Gardeners' and Florists' Price List

Prize Winning Vegetable Seeds and Choice Florists' Flower Seeds, Seeds of Annuals, Perennials, Climbers and Greenhouse Plants truthfully and fully described with valuable information for Gardeners and Florists

THIS BOOK IS MORE THAN JUST A SEED CATALOGUE

PANSY AMERICA

Enormous in Size

Brilliant and Unusual New Colors

Trumps—all trumps which are never beat. The most gorgeous and largest blooms in all the colors of the rainbow with color variations that the average pansy grower has never seen. Absolutely in a class by themselves.

For years we strived, we worked hard and finally succeeded after a heavy outlay of money and long years of patient waiting. Now we are able to offer you seed, producing plants with blooms immense in size and of the richest colors imaginable, that simply dazzle the onlooker and that you will sell at almost double the price common pansies sell for and sell them as fast as you reach the market even at times when other pansies go begging. Our American Pansy mixture is so superior and so absolutely unbeatable that we are making you the following unheard of offer.

WE WILL GIVE YOU SEED FREE MONEY BACK IF NOT FULLY SATISFIED

If you should be disappointed or not fully satisfied with this nature's most wonderful gift to mankind, we ask but one favor. Drop us a postal card and tell us that the seed did not come up to your expectations and we will immediately mail you a check in full for your entire purchase of American Pansy seed. We will also do this: Upon request we will send you a trade packet of this pansy seed containing 450 to 500 seeds worth 40 cents. You plant the seed first for a trial and if you will find that the seed does produce blooms VERY MUCH SUPERIOR to what you used to raise you send us the 40 cents—otherwise you need not send a cent. T. pkt. 40c; 1/8 oz. \$1.50; 1 oz. \$10.00; 1/4 lb. \$37.50; 1 lb. \$150.00.

QUALITY SEEDS

At prices quoted, we prepay all seeds to any point in United States, Canada, South America or West Indies, except Beans, Corn, Peas, Spinach and where noted. Terms cash, no discount. No charge for bags or packing. Orders to be sent C. O. D. should be accompanied by one-fourth cash.

To Our Customers in Foreign Lands

Please remit in United States Funds. Foreign money fluctuates in value; sending U. S. money is an advantage to both parties.

Condition of Sale

All offers are made subject to being unsold upon receipt of order.

In common with seed growers and dealers the world over, we give no warranty, express or implied as to the description, quality, productiveness or any other matter of any seeds, plants or bulbs we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they can be returned at once and no sale has been made.

WHO WE ARE—WHAT WE DO

We are seed growers and cater to the most critical trade there is, namely, to market gardeners, truckers, canners and florists. We supply to this critical trade seeds of the highest quality.

We never send out second grade seeds as some may think when comparing our prices with those of others. The best is none too good when it comes to seeds—we know it—and act accordingly.

Using our seeds means to be on the safe side. Our seeds are reliable and favorably known since 1905—in other words, for thirty years.

SAVE MONEY — SAVE WORRY

Address your orders to:

Giorgi-Seeds, Council Bluffs, Ia.

The foremost vegetable and flower growers, amongst them the biggest establishments of national repute, depend for their seed supply on us. Let us get acquainted—a trial order will do this and whether large or small, will be highly appreciated by us, promptly filled and we hope will lead to mutually profitable and increased dealings. **Place your orders early.** Seeds are not like bricks. Bricks can be had at any time, in any quantity, the supply of clay is unlimited. Not so with seeds. Every year certain seeds are in short supply owing to poor crops. Shortages show as the season advances, order early while the supply is good.

NEW ONION PROSPERITY

A green or bunching variety.

Ready six weeks before Onions raised from sets.

Prosperity Onion will make more money for the gardener than any other crop. It can be marketed long before onions from spring planted sets are ready and thereafter throughout the whole season even in the hottest of weather up to the time when the ground freezes up solidly.

Prosperity Onion forms no bulbs, it is a bunching onion like the Welsh or Egyptian Winter but very much better. The stalks of Prosperity are extra heavy, $\frac{1}{2}$ to $\frac{3}{4}$ inches through, absolutely white for a length of 4 to 6 inches, tender, mild and sweet, fully equal in quality to onions raised from sets, of better appearance and easier to get ready for tying, no skin to peel, all that is needed is to wash the stalks and tie.

It is ready for the market long before rhubarb and asparagus, making an income for the gardener at a time when there is absolutely nothing in the garden that could be turned into money. The grower will have the market to himself and naturally will get paid well. Another time Prosperity Onion will pay exceedingly well is during summer, or whenever there will be demand for green onions and the market bare of it. It is a crop that can be marketed at any time of the year, even after hard frosts, if pulled, stored in cellars and heeled in dirt. In a word there is no crop that will bring as much money to the grower as Prosperity Onion.

Prosperity Onion is raised from seed. You plant it only once and for years thereafter all you will do is to pull, leaving a stalk stand in the row 5 inches apart and this stalk by stooling soon will furnish another crop. Thus a bed of Prosperity Onions becomes a permanent crop, yielding from year to year, every day in the year excepting the dead of winter when the ground is frozen and covered with snow. Prosperity Onion is absolutely hardy, needs no covering of any kind, no protection whatever, it never winterkills.

Besides making money from the sales, you will make money by saving the cost of onion sets and the cost of planting them. With a patch of Prosperity Onion in your garden it will be immaterial to you whether onion sets sell at \$3.00 per bu. or \$10.00 per bu., you have freed yourself from that expense forever and for good. Your only expense will be for seed to give you a start. The first year there will be the expense of pulling the weeds. You can easily, the first year, rid the patch of all weeds and that expense is done with. Your patch will become a sort of a mine. You will thin out the patch and the remaining plants by stooling will in 60 days provide another crop. The rate at which stools are made is from 3 to 8 to each plant. We grow Prosperity Onion in our own fields and write from experience. In our opinion, the plantation of Prosperity Onion is the most valuable crop we have and ever had and we have not the slightest doubt that if you will start a patch of Prosperity Onion in your garden, that you will be of the same opinion, too. Price Pkt. 10c; oz. 50c; 1 lb. \$5.00.

Onion Prosperity

The News for 1935

The important news to vegetable growers is the fact that seeds of Sweet Corn, Cucumbers and Onions are in short supply. Lack of moisture and exceedingly high temperatures were the causes of short crops and in many cases of absolute crop failures. Because the supply of many items in the above named vegetables is an uncertain problem we are not quoting such seeds in larger lots. We assure you that if you will write for prices we will do our very best to supply RELIABLE stocks at the lowest prices possible.

As to the supply of flower seeds there are ample stocks with very few exceptions.

Our catalog contains everything new and worthwhile in vegetables and flowers, that we were able to unearth.

We have added 10 new items in vegetables and 191 new items in flowers.

We are doing our best to render service, we do not spare effort to locate the new and supreme. Offers from seed growers, seed specialists, florists, market gardeners, located in all parts of the world reach us, are carefully studied and considered by us, whenever anything new of promise is offered we try it, whether it comes from California or from Patagonia. If found worthy we offer it and praise it as it may deserve.

That means that we are doing our duty as seedmen. We are doing everything that can be done in order to DESERVE your patronage.

CABBAGE EARLY MARVEL

If you grow early cabbage for market you will make some extra profit by growing Early Marvel. Positively the earliest cabbage, with large heads, in existence. The heads are ball shaped, slightly elongated, very hard, very white inside, of fine quality, weighing 5 to 8 lbs. per head. The crop comes almost all at once, and every plant that you will set out will make a head. Early Marvel can be marketed long before fully developed. If left standing in the field when fully developed, will not burst for several weeks. Heads very hard, leaves have small midribs, eating quality very high. Pkt. 15c; oz. 60c.

BEAN GIANT ENGLISH

**IMMENSELY PRODUCTIVE—HARDY LIKE PEAS
PODS AND BEANS OF GIGANTIC SIZE**

Here is an opportunity for progressive gardeners. A bean closely resembling largest podded limas, ready weeks ahead of limas. A standard bean in England, different from other beans in being as hardy as peas or lettuce and like peas should be planted as soon as the ground is in workable condition in the spring. The pods grow direct from the stalk, the stalk grows about 3 feet tall, the pods are gigantic in size, so are the beans, and there is no bean more delicious. You will sell these beans if you will have them. They are nothing new to most foreign people who buy English Beans eagerly. Plant in rows 18 inches apart, six inches apart in the rows, one bean to a hill. Pkt. 10c; 1 lb. 40c, prepaid. F. O. B., 10 lbs. \$2.00; 25 lbs. or over at 17c per lb.

BEAN GREEN PERFECTION

Possesses the same high quality as our Admiral Wax Bean and is every bit as valuable. Very heavily productive, same fine, straight, meaty long stringless pods that are almost perfectly round and of the finest flavor. Fully as early as Admiral Wax, that is, it is the earliest high class green podded bean there is. The plants produce an extra heavy crop of pods and if kept picked clean will produce over a long period of time. Green Perfection is a variety that can hardly be improved upon. You will agree with us if you will try it. The seed is white, another advantage. Supply limited. Pkt. 10c.

BEAN TENDERGREEN

Possesses high eating qualities and is marvelously productive. The plants are strong and vigorous, well branched, holding the heavy load of pods well up from the ground. The pods are seven inches long, absolutely straight, round, extremely meaty and tender, of beautiful attractive light green color. The pods are stringless even when fully developed. Tendergreen is of the greatest value both for market gardeners as well as for canning. Those that tried this bean praise it highly. Quite early, although not in the earliest class. Pkt. 10c; lb. 30c, postpaid. Not prepaid: 10 lbs. \$1.80.

Beet Iowa
A High Class Beet

NEW BEET IOWA

VERY EARLY—HEAVILY PRODUCTIVE

Extra early, superior in shape and color, with the extra advantage that its foliage is light, yet ample, to make it easy to tie.

Globe-shaped, smooth and much darker in color than most globe-shaped beets, both in and out. Medium in size, never cracks open and never grows to immense proportions like other beets. The flesh is rich, deep, brilliant, scarlet-red without light zones, sweet and tender. Every plant of Iowa makes a shapely and salable root, even if the plantation is left unthinned and the plants allowed to crowd one another. Iowa is an all purpose beet, but especially valuable for growing on a large scale for canneries or the wholesale trade. Pkt. 5c; oz. 10c; ¼ lb. 23c; 1 lb. 90c; 10 lbs. \$7.50.

An Ohio customer writes: Iowa beet beats any variety I ever planted.

LONG SMOOTH DARK RED BEET

A long beet is popular in some markets and if you wish to get something extra good in a long beet we have it. The roots of our strain are shaped like a carrot, averaging 9 inches in length and 3 inches through at shoulder, and 1½ inches through near the end of the root. Symmetrical, smooth, uniformly deepest blood red in and out, fine flavored, and sweet. Foliage dark bronze and not too heavy. Pkt. 5c; oz. 10c; ¼ lbs. 20c; 1 lb. 80c; 10 lbs. \$6.00.

CUCUMBER LINDEN'S MARVEL

An extremely handsome new variety a strain of white spine, the fruit averaging 10 in. in length, smooth straight of well balanced shape, the ends not pointed of very dark green color. Strong grower, blight resisting immensely productive and quite early. As long as Linden's Marvel is on the market the buyers are leaving other cucumbers alone. This is because Linden's Marvel is highly attractive in appearance and of the size everybody is favoring. When this cucumber made its first appearance on the Omaha market many of our customers inquired about the supply of seed. They are very much interested and expect to grow Linden's Marvel if the seed will be procurable. We have the seed but only a limited quantity. Pkt. 10c; oz. 25c; ¼ lb. 50c.

CHOP SUEY GREENS

A new vegetable from the Orient, used in the preparation of the famous dish, Chop Suey, or can be used like any other greens. Of distinct flavor not found in any other vegetable, truly Oriental and impossible to describe. Those that tried it, prepared like spinach, proclaimed it a superb dish. Of upright growth with leaves cut like those of a fancy fern. Ready to use when about a foot high, to which height it grows in 30 days from date of sowing. Sow early in the spring in rows foot apart. Pkt. 10c; oz. 30c.

Cauliflower Early King

CAULIFLOWER EARLY KING

THE EARLIEST CAULIFLOWER IN THE WORLD

Larger, much deeper through and more solid than Snowball or any other early cauliflower. Of most attractive appearance, snow-white and fully

TWO WEEKS EARLIER

than Early ERFURT which up to the arrival of Early King was considered one of the earliest to mature. It heads up evenly, the whole crop can be cut and marketed in two weeks. Produces a larger percentage of perfect heads than other varieties even on rather poor soil and under adverse conditions. Practically disease free. The head of Early King is exceptionally high with the curd standing out in relief like a ball. The inner leaves of Early King curl in at the top, closely enveloping the head and excluding rain water and any possible harm by unfavorable weather. The head is thus perfectly protected until it reaches a size of five inches across at which stage it is time to start tying. Few days after, the heads are of marketable size. If left standing the head will soon attain a size of ten inches across. The outside leaves are very dark green with stout ribs and slightly shorter than those of most other varieties, yet ample to give the heads full protection. Early King will surely make money for you. Pkt. 20c; $\frac{1}{8}$ oz. 40c; oz. \$2.20; $\frac{1}{4}$ lb. \$7.00; lb. \$28.00.

CARROT GOLD COIN

THE SWEETEST—THE EARLIEST THE BEST FOR WINNING MONEY

Our new Gold Coin carrot, is fully developed and ready for the market 75 days after date of sowing. The roots are $6\frac{1}{2}$ to 7 inches long, almost an inch through, stump rooted, perfectly cylindrical, smooth and straight. Very uniform, there is not an "off" root in a bushel. Other good early carrots are not more than half developed at a time, when Gold Coin is ready to sell. Gold Coin can be marketed early and late. Can be left in the ground till late fall and if stored will keep perfectly.

Of highest quality, very sweet, of a most pleasant, scented flavor, richly colored, orange-red. An ideal carrot from every viewpoint. Pkt. 10c; oz. 15c; lb. \$1.40, prepaid.

SWEET CORN EARLY COLUMBIA

An extra early white corn of very high quality. Stalks 6 ft. tall, frequently bearing two fine ears, 8 inches long, filled with plump sweet kernels to the very tip end. Twelve rowed. The ears are made more attractive in appearance by the presence of green streamers. Highly popular with market gardeners in the East, where it originated, and regarded as the best paying early white sort. Pkt. 10c; lb. 40c, postpaid. Not prepaid: 5 lbs. \$1.30.

CELERY—FLORIDA GOLDEN

Of the Golden Plume type and season, but a very great improvement over that variety. Possesses greater height and weight of plant and the edible part of the stem is larger. In Florida this celery has a height of 22 to 24 inches and the length of the edible stems is in Florida 8 to 9 inches. The foliage of Florida Golden is slightly darker green than Golden Plume, the stems are broad, thick, solid, the plants full hearted and very compact, blanching to a rich cream color. We recommend a trial of this new celery to growers everywhere. Pkt. 10c; oz. 60c; lb. \$5.00.

CABBAGE TRIUMPH

New. An extra early, pointed white cabbage. Of ALL cabbages the tenderest and finest flavored. Those that tried this cabbage say it is more tender and more delicate in taste than cauliflower. If you are after quality try Triumph. Pkt. 10c; oz. 60c.

SWEET CORN TENDERGOLD

Resistant to bacterial wilt (Stewart's disease). Will stand unaffected on diseased ground with diseased corn fields all around. Of the many wilt resistant hybrids developed by the various Agricultural Stations Tendergold is regarded as the best.

Ears 12-rowed, 8 inches long, Golden Bantam type, but twice as productive. It is claimed that this new hybrid corn commands a premium on the market because in tenderness and succulence it has no rival and because it holds its fine quality two to three days longer than other corns. Compares favorably with the Evergreens in canning cost. Market gardeners report customers insisting on this corn after one trial. Try it. Pkt. 10c; lb. 40c, prepaid. Not prepaid: 5 lbs. \$1.50.

FINE HEAVY ENDIVE

Is Italian Red Rib variety. We supply quantities of seed to many large growers. The fact that their orders come to us year after year, proves that Red Rib is a paying variety to grow.

CABBAGE SHORT STEM HOLLANDER**Special Strain**

Grow it for trial to find it the best strain. What makes our strain of such high value? The fact that it forms extremely tight heads with practically no hollow spaces, that it is perfectly globe shaped and of perfect size, namely of medium size. This is an important item, making it desirable for shipping to centers of population where cabbage is sold by weight. Heads of cabbage larger than is needed for immediate use are not desired because that means waste. The city people are careful spenders and buy what looks to them as most for the money.

Our Hollander keeps for months in storage. Other cabbages do the same. But here is the difference. Our Hollander will come out of storage in better shape than other cabbages because it has several layers of dark green outside leaves. You remove one, you remove another layer of the outside leaves and you still have a head of cabbage as fresh looking as if it was cut recently, when, in fact, it was laying in storage for several months.

To a purchaser shut up in a big city a cabbage head enveloped in fresh looking green leaves looks mighty good and prompts him to buy. That's what counts. There are several strains of Hollander. Because a slight difference in a strain makes a big difference in returns it will pay you to find the strain that pays best. We are pretty sure that ours is the best. Pkt. 10c; oz. 30c; lb. \$2.60, prepaid.

CELERY TRADE BUILDER**TENDER—BRITTLE—STRINGLESS**

Plant quite dwarf and stocky, heart large and full, creamy yellow. Stalks broad, thick and meaty, crisp, very tender and so brittle that it will not stand distant shipping. It stands alone in quality, which is wonderful in the full meaning of the word. This is a celery that will appeal to the fancy class of buyers and will fetch fancy prices. It will advertise you as a skillful gardener and producer of a perfect product. Grow Trade Builder for your local market. You will sell it easily with a pleasing profit at any time. Almost as early as Golden Self Blanching, a wonderful keeper and high class as a winter sort. Pkt. 10c; ¼ oz. 12c; oz. 45c; ¼ lb. \$1.00; 1 lb. \$4.00.

MUSKMELON GOLDEN QUEEN

Originated with one of the melon growers in our locality. This grower made quite a bit of money selling his melons when the times were not as tough as they are at present at 50c per melon never for less and many a melon went for 75c and as high as a dollar a piece for the biggest ones. In spite of his being there when it comes to charging, his customers were on the lookout for his melons. Golden Queen is a large melon of high quality averaging 15 pounds per fruit, heavily ribbed and heavily netted, outsells any other melon on the market and is ready for the market three days ahead of Hale's Best. This may sound like a fairy tale yet these are the facts. Not suitable for shipping. Pkt. 10c; oz. 25c; lb. \$2.00.

NEW SPINACH BIG CROP**Long Standing—Disease Resistant—Enormous in Size**

Big Crop Spinach produces almost twice as big a crop as the next best variety. Very early, very hardy and stands two weeks longer than Bloomsdale before shooting to seed. The leaves are borne on long, stout stalks, well above the ground, staying clean and free of dirt. They are thick, very large, rounded at the edges, twice as long as they are broad, moderately crumpled. Color bright green. Blight and wilt resistant. Of all so-called smooth leaved varieties such as Viroflay, Thick Leaf, Flanders, etc., Big Crop Spinach is the best and unbeatable for canning purposes and for a tremendous crop. Oz. 5c; ½ lb. 20c; lb. 40c, prepaid. Not prepaid: In lots of 10 lbs. or over, at 20c per lb.

BLIGHT RESISTANT SPINACH

Virginia Savoy Blight Resistant, introduced by the Va. Truck Experiment Station at Norfolk, Va. of Bloomsdale type, heavily crumpled with massive thick leaves. Highly blight resistant. Oz. 5c; lb. 40c, prepaid. Not prepaid: 10 lbs. \$2.40; 100 lbs. \$22.00.

**CUCUMBER TRIUMPH****Extra Early—Extra Good**

Unlike any variety so far offered. A cucumber the growers were looking for, for a long time. That means a cucumber that is early, fairly long of good appearance and a reliable crop producer.

Triumph is such a cucumber. An ideal cucumber as you will find out if you will try it.

A robust growing new white spine variety producing heavy crops of very slender, very symmetrical and highly attractive, intensely dark green fruits 10 to 11 inches long. Besides being heavily productive, an item of great importance, Triumph is as early as the famous Early Fortune. The fruits contain very few seeds, the flesh is tender, crisp white and the best quality. Very uniform, hardly any culls. Unbeatable for slicing and the KING of all cucumbers for shipping. Pkt. 15c; ½ oz. 35c.

MUSKMELON SUNKIST

A round Rockyford type melon, yellow on the outside with fairly coarse netting and no ribs. Flesh golden-pink solid and VERY thick. Its greatest value is its ability to stand shipping and trucking ANY distance when thoroughly vine-ripened. Will stay in prime condition 5-6 days, in fact improves in quality after being picked. It has an extremely strong rind and it is the heaviest melon for its size. A melon that does not turn soft.

Sunkist is an extra heavy producer, the vines are uncommonly thrifty and possess much more foliage than other melons. In picking you will not see the melons unless you stand right above the patch—the heavy foliage hides the melons. When the vines of other melons are beginning to "play out" the vines of Sunkist are as green and fresh as can be. When the melon is cut open no juice runs out of it. The seed cavity is exceptionally small, the amount of seed accordingly very small.

Sunkist is very sweet and very FRAGRANT and it never gets soft at the ends even when the melons are handled roughly, they stay firm and solid. When you market any kind of melon the buyers feel the melons at the ends looking for soft spots. No buyer will find any soft spots on Sunkist melons, your melons will sell and there will be many calls for more. In season of ripening Sunkist follows Hale's Best. When Hale's Best is about one-third gone Sunkist is ready for picking.

Although Sunkist is a very new melon it is sold under several names like Silver Bell, etc., and is best known under the trade name of Weaver's Special. Pkt. 10c; oz. 30c; lb. \$2.20.

WORTH KNOWING Down South where the best watermelons are grown, wide awake growers leave only two melons to grow on each vine. (New method.) There were two neighbors, both grew melons, one followed the new method and the other did not. Both were members of a melon growers association. The man with two melons to the vine sold six cars of melons, the smallest of which weighed 28 lbs. For his crop he received \$2,440.00. The other man left all his melons on the vines, had smaller melons and the association could only sell four cars for him. His biggest melons weighed 27 lbs. and the others ranged down to 12 lbs. These melons netted the grower only \$660.00. The difference in favor of the man who believes in up-to-date methods was \$1,780.00, enough to buy a fine automobile.

CAULIFLOWER EARLY KING

Surpasses all other cauliflowers in earliness and in uniformity of growth. Its absolute freedom from "ricing" makes it an ideal sort for growing on a large scale. It is a cauliflower that is almost 100% perfect, free from culls, the most profitable variety for an early crop, for shipping as well as for an outside crop in the fall. Fully described on page 2. Pkt. 20c; $\frac{1}{8}$ oz. 40c; $\frac{1}{4}$ oz. 55c; oz. \$2.20; lb. \$28.00.

MUSKMELON HONEYMEL

New. Of the Honeydew type but way better in quality, more like a true muskmelon because very sweet and highly flavored. Unlike the Honeydew it is a netted melon, slightly ribbed. Rind pearl-gray, flesh green. Two weeks earlier than Honeydew. Selis on the markets for almost double prices. Pkt. 10c; oz. 30c; lb. \$2.20.

NEW PEAS WELCOME

If you are growing peas for the market, you certainly would find growing peas, way more interesting than it is if you had peas to sell ten days ahead of the usual type.

You can have such peas. This pea is our Welcome.

Welcome is a short pea, vines about two feet high, loaded with handsome, well-filled, sea-green pods. If by growing Welcome you will not make good money, you will not by growing any other pea. If you will not try Welcome, growing for the market, you will lose. Pkt. 10c; lb. 40c, prepaid. Not prepaid: 5 lbs. \$1.10; 10 lbs. \$2.20; 100 lbs. \$21.00.

SENSATIONS—THRILLS—MORE SENSATIONS—SOMETHING NEW, NEVER BEFORE SEEN

is what the public wants and willing to pay those that have the goods.

The grower that has good new flowers, does not complain of poor business. He placed himself beyond competition. Being the only one in his territory, having new and superior plants and flowers, he is kept busy and often could sell more of the new if he had a supply.

The progressive grower also gains in another way. His customers advertise him, they talk about the beautiful new flowers he sold them which means: more customers, more business.

GREEK AND LATIN—in seed catalogs is used because world wide connections, seedmen buying and selling seeds in all parts of the world. No matter of what nationality the seed seller or the seed buyer may be, he understands these Latin and Greek names. A Japanese seed dealer for instance, would hardly understand the meaning of the word "columbine" but he knows and so does the Russian, German, etc., what "aquilegia" means. The Greek and Latin becomes the standard language that enables the seedmen, also the botanists, to understand each other. Without this, international trading amongst seedmen would be almost impossible. Some words listed below end with an "a," "s," or "m." Alba, albus, album. But it always means the same; namely "white."

Terms not included in the list below are terms of which the meaning is unknown, therefore cannot be translated.

arvensis—common in fields
 acaulis—stemless
 affinis—related
 album—white
 alpinum—from high mountains
 alternifolius—opposite-leaved
 amellus—home on the hillside
 anethoides—dill-like
 angustifolia—narrow-leaved
 argentea—silvery
 arenaria—sand loving
 auricula—ear-shaped
 auratum—golden
 aurantiacus—orange-yellow
 arborescens—tree-like
 atrococcineus—dark scarlet
 autumnalis—fall blooming
 azurea—sky blue
 biennis—biennial
 barbatus—bearded

caespitosa—tuft forming
 coronaria—for use in wreaths
 cordifolius—leaves heart shaped
 columbaria—colombo-pigeon.

Pigeons it was believed liked the seed.

cyanus—blue
 coerula—dark blue
 coelestis—almost divine
 cruentus—bloody
 cephalotes—head-shaped
 capitata—like a head
 caudatus—tail-like
 corollata—garlanded
 coccineum—scarlet
 callilepis—charming
 calycanthema—two calyxed
 candidissima—whitest
 caesius—steel blue
 chalcidonicum—scarlet
 digitata—fingered
 dioica—dual
 dealbata—whitish
 deltoides—shaped like a D
 dissitiflora—profusely blooming
 damascena—from Damascus

elator—tall
 elegans—ornamental
 eximium—outstanding
 excelsior—stately

falcatus—sickle-shaped
 fimbriata—fringed
 floribunda—floriferous
 fragilis—fragile
 frutescens—shrubby
 flexuosus—twisted
 flore pleno—double flowered
 flammula—flaming red

grandiflora—large flowered
 grandis—great
 gracilis—slender
 glaucum—grayish
 gymnocarpa—smooth seeded
 glomerata—bunched
 globosa—globular

humilis—low, humble
 hispida—shaggy
 hybridum—mongrel
 heterophylla—diverse leaved

incana—grayish
 indivisa—indivisible
 insignis—remarkable
 lusitanicus—from Portugal
 luminosa—luminous
 latisquama—broad-scaled
 latifolia—broad leaved

lutea—yellow
 longifolia—long leaved
 lignosa—woody, shrubby
 laevis—smooth
 lanceolata—lance shaped
 lucidus—shining

monstrosa—unusual
 muricata—soft spined
 maxima—largest
 major—large, great
 macrophylla—large leaved
 maritimus—from the coast
 magnifica—great
 multiflora—many flowered
 maculata—spotted
 muricata—soft stemmed

montana—home on the hillsides
 minimum—smallest
 microphylla—small leaved
 mirabilis—admirable
 margaritacea—pearl-like
 moschata—musk scented
 malacoides—bad shaped

nana—dwarf
 napellus—root beet-shaped
 nebulosa—cloud-like
 noctiflora—night blooming
 nigrescens—blackish
 nivalis—snowy
 nudicaulus—smooth-stalked
 nobilis—comely
 neglectus—overlooked
 nemorosa—home in rocky soil

ovatus—egg shaped
 oblongata—oblong
 orientale—oriental
 officinalis—medicinal
 occidentalis—western, European

ptarmica—sneeze causing
 podaryifolia—dense leaved
 paniculata—irregularly branched
 persicifolia—peach leaved
 picta—picturesque
 pycnostachya—long spiked
 pudica—bashful

procumbens—trailing
 pennata—feather-like
 pulcherrima—very beautiful
 pulchellus—charming
 pungens—sharp, pungent
 plumarius—teaseled, feather-like
 pseudo—misleading
 pompon—beautiful

praecox—early
 palustris—from swamps
 pumillum—little
 pyramidalis—pyramid like
 patulus—outstretched
 patens—open
 polyphyllus—many leaved

rupestris—gravel loving
 rotundifolium—round leaved
 recta—upright
 rostratum—beak possessing
 retusus—pressed in, bent
 ritro—circular
 repens—creeping
 ramosum—many branched
 rubrum—red
 rosea—rose pink
 rugosa—wrinkled

suaveolens—fragrant
 saxatile—home in the woodland
 stolonifera—spreading—stooling
 speciosa—gorgeous
 sylvestris—from woods
 sanguinea—blood red
 spica—spike
 scariosa—rare

semperflorens—everblooming
 sempervirens—evergreen
 sempervivum—ever alive
 sinuata—teaseled
 serrata—prostrate
 scandens—climbing
 superbus—magnificent
 simplex—single
 stricta—stout, tough
 saxatile—indigenous to rocks
 setosa—bristly

tomentosa—velvety
 tenuifolium—slender-leaved
 trichophylla—hair leaved
 tinctorius—dye producing
 tomentosa—velvety

uliginosum—dampness loving
 uvaria—bunched
 veris—spring flowering
 versicolor—changing color
 virgatum—switch-like
 vulgaris—common
 vaccaria—found in pastures
 venosa—veined
 variabilis—changeable
 villosum—hairy
 vera—true, genuine
 vernalis—youthful
 verticillatus—square stemmed
 viridis—green

Antirrhinum Rustproof

The seed we offer has been proved to be 75% rustproof. We offer a superior mixture containing a higher percentage of the more desirable light colors than will be found in other mixtures now on the market, namely canary yellow, rose pink, salmon pink, white with a dash of red and orange shades. **DE LUXE MIXTURE.** T. pkt. 50c; 1/16 oz. \$1.00.

AGERATUM GIANT OF IOWA

This new Ageratum produces in greatest abundance extra large clear blue flower-heads from June to frost therefore of greatest importance to All to whom flowers mean anything. If you will try this Ageratum you will benefit yourself and will thank us for recommending it to you. Height 30 to 36 inches. T. pkt. 20c; 1/8 oz. 40c; oz. \$2.40.

ARDISIA CRENULATA

A classy decorative plant far from common, bringing high prices at Christmas time. It's main attraction is the berry like coral-red fruit, but the beautifully shaped leaves, the general appearance of the whole plant, the fact that every part of it is fragrant, makes Ardisia an outstanding plant the whole year round. You will make no mistake if you will try Ardisia.

Start the seed in heat in the spring (the seed germinates in 6-8 weeks) then grow cool (45-50 deg.) in rich soil mixed with sharp sand to insure perfect drainage. The following spring your plants will bloom and will be a model of beauty at Christmas time. Half hardy perennial. Height 2-3 ft. Seed in berries. 25 for 25c; 50 for 45c; 100 for 85c; 1000 for \$5.00.

ASPARAGUS FILICINUS

Perfectly hardy perennial, producing quantities of fern-like foliage closely resembling the foliage of Asparagus Plumosus on stems 6-7 feet high, invaluable for florists work. Seed scarce. Only 5 seeds to a customer. **PRICE**—5 seeds 60c.

ASPARAGUS PLUMOSUS MARKET KING

A new variety of climbing Asparagus, extremely vigorous in growth, producing in abundance elegant sprays of fine fern-like foliage. The sooner you will try this new Asparagus the better for you. It is high class and very much worth while. T. pkt. 30c; 100 seeds 80c; 500 seeds \$3.50.

ASPARAGUS SPRENGHERI DEFLEXUS

Of extraordinary value and THE asparagus of the future to be grown and used the same as Sprengheri. The high value of Deflexus lays in the fact that its leaves are wide, very substantial possessing metallic lustre, lending a charm to every floral piece not obtainable when other "greens" are used. 25 seeds 45c; 100 seeds \$1.60; 1,000 seeds \$13.00.

ASPARAGUS ACUTIFOLIUS—A hardy perennial of climbing habit of robust growth furnishing the grower during summer when grown outdoors quantities of very fine material indispensable in flower work. Height 5 ft. T. pkt. 10c; oz. 45c.

BABY'S BREATH ASTER

An absolutely hardy perennial of neat compact habit that every grower will find indispensable if he is in the flower business. The plants only about 20 inches tall are a sea of pure white flowers one half inch across from August to almost frost. The plants begin to bloom just when Gypsophylla is done blooming, the bloom is just as valuable as Gypsophylla. This is the plant's greatest value. It also must be classed high as a hardy perennial rock plant. T. pkt. 20c; 1/16 oz. 30c.

GAILLARDIA BEAUTIFUL STAR

New hybrids in the annual class. Flowers very large and double, two inches across or over, in attractive shades of copper red, pompeian red, blue, scarlet, yellow, etc., and many flowers edged with gold at the tips of florets. Of high value for cutting, the stems being long and rigid and the flowers lasting a long time when cut in or OUT of water. In bloom from May to November. The flowers are ball-shaped, double and resemble a star and fine for any kind of flower work. Easily raised, doing well in almost any kind of soil, defying hot and dry weather, never failing to produce masses of exceptionally beautiful flowers. A flower that is not possible to overpraise, yet almost unknown. Grow this Gaillardia, you will have an unlimited supply of blooms from May to frost. Height 2 ft. T. pkt. 10c; oz. 60c; lb. \$6.00.

New Giant Snapdragons—Antirrhinum

The new Snapdragons offered below are very superior varieties, the seed thoroughly dependable, strictly true to name and type, produced by ourselves or by growers that we know are thoroughly dependable. Better seed than what we send out does not exist. Height for all listed below—18-24 inches.

AFTERGLOW—Color golden orange, the best golden bronze type. T. pkt. 40c; 1/16 oz. 65c; 1/8 oz. \$1.20.

CHEVIOT MAID—Bright, clear rosy-pink flowers of perfect form, fine stems and VERY early. Exceptionally good and valuable for winter blooming. T. pkt. 40c; 1/8 oz. 80c; oz. \$6.00.

CHEVIOT MAID SUPREME—Darker than Cheviot Maid, longer better stems. T. pkt. 40c; 1/16 oz. 65c; 1/8 oz. \$1.20.

CHERRY-RIPE—Rich, terra cotta red, deeply suffused, with cerise a bold outstanding color. T. pkt. 40c; 1/8 oz. 80c; oz. \$6.00.

CEYLON COURT—A leader in yellow, early and long stemmed. T. pkt. 40c; 1/8 oz. 80c; oz. \$6.00.

GENEVA PINK—One of the best. Rich rose-pink. T. pkt. 40c; 1/8 oz. 80c; oz. \$6.00.

GOLDEN PINK QUEEN—Golden pink flowers, medium early. T. pkt. 40c; 1/8 oz. 80c; oz. \$6.00. Not a good forcer.

HELEN—Beautiful bright salmon-pink, flowers large. Early. T. pkt. 40c; 1/8 oz. 80c; oz. \$6.00.

JENNIE SCHNEIDER—An early, large flowering, and attractive salmon-rose pink, perfect in color, stem and shape of flower. T. pkt. 40c; 1/8 oz. 80c; oz. \$6.00.

KEYSTONE—Large flowers, glowing dark scarlet. Fine, well formed spikes. T. pkt. 40c; 1/8 oz. 80c; oz. \$6.00.

LAURA—Lively, deep, glossy rose-pink, very floriferous and early. T. pkt. 40c; 1/8 oz. 80c; oz. \$6.00.

MAUVE BEAUTY—Soft rosy mauve of an unusual appeal. T. pkt. 20c; 1/8 oz. 35c; oz. \$2.00.

MONTANA WHITE—Immense flowers, glistening pure white. Vigorous grower. T. pkt. 40c.

ORLANDO—Rich bronze flowers, magnificent long stems. Very outstanding. T. pkt. 40c; 1/8 oz. 80c; oz. \$6.00.

PENN-ORANGE—Vivid rich orange, quite early flowers poorly placed. T. pkt. 40c; 1/8 oz. 80c; oz. \$6.00.

PHILADELPHIA PINK—Large flowered, pure pink. T. pkt. 10c; 1/8 oz. 15c; oz. \$1.00.

PRIMROSE MONARCH—Clear primrose yellow, deeper center. T. pkt. 25c.

ROCK'S WHITE—Flowers of immense size pure white. T. pkt. 25c; 1/8 oz. 50c; oz. \$3.00.

ROMAN GOLD—High class commercial variety, unusual in color, pink, copper and golden yellow blended together and simply charming. Very early. T. pkt. 40c; 1/8 oz. 80c; oz. \$6.00.

ROSE QUEEN WITTERSTAETTER—The richest dark rose shade. T. pkt. 40c; 1/16 oz. 65c; 1/8 oz. \$1.20.

SUN TAN—Half dwarf winter-blooming bronze type, producing perfect flowers even in the dark days. Color a blend of deep pink, copper and yellow. T. pkt. 40c; 1/8 oz. 80c; oz. \$6.00.

ANTIRRHINUM GOLIATH MIXED—Includes all the above semi-dwarf varieties in proper proportion. T. pkt. 20c; 1/8 oz. 35c; oz. \$3.00.

TALL GIANT SNAPDRAGON—(Maximum)

These giant flowered Snapdragons are every bit as beautiful and grand as gladioli and the fact that they are in full bloom long before gladioli, when grown outdoors, makes them so much more valuable and welcome.

They represent a marked advance over the older Tall Large Flowered type in size and brilliancy of colors. The spikes are 3 to 4 feet tall with flowers well placed. Excellent for outdoor culture. If you sell plants to the public it will pay you to have a supply of these Giant Flowered varieties. There is a steady call for the plants of the Tall Snapdragons.

CANARY BIRD—Canary yellow, golden yellow center. Massive, well formed spikes.

COPPER KING—Velvety copper scarlet of giant size.

DEFIANCE—Fine, long spikes of fiery red bloom a suffusion of brilliant orange and a glow of rich scarlet. High class either by day or under artificial light.

FASCINATION—A delightful combination of rose pink and yellow blending into a warm, soft rose shade. Very free bloomer.

GIANT ROSE—Goliath type flowers of maximum size, color exceedingly rich, deep, rose pink. Tall.

INDIAN SUMMER—Beautiful and most unusual color, very rich, deep velvety copper. Flowers of the largest size, closely placed on the stem. Highly priced as a cut flower.

ORCHID—Color an exquisite shade of mauve pink. Never fails to attract favorable attention. A wonderful flower.

PINK GLORY—Apple blossom pink, yellow lip. A delicate and pleasing color.

PURPLE KING—Velvety dark purple.

SALMON ROSE—Of a beautiful shade of salmon pink. A new color.

SNOWFLAKE—Pure white, yellow tube a profuse bloomer.

VENUS—White with a rosy tint, a delicate and appealing shade, flowers well placed and frilled.

Price: Any of the above, T. pkt. 15c; 1/8 oz. 25c; oz. \$1.60.

NEW GIANT SNAPDRAGONS MIXED—Includes all the above TALL growing large flowered varieties. T. pkt. 15c; 1/8 oz. 25c; oz. \$1.60.

Giant Snapdragon

SNAPDRAGON UNRIVALED

Superior to any existing variety, surpassing in size of bloom and size of spikes any known variety. Way superior to the Maximum type which up to now was considered the acme of perfection. The color of Unrivalled is a combination of salmon-pink, primrose yellow with a touch of orange. Unrivalled is an exquisite flower, indescribably beautiful, sure to create a sensation in any flower market. Height 18 in. T. pkt. 60c; 5 pkts. \$2.50.

ANTIRRHINUM ROCK HYBRIDS

A new race of snapdragons forming compact, rather small plants. These are profuse bloomers and bloom earlier than other "snaps" staying in bloom the whole season. Excellent for rock and alpine gardens. The bloom is produced from the ground up to the tips of plants, almost completely hiding the foliage from view. Many colors mixed. Height 6 in. T. pkt. 10c; 1/16 oz. 20c; 1/8 oz. 35c.

ASTER PRINCESS

A new creation unlike any other aster in formation of bloom, an exhibition flower of great beauty that will create sensation among flower lovers as well as among commercial growers.

The bloom is composed of unusually broad and long petals, the petals of the lower half of the bloom curl back and bunch up close around the stem while the petals of the upper half of the bloom form a very high and very double center. The whole flower is a ball of irregular outline reminding one of a globe shaped, wide petaled greenhouse chrysanthemum. The flowers are born on extra strong stems, when cut will stay fresh and will arrive when shipped long distances in better shape than any other aster known. Plants vigorous—of compact, upright growth, branching and 18 to 20 inches high. The colors are pure white, deep lavender, brilliant rose, delicate pink and violet purple. **MIXED.** T. pkt. 25c; 1/8 oz. 50c.

ASTER TRIUMPH

New. Another aster that is different. Triumph has long, straight, fairly wide petals that radiate from the center of the bloom in every direction, forming a huge star-shaped semi-globe of most elegant outline 5 inches across. Color, bright shell-pink. Stems long and strong, plants of vigorous growth, 30 in. high. Triumph blooms from August to November. Valuable cut flower. Double. T. pkt. 10c; 1/8 oz. 30c; oz. \$2.00.

Wilt Resistant ASTERS

If your soil is infected try the Wilt Resistant Asters. The seed we offer is first generation stock, grown on highly infested ground in order to insure immunity on sick soils when grown for a crop of flowers. Grown by the famous flower seed specialist, Bodger, and is the best seed money can buy.

AMERICAN BEAUTY

Wilt Resistant. One of the finest Asters in existence for cutting and shipping. Flowers large, double and compact, from early June to frost. **BLACK BLUE, CRIMSON, WHITE, PURPLE, MIXED.** Any color. T. pkt. 10c; 1/8 oz. 15c; oz. \$2.00; lb. \$20.00.

QUEEN OF THE MARKET

Wilt Resistant **CRIMSON, DARK BLUE, PURPLE, SCARLET, WHITE, MIXED.** T. pkt. 10c; 1/8 oz. 15c; oz. 80c; lb. \$10.00.

WILT RESISTANT ROYAL ASTER

DARK LAVENDER (AZURE BLUE) DEEP ROSE, LAVENDER PINK, (PEACH BLOSSOM) PURPLE, WHITE, MIXED. Any color: T. pkt. 10c; 1/8 oz. 20c; oz. \$1.40; lb. \$14.00.

HEART OF FRANCE. Wilt Resistant. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.20.

BALL'S WHITE. Wilt Resistant. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.20.

KING ASTER. Wilt Resistant. **BLACKISH BLUE, CRIMSON.** Either color: T. pkt. 10c; 1/8 oz. 15c; oz. 80c.

WILT RESISTANT CREGO

Improved type, large flowered. **CATTLEYA** a novel orchid florist color. **CRIMSON, PURPLE, DARK VIOLET, DEEP ROSE, LAVENDER PINK or PEACH BLOSSOM, SHELL PINK, PURPLE, (DARK BLUE) WHITE, MIXED.** Any color: T. pkt. 10c; 1/8 oz. 20c; oz. \$1.20; lb. \$14.00.

"SURPRISE" ASTER "SALMON GOLD"

New creation in asters, an absolutely new color, never before seen in asters, namely a glowing, salmon-pink with a sheen of gold. Flowers perfectly formed, from 3 to 3 1/2 inches across, very double. Of extraordinary lasting qualities staying fresh, if placed in water, for over two weeks and therefore invaluable for shipping long distances. Stalks wiry and stiff. Very early beginning to bloom in July and lasting till late in fall. Each plant produces from 40 to 50 salable blooms. Height 2 ft. T. pt. 15c; 1/8 oz. 40c; oz. \$3.00.

ASTER SURPRISE CHARM—Pink, flushed with old gold. T. pkt. 15c; 1/8 oz. 40c; oz. \$3.00.

ERYTHRINA CRISTA GALLI

Coral Tree. Half hardy shrub of striking beauty rarely seen. Produces during summer masses of brilliant crimson bloom in large terminal racemes. Easily raised from seed. Sow in May in a deep flat with 4-5 inches of dirt. By fall you will have strong plants two feet tall. Store the flat inside over winter. Next May plant out three feet apart in full sun. A group of these plants produces an immense effect. Then every fall lift the fleshy roots and store over winter like dahlia roots. South of St. Louis stands out of doors if protected. Height 5 ft. T. pkt. 20c; 25 seeds 50c; 50 seeds 85c

"BASKET" CAMPANULA

Resembles the better known variety of "Isophylla" which cannot be grown from seed. Unexcelled for hanging baskets, and pots, producing in greatest abundance, large, open light blue, bell-shaped flowers, on long overhanging branches. Of all plants belonging to this class we do not know of any nearly as beautiful and full of grace as this Basket Campanula.

In blooming qualities there is hardly anything like it. Will prove a money maker and a fast selling plant. Started early, it will bloom the first year from seed. Use sandy soil, do not cover the seed at all, transplant when large enough to handle. Will thrive even under gross neglect. Height 8 in. T. pkt. 50c.

CARNATION PRAGUE GIANT

Much more than just another new carnation. Of all hardy carnations this is the finest. The plants are of robust growth carrying on stiff wiry stems extra double, well formed fragrant flowers 2 inches across in many shades of the most lovely pink besides all other straight colors. These flowers supported by stalks, so strong and rigid that not a single bloom leans towards the ground, touch one another at an even height in such a fashion as if arranged by the hand of a skilled florist into a big bouquet of such a beauty that when seen by a flower lover some of the plants will be seen no more by the grower—they will be sold and carried away. It is this upright even growth that makes Prague Giant the king of hardy carnations. No other carnation can compare with it in this respect. For several years we had plantations of Prague Giant on one of our seed farms but never gathered a single seed, had to sell the plants to visitors. Our telling them that the plants are a seed producing crop was of no use. They begged for the plants and we had to sell. **CULTURE:** Sow in spring, transplant in summer, to get blooming plants in spring. Will winter without protection. If you will place Prague Giant in pots, force gently and bring the plants into bloom in May and then to market, we assure you that you will sell the plants and will not have enough to satisfy the demand. You will positively lose if you will not plant **PLENTY** of Prague Giant. Outdoors Prague Giant blooms early in June to July, the seed produces about 90% double flowers. Height 15 inches. T. pkt. 20c. Very short crop.

CENTAUREA PULCHERRIMA

Also called Aetheopappus. A truly splendid flower, that you will sell fast, when in bloom, which is in May and June. Its corn-flower like flowers are 1 1/2 inches across, vivid rose-pink with a well defined pure white center, very double, very beautiful. Fine bedding and rock plant and first rate cut flower. Hardy perennial. Height 16 in. T. pkt. 20c; 1/16 oz. 35c; 1/8 oz. 60c; oz. \$4.40.

DOUBLE SHASTA DAISY

Flowers five inches across, resembling an aster, almost double, born on long stiff stems for almost three months, and pure white in color. Hardy perennial. In our trials it proved perfectly hardy and produced a good crop of high class double flowers in spite of excessively hot and dry weather. Height 3 ft. T. pkt. 25c; 1/64 oz. 60c; 1/32 oz. \$1.00; oz. \$40.00.

CINERARIA "OLYMPIC GIANTS"

This is a new race of Cinerarias which for vigor of growth, size of flower and range of color far surpass the well known strains. The height of the plant is about 18 in. producing enormous flowers which often reach a diameter of 5 to 6 in. There is a wonderful range of color, many ringed varieties as well as selfs. T. pkt. 30c; 1/64 oz. \$1.20; 1/32 oz. \$2.20.

DIANTHUS NEGLECTUS

This is a real gem because of unusual beauty, also because it blooms in May and June when plants sell good. Potted and displayed when in bloom, will sell fast for at least 25 cents per plant, depression or no depression. It is a hardy perennial of compact growth, foliage gray green and neat, flowers born singly on upright stalks the size of a quarter piece, cup shaped, rosy pink with an extraordinary appeal. Once established, will thrive in almost any soil for years, withstanding any amount of heat and drought. Height 6 in. 25 seeds 20c; 50 seeds 35c; 100 seeds 65c; 500 seeds \$2.50.

DIANTHUS KNAPPI—Very dainty, rare, unique and the only Dianthus which produces yellow flowers which are born on slender stems in clusters during July and August. Extremely hardy, drought and heat resisting perennial, foot high. T. pkt. 40c.

DELPHINIUM ICEBERG

Belladonna type, flowers pure white. Flower spikes 20 inches long carried on good stout stems. Plant of vigorous growth and healthy. T. pkt. 50c.

Our Cyclamen seed produces short and stocky plants

CYCLAMEN

The seed we offer is the best money can buy. Grown for us by one of Germany's best growers. Better seed than ours does not exist. Our Cyclamen grower wrote us once a long letter and in this letter made a remark. The Cyclamen seed that is now on the way to you is of such quality that you will "gain in honor" in German "wobei Sie Ehre erwerben." Our grower is proud of the quality of his seed.

NEW CYCLAMEN BONFIRE

Of ruby salmon color, flowers of unusually large size, of elegant outline and very floriferous, a novelty of the highest order. Our seed is of Ed. Trunk's growing, the acme of perfection, well and favorably known by all prominent Cyclamen growers all over the land. 10 seeds 25c; 50 seeds 80c; 100 seeds \$1.50; 200 or more at the rate of \$12.00 per 1000.

DOUBLE CYCLAMEN CARMEN

A really double Cyclamen that comes absolutely true from seed. The flowers are ten petaled 5-6 inches across of vivid carmine red. 5 seeds 60c; 10 seeds \$1.00; 25 seeds \$2.30.

CARYOPTERIS MASTACANTHUS

Free flowering hardy perennial of high value for cutting. Blooms in great profusion from early in September till frost. Verbena-like flowers in blue, white and pink. Loves sandy soil. Will bloom till midwinter under glass. Easily raised from seed. In the North dies down in winter but new shoots spring up freely in the spring and produce a crop of bloom the same season. Height 3 ft. T. pkt. 15c; oz. \$1.00.

EXACUM AFFINE

An elegant pot plant producing from June to frost hundreds of small, star-shaped, beautiful blue fragrant flowers if sown in February. Hard to beat as a house plant and for baskets. Use rich soil, place 2-3 plants in a pot. Seed very fine but germinates readily. Annual. Height 6 in. T. pkt. 30c; 1/64 oz. \$1.40.

ELEAGNUS LONGIPES

Valuable shrub because highly ornamental and easily and inexpensively raised from seed. Flowers fragrant, yellowish white in May, followed by bright red, edible cherry like fruit that hangs in bunches from the branches. Foliage silvery white. Perfectly hardy. Height 5-6 ft. T. pkt. 10c; oz. 50c.

GYPSOPHYLA SUNDERMANNI

A miniature Paniculata, plants having a spread of a foot across, covered with white bloom from May to August. An extra good, neat rock plant. Height 6 in. T. pkt. 20c.

PANSY AMERICA

Enormous in Size

Brilliant and Unusual New Colors

Trumps—all trumps which are never beat. The most gorgeous and largest blooms in all the colors of the rainbow with color variations that the average pansy grower has never seen. Absolutely in a class by themselves.

For years we strived, we worked hard and finally succeeded after a heavy outlay of money and long years of patient waiting. Now we are able to offer you seed, producing plants with blooms immense in size and of the richest colors imaginable, that simply dazzle the onlooker and that you will sell at almost double the price common pansies sell for and sell them as fast as you reach the market even at times when other pansies go begging. Our American Pansy mixture is so superior and so absolutely unbeatable that we are making you the following unheard of offer.

MONEY BACK IF NOT FULLY SATISFIED

If you should be disappointed or not fully satisfied with this nature's most wonderful gift to mankind, we ask but one favor. Drop us a postal card and tell us that the seed did not come up to your expectations and we will immediately mail you a check in full for your entire purchase of American Pansy seed. We will also do this: Upon request we will send you a trade packet of this pansy seed containing 450 to 500 seeds worth 40 cents. You plant the seed first for a trial and if you will find that the seed does produce blooms VERY MUCH SUPERIOR to what you used to raise you send us the 40 cents—otherwise you need not send a cent. T. pkt. 40c; 1/8 oz. \$1.50; 1 oz. \$10.00; 1/4 lb. \$37.50; 1 lb. \$150.00.

ECHIUM CRETICUM

A new, hardy annual of easiest culture. The flowers are of soft, red color, very attractive. Fine for bedding or as a pot plant. In bloom during July and August. Height 18 in. T. pkt. 20c; 1/8 oz. 30c; oz. \$2.00.

EPACRIS HYBRIDA

Half hardy shrubby perennial, one of the most beautiful, hard wooded plants known. Of the highest value as a pot plant and for cutting. Recommended only to experienced growers that understand the culture of Ericaceae. Epacris requires same treatment as Erica. Worth growing because beautiful, out of the ordinary and a winter bloomer. The seed we offer is saved from choice hybrids of many colors, both single and double. 100 seeds 30c; 500 seeds \$1.00.

GLORY OF THE SUN**A NEW FLOWER OF EXTRAORDINARY VALUE**

Leucocoryne Ixioides Odorata "Glory of the Sun" is a bulbous plant, bearing large, fragrant, blue flowers with white centers in large heads on wiry stalks 18 inches long, from February to May, if planted in August to November. Charming in the daytime or under artificial light a flower that lasts two weeks when cut, one that can be shipped long distances and easily produced from seed. It was introduced in Europe in 1928 and the Europeans went wild over it. The same thing will happen here and growers will do well and make NO mistake if they grow Leucocoryne without delay. The demand for flowering bulbs is sure to come, the thing is, to have the bulbs when the demand does come. **CULTURE**—Treat same as you do Freesias. Bulbs planted in the Fall bloom in February and on. It takes 2 to 3 years to produce flowering size bulbs from seed. The seed germinates readily and bulbs are produced without any trouble. The seed is rather expensive, but in two or three years you will have your own seed producing plants, will keep on sowing and producing bulbs which you will sell as fast as produced. Therefore do not hesitate. Go ahead full blast. You have here a chance to make a few extra dollars that will come in handy when taxes fall due, etc. T. pkt. 75c; 10 pkts. \$7.00; 100 pkts. \$60.00.

Kalanchoe Coccinea

A succulent plant, ideal for pots, producing highly attractive bright scarlet flowers in great profusion early in February and staying in full bloom for two months. Easily started from seed. Plenty of air and a night temperature of 55 deg. is required. You will find Kalanchoe a ready seller and one of the most satisfactory house plants.

Start the seed in February or March, grow in the open during summer, place on benches before frost 2-3 plants in a pot to get heavy, bushy growth and a mass of bloom, January to April. For best success use light soil mixed heavily with peat. Height 18 in. T. pkt. 30c; 250 seeds 80c; 1000 seeds \$2.80.

IRIS AUTUMN KING

German or Bearded Iris originated by H. P. Sass. Blooms during the May-June season and again from September until killed by frost. Flowers large, purple-blue. Very scarce. Each 50c, postpaid.

DOUBLE LOBELIA "CHARM"

This charming beautiful new Lobelia is of neat, shapely, compact growth, the plants are round, stems and foliage a rich purple, covered throughout the season with large double flowers of an intense blue. Height 10 in. T. pkt. 40c; 1/16 oz. \$1.00.

MESEMBRYANTHEMUM CRINIFOLIUM

Ice Plant. Livingston's Daisy. New. Highly attractive annual producing daisy-like flowers two in across, in every imaginable color from May to October. Valuable for dry sunny places, the rock garden and as a pot plant. Plants dwarf, spreading to about a foot in diameter, covered with bloom. Very outstanding. T. pkt. 25c.

MYOSOTIS CHRISTMAS BOQUET

The flowers are extra large, deep blue, very bright, born on long stalks and produced freely. Highly valuable for winter blooming. Sown in June and potted on, will produce specimen plants under glass at Christmas-time and will furnish high class material for cutting. Height 15 in. T. pkt. 20c; 1/8 oz. 45c; oz. \$3.20.

MYOSOTIS BLUE BASKET

New. Classed in Europe as one of the best if not the best of all Myosotis. This because it produces such a mass of bloom as no other Myosotis ever produced, because of its exceptionally bright dark blue color, also because it is early and the plants of neat, compact growth. Alpestris type, height 1 ft. T. pkt. 20c; 1/16 oz. 35c; 1/8 oz. 60c; 1 oz. \$4.40.

LOBELIA BLUE STONE

Of compact growth, flowers clear gentian blue without eye. One of the finest bedding lobelias. New. Height 4 in. T. pkt. 10c; 1/32 oz. 20c; 1/16 oz. 35c.

OSTROWSKYA MAGNIFICA

Few hardy perennials are as showy as Ostrowskya. Nothing new, yet still rare. If you will undertake to grow Ostrowskya you will wait for blooming plants 3 years from date of sowing. If you will wait, you will be richly repaid. Your plants will be a delight to you and in great demand by flower lovers when seen with their pale blue bell-shaped flowers that are 4-5 inches across, in clusters of 3 to 6 at the top of each stem. Full grown plant throws 6-10 flowering stems and is a sight long remembered. Easy to grow. Demands well drained deeply worked soil and a cover of coarse litter after blooming which is in August. When through blooming nothing is left of the plant above the ground, it needs covering to keep it dormant during rainy fall weather. It is perfectly hardy and enjoys our dry and hot climate. Height 4-5 ft. 25 seeds 30c; 50 seeds 50c.

STOCK GIANT WONDER

If you will try it you will find it the best paying stock now in existence. Flowers gigantic in size extra double, the spikes longer and heavier than in the famous Non-Branching type of stock. You can grow it to a single spike in the usual way and you will find it as said, the largest and finest of all. In habit Wonder resembles the Bismarck stock, same branching habit but in all other ways very superior. Excellent forcer, extra early and the seed produces a high percentage of doubles. **WHITE, BRILLIANT RED, BLUE, LAVENDER, LIGHT PINK, DARK ROSE, YELLOW, MIXED.** Any color: T. pkt. 35c; 1/32 oz. 60c; 1/16 oz. \$1.00; 1/8 oz. \$1.80.

ZINNIA FANTASY

Fantasy is the most fascinating new Zinnia type introduced to the flower world in many years. The very informal, shaggy appearing flowers are graceful and interesting, quite distinct from the stiff, formal zinnias to which we are accustomed. The rounded medium-sized flowers are composed of a mass of shaggy ray-like petals which give a delicate and refined appearance, large enough to satisfy the desire for mass of color, yet small enough to lend themselves gracefully to flower arrangement.

The color range includes the brightest shades of reds, yellow and orange, as well as the popular pastel pinks and cream. **FINEST MIXED:** T. pkt. 15c; 1/16 oz. 35c; 1/8 oz. 55c; 1/4 oz. \$1.00.

ZINNIA DESERT GOLD

Flowers in shades of yellow and gold, the petals overlaid at the base with a deeper golden yellow giving a charming bicolor combination. Pronounced by many as the finest in Zinnias. T. pkt. 20c; 1/8 oz. 30c; oz. \$2.00.

SCABIOSA FISCHERI

Hardy perennial of vigorous growth producing a sea of very dark bright blue, double flowers over an inch across during July and August. Fine for cutting and as a border plant. Height 3½ ft. Different from S. Japonica. T. pkt. 10c; oz. 60c.

**VARIEGATED YUCCA
Will Make Money For You**

The leaves of this Yucca are broad, dark green at center, breaking up with narrow stripes to a broad outer edge of clear, conspicuous yellow. The plants are very ornamental and graceful of compact growth and only 18 inches high when fully developed. Of similar usefulness as Dracaneas, vastly more attractive and absolutely hardy. Easily raised from seed. By all means try this Yucca. Pot up the seedlings and offer them in the spring. You will sell no end of them at your own price. T. pkt. 40c.

LEPTOSIPHON ROSEUS. Listed by us under the name of Gillia Micrantha Rosea is a plant of importance to all flower growers. Beautiful, easily raised, in bloom in May to October. See Gillia.

You can order ¼ and ½ oz. at ounce rates, ¼ and ½ lb. at pound rates.

NEW PETUNIA DWARF RAMONA GIANTS

A fine strain of Giant Single Petunias for pot culture. We have checked this type against many in our experimental grounds and consider it the most compact Giant Flowering Petunia, with best formed flowers, of any dwarf type on the market. As in the illustration, when in full bloom, the plants show nothing but colorful flowers, immense in size, with open throats, beautifully veined and marked. T. pkt. 30c; 1/32 oz. \$1.75; 1/16 oz. \$3.25; 1/8 oz. \$6.25; oz. \$48.00; 1/64 oz. 95c.

Petunia Dwarf Ramona Giant

PETUNIA BLUE THEODOSIA

Identical in size, equally as graceful, as the famous Pink Theodosia. Blue Theodosia is of deep, metallic-blue with a silver sheen, the throat intensely, deep blue, the whole, beautiful, fringed flower veined with delicate lines of black-blue. The extreme size, the charming blue color and the metallic lustre of the flower will make Blue Theodosia a favorite for a long time to come. T. pkt. 30c; 1/32 oz. \$1.75; 1/16 oz. \$3.25; 1/8 oz. \$6.25; oz. \$48.00; 1/64 oz. 95c.

PETUNIA WHITE PEARL

The finest white, dwarf, compact, bedding petunia. Very floriferous, flowers extra large, satiny-white. Height 8 in. T. pkt. 10c; 1/16 oz. 40c; 1/8 oz. 75c; oz. \$5.00.

PETUNIA DAZZLER

Flowers of maximum size, glistening white in the throat for about two-thirds of the flower, then sharply bordered with a broad band of brilliant dark crimson. An exquisite variety. T. pkt. 25c; 1/64 oz. \$1.00; 1/32 oz. \$1.75.

Petunia Double Marvels

HARDY VERBENA VENOSA

A very showy, deep lilac-blue, Verbena of compact growth. In bloom continuously from April till frost. Besides being a high class hardy perennial and a pot plant, it is a first class plant for bedding, edging, for covering steep banks, graves, etc. The plants spread and root readily and are at all times covered with bloom. If you are a flower grower, you cannot do without the hardy verbena. You will find it a beautiful flower, a fast selling plant, about the easiest to propagate and a plant that you can use to advantage almost the year round. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.20.

VERBENA VENOSA ALBA—Flowers silvery-white. T. pkt. 20c; 1/8 oz. 40c; oz. \$2.80.

VERBENA VENOSA LILACINA—New. Delicate lavender blue. T. pkt. 20c; 1/8 oz. 40c; oz. \$2.80.

Viscaria Tom Thumb

VISCARIA TOM THUMB

Extremely free flowering, annual of dwarf compact growth and great beauty. In bloom all summer. Easily raised. Fine for ribboning, bedding as a pot plant and a good cut-flower. **BLUE GEM**, bright, true blue. **ROSY GEM**, brilliant rose. Ht. 8 in. Price: Either variety, T. pkt. 15c; 1/8 oz. 35c; oz. \$2.00.

Petunia Theodosia

PETUNIA THEODOSIA

Extra large, fringed, pink flowers, with well defined golden throat, very conspicuous, a flower that sells at sight. Won first prize at the Boston Flower Show in 1928. All florists that grew Theodosia report good sales at much better prices than is possible to get for geraniums. T. pkt. 30c; 1/64 oz. \$1.00; 1/32 oz. \$1.75; 1/16 oz. \$3.25; 1/8 oz. \$6.25; 1 oz. \$48.00.

SALVIA BEDDING QUEEN

OF ALL SALVIAS THE EARLIEST
HEAVY BLOOMER—VERY COMPACT—EVEN HABIT

Bedding Queen, a new Scarlet Salvia, produces masses of bloom, in fact twice the amount of bloom than ordinary Salvias, by the end of June from seed sown at the end of February. Of erect growth, very compact and even, with spikes closely set with large flowers of the most brilliant scarlet. The finest of all Salvias. Height 20 inches. T. pkt. 20c; 1/8 oz. 35c; oz. \$2.40.

STATICE SAREPTANA

Like Incana in growth with florets like Latifolia but three times as large, intensely dark, bright blue in color. Very effective when dried as it retains its fine blue color for a long time. Easily raised from seed. Absolutely hardy. Height 2 ft. T. pkt. 10c; oz. 80c; lb. \$8.00.

STATICE KAMPF'S BLUE

Statice Sinuata Atrocoerulea Kampf's Tall Improved. A long name for a plant. An annual variety, flowers most brilliant deep blue, large and dense, on stalks 3 feet tall. The finest blue in the Sinuata class. T. pkt. 15c; oz. 80c.

STOCK EARLY HARBINGER

Vigorous grower and almost hardy in the North treated as a perennial. It is a new type, tree-like in growth. The stem about 9 inches high, branches out into a number of fine, long stemmed, heavy spikes of bloom in a wide range of colors such as shades of pink from flesh to deep rose, shades of lavender and blue, pure white, yellow as well as purple. The plants produce a very good percentage of doubles. A splendid cut flower and a high class pot plant that can be had in bloom at Christmas, from seed started about July 10th. T. pkt. 50c.

STREPTOSOLEN JAMESONI

A graceful pot plant, bearing from Christmas onwards, corymbs of brilliant orange-yellow flowers similar in shape to flowers of Lantana at the tip of every growth. Can be grown in bush or tree-form and if nicely staked is quite attractive. Culture same as for Browallia. Tender perennial. Height 4 ft. 50 seeds 40c.

TO LESSEN THE LOAD of worries that many of us are compelled to carry, give your customers maximum service, "most for their money," and grow a maximum amount of new, never-seen-before flowers.

Statice Dumosa

STATICE DUMOSA

THE FINEST STATICE FOR DRYING

Of great value to the florist, in fact the most valuable of all Statice. In general appearance it resembles the well-known Incana Nana variety, which when dried is being imported from Germany and here used in immense quantities in wreaths and other floral work. Dumosa differs from Incana Nana in having larger individual florets, much brighter in color, clear silvery white when dry and lavender when fresh. The branched stalks are more than twice the size of Incana, the main stems twice as stout. For these reasons Dumosa is a highly valuable new variety. Height 20 in. Perfectly hardy without protection anywhere. T. pkt. 10c; oz. \$1.00; lb. \$10.00.

THE "OUTLINE" OF GARDENING

SOIL—Any soil where weeds grow is all right or can be made so. If the soil is poor, apply manure, the more the better. Spade it under. Spade 9 to 12 inches deep, preferably in the spring, then rake the soil smooth. If the soil is too heavy, (gumbo, clay), apply stable manure; if it is too light (sandy), again apply manure. Manuring makes light soils heavier and heavy soils lighter. This sounds like a joke, but it is a fact. If your soil is pure muck (peat), it is ideal for raising cabbage, lettuce and other leafy vegetables, but before you can grow all kinds of crops on this soil you must thoroughly mix it with regular soil, be this sandy, clayey, or a good loam. With soil and small application of stable manure you will raise wonderful crops, as muck soil is exceedingly rich.

SOWING—Read cultural directions in this book. Do not cover the seed too deep—be very careful in this respect. Seeds the size of a pin head should be covered one-fourth to one-half inch deep. Larger seeds like those of radish or beets should be covered three-fourths to one inch deep. Corn, beans and peas, should be covered two to three inches deep. Very fine seed like those of begonia, must not be covered at all, merely pressed to the soil and sow such fine seed first in a box, not over 3 inches deep, filled with finely sifted soil. Cover the box with a pane of glass.

VERY IMPORTANT—Whenever you read in our catalog "thin out to 4 inches apart in the row" as the case may be, do so as soon as the plants are up. If you allow the plants to crowd each other the crop will never properly develop. Leafy vegetables will be spindly and sometimes will quickly shoot to seed and the root crops will have thin, long and deformed roots. The beginner may think that the more plants in the ground the bigger the harvest. That is a mistake. Big and fine crops will come only from plantings where the plants have room to develop.

WHY SEEDS SOMETIMES FAIL TO "COME UP"—All real seedsmen send out good live seeds with strong germination. But seed will fail to come up if it is covered too deep, if the ground is not moist enough, if the weather is too hot, if a hard crust is formed on top of the soil, if mice, birds or insects will get it, if sown in too hot a hotbed and from other causes which are, for a while anyhow, impossible to explain. These things happen no matter how good the seed sowed, and all old gardeners know it. In the great majority of cases seeds come up just fine, yet sometimes they fail, and you should be informed about the probable causes. Do not blame the seedsman, he is rarely to blame, he is doing his part. Be optimistic—do like a neighbor of ours did. He sowed beet seed three times, every time in a row about an inch or so apart from the old row. The seed did not come up. He sowed the fourth time, then came a heavy rain, and in a few days the seeds from all four sowings were up.

CULTIVATION—As soon as your plants are big enough to handle, thin them out, pull the weeds, transplant and keep on cultivating. The more you use the hoe or the cultivator, the faster your crops will grow, and the more they will produce.

SETTING OUT PLANTS—You will hardly ever lose a single plant if you will plant in a moist soil, and if you will press the soil firmly to the roots. NEVER, NEVER place manure near the roots of a plant. Manure contains strong chemicals and will either kill the plant outright, or damage its roots to such an extent that the plant will stay stunted. If you must manure, place the manure a foot or so away from the roots. Putting manure right to the roots has killed thousands of trees and plants. Do not plant in dry soil. Wait for a heavy rain or soak the ground with water, then let it dry off so that when you press a handful of it it will not stick together. Never work soil that is wet; wet soil when worked sticks together and hardens just like a brick. Plants do well only in soil that is porous, soil that crumbles easily when handled.

MORE INFORMATION—You will get more information elsewhere in our catalog. It is packed with valuable pointers. Also consult your friends about gardening, exchange your experience with them, read garden magazines, and after a year or two of experience you will know all you need to know. Your garden will be a source of pleasure and profit.

GARDENING FOR PROFIT—If you want to raise vegetables or flowers for profit, hire yourself to a practical gardener or florist. One year of experience will be worth more to you than all the books that were ever published on gardening. However, read books; they are the cheapest source of information. With actual experience in a garden or greenhouse, the books you will read afterwards will do you twice as much good, because many things now hard to understand will be plain to you. Experience is the best teacher.

SPECIAL BENT LAWN GRASS SEED

Composed of the best Bent varieties with a proper proportion of Red Top and Rye Grass. This special Bent Grass seed will produce a dense turf of the finest texture rivaling in luxuriant feel an expensive oriental rug. No other Lawn Grass can compare in results with a lawn produced from the Bent Grasses. Bent Grasses are the dwarfest in cultivation, their creeping character causes them to mat together and they produce a dense mat of fine, silky leaves, deep, rich green in color. Bent turf can be mown closely and will stand up well under the heaviest wear. Ideal for forming a terrace sod as it will withstand drought and sun. If the slope is gentle add one inch of top soil, sow the seed at the rate of one pound to each 100 square feet, rake the seed in and firm the soil with a roller or back of a spade. If the slope is quite steep, proceed as above but sow along with the Bent Lawn Grass Seed one-half pound of Italian Rye Grass to each 100 square feet. Italian Rye Grass is a quick growing grass and will hold the soil together and give a chance for Bent Grasses to establish themselves. Mow the Rye Grass as soon as the growth is of sufficient height and keep it cut. We compose this Special Bent Lawn Grass Mixture out of separate varieties, using only the heaviest and highest germinating seed and if you will follow our directions you will have a lawn that will be the talk of the neighborhood. Price: Lb. 90c; 2 lbs. \$1.75; 5 lbs. \$4.00, prepaid. NOT prepaid: 10 lbs. \$8.00; 100 lbs. \$75.00.

Lawn Grass Seed

In composing lawn grass mixtures, we use the highest grade of seed thoroughly recleaned, containing the largest proportion and the greatest weight of actual seed, a grade that is closely 100% free of hulls, the best grade obtainable.

The small proportion of Rye grass that is included in some of the mixtures insures a quick effect (within a month from date of sowing). Rye grass is a protective grass and dies out completely in two years, its place is taken by Blue Grass, New Zealand Fescue and finally by Bent Grasses, all fine leaved varieties. You will have from our seed a wonderful lawn that you will be proud of.

Directions for Making a Lawn

On new lawns use 1 lb. of Seed for 100 square feet; 100 lbs. for one acre. To replenish lawns where grass is thin use half quantity.

If you want a nice lawn and this in from 30 to 40 days after sowing, you cannot use less than 100 lbs. of seed to the acre.

In the formation of lawns, and proper care of lawns, many things are to be considered. The beauty of a lawn consists in the evenness of its surface, and the richness of its verdure. This can only be produced on well-drained, prepared, thoroughly pulverized soils. Another important consideration in making a lawn, is to have the soil of even depth throughout, so that the grass may be marked by a regularity of growth. After sowing, the ground should be lightly harrowed or raked, and heavily rolled, in order to press the seed into the soil. Sowing can be done from the middle of March to the middle of May, and in favorable seasons, even up to July. Seed may also be sown from the latter part of August to the end of September. As soon as the frost is out of the ground, the land should be heavily rolled, and cross-rolled, as the soil is loosened by winter frosts, and rolling is necessary to compress it again.

DANDELIONS—A good way to eradicate dandelions and other weeds in a lawn is to cut the grass regularly and never closer than two inches from the soil surface. Cutting induces sturdier growth of grass but the weeds perish when cut regularly and are prevented to seed themselves.

Leave cut grass lay, it will quickly shrivel, work down to the soil surface and form a mulch. Your grass will withstand dry weather far better than lawn that is sprinkled. Your lawn will continue green in spite of drought for an entire summer. Watering: Apply water when the color of your grass begins to be pale instead of a deep green, then soak the ground a foot deep by laying the hose on the ground and letting the water flow in a gentle stream for an hour or two on one section after another. Do not sprinkle your lawn as sprinkling is of doubtful help and in some cases actually does harm. If you will water thoroughly your grass will have plenty of moisture to fall back upon for three weeks in hottest of weather and longer if the temperature is not too excessive. And it is easier and less work too, than when you are sprinkling every day.

Lawn grasses should be sown thickly, from 150 to 50 square feet to the pound, depending upon condition of the soil, time of year, etc. We like the plan of working in units of 100 square feet (10 by 10 feet squares), and seeding each unit with the quantity of seed decided upon. An easy way to do this is to take two heavy cords, each ten feet long and with a loop in each end. By starting at one corner and staking out regular spaces using the same amount of seed for each square of 100 feet your lawn will be very evenly seeded.

Use no fresh manure for fertilizer because it contains weed seeds. Bone meal one pound per 100 square feet is the proper thing to use.

ITALIAN RYE GRASS

An annual, fine leaved deep green grass, unexcelled as an admixture in lawn grass. Will make a fine turf in 30 days after sowing. Its value lies in the fact that by its extremely quick growth it will bind soil together preventing washing out in case of heavy downpours and that it will protect other grasses of fine texture like Bent Grass for instance. Its main usefulness in the North is to serve as a "nurse crop", in the South it makes an excellent winter turf when Bermuda Grass is dormant. High grade imported seed. Lb. 30c; 2 lbs. 55c, prepaid. Unprepaid: 10 lbs. \$1.80; 100 lbs. \$16.00.

WHITE CLOVER—Extra recleaned seed 1 lb. 55c; 10 lbs. \$4.50.

KENTUCKY BLUE GRASS—Extra fancy seed. 1 lb. 40c; 10 lbs. \$3.25.

GRASS FOR GOLF COURSES Genuine Washington Bent Grass is the best. The sturdiest grower, staying green even in prolonged hot and dry weather. Resistant to zonate-eye spot, a disease manifesting itself in the peculiar targeted appearance on the leaves, sometimes killing the leaves entirely, turning the turf to a brown color. For best results in establishing a turf start Bent Grass from seed. Use 15 lbs. per acre.

WASHINGTON BENT GRASS Lb. prepaid, \$1.30. Unprepaid, 5 to 10 lbs. \$1.10 per lb. In lots of 10 lbs. or over, \$1.00 per lb.

GERMAN BENT GRASS 1 lb. \$1.30, prepaid. Unprepaid, 5 lbs. \$5.50; 10 lbs. \$10.

DE GIORGI' SPECIAL LAWN

This mixture contains several of the finest American and European grasses adapted for Lawn making and cannot be excelled, being by far superior to mixtures usually sold. Produces a perfect lawn in a few weeks after sowing, that stays green from early spring till winter, does NOT turn yellow even in the hottest and driest part of summer and does well in moderate shade as well as in full sunlight. This because we use the best grade of seed in its composition and the right kind of fine leaved grasses in proper proportions. Price, by mail, postpaid: 1 lb. 45c; 3 lbs. \$1.25. Not prepaid: 10 lbs. \$3.60; 100 lbs. \$33.00.

PUTTING GREENS

The hardest and finest growing grasses are contained in this mixture. It produces a beautiful and lasting green turf, calculated to withstand hard wear and tear. By mail, postpaid: 1 lb. 55c. Not prepaid: 5 lbs. \$2.35; 10 lbs. \$4.50; 100 lbs. \$40.00.

OUR SPECIAL LAWN GRASS SEED is used by landscape gardeners in quantities, because it produces permanent dark green turf in a short time, does not winter-kill and once established no additional seedings are necessary.

DEEP SHADE LAWN This is a mixture of the most expensive fancy grasses only, such as Wood Meadow Grass, Slender Fescue, etc., and will give perfect satisfaction anywhere in dense shade. By mail postpaid: 1 lb. 60c. Not prepaid: 10 lbs. \$5.00.

YARROW Makes a beautiful deep green closely woven turf and we recommend it highly for seeding such spots that are bare from constant tramping and where grass will not grow. Yarrow will make close, neat, dark green sod that will stand the wear and will eliminate the bare spots in your lawn, golf links, etc. It will last for years and do well even in dry and quite poor soil where hardly anything else will grow. An ounce of seed will sow 50 square feet. Four pounds of seed will sow an acre. Pkt. 10c; oz. 40c; lb. \$4.00.

THE VALUE OF A LAWN GRASS MIXTURE depends on what the mixture contains. Most people cannot tell one grass seed from another and many buy if the price is low. Later they are sorry. Buying our grass seed, you will get a mixture composed of proper grasses in proper proportion and seed of first quality. You can throw into a mixture almost anything—dust, weed seeds, timothy seed, etc. Our seed is not that kind. We sell ONLY the best, seed that will give RESULTS so that the buyer is prompted to say to his friends: If you want good seed you'll get it from DeGiorgi.

ADMIRAL WAX BEAN

Admiral Bean is the most valuable and absolutely the best early wax bean of quality.

Extra early, heavily productive, a sure cropper even under unfavorable conditions. Admiral will yield a heavy crop of meaty, stringless, oval-shaped, straight pods, 5 to 6 inches long, of lustrous, attractive, rich golden yellow color when planted early or late and even during hot any dry weather when most other beans fail. Admiral will even stand a light frost without injury. An unbeatable variety and market gardener's money maker. Pkt. 10c; ½ lb. 15c; 1 lb. 30c; 10 lbs. \$1.60; 100 lbs. \$14.00.

GOLDEN HARVEST BEAN A Florida customer writes: "From 15 lbs. of your Admiral Bean I picked 80 bu. of pods. My net profit was \$360.40. In my 18 years of experience as truck grower I have never seen beans yield so much as your Admiral. Do you know that your Admiral bean is a frost-proof bean? We had a big frost, when beans were up for about 3 weeks, that killed all beans I had planted as well as all the neighbors, but it did NOT kill my patch of Admiral Wax. I think your Admiral Wax Bean should be called GOLDEN HARVEST BEAN."

**Artichoke
Early Paris**

**Green
Globe**

A most delicious vegetable usually boiled and eaten with a dressing of fresh butter. Sow the seed in a hot bed before the middle of March, set out in rows 4 ft. apart and 2 ft. in the rows and you will get fine heads the first season. Pkt. 10c; oz. 35c; $\frac{1}{4}$ lb. \$1.10; lb. \$4.20.

EARLY PURPLE GLOBE—*Carciofo violetto di Chioggia*.) Purple tinged, large, globe shaped, tender, very productive and earliest variety. Pkt. 10c; oz. 35c; $\frac{1}{4}$ lb. \$1.10; 1 lb. \$4.20.

Asparagus

CULTURE—1 oz of seed will produce 1000 plants, $1\frac{1}{4}$ lbs. of seed enough plants to set an acre. For a crop of plants use 10 lbs. of seed per acre.

Sow early in the spring as soon as frost is out of the ground and the soil in good workable condition, not sticky. Have the rows about 2 feet apart and an inch apart in the row, cover the seed with half an inch of soil. Thin to not less than 2 inches apart and if you will keep the plantation free from weeds you will get strong roots fit to be planted in permanent beds the following spring. In preparing your permanent bed prepare the ground in the fall by giving it extra heavy coating of manure, then plow the ground very deep which will kill all weed seeds and destroy cutworms and it will also have a tendency to make the ground warmer; in a word your ground will be in excellent condition to receive the plants in the spring.

Lay out your beds 4 feet between the rows and plant 2 feet apart in the rows, in furrows 8-10 inches deep, spread the roots to radiate in all directions and cover with 3-4 inches of dirt. In later cultivation gradually fill up the furrows as the plants grow till the whole field is level. If you will not cut at all until your bed is 3-4 years old, your asparagus will run extra heavy so that a bunch of 5-7 stalks 8 inches long will weigh a pound, fetching top price. Asparagus beetle if unchecked will destroy your asparagus. Destroy the beetle by dusting with calcium arsenate through the season while the dew is on. Never apply calcium at the time of cutting for market as it is a rank poison.

Asparagus seed germinates rather slowly; to insure better germination soak in hot water before sowing.

Governmental bulletin No. 289, Asparagus, may be had on request to the Department of Agriculture, Washington, D. C.

ASPARAGUS MARY WASHINGTON

The best of the Washington varieties and the best of the rest. Superior because it holds a tight bud the longest, and the stalks are heavy and big. It is rust resisting, somewhat earlier than other varieties and while it does not yield as many stalks, the stalks are larger and the yield in pounds per acre is considerably greater. The seed we offer is first generation removed from strain originated by Dr. Norton. Pkt. 5c; oz. 10c; lb. 80c; 5 lbs. or over at 65c per lb. prepaid.

HEAVY 2 year old roots: 25 for 85c, prepaid Not prepaid: 100 roots \$1.50; 1,000 roots \$10.00.

Lighter one year old roots: 100 for \$1.00; 1,000 for \$8.00.

ASPARAGUS PALMETTO

Heavy yielder with large, green, thick stalks. An old, popular variety. Pkt. 5c; oz. 10c; 1 lb. 60c; 5 lbs. and over at 45c per lb., prepaid. Roots: Same prices as quoted for the roots of Mary Washington.

ASPARAGUS ROOTS

Our asparagus roots are of superior quality, produced in the rich Iowa soil, are extra heavy and full of vitality. Grown by us on our own land and in a different way than is the rule. For a crop of roots we sow thinly, every seed 3 to 4 inches apart. This gives the roots a chance to develop into real size, they grow fast, and a plantation from roots produced by our method yields a maximum of No. 1 grade asparagus. Price: \$1.50 per 100; \$10.00 per 1000.

Asparagus Mary Washington

SELL DIRECT to the consumer, delivering your product to private families and by establishing a roadside market. For your roadside market select a place as near town as possible with ample parking space and to make the place draw maximum of attention dress up with flowers such as first rate varieties of Cannas, Dahlias, Zinnias, Ageratum Giant of Iowa, Gaillardia Beautiful Star, Marigold All Double. Plant masses of these flowers, use no flowers that are seen everywhere. At first your roadside market will be no gold mine but, if you will give honesty in quality, pack and price, if you will be as accommodating as you possibly can be, to all that will stop at your place, you will in time work up a business running into thousands of dollars, despite the depression.

It is important to have roomy parking space. People hate to stop on the highway, which is against the law anyway. Not having suitable place on your own land, rent or buy an acre or so. If you will rent, have an option on the place so that the landlord seeing that you are prospering, cannot tell you to move.

TO DO WELL make yourself useful to others. Give better service, sell better goods. Always do your best—NEVER just enough to get by. If on top of this you will have plenty of patience you will succeed.

Sell the Best

vegetables, carefully graded and you will get worth while prices. By marketing the best only, you are building for yourself a reputation as a grower of quality products and even though prices received for your products should be low at times, maintain quality always and never lose confidence in the future. Times will again be what they should be, for the simple reason that nothing lasts forever.

We sell half pounds at pound rates, 5 lbs. or over at 10 lb. rate, 25 lbs. or over at 100 lb. rate.

Beans

Everyone who plants beans wants at least a green and yellow wax bean. For your green bean get DeGiorgi's strain of BOUNTIFUL STRINGLESS; for the wax the ADMIRAL. These are both good, and you'll have no regrets, we assure you.

Both varieties named are flat podded. PRIDE OF IOWA is our choice for the round podded in the green bean; PENCIL POD WAX for the yellow.

THE LIMAS. This is a distinct sort. Some of our friends are under the impression that only an expert can grow them successfully. There is something to this when growing the large podded Limas, but you will surely succeed with DeGiorgi's PROLIFIC BUSH LIMA. It is about the smallest podded in our whole list but what it lacks in size it makes up in quantity; the bushes are loaded with pods and it seldom fails to produce a full crop.

The flavor is superb; you'll like these beans if you are at all partial to Limas. They cook easily and evenly. The large crop makes this an ideal shell bean.

If you want to try the pole Limas or have already grown them, get our JUMBO, a vigorous producer of extra quality beans.

POLE BEANS. Perhaps you think it is too much trouble fussing with the poles. A friend of ours had the same idea, but he was prevailed upon to try them several seasons ago. Now he always plants pole beans, always KENTUCKY WONDER. And about twenty-four poles, three plants to a pole, furnish all the beans for a family of seven—and they're pretty big "bean eaters" at that. If your garden is of fair size, try some this season—get GOLDEN CLUSTER if you want the wax—and you'll have some every season afterward. They are enormous producers; you have no idea until you try them how big a crop they produce.

Set the poles four feet apart each way, tie each set of three together at the top, wigwam fashion and you'll be surprised at the results.

ASPARAGUS POLE BEAN. This is a distinct specie of Beans. The pods are good eating and they really grow 3 feet or even longer. They will do well everywhere and are worth planting.

EARLY MAZAGAN or Fava Bean, also called English Bean, is very different from all other beans. It must be planted early at the same time as such hardy vegetables as Radishes and Parsnips are planted.

The Beans resemble Lima Beans in taste and are prepared for table in the same way.

SCARLET RUNNER. This Bean is in a class by itself. It is generally planted for its bright red flowers rather than as a cropper.

HOW MANY BEANS, TO PLANT AN ACRE?

Planting in rows 3 ft. apart, dropping 3 beans in hills foot apart in the row, 40 lbs. of bush beans will easily plant an acre. Pole Beans 25 lbs. per acre. Bush Lima and Pole Limas also English beans are planted at the rate of 45 to 60 lbs. per acre. Less if you plant small seeded Limas, more if the variety planted is large seeded. One pound of beans will plant a row 50 feet long.

Beans do well in any soil, light soil is best for them. Have the rows three feet apart to allow horse cultivation, or 16 inches apart for hand cultivation. Plant the seeds 12 inches apart in the row and cover up with two inches of soil. Never plant Beans until the apple trees are in bloom. Give frequent cultivation. Some people plant extraordinarily early, and in most cases they lose their first planting which, considering the price of seed and labor, is rather expensive. Do not cultivate your Beans when they are wet from dew or rain; if you will, the plants will get blighted and pods rusted.

CULTURE FOR LIMA BEANS. These are VERY sensitive to cold, therefore must be planted later than is usual with regular beans—when the weather is thoroughly settled and warm and not before, or the seed will rot in the ground. Avoid ground fertilized heavily with fresh manure, because the plants on such ground drop their blossoms, resulting in few or no pods. Space bush limas 1½ ft. apart in the row, pole limas 4 ft. each way, placing one seed of bush limas to a hill and 4 to 6 beans in a circle about the pole of pole limas; always planting the seed with the eye DOWN. Cover the seeds about 2 inches deep.

HOT WEATHER BEAN—For second planting, Longfellow is the best variety we have ever tried. It will produce a good crop of fine long, round, rather slender, but straight pods, even if the weather should be hot and dry.

BOUNTIFUL BEAN—Extra early, heavily productive, long broad straight pods of a rich dark green color. Stringless, picked while the pods are young. One of the best for an early crop.

CHAMPION WAX BEAN—Extra early bush bean, pods glistening pale yellow, rather narrow, very attractive in appearance, about 6 inches long, nearly straight and stringless. Heavily attractive, quite free from rust, a dependable sort to plant either in the spring or for a fall crop.

MASTERPIECE BEAN

An extra early bush bean of vigorous upright growth, heavily productive, exceedingly valuable for pot culture as a foreign variety. Pods long, tender when young, round, meaty and straight. Pkt. 10c; lb. 40c; 10 lbs. \$2.10; 100 lbs. \$18.00.

GREEN BUSH BEANS

Any variety, 10c per pkt.; ½ lb. 15c; lb. 30c, postpaid.

Not prepaid:	10 lbs.	100 lbs.
Black Valentine	\$1.30	\$10.00
Bountiful	1.50	13.00
Early Mazagan	2.00	17.00
Full Measure	1.60	14.00
Giant Stringless Green Pod.....	1.50	12.00
Giant English	2.00	17.00
Improved Earliest Red Valentine.....	1.30	10.00
Longfellow	1.30	10.00
Masterpiece	2.10	18.00
Navy	1.00	7.00
Pride of Iowa	1.60	14.00
Refugee Stringless	1.60	13.00
Round Pod Refugee, 1000 to 1.....	1.60	13.00
Stringless Green Pod	1.50	13.00
Green Perfection, crop failed
Tendergreen	1.80	15.00

WAX BUSH BEANS

Not prepaid:	10 lbs.	100 lbs.
Admiral Wax	\$1.60	\$14.00

ASPARAGUS OR YARD LONG—Postpaid, Pkt. 10c; lb. 60c.		
GIANT MARVEL—Crop failed.		

POLE BEAN IDEAL MARKET

The earliest Pole Bean, producing a heavy crop of tender, round, long, perfectly straight, bright green pods, stringless when young and of excellent flavor. Pkt. 10c; lb. 40c, prepaid. Not prepaid: 10 lbs. \$1.70.

POLE BEAN MAMMOTH CRANBERRY

Special Worcester We have an exceptionally fine, large seeded, large podded, bright colored stock of these beans. Our beans are the true old fashioned type. Of exceptional quality, many people proclaiming these Worcester beans as the tastiest and finest beans in existence. Pkt. 10c; lb. 40c.

POLE LIMA BEAN JUMBO

Extraordinarily productive, the vines bearing pods from the bottom to the top of vine, the pods often over 8 inches long and about 2 inches wide, filled with beans of extra large size. The pods are produced in clusters of from 4 to 8 until the vines are killed by frost. Pkt. 10c; lb. 40c, postpaid. Not prepaid: 5 lbs. \$1.25; 10 lbs. \$2.50; 25 lbs. \$5.50; 100 lbs. \$22.00.

HIGH TABLE QUALITY of the vegetables you sell increases the demand and your profits. Knowing that quality in vegetables is of the highest importance, we continually improve by careful selection the quality of our various strains. A successful market gardener said to us once: "It takes a long time to win with quality unless one does expensive advertising but, once the buyers do find out that your produce is dependably of better than the average quality your sales will steadily increase and you will get slightly better prices for your stuff." How true this is!

OUR BEAN SEED is of superior quality carefully grown and inspected in the field 3 to 4 times. At no time is the crop harvested if it shows even a trace of anthracnose halo or bacterial blight.

Pride of Iowa

PRIDE OF IOWA BEAN

A WONDERFUL GREEN POD BUSH VARIETY

PRIDE OF IOWA is a wonderful variety. The pods are of beautiful appearance, nearly round, deeply creasebacked dark green, extremely brittle, absolutely stringless in all stages of growth, totally without fibre, very meaty and possess a delicate flavor. They hang in large clusters on the vines and it is easier to pick 50 baskets of them than it is to pick 25 baskets of any other green sort.

PRIDE OF IOWA produces on an average of 75 to 100 market baskets more per acre (baskets as used in our market of one-third bushel capacity) than any other green podded Bean. We tried every variety listed by us as well as many that we do not list, and know what the facts are.

PRIDE OF IOWA is ready five days after Early Valentine variety and reaches the market in ample time to bring the top prices that prevail early in the spring. On account of its very high quality and fine appearance of the pods as well as size and length which is from 6 to 8 inches, it frequently sells in our market for 10c or 15c more per basket than any other green Bean.

PRIDE OF IOWA has very bushy vines that grow about 18 inches high, without runners and with thick stalks that keep the plant erect and unaffected by high winds. The bushes are very broad and for best results must be planted in rows 3 feet apart and a foot apart in the rows. Pkt. 10c; lb. 30c, prepaid. Not prepaid: 10 lbs. \$1.60; 100 lbs. \$14.00.

GOOD FOR ALL BEET

Roots almost perfectly globular, smooth, very dark, red in and out, tender sweet flesh, free from zones or prominent growth rings. Early. Fine for all purposes. Pkt. 5c; oz. 10c; lb. 80c.

CROSBY'S EGYPTIAN BEET

Selected stock. The roots of our strain are almost globe shaped, dark red, in and out, of fine shape either young or when left standing till late in the fall. The finest strain to be had. Pkt. 5c; oz. 10c; lb. 80c; 10 lbs. \$6.50, prepaid.

DETROIT DARK RED BEET

Extra select stock greatly improved in looks as well as in quality, as you will see if you will try. Fine globe shape, smooth, very dark red, tender roots with small tap roots and just enough foliage to make it easy to tie in bunches. Extra good. Pkt. 5c; oz. 10c; lb. 80c; 10 lbs. \$6.50, prepaid.

BEET IOWA—Darkest Red. See Page 1.

Beet Early Wonder

EARLY WONDER BEET

DEEP RED IN COLOR, TENDER AND SWEET

EARLY WONDER is of ideal shape, perfectly smooth, free from fibrous roots, and with only a small tap root. The flesh is tender and sweet and stays so in all stages of growth. The color is intensely solid deep crimson red. The tops are considerably smaller than is the case with other beets, yet the amount of foliage is sufficient and makes it an ideal bunching variety. It has just the right amount of leaves, an item of importance, as it does away with lots of work connected with trimming the leaves.

EARLY WONDER is the result of years of re-selecting and improving, and absolutely the first in earliness. It never gets out of shape no matter how long left standing in the field after reaching maturity. It does extraordinarily well even on thin soil and is so positively unusual that we unhesitatingly say to you plant heavily for early young beets. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 80c; 10 lbs. \$5.00, prepaid.

BEET WINTER KEEPER

Turnip shaped beet of highest quality, valuable because stored in a vegetable cellar, will keep for months in prime condition and can be marketed in an "orderly" way, that is, brought to market in such quantities that the market will not become flooded. We advise a trial. Pkt. 5c; oz. 10c; lb. 80c.

EXTRA EARLY EGYPTIAN BEET

Extra early, producing flat, smooth, turnip shaped roots, about 2 inches in diameter. Flesh deep red, and very sweet and tender. An old standard sort of the most popular variety among market gardeners for forcing. Pkt. 5c; oz. 10c; ¼ lb. 15c; 1 lb. 60c, postpaid.

HOW MANY PLANTS

FROM AN OZ. OF SEED? You can expect from 1 oz., from 1 lb.

Asparagus	1,000	16,000
Brussels Sprouts, Broccoli, Cabbage, Cauli- flower, Rutabaga, Egg Plant.....	3,000	48,000
Chicory	3,000	48,000
Parsley	3,000	48,000
Pepper	2,000	32,000
Tomato	4,000	64,000
Onion, Leek	2,500	40,000

You will get less plants from seed sown in the open than you will when sowing under glass or in a seed bed.

NUMBER OF PLANTS TO THE ACRE—It takes 43,560 plants when set foot apart each way; 10,890 when set 2 feet apart each way and 4,840 when set 3 feet apart each way.

You can order all seeds priced at 45 cents per oz. or over in quarter and half oz. lots at oz. rate. Quarter and half pounds at pound rate. Five lbs. or over at 10 lb. rate. 25 pounds or over at the 100 lb. rate.

Table Beets

CULTURE—1 oz. will sow 50 feet of row, 4 lbs., to an acre. Plant beets when frost is out of the ground and the soil in workable condition. Have the rows 16 inches apart, plant moderately thick in the row and later thin out to 4 inches in the row. The thinnings furnish excellent greens. Give frequent cultivation.

EARLY BEETS—About 15th of February broadcast $\frac{1}{4}$ lb. of seed per sash in a hot bed that is not too warm, transplant on a cloudy day when your plants are about 6 in. tall using only good plants throwing away all weak ones. If your ground is in good shape you will get a crop of beets days ahead of field sown beets.

CRIMSON GLOBE—Flesh blood red, slightly zoned.

DEWING'S BLOOD TURNIP—Medium early.

ECLIPSE—Smooth globe shaped, dark fleshed sort.

ELECTRIC—Round, deep red with rings of lighter hue.

HALF LONG BLOOD RED—Heavy smooth roots, very dark red. Price: Any of the above, pkt. 5c; oz. 10c; lb. 60c.

LONG, SMOOTH, DARK RED—Roots long, smooth, heavy flesh black red, sweet and very tender. The best keeper. Price: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 80c; 10 lbs. \$6.00.

BEETS FOR STOCK—See page 59.

WHICH BEET IS THE BEST?

For the earliest crop and for foreign try either Early Wonder or Iowa. For canning and for a maximum crop, Iowa and Detroit are hard to beat. The Egyptian beets are of highest quality and very dark in color but losing in favor possibly because more or less flattish. For a market with large foreign population, try Select Long Smooth Blood.

Swiss Chard

Also called silver beet or spinach beet. Is grown exclusively for its leaves. The root never develops to a large size and is of no value. The leaves are carried on long, broad, thick stalks of which the leafy portion is used as spinach and the stalks or midribs like asparagus. It produces continually throughout the summer till frost and furnishes an abundance of excellent "greens" during the hot summer months when spinach cannot be grown. Culture same as for beets. 1 oz. for 100 ft. row, 4 lbs. per acre.

Lucullus and Green Giant Swiss Chards are both savoyed and curly. However in some markets the curly Chards are not wanted and if the favor is shown the smooth leaved variety, our Silver Giant Chard, is the sort to grow.

SWISS CHARD LUCULLUS

Popular variety with leaves heavily crumpled, very large, stalks white, thick and tender, well flavored. Pkt. 5c; oz. 10c; lb. 80c; 10 lbs. \$5.00, prepaid.

SWISS CHARD SILVER GIANT

The leaves of Giant Silver Chard are smooth, not crumpled, dark green, the stems silvery-white, very fleshy, very broad, tender and fine flavored. The plants are large, heavy and of fine appearance. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 80c.

SWISS CHARD GREEN GIANT

Leaves much darker green than those of any other variety, crumpled and savoyed like spinach, about two feet long, about a foot wide with an immense snow-white fleshy midrib. Of excellent quality. Yields continuously from early summer until frost. Fully as tasty as spinach, devoid of all earthy flavor. The midribs are tender like asparagus, prepared and served same way as asparagus. Break the outside leaves carefully while still young. New tender leaves will rapidly be put forth and you can keep on harvesting all through the season. Thus Green Giant Chard is a cut and come again variety of high value. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. \$1.00; 10 lbs. \$9.00, prepaid.

BROCCOLI ST. VALENTINE

Produces large, white, handsome heads, closely resembling cauliflower in appearance—in fact, is being sold as cauliflower in every grocery store during the winter months; the buying public not knowing the difference. A highly paying crop for any gardener located South or on the Pacific coast. Pkt. 10c; $\frac{1}{4}$ oz. 15c; oz. 60c; lb. \$6.00, prepaid.

NINE STAR BROCCOLI A perennial variety, claimed to be hardy and not to winter-kill, producing cauliflower-like heads in numbers. Try if located South. In Iowa it winter-kills. Pkt. 15c. More Broccoli on page 24.

BRUSSELS SPROUTS

If you've never seen them growing, let us tell you the plant is erect, two feet or more in height and in addition to the rather broad, heavy leaves the stem produces miniature heads of cabbage, probably an inch or less in diameter. Fashionable hotels are generally good customers for this vegetable.

The culture of Brussels Sprouts is the same as for cabbage, except that the leaves should be pulled down in the fall to give the small heads more room to grow.

BRUSSELS SPROUTS—AMAGER MARKET

A fine strain, quite early, with sprouts compactly set, yielding as high as five thousand quarts of beautiful sprouts per acre. Pkt. 10c; oz. 40c; lb. \$2.80.

IMPROVED EXTRA DWARF Dwarf habit, the stems are thickly set with Sprouts which grow about one inch in diameter. Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 70c; lb. \$2.80, prepaid.

Cabbage

CULTURE: 1 oz. of seed will produce 3,000 plants, 8 oz. per acre.

EARLY SORTS. In the Prairie States April 10th is about the right time to set out plants into the field. In order to have plants ready at that time plant the seed in hot beds February 15th, covering the seed one-quarter inch deep. This will give you ample time to transplant into cold frames and produce sturdy plants to go into the field by April 10th. Have rows 3 feet apart and plant foot apart in the row. The soil for cabbage should be very rich with good drainage. Cultivate frequently. If the crop shows a tendency to head up all at one time and you have no ready market for the entire crop, loosen the roots in the ground by lifting the cabbages lightly. This will permit your cabbage to stand in the field from one to two weeks after maturity without bursting. **LATE CABBAGE.** Drill the seed in the open ground about the middle of June. About July 20th you will get from this sowing large and stocky plants which you set out in rows 3 feet apart and 18 inches in the row. Your crop will be ready in October and November.

Which Cabbage Is The Best?

Cabbages differ in size, shape, earliness, color, flavor and keeping qualities. This makes a long list necessary.

Where only one variety is planted we suggest either **ALL HEAD EARLY** or **DELUX**.

If you want extreme earliness without regard to quality choose **COPENHAGEN MARKET**. If you like quality with fairly early maturity then plant either **EARLY SPRING** (round head) or **JERSEY WAKEFIELD** (conical head).

The medium early varieties are nearly all of good flavor. All Seasons, Early Flat Dutch, Early Summer, Faultless, Sure Crop and All Head Early are all good sorts. **GLORY OF ENKHOUSEN** has hard round heads and while of good quality is really not the equal of the other varieties mentioned.

For late cabbage either for Sauer Kraut or for storing, **LATE FLAT DUTCH** is the outstanding sort. The head is large, heavy and fairly solid, the ribs small, the leaves tender and the flavor excellent. It has been renamed quite a number of times and if you've raised cabbage of this description but under another name you've very likely had Late Flat Dutch. Nearly every seed catalog lists it under several names and ours is no exception.

DANISH CABBAGE like Danish Ball Head, Hollander, Dutch Winter, etc., are splendid keepers and for this reason splendid as late varieties. But they are coarse and have heavier ribs than Late Flat Dutch and are not quite its equal in flavor and tenderness.

RED CABBAGES, Black Diamond is fine early. Model best late.

SAVOY CABBAGES have a crinkled leaf. Many prefer them claiming superior quality. Marvin's is the best.

COPENHAGEN MARKET

The heads are ball shaped, average about eight pounds each in weight, have a small core, and are produced on quite short stalks, almost on the ground level. The leaves are small, light green, always tightly folded, and therefore can be set closer than is usual with varieties of similar type.

We offer seed grown by the originator of this variety. Pkt. 10c; ½ oz. 15c; oz. 30c; ¼ lb. 55c; lb. \$2.20, prepaid.

GLORY OF ENKHOUSEN CABBAGE

Early as Succession, heads medium sized, just right for market, perfectly globe shaped, of fine dark green color. It has only a few outer leaves permitting close planting. Good keeper and shipper, and may be pronounced a very desirable early sort. Pkt. 5c; ½ oz. 10c; oz. 20c; ¼ lb. 50c; lb. \$2.00.

CABBAGE—JOHNSON'S DRUMHEAD

One of the finest main crop sorts for market gardeners. The plant is of extra strong growth, the heads very large, round, slightly flattened at top, remarkably uniform, extra hard, firm, and fine in texture. The average weight of heads is from 12 to 16 lbs. per head. Pkt. 10c; oz. 20c; lb. \$1.80, prepaid.

NEW CABBAGE DELUX

**THE MOST PROFITABLE LATE VARIETY
YELLOW RESISTANT**

The finest, most reliable, sure heading, longest keeping and best paying late variety. A few days earlier than Danish Ballhead, oblong in shape, very hard, very white inside, medium in size. One of our friends, a most successful gardener, says this about Delux: I had 10 thousand plants set early, and was cutting early and again late. My cabbage was fetching at first \$2.50 per bushel and the lowest I ever got for it was \$1.00 per bushel. We had a dry spell and it looked as though part of my cabbage will be a failure. Early in the fall I started for the field with a plow. But I did not plow my cabbage under. My Delux was all headed out and finer cabbage I have never seen. Out of the 10 thousand plants only six did not make a head. My grocer's customers actually begged for more Delux and I could have sold more had there been more. By planting early, you will have fine cabbage to sell early and again late, and early planting will give your cabbage a good start so that worms and bugs cannot hurt it. Delux is a first rate keeper, wilt resistant and can be planted close. Pkt. 10c; oz. 40c; ¼ lb. \$1.00; lb. \$4.00.

CABBAGE WISCONSIN NO. 8

A late variety, long keeping, a selection from the Hollander or Dutch Winter variety, bred for resistance to cabbage yellows. Should be planted where the cabbage crop is likely to suffer from yellows. Our strain is grown on soil infested with yellows by a specialist and can be depended on to produce a good crop on ground where other cabbages would fail. It is 100% immune from disease. A splendid keeper, properly stored, will keep in prime condition till spring. Pkt. 10c; oz. 40c; lb. \$2.60.

SHORT STEM HOLLANDER

There are several strains of Hollander cabbage. After years of work, we found, in our trials that Hollander from a certain grower in Amager Island is about as good a cabbage of the Hollander type as can be expected. If you grow Hollander please try a little of our seed. Fully described in the front part of our catalog on page 3.

GOLDEN ACRE CABBAGE

An early variety of Copenhagen Market type, but several days earlier. Heads round, solid and ready to cut at almost one cutting. Pkt. 10c; oz. 45c; lb. \$3.00.

EARLY JERSEY WAKEFIELD

Our strain of this cabbage represents the highest grade of excellence. It is the result of the most careful and painstaking selection from an early maturing head of perfect shape. Small but thick and heavy outside leaves permit close planting, and enable it to stand more cold weather without injury when carried through the winter, either in the open ground in the South or in cold frames in the North. Every market gardener knows what Jersey Wakefield is and we know that our strain cannot be beaten in earliness, hard heading qualities or uniform growth. Pkt. 10c; oz. 20c; lb. \$1.80; 10 lbs. \$17.00, prepaid.

Cabbage Early Money

CABBAGE—EARLY MONEY

Earlier than any other Cabbage grown. Sure Money Maker

Early Money Cabbage makes fine, round, solid heads weighing from 3 to 5 lbs. each; several days ahead of any other variety. It will make money for the gardener and more friends for us. Except that it is earlier, it resembles the Copenhagen variety, and like Copenhagen it is not suited for storing although it will keep in prime condition for at least sixty days after maturity. For an early crop and to win dollars and new customers for the market gardener, it stands alone. Pkt. 10c; oz. 45c; lb. \$4.00, prepaid.

EUREKA CABBAGE

Extra early, heads small to medium in size, broad, flat, slightly rounded. Stem very short. Can be set close having but few outer leaves and will make good hard heads even in rather poor soil. Pkt. 10c; oz. 30c; lb. \$3.00.

EARLY SPRING CABBAGE

Early Spring is fully as early ripening as the famous Jersey Wakefield. The heads are round, slightly flattened, attaining a weight of about six pounds each. The plant is of uniform dwarf growth, has but few outside leaves, and can be planted as closely as 20 inches apart. A great feature about this cabbage is that it heads firmly at an early stage of its growth so that fine, hard heads although small, can be obtained long before it is fully matured. Pkt. 10c; oz. 20c; lb. \$1.80; 10 lbs. \$17.00, postpaid.

CABBAGE—ALL HEAD EARLY

Best sort for those who plant but one variety of cabbage. It is the earliest of all large cabbages, sure to head, and uniform in shape, size and color, and of high quality. Pkt. 10c; oz. 20c; lb. \$1.80.

YELLOWS RESISTANT GLOBE

An excellent mid-season cabbage, selected from the Glory of Enkhuizen; very uniform. It is a few days later than the Marion Market, but is inclined to produce somewhat heavier head. An outstanding feature of this variety is the unusually short core. Pkt. 10c; oz. 45c; lb. \$3.00.

CABBAGE PENN STATE BALLHEAD

Penn State Ballhead produces compact, slightly flattened ball-shaped heads, much heavier for their size than those of ordinary strains. In repeated tests over a period of years it produced a yield of over twenty tons per acre.

It was tried by many growers located in different parts of the country. All are very enthusiastic, expressing their satisfaction in such terms as: Most wonderful cropper—splendid keeper—never before were we so well repaid—the crop and profit was quite beyond our expectation—etc. Penn State Ballhead can be planted quite close, is extremely slow to crack. Pkt. 10c; oz. 30c; lb. \$2.60.

Late Flat Dutch

LATE FLAT DUTCH

The old type staple late variety, introduced here from Europe by the first settlers. It has so many good qualities that it is simply indispensable.

In prolonged dry spells the plants show the amount they suffer, it looks as though there will be no crop, but as soon as rain falls and the weather cools off, the plants quickly revive and make good. Whenever you plant Late Flat Dutch you are on the safe side. Pkt. 10c; oz. 20c; lb. \$1.80.

CHARLESTON WAKEFIELD

An improved and larger form of Early Jersey Wakefield, about a week later in maturing, but yielding fully twice the crop of the original Jersey Wakefield Cabbage. It has a less pointed head than its ancestor, is a first-rate shipper and well liked by all who are acquainted with this variety. Planted exclusively in some parts of the South. Pkt. 10c; oz. 20c; lb. \$1.80; 10 lbs. \$17.00, postpaid.

FOR MORE CABBAGE please see the front pages of this catalog.

DANISH BALL HEAD, SHORT STEM

Popular because of its great solidity of head and its unequalled keeping and shipping qualities. The heads are very hard, fine grained, and will weigh one-fourth more than other varieties of equal size. Our seed is very high bred and cannot be excelled in quality. Genuine Amager Island grown. Pkt. 10c; oz. 20c; lb. \$1.80; 10 lbs. \$17.00, postpaid.

DANISH BALL HEAD, TALL STEM

Excellent keeper. It resembles the Dutch Winter or Hollander; has all its good qualities, but differs from it in maturing two weeks later, and has taller stems. The heads are more ball shaped than those of the Dutch Winter. Pkt. 10c; oz. 20c; lb. \$1.80; 10 lbs. \$17.00, postpaid.

CABBAGE MARION MARKET

The MARION MARKET was originally bred up from Copenhagen Market, but differs from the latter in several respects. It takes about ten days longer to mature than the early strains of Copenhagen and produces a much larger plant. The heads are practically round, very hardy and stand shipment well. The quality throughout is excellent, and a favorite for early Kraut. It is very highly resistant to the Yellows and we have seen this variety yield as high as 26 tons per acre. Pkt. 10c; oz. 40c; lb. \$3.00.

CABBAGE BUGNER

A medium early variety of the Holland type, producing medium sized, almost ball-shaped heads, hard and solid. If planted early can be cut early in summer and then till fall. A disease resistant variety and a good keeper. Pkt. 10c; oz. 45c; lb. \$4.00.

OTHER CABBAGES

AUTUMN KING—A late sort, heads large, hard, flat.

ALL SEASONS—Heads round, flat, weighing from 10 to 12 lbs. each. Of high quality and a sure header.

EARLY FLAT DUTCH—Second early, round flat, quality good. Resists heat and therefore popular in the South.

EARLY SUMMER—Follows closely the earliest sorts in maturity, the heads are round, flattened, white inside, bluish green outside.

EARLY WINNINGSTADT—Conical heads, quality good.

PREMIUM FLAT DUTCH—Same as Late Flat Dutch.

STEIN'S EARLY FLAT DUTCH—Popular in the South.

SURE CROP—Another type of Flat Dutch. The heads are a trifle smaller and it matures about two weeks earlier.

SUCCESSION—Medium Early, round flattened heads.

SUREHEAD—Late variety, sure header, quality good.

PRICE—Any of the above: Pkt. 10c; oz. 20c; lb. \$1.80; 10 lbs. \$17.00, prepaid.

CANNON BALL—An extra early, sure heading Copenhagen Market type. Pkt. 10c; oz. 20c; lb. \$2.00.

CABBAGE WISCONSIN ALL SEASONS

Yellows resistant. Type similar to the old variety and the season about the same. It is the hardiest of all the flat-head varieties, an excellent Kraut cabbage. WISCONSIN ALL SEASON is known to stand unfavorable conditions of drought and hot weather unusually well. For this reason it is a very choice variety for the home garden for late summer and early fall use. It does not burst as readily as other varieties after heading up. Pkt. 10c; oz. 25c; lb. \$2.00.

CABBAGE FAULTLESS

If you grow one variety of cabbage only, choose our Faultless. Faultless is a medium early sort ripening from two to three weeks after the early kinds, forming large heads averaging 12 lbs. In weight and on good ground reaching the proportions of the well known Late Flat Dutch variety. The heads are hard, flattened, have only very few outer leaves and the inside of the heads is white. A good keeper, a good seller, dependable as to crop, fine for slaw, boiled or made into sauerkraut. In a word, it is faultless. Pkt. 10c; oz. 20c; lb. \$1.80, postpaid.

CABBAGE IACOPE

A yellows resisting strain of Copenhagen Market. A product of many years of breeding by the Iowa Agricultural Experiment Station. If you are unable to grow a satisfactory crop because of yellows, we highly recommend Iacope. But if your soil is disease free, you will do better by growing our Early Money which is days ahead of Iacope in earliness. Pkt. 10c; oz. 40c; lb. \$3.00.

MONEY FROM SAUERKRAUT

You can make some extra money by making sauerkraut. Make it early in the season. Do not wait for cool weather. There are many people that would buy it. These people do not buy ONLY because there is no sauerkraut to be had at the time. One can always buy sauerkraut in cans, but many, do not want canned sauerkraut.

If you want sauerkraut of the finest quality use either Early or Late Flat Dutch cabbage for this purpose. Inform your customers in plenty of time that you will have high class home made sauerkraut.

You can also sell tomatoes made into Catsup, chow chow, etc., dill pickles, pickled onions, beets, etc. You will prosper if what you put up, will be of the highest quality.

YELLOWS RESISTANT CABBAGES

Our yellow resistant strains of cabbages are grown for us on Long Island and in Wisconsin in co-operation with the University of Madison, Wis. The seed we offer is First Generation only and is the only safe seed to use on diseased soils.

YELLOWS IN CABBAGE—The plants turn yellow, the leaves drop off the stem and finally the whole plant dies. In such case the only remedy there is, is to grow only yellows resistant varieties. To be benefited you must have ONLY first generation seed as second generation seed is almost worthless.

LAST SOWING DATES

You can sow and be sure that they will "make," Broccoli, leek, pepper and tomato up to May 15th. Onion and parsnip up to May 20th. Lima Beans, celery, melons, cardoon and salsify up to June 1st. Swiss Chard and peas up to June 10th. Brussels sprouts, cabbage, cauliflower up to June 15th. Sweet corn and endive up to July 1st. Carrots, cucumber, winter radish up to July 10th. Dwarf beans and Florence Fennel up to August 1st. Chinese cabbage, kale, mustard and turnip up to August 10th. Spinach and early radish up to September 1st.

The dates mentioned are for the approximate latitude of Chicago and New York and allowances must be made in colder and warmer sections.

Savoy Cabbage

CULTURE—Savoy does not require the intensive culture common cabbage does and will make a good crop on even comparatively poor ground. Should be treated like early cabbage. All Savoyes are superior in flavor but they do not keep long.

MARVIN'S SAVOY CABBAGE

Most popular and best of all Savoyes. Heads large, solid, very curly, having only a moderate amount of outside foliage, growing closely about the head. Of excellent quality and flavor. Pkt. 10c; oz. 30c; lb. \$2.40.

Savoy Cabbage—Early Vienna

SAVOY CABBAGE—EARLY VIENNA

The heads of this are round, dark green, exceedingly curly formed on short stalks, weighing from 3 to 5 lbs. each. It is quite an old variety, yet it must be classed as one of the very best. Pkt. 10c; oz. 30c; lb. \$2.40.

ITALIAN SAVOY ASTI LATE

Italian Savoy Cabbage (Cavolo di Milano) is a variety, especially adapted for warm countries and about the only variety that will make a solid head in the South. It never fails to make solid heads, finely curled, perfectly round and weighing from 3 to 5 lbs. each. It grows on a short stalk, and the heads are produced in 40 days from the date of setting. It is a sure cropper, whether planted in the fall or in the spring. We have the genuine seed from one of Italy's best seed growers. Pkt. 10c; oz. 30c; lb. \$3.00.

SAUERKRAUT—Mix finely cut up cabbage with salt. One heaping tablespoonful to a gallon of cabbage. Press into the jar, tamp it as solid as possible then cover up with a few cabbage leaves, place board and heavy rock on top, keep in a warm place for two weeks then move to the coolest place at your disposal. If you should not have enough brine add water as sauerkraut must be submerged at all times to prevent spoiling.

SOW IN FLATS is mentioned often in this catalog. A "flat" is a box 18 in. long, 12 in. wide and 3 in. deep. A flat holds 100 plants once transplanted and fits the standard frame or hot bed. The bottom of flat must not be close fitting to assure perfect drainage and to insure perfect drainage all experienced growers lay on the bottom "short" manure or straw. The flat is filled with sifted soil, the soil is shaken down but NEVER packed down and this again in order to insure good drainage. Without good drainage healthy and robust plants are out of question.

MORE MONEY FOR CABBAGE

You will get more money for early cabbage if you will start the seed in frames as is the usual practice—BUT—not crowd the plants. Give them plenty of room, twice as much as you used to do. You will have robust plants with stems as big around as your little finger and such plants you will set out instead of the spindly things raised in an overcrowded box. Following this method you will gain from 15 to 20 days and get for a dozen heads more than you will later in the season for two dozen.

Red Cabbage

BLACK DIAMOND

A new second early Red Cabbage from Holland, is meeting with great popularity with all lovers of Red Cabbage on account of its fine appearance and deep red, almost black color. Heads medium sized, very hard and heavy, leaf rib thin and small. Pkt. 10c; 1 oz. 30c; 1 lb. \$2.80, postpaid.

MAMMOTH ROCK RED CABBAGE

Produces large solid heads, often weighing 12 pounds each. Always sure to head and of good red color to the center. Pkt. 10c; 1 oz. 20c; 1 lb. \$1.80, postpaid.

RED CABBAGE MODEL

A PERFECT LATE VARIETY

New and distinct. Deep red all through, large, compact, hard and extra heavy, shaped like a ball. Of right size, the heads averaging 8 to 10 lbs. It will keep in prime condition till spring. It can be put on the market when there is no other red cabbage to be had. Most other varieties of red cabbage being early to mature must be put on the market during hot weather. They do not keep well. Model can be put on the market when the weather is cool and the demand is brisk and no good red cabbage to compete with. It can be sold throughout winter until spring. It fills a long felt want. Pkt. 10c; oz. 40c; lb. \$4.00.

CHINESE CABBAGE

Culture—Chinese cabbage succeeds in cool weather only. It is easily raised if seed is sown late in July or early in August. The plants develop quickly, forming large solid heads well blanched in the hearts. Sow the seed thinly where the plants are to mature as they do not stand transplanting well. Have rows 2 ft. apart and 20 inches between the rows. Chinese Cabbage is much milder in taste than ordinary cabbage, it is used boiled as well as raw in salads or made into delicious cold slaw.

CHIH LI—Earliest of the Chinese group. Heads long, solid, white, shaped like a roller, two feet in length. The best for high class trade. Pkt. 10c; oz. 30c; lb. \$2.00.

CHINESE CABBAGE WONGBOOK—Heat and drought resisting variety, forming large, broad and heavy heads one third shorter than those of the regular PE TSAI. Of very high quality. Pkt. 10c; oz. 30c; lb. \$2.00, postpaid.

PE TSAI—When fully matured measures about 15 inches high and 3 or 4 inches in diameter. The leaf stems are white, as if they had been blanched, and from 1½ to 2 inches broad. The leaf when expanded is about 10 inches across, of a light green color, heavily veined and crinkled, like Savoy Cabbage. Pkt. 10c; oz. 30c; lb. \$2.00, postpaid.

A GREAT HELP

to every gardener is information pertaining to growing vegetables and to the business of market gardening in general. There is an excellent paper published in Louisville, Ky., that really informs. If you are a market gardener you will be money ahead if you will read that paper. Address: Market Growers Journal, Louisville, Ky.

Ours is the most critical trade—gardeners and florists. We cater to the wise and experienced. We give value. Among our customers are the foremost florists and market gardeners.

Cardoon—Large Smooth

Stalks thick, very fleshy, large and without spines. The best variety. The blanched stalks are a real delicacy either boiled and served with butter sauce or smothered in butter or olive oil and flavored with sliced onion or with a little garlic. Easy to grow. Sow the seed early in the Spring set out the plants when the weather is settled, 2 feet apart each way and blanch in the same way as celery. To be really good and tender cardoon must be well blanched. Pkt. 10c; oz. 25c; lb. \$2.00, postpaid.

TOURS SPINY CARDOON—Produces heavy stalks and in spite of its spines is popular with many who are partial to this vegetable. Pkt. 10c; oz. 25c; lb. \$2.00.

Chives—Schnittlauch

This vegetable is a perennial plant growing in thick tufts and is related to the onion but never forms a bulb. The edible part is its grass like, deep green, hollow leafage. The leaves finely cut are used for flavoring soups, scrambled eggs or are mixed with cottage cheese. The leaves can be cut throughout the summer till frost. Their flavor is onion like, very mild and pleasant. Pkt. 10c; oz. 60c. Plants: 25 for 25c; 60c per 100, prepaid. \$3.50 per 1000, not prepaid.

Dandelion

Sow in the spring in drills quarter of an inch deep and foot apart, thin out the plants to 6 inches apart. Cultivate. The crop is ready the following spring. You can also sow the seed in June and up to middle of July. Mix some radish seed with the dandelion to mark rows for early cultivation. Your crop will be ready the following spring. To improve the quality, blanch by covering the plants with boards. Dandelion is used as salad, prepared like spinach, etc., and is rapidly gaining in popularity. A superior strain placed on the market is bound to sell with profit to the grower in most any market.

MAMMOTH THICK LEAF DANDELION—Of robust growth, plants heavy, leaves thick of superior quality. Pkt. 10c; oz. 40c; ¼ lb. \$1.25; lb. \$5.00.

CHOP SUEY GREENS—In every way a new vegetable, with a flavor not found in any other "greens." See novelty pages.

HORSE RADISH

CULTURE—Plant in rich soil, foot apart in rows. Plow the field early in the Spring, allow 10 days for the soil to settle then take a stick, drive this into the ground in a slanting way, place your sets in the openings, then firm the soil. Using stick in planting is very important as well as placing the sets into the openings straight. If the sets get bent while being placed in the openings you will get crooked roots that are of far less value than long straight roots. The bulk of the crop is made in the fall, while the weather is cool therefore wait with the digging to the last—dig just before heavy frosts. When making your own sets see to it that they are free from black spots, 8 to 12 in. long and about the thickness of a pencil. It takes 15 thousand sets planted 3x1 to set an acre.

New Bohemian

Also called Maliner Kren. It originated near Malin, in Bohemia, where it has been cultivated for many years. Every year immense quantities of the roots are exported to all parts of Europe. The roots are very large and the flesh snow white. It matures somewhat earlier than the ordinary kind. The greatest value of this variety lies in the fact that it is very hot to the taste and at the same time agreeable and sweet. Sets ready for planting. Dozen 30c; 50 for 65c; 100 for \$1.25, postpaid. 1,000 roots \$8.00, unprepaid.

COLLARD

Georgia White Cabbage

A cross between cabbage and collard with a flavor like cabbage and heading up like cabbage. It never winterkills and the firm heads which are almost as large as those of cabbages can be left on the plants and harvested during the winter as needed. The heads are round and either raw or boiled delicious in flavor. More tender and whiter than the Blue Stem variety and equally as cold and heat resistant. Pkt. 5c; oz. 10c; lb. 80c.

Georgia Blue Stem

The old popular variety, very tall and long stemmed leaves far apart. The leaves can be cropped and eaten, as the plant forms new leaves again. Pkt. 5c; oz. 10c; 1 lb. 80c, postpaid.

Collard Carolina Short Stem

Short stemmed, leaves large, spreading, fine flavored. Hardy and drought resistant. Popular upon first trial. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 80c; 10 lbs. \$7.50, prepaid.

CHIVES A PAYING CROP

Do you know that you could sell lots of chives if you are located near a good sized town? In many cases the demand is more than the supply. Sow chives in the spring to get sturdy plants by fall. Leave them outdoors, they will not winterkill and about the middle of February spade out and divide the clumps so that one dozen clumps will fill out an ordinary flat, place flats in the hot bed or a greenhouse and in two weeks your chives will be 8 inches tall and ready for the market. In our town the growers get \$1.00 per flat and hundreds of flats are sold every spring. The first flats go to the market late in February when there is not much else to sell from the garden.

Do you know that we are the actual growers of many seeds we sell?

CRESS

CRESS possesses a pleasant, slightly pungent flavor which is especially pronounced in watercress. Watercress besides being slightly pungent has a certain sort of perfumed taste which is hard to describe and which is very pleasant to the palate. Used as salad and for garnishing.

WATER CRESS—For growing along banks of ponds or streams. Easily raised from seed and once you start a plantation the plants will spread and you will have cress to cut forever. Pkt. 10c; oz. 30c; ¼ lb. 85c; lb. \$3.40.

CURLED GARDEN CRESS—A small curled plant with a pleasant slightly pungent flavor. Sow the seed early in spring. Pkt. 5c; oz. 10c; lb. 60c.

UPLAND CRESS—Similar to Water Cress but can be grown in any garden. Leaves smooth. Pkt. 5c; oz. 10c; lb. 80c.

GARLIC

Bavarian Garlic

The bulbs of this garlic are larger than those of the common variety, and keep very long. Selected fine sound bulbs. ¼ lb. 13c; ½ lb. 25c; lb. 50c, postpaid.

CORN SALAD

Large Green Cabbaging

The whole plant makes an excellent and distinct salad. The seed is sown at the end of summer or autumn, in any kind of soil and the plant produces leaves from October to Spring, without requiring any attention or protection. Pkt. 5c; oz. 10c; lb. \$1.00.

CHERVIL

(Koerbel-Cerfeuil). A vegetable similar to parsley, but handsomer. Used for flavoring soups and salads, also for garnishing. Has a strong flavor and perfume. Pkt. 5c; oz. 10c; lb. \$1.00, postpaid.

We sell half and quarter pounds at pound rate, 5 lbs. or over at 10 lb. rate, 25 lbs. or over at 100 lb. rate.

Carrots

CULTURE—1 oz. for 100-foot row, 4 lbs. per acre.

Carrots are very hardy and can be planted as soon as you stir up from 2 to 3 inches of top soil. Have the rows 14 inches apart and thin to about 4 inches apart in the rows. Cover the seed half inch deep and tramp the ground firmly which insures quick germination. Cultivate frequently.

HIGH CLASS CARROT SEED

Our carrot seed grows roots that have no hard core, are rich in color of uniform shape without the rosin-like smell characteristic to this vegetable. Prepared for table, the tenderness, sweetness and delicious flavor makes it a dish fit for the gods. Your customers can tell good carrot from poor. Raise the finest carrot there is from our seed, to make them come again.

BEST CARROT

I want the best carrot there is. That is what the customer says when he comes in person to our place.

There is no such a thing as BEST in carrots, or most other vegetables. Carrots differ in size, shape, earliness, keeping qualities, amount of tops, color and taste.

Every variety of carrot we offer is high class. None has qualities that would answer all purposes. Therefore plant French Forcing if you want carrots ahead of all others in earliness and if willing to grow carrots under glass. If you want the earliest carrot for bunching with an appealing shape and good color you must grow Gold Coin, because that is the best variety for early sales. If you want highest quality and fair crop and a carrot that will keep over winter Nantes is what you want. If you want a carrot that will give you immense crop and will keep, properly stored, till spring Oxheart is the sort and if you want a large stump rooted carrot the kind that sells in any market, is good for growing on a large scale, South or North, you want Danvers or Chantenay.

CARROT IMPERATOR

Of exceptional merit. A type of Chantenay, but the roots are better filled out, not tapering quite as much as old Chantenay. They are of extra fine appearance, deep orange, of fine texture, tender and sweet. Pkt. 10c; oz. 15c; lb. \$1.20.

CARROT SELECTED DANVERS

The roots are almost cylindrical, stump rooted, of fine rich, orange red color. Flesh fine grained, crisp, tender, with a very little core. A very heavy cropper, 30 tons of roots per acre being no exceptional crop. It is a very important variety with market gardeners. Realizing this, we are constantly improving our strain of this carrot, and can definitely pronounce it the finest in cultivation. Pkt. 10c; oz. 15c; lb. \$1.00, prepaid.

GUERANDE OR OXHEART

Roots short and very thick, only about 6 inches long and fully 4 to 6 inches in diameter. Grows very rapidly and the roots attain a weight of more than a pound each. Excellent in quality. Will prove quite profitable for the market gardener. Pkt. 10c; oz. 15c; lb. \$1.00, postpaid.

CARROT EARLY CHANTENAY

First class variety for bunching, shipping as a bushel carrot and for storing. Half long, abruptly stump rooted or square at the end, smooth, of rich red-orange color in and out that is retained even when the carrots are boiled. Flesh firm, fine grained and very sweet. Tops medium size just right for tying. Can be bunched at any time after it has made half of its growth. Average yield per acre 30 tons. Our seed of this as well as all carrots is EXTRA SELECT. Pkt. 10c; oz. 15c; lb. \$1.00.

CARROT AMSTERDAM FORCING

Extra early variety, forming handsome, smooth, medium large, stump-rooted carrots of deep orange color. Pkt. 10c; oz. 15c; lb. \$1.20.

CARROT NANTES

Roots, cylindrical, smooth, bright, orange, becoming yellow in center, but with no distinct core. Of the finest quality and one of the most symmetrical and handsome of the medium sized sorts. Pkt. 10c; oz. 15c; lb. \$1.00, postpaid.

ST. VALERY—This is an extra fine variety, an improvement over Imp. Long Orange. Pkt. 5c; oz. 10c; lb. 80c, postpaid.

CHANTENAY SPECIAL—Same as regular Chantenay with somewhat shorter tops and very small core. The core is nearly the same color as flesh. Easy to tie. Fine for long distance shipping. Pkt. 5c; oz. 10c; lb. \$1.00; 10 lbs. \$9.00.

FRENCH FORCING—Of all carrots this is the earliest. Roots round, 2 inches in diameter, orange red, sweet, of highest quality. Pkt. 10c; oz. 15c; lb. \$1.00.

CARROT GOLD COIN—See novelty pages.

Cauliflower

CULTURE—1 oz. for 3,000 plants, $\frac{1}{4}$ lb. per acre.

For an early crop sow March 1st in hot beds. For late crops sow in the early part of June in rows a foot apart. When plants are well developed they are set in rows 4 feet apart and 2 feet apart in the rows. If possible use liquid manure and apply around the roots of the plants as soon as growth starts. This will make wonders. You hardly can give cauliflower too much fertilizer. When heads begin to form, gather the leaves loosely together and tie them at the top to prevent the sun from injuring the heads.

WHICH IS THE BEST CAULIFLOWER?

The finest **EARLY** Cauliflower is at present **Early King**. It heads up all at one time and two weeks after its first head is formed, the whole crop is out of the way, cut and marketed. If you want an early cauliflower for both early and later **Danamerica** is extra good.

To cut early and then over an extended period of time **Six Weeks** and **Snowball** are good also. **Dry Weather** is a fine sort that is easily raised. For the late crop **Autumn Giant** is hard to beat.

CAULIFLOWER DANAMERICA

This is now the finest type of **Snowball** cauliflower, forming heads real early in the season and then over an extended period of time. In other words a type that does not come all at once.

In trials extending over several years **Danamerica** cauliflower produced under especially adverse conditions, hot and dry weather prevailing, 75% first grade heads when other strains of **Snowball** produced only 45 to 50% of salable heads. This fact makes **Danamerica** the finest and surest heading strain of **Snowball** type of cauliflower. Our seed is of Danish origin grown by one of Denmark's greatest cauliflower seed specialists. Pkt. 20c; $\frac{1}{8}$ oz. 35c; $\frac{1}{4}$ oz. 60c; oz. \$2.40; lb. \$24.00.

CAULIFLOWER SIX WEEKS

Six Weeks is a dwarf type of cauliflower, producing perfectly white, heavy heads, six weeks after transplanting and although the heads are large can be set close together, about 18 inches apart is all the room it needs. A fine variety for an early as well as for a fall crop. Pkt. 15c; $\frac{1}{4}$ oz. 40c; oz. \$1.60; lb. \$20.00.

EARLIEST DWARF ERFURT

Popular with many gardeners. Quite similar to **Snowball**, except that it is a trifle earlier. Under good treatment every plant produces a fine large snow white head. Pkt. 20c; $\frac{1}{4}$ oz. 40c; oz. \$1.60; $\frac{1}{4}$ lb. \$4.00; lb. \$16.00, postpaid.

DRY WEATHER OR DANISH GIANT

Reaches perfection where other sorts fail. Especially valuable in dry seasons and also in the South. It produces very large, perfectly-formed white solid heads, maturing about a week later than **Snowball**. The cauliflower will head when most other sorts would be a failure. Pkt. 20c; $\frac{1}{4}$ oz. 45c; oz. \$1.80; $\frac{1}{4}$ lb. \$5.00; lb. \$20.00, prepaid.

CAULIFLOWER EARLY KING

THE EARLIEST CAULIFLOWER IN THE WORLD

AUTUMN GIANT Reliable late sort, producing very large, heavy and fine heads. Popular on the Pacific Coast, where it is known under the name of **California Wonder**. Pkt. 10c; $\frac{1}{4}$ oz. 15c; oz. 60c; lb. \$5.00.

LARGE LATE ALGIERS A vigorous variety that will stand lots of neglect and is certain to head. Heads well formed, very large and heavy, perfectly white, and handsome. Succeeds in all parts of the country and can be depended upon to produce fine heads of extraordinary large size during fall months. Pkt. 10c; $\frac{1}{4}$ oz. 15c; oz. 60c; lb. \$5.00.

ITALIAN GIANT—Late cauliflower, very large and heavy. Pkt. 10c; oz. 60c; lb. \$5.00.

CALIFORNIA WONDER—Same as **Autumn King**, an excellent late cauliflower. Pkt. 10c; oz. 60c; lb. \$5.00.

CAULIFLOWER SUPER SNOWBALL

An extremely early, new variety of the **Snowball** type. Matures evenly, producing solid, pure white, finely grained heads of great depth and superbly beautiful in appearance. The seed we offer is originator's stock. Pkt. 20c; $\frac{1}{4}$ oz. 55c; oz. \$2.20; $\frac{1}{4}$ lb. \$7.00; lb. \$28.00.

SNOWBALL CAULIFLOWER

Produces white, solid heads, 9 to 14 inches across, and deep in proportion. That is our strain of **Snowball**. Cauliflower is a vegetable that has to be grown with certain care. It must be sown and transplanted at the right time, and planted in well-prepared rich soil. This is done our seed will be found very superior. Pkt. 20c; $\frac{1}{4}$ oz. 40c; oz. \$1.60; $\frac{1}{4}$ lb. \$4.00; lb. \$16.00, postpaid.

CALABRESE BROCCOLI

The plants, about 30 in. high, produce many branches terminating in cauliflower-like rosettes, which together with the heavy fleshy stalks are the edible parts of the plant. Exceedingly tender, buttery in flavor, a delicacy of the high-ets order. Prepare for table same as cauliflower. For an early crop sow March first under glass and in May or early June for a late crop. Plant in rows 3 ft. apart and 18 in. apart in the rows. For market cut the heads with about a foot of stalk and to 2-3 in a bunch.

SPECIAL STRAIN. There are many varieties of Broccoli now on the market. We tried them all. The strain we offer is the best there is and if you are in need of Calabrese Broccoli and will try our strain you will find that it is the most profitable strain in existence. Pkt. 10c; oz. 80c; lb. \$8.00. More about Broccoli on page 17.

Celery

CULTURE—1 ounce for about 2,500 plants, 1 lb. required for one acre.

As celery seed is very slow to germinate we suggest planting the seed in hot beds covering about $\frac{1}{8}$ inch deep, wetting the bed thoroughly and covering with burlap to hold the moisture and hasten the germination. Sow about March 1. When plants come up remove the burlap and keep the bed ventilated to prevent damping off. When the plants are about 2 inches high transplant in the hot beds 3 inches apart each way. When they are 4 inches high cut off the tops which will induce stockiness. The plants will soon grow again and when they get 6 inches tall set out in the open in trenches 6 inches deep and 6 inches apart in the trenches cutting off the outer leaves pressing the soil firmly around the roots. When the plants are nearly full grown they should be handled which is done by gathering the leaves together and drawing the dirt around the plants to one-third of their length taking care that none of the dirt falls between the leaves so that the plants will not rust or rot. After a few days draw more dirt around the plants and repeat this process every few days until only the tops of leaves are visible. This insures perfect bleaching.

Some growers use boards, others bleach their celery by wrapping up the individual plants in ordinary newspaper.

TALL GOLDEN SELF BLANCHING CELERY

Highly disease resistant, earlier, taller and heavier than the original French strain. Of better appearance, very high in quality and a remarkably good keeper. Has met with favor in every market. Pkt. 10c; oz. 60c; lb. \$6.00.

PLANT GROWERS As an aid to our customers that come to Council Bluffs from points miles around looking for plants we are giving the names of growers in our city: C. H. Brattain; L. A. Diller; Mrs. Mary Hartman; Frank Hecht; Peter Jorgensen; George E. Linden; Herman Linden; Mandarin Gardens; Henry Meyer; V. H. Neilsen; E. L. Wilcox; J. F. Wilcox & Sons.

No matter what plants you may be in need of, whether it be tomato or cabbage plants, pansies, salvias, cinerarias, primulas, snapdragons or hardy perennial plants, you will get them from some of the growers named above.

DWARF GOLDEN SELF BLANCHING—Plants short, stocky with well filled heart, ribs broad. Best French grown seed. Pkt. 10c; oz. 60c; lb. \$6.00.

Which Celery Is the Best? The earliest and best paying variety is Florida Golden. Golden Self Blanching, a little later variety, is firmer, slightly better keeper and withstands unfavorable weather well. The tall strain is the coming variety for long distance shipping. Trade Builder, is high class in quality and always profitable. Giant Pascal makes finest looking plants, heavier than most other varieties of attractive deep green color and is the best variety for growing plants for sale to the general public. A wealth of information is contained in Farmers Bulletin No. 1269, "Celery Growing," which you will get free, if you will write to the Department of Agriculture, Washington, D. C.

SANFORD SUPERB CELERY

Same as Easy Blanching or Easy Bleacher. The finest "green celery" for an early crop, bleaching readily with boards. The thick solid and meaty stalks blanch to pure white with bright green tops. Our strain is of outstanding quality. Pkt. 10c; oz. 45c; lb. \$3.20.

GIANT PASCAL or WINTER KING CELERY

Large, solid, crisp and of sweet nutty flavor. Color, ivory white, long thick and stringless, while the heart is golden yellow and very attractive. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 50c; lb. \$2.00, postpaid.

FRENCH'S SUCCESS A late variety, compact and short in stem so that the plants may be well earthed up for blanching while growing close together. The foliage is dark green. The heart is large, solid and is formed early. The stalks become, when blanched, almost white or very light creamy yellow, thick, yet brittle, without stringiness and of good quality. Remains firm, solid and in fine condition until late in spring. Pkt. 10c; oz. 30c; $\frac{1}{4}$ lb. \$1.00; lb. \$4.00.

WINTER QUEEN—Late, long keeping variety, quality very high. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 50c; lb. \$2.00, postpaid.

CELERY GOLDEN PLUME—Of Golden Self-Blanching type, but heavier, more attractive in appearance, stalks smooth without ridges, bright and lustrous, hearts heavy and full. Early. Good keeper. Pkt. 10c; oz. 45c; lb. \$4.00.

GOLDEN PHENOMENAL—A highly improved Golden Plume, taller, heavier, more compact, easily blanched. Pkt. 10c; oz. 60c; lb. \$6.00.

CELERIAC GIANT PRAGUE

Round, smooth roots with very few side roots. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 50c; lb. \$2.00, postpaid.

PRAGUE MODEL CELERIAC Larger in size than the old Giant Prague, has small rootlets, and few in number, and is of fine flavor with flesh nearly snow-white. Pkt. 10c; oz. 30c.

LARGE ERFURT CELERIAC—Roots large, smooth and almost round. Pkt. 5c; oz. 20c; lb. \$2.00.

CELERIAC—In order to get large, firm, solid, tender and smooth bulbs, celeriac must be grown in very rich soil. Soil heavily fertilized with WELL rotted manure is the thing. Frequent cultivation is essential and the crop must never be allowed to suffer from lack of moisture, in fact celeriac can hardly be overwatered. Never use fresh manure as this tends to make the bulb too big and hollow inside. Celeriac is a paying crop in localities with large German or Bohemian population. The Germans are extremely fond of it using it boiled, cut in cubes in combination in potato salads. Celeriac is a delicacy of the highest order.

GREEN CELERY—Growers call all varieties of celery that AFTER blanching retain green tops "green" celery. To this class belong the following varieties listed by us: Easy Blanching, French Success, Giant Pascal, Sanford Superb, Trade Bulder, Winter Queen. All others are "yellow" celeriacs.

Sweet Corn

One Pound for 150 hills, 10 to 12 lbs. in hills for an acre.

CULTURE—Plant in rows 3 feet apart in hills $3\frac{1}{2}$ feet apart, drop in each hill 4-5 seeds, later thin out to two plants in each hill. Closer planting than this means, even on rich ground, less and smaller ears. Plant deep, 3 to 4 inches, so that in case of frost the plants will have a chance to come up from the root which unless the frost is very severe are unhurt.

Which Sweet Corn Is the Best? Best varieties in yellow are: Golden Early Market the earliest, Sunshine, extra early and large eared, Golden Rod with heavy ears of very high quality, Whipple's Yellow, a wonderful variety, ears of largest size sweet and tender. In white Sweet Corn the leaders are Mayflower, Early Reliance, Vanguard and September Morn.

The finest sort for the South is Kendell's Early Giant. Southern growers should also try Early Adams which is a field corn variety passing for sweet corn, lacks quality but is very early. Seldom attacked by the worm and a good seller.

SWEET CORN EARLY RELIANCE

Ears of Good Size—Quality First Class
EXTRA EARLY

Ready for the market days ahead of Evergreen, ears the size of Evergreen and every bit as good as Evergreen in quality and sweetness.

Ready for the market days ahead of any other variety of anywhere near its size. Not only is Reliance distinctively earlier but the ear is of good size with white grain of really good quality. The plant growth seldom exceeds four feet in height, the ears borne close to the ground 7 to 8 inches in length, blocky in shape and well filled with glistening white grains in rows of 12 to 14. A real sweet corn, which we recommend unhesitatingly to all gardeners being convinced beyond the shade of doubt that Early Reliance will make money for them and help to make the business of gardening more interesting and worth while. Pkt. 10c; lb. 40c, prepaid. F. O. B. 10 lbs. \$2.50; 100 lbs., write for price.

GOLDEN EARLY MARKET

A variety that will be found highly profitable. Ready 10 to 14 days before Golden Bantam, ears 9 inches long 12-14 rowed, kernels broad, meaty, sweet, golden yellow in color. Plants 6 feet tall, sturdy and vigorous. In edible qualities the equal of Golden Bantam, ears larger, ready much earlier two to three ears on a stalk, a variety that as we said will pay to grow. Pkt. 10c; lb. 40c; 10 lbs. \$2.80.

SWEET CORN EARLY GOLDEN ROD

Early—Ears Long—Heavily Productive

A wonderful new, early yellow-eared variety. Ears from 8 to 10 inches in length, with twelve to eighteen rows of deep, golden yellow, lusciously sweet kernels. The kernels are in absolutely straight lines on the cob and nicer looking ears are hard to imagine. Ready 3 to 4 days after Golden Bantam and in quality no other sweet corn is its equal. A variety that will sell no matter at what time it is placed on the market. The ears of Golden Rod remain tender, in milky condition longer than any other known sort and the stalks bear never less than two perfect ears and quite often three. We knew about the existence of Golden Rod Sweet Corn for a number of years but it was impossible to secure the seed. Now we have the seed and we know that by offering you this high class variety we are rendering you real service. Pkt. 10c; lb. 40c, prepaid. F. O. B. Council Bluffs: 10 lbs. \$2.80.

WHIPPLE'S EARLY YELLOW—Ears almost twice as large as those of Golden Bantam, fully as sweet and tender, three days later. Pkt. 10c; lb. 40c, prepaid. Not prepaid: 10 lbs. \$2.80.

GOLDEN GIANT—Early, large eared yellow sweet corn of exceptional quality. Selected stock. Pkt. 10c; lb. 40c, prepaid. Not prepaid: 10 lbs. \$2.80.

NARROW GRAIN EVERGREEN—Long heavy ears 18-20 rowed deep narrow grains, highest quality, few days earlier than Stowell's. 10 lbs. \$2.90.

TRUCKER'S FAVORITE—A late white sort of the Adams type, ears large and handsome, not very sweet therefore not attacked by worms, popular in the South. 10 lbs. \$1.50.

Sweet Corn September Morn—Ears Extra Large, Quality Extra Good

SWEET CORN VANGUARD

An extra early, white Sweet Corn, ready for the market three days after Golden Early Market, producing 12-rowed ears about 10 inches long, enveloped in an immensely thick and heavy husk. Of good quality, fairly sweet. All who tried this corn report very satisfactory returns. We know that Vanguard will make money for you and recommend strongly a trial. Pkt. 10c; lb. 40c, prepaid. Not prepaid: 5 lbs. \$1.20; 10 lbs. \$2.20; 50 lbs. \$10.00.

SILVER KING—A variety of field corn used as table corn in the South. Produces very large crops of perfectly shaped, snow-white ears. Almost immune to the attacks of worms. Extra heavy cropper. 100 lbs. \$5.00; 10 lbs. 75c.

EARLY MAYFLOWER

Produces on stalks 4 feet tall, two fully developed, large and heavy ears which are twelve rowed with white grains of fair depth and width. In season Mayflower closely follows Early Reliance, in other words it is an extra early corn and considering its earliness its quality is high. The ears have long overlapping husks and appear to be larger than they really are. Pkt. 10c; lb. 40c, prepaid. Unprepaid: 10 lbs. \$2.80; 25 lbs. or over \$2.20.

SUNSHINE SWEET CORN

A new, yellow sweet corn, twelve rowed, producing on stalks about 7 feet tall 2 or 3 ears, heavier in size than Golden Bantam, with broad kernels, very sweet and tender, 6 to 10 days ahead of Golden Bantam. Will there be a demand for a corn of this type when brought to the market 10 days ahead of Golden Bantam? You cannot ignore a corn like that. Pkt. 10c; lb. 40c, prepaid. F. O. B. 10 lbs. \$2.80.

GOLDEN BANTAM

Claimed to be the richest and sweetest of all Sweet Corns. Small ears, very symmetrical, with yellow kernels which at first give the impression of field corn, but after tasting it, it proves to be real Sweet Corn and of exceptionally good quality. In season it is medium-early. Pkt. 10c; lb. 40c, prepaid. 10 lbs. \$2.60.

WHIPPLE'S EARLY WHITE—Two weeks earlier than Evergreen, producing ears fully as long and heavy as those of Evergreen. Quality excellent. Heavily productive. Pkt. 10c; lb. 30c, prepaid. Not prepaid: 10 lbs. \$2.50.

PRICES FOR SWEET CORN

SEED ARE TERRIBLY HIGH. This is bad for you and also for us. The crop was almost a total failure owing to the drought. What to do? Restrict your acreage. You will have less to sell but you will get a decent price for what you will raise.

The same is true when it comes to Onion and Cucumbers. The crop of the two was extremely light. In the case of Onions it was the drought and Cucumber crop was cut by drought and by hail.

The shortage in Sweet Corn is so real that we cannot quote prices on large lots excepting Vanguard of which we have a fair supply.

If in need of Sweet Corn in quantity please write for prices. We will do our best to supply the seed at lowest market prices.

SEPTEMBER MORN SWEET CORN

AN EXTREMELY LARGE, VERY SWEET VARIETY

SEPTEMBER MORN has ears fully twelve inches long and at times they reach fourteen inches in size. They are six to seven inches in circumference and have sixteen rows of very deep kernels. It is really immense in size and combines with this an unusual feature—really high quality, being tender and extraordinarily sweet.

SEPTEMBER MORN is both a heavy yielder and has a very thick husk. This latter feature makes it very resistant to worms and there will be little if any loss from this source.

SEPTEMBER MORN matures late in August or early in September, a time when hardly any sweet corn is on the market. Here in Council Bluffs it retails for 20c to 30c the dozen ears. And it is such a ready seller; simply display a few ears with the husks partly stripped off and the corn sells itself. After one or two trips you'll find the demand well established and your whole crop will sell without further effort.

Get your order for seed in early. Pkt. 10c; 1 lb. 40c, prepaid. Not prepaid: 5 lbs. \$1.45.

SWEET CORN—Kendell's Early Giant

Remarkably large in ear for a second early sort and very popular in some localities as a market sort. The stalks are about 6 feet high, the ears about 9 inches long and as a rule twelve rowed. The grain is white, rather broad and shallow and the quality is very good. Pkt. 10c; lb. 30c, postpaid. 10 lbs. \$2.30; 100 lbs. not prepaid. **COUNTRY GENTLEMAN**—An especially fine quality corn. Cob small, densely covered with irregular rows of long, pearly white "shoe peg" grains, quite sweet. Pkt. 10c; ½ lb. 20c; 1 lb. 40c, postpaid. Not prepaid: 5 lbs. \$1.20; 100 lbs. not prepaid.

SWEET CORN

	10 lbs.	100 lbs.
ADAMS EARLY. Extra early, quality poor.....	\$1.50	\$13.00
BANTAM EVERGREEN. Medium early, a cross between Golden Bantam and Evergreen, ears good sized, quality very good.....	2.80	
HOWLING MOB. Medium early, ears large, quite sweet. Very popular in the East.....	2.30	
STOWELL'S EVERGREEN. Late, quality excellent, heavy yielder	2.60	
ANY OF THE ABOVE: Pkt. 10c; ½ lb. 20c; 1 lb. 40c, prepaid. Prices for 10 and 100 lbs. are not prepaid.		

POP CORN—Japanese Hulless

Pops 40 to 50 Per Cent More Than Other Varieties

A dwarf growing Pop Corn. The stalks are only about 2½ feet tall, each stalk averages 4 ears, and the corn can be popped the day it is husked. It pops without a hard kernel and is the tenderest Pop Corn known. The ears are small, so are the kernels, but on account of the excellent quality of the popped corn, it is selling readily in the stores and at astonishing prices. Pkt. 10c; lb. 40c, postpaid. Not prepaid: 10 lbs. \$1.40; 100 lbs. not prepaid.

Culture—Wherever field corn grows, pop corn, will. Can be planted like field corn 4 plants to each hill or drilled in rows 3½ feet apart and 10 inches apart in the rows. Four pounds of seed plants an acre. To make money raise pop corn every year, sell direct to the stores and establish a steady trade. Even when sold to jobbers or to elevator men there is good money in it and like with everything else there are years when the price is very low for pop corn and again when the prices are high and the profits satisfying.

POP CORN T N. T.

This new Pop Corn is taking the country by storm. Introduced only three years ago, its fame has spread far and wide. It has been christened all kinds of names such as Dynamite, Yellow Witch, Sunburst, Golden Giant, Mushroom, etc. The initials T. N. T. stand for Tender, Nutritious, Tasty which this corn is, in a high degree. It pops exceptionally large, the popped corn has a creamy yellow cast, making it appear as though it was buttered. It is a yellow corn, produces large heavy ears and to make it short, it is the finest and most valuable variety at present and no one will make a mistake to get acquainted with it. It will be the leading pop corn very soon. Pkt. 10c; lb. 40c, prepaid. Not prepaid: 10 lbs. \$1.60.

How to Make Dill Pickles

Freshly gathered perfectly formed and sound, carefully washed cukes are placed in jars or barrels in layers with layers of dill either fresh or dried and the jars filled with brine. For quick consumption make the brine by adding pint of vinegar and 4 ozs. of salt to each gallon of water; if you wish the pickles to keep for a longer time, use twice as much vinegar and salt. Place a board with a weight on the top of the cukes, to keep them submerged. In warm weather the pickles will be ready in 8-10 days, in cool weather it takes as long as 4 weeks.

DILL—The green leaves are used for pickles and for flavoring sauces. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 80c.

AN IMMENSE CROP of pickling cucumbers will you get by cutting off the tips of vines and keeping them cut to the length of 4 ft. At ALL times pick your vines CLEAN. If the market price is not below the cost of production, sell, otherwise feed your cukes to pigs. Vines picked clean will keep on bearing. Should the price be what it should be, you will have cukes to sell. Make 3 to 4 successive plantings. If your first planting goes haywire, there are 3 more plantings to fall back upon. As they say, there is more than one way to skin the cat. Every way has to be used nowadays if one does not want to go crazy trying to figure out how to meet the taxes.

Kale or Borecole

CULTURE—Half ounce of seed will sow a row 100 feet; 1 lb. to the acre.

In the South where this vegetable is very popular, sowing is usually done from August 15th to October 15th. In the North sow early in the spring and again in the early part of August. Have the rows 18 inches apart and 12 inches apart in the rows.

Which Kale Is the Best?

Evergreen Gem is the choicest of all curly Kales at present, highly profitable and the only variety to use, when grown on a large scale for shipping, etc.

KALE deserves far more attention than it has commanded thus far in this country. It is easily grown, being of the cabbage family and handled in exactly the same way. It forms no heads. The flavor is distinct and not readily compared with that of other vegetables though some contend it resembles cabbage in this respect.

KALE EVERGREEN GEM

Of all Kales, Evergreen Gem is the best and most profitable variety. When fully developed (50 days from date of sowing) the plants stand 18 to 24 inches high, of very dense growth, very spreading and rest directly on the ground. Being so to say anchored to the ground are not affected by high winds. The leaves are as heavily curled as the best strains of curled parsley, very attractive in appearance of distinct, intense, deep green color with a bluish sheen. The leaves never turn yellow even after being exposed to several frosts. Markedly different from other Kales as it branches out of the bud instead of from the stalk, producing many more leaves than the old varieties and is unsurpassed in yielding qualities, 500 barrels per acre being the average crop. The leaves being very densely curled have high carrying qualities for long distance shipping. Try this Kale. We assure you that you will find it the finest and by far the most profitable variety. For best results plant in rows 30 in. apart, 8 to 10 in. apart in the rows, thinning out when the plants are 4 to 5 inches tall. Pkt. 5c; oz. 10c; ¼ lb. 25c; lb. \$1.00, prepaid.

BLUE SIBERIAN KALE

Special market garden strain of vigorous growth and exceptionally attractive bluish-green color. Beautifully curled and crumpled at the edges. Withstands severe winter conditions. Pkt. 5c; oz. 10c; lb. 80c; 10 lbs. \$6.50, prepaid.

DWARF GERMAN—Of compact habit, moss curled, bright green kale. Hardy but will not stand temperature below zero. Pkt. 5c; oz. 10c; lb. 80c; 10 lbs. \$7.50.

TALL SCOTCH KALE—Curled, leaves plume-like, very attractive. Pkt. 5c; oz. 10c; lb. 80c; 10 lbs. \$7.50.

BROCCOLI HEADED TURNIP

Of same usefulness as Seven Top Turnip, of superior quality and high class variety for spring planting. Produces numerous cauliflower-like heads on stalks 18 inches high, also quantities of succulent, light green, tender leaves, resembles the leaves of Grand Rapids lettuce. Sometimes called Broccoli Raab. Of same usefulness as spinach or other "greens." Pkt. 5c; oz. 20c; ¼ lb. 50c; lb. \$2.00.

TENDERGREEN

A new vegetable resembling curled mustard but much heavier and more bulky. Prepared like spinach makes delicious greens. Develops in very short time, producing several crops in one season, withstands great amount of cold as much as Bloomsdale spinach or mustard also withstands summer heat, slow to shoot to seed. Leaves curly, very light green, very attractive. Pkt. 5c; oz. 10c; lb. 80c, prepaid.

You can order all seeds priced at 45 cents per oz. or over in quarter and half oz. lots at oz. rate. Quarter and half pounds at pound rate. Five pounds or over at 10 pound rate. 25 pounds or over at 100 pound rate.

Cucumber

For an early crop plant in hot beds on pieces of sod 6x6 inches and three inches thick. Plant 6 seeds in the center of each piece and when true leaves appear and danger of frost is over move plants to the field, put them in rows 5 feet apart and 3 feet apart in the row. Most gardeners plant the seed in open ground about May 10th, dropping 10 to 15 seeds in each hill in rows 5 feet apart and 3 feet in the row. When the plants get their true leaves thin out to three in each hill. Give frequent but shallow cultivation and if the crop is attacked by beetles give light application of air slacked lime mixed with soot and road dust. 1 oz. to 50 hills, 2 lbs. per acre.

CULTURE UNDER GLASS—Most crops under glass are started from early January up to April. Planted in the fall, they are coming rather slow unless the weather is exceptionally bright. Solid beds give best results, benches 6 to 8 inches deep filled with rotted sod mixed with about one-fourth cow manure give good results also. The temperature should never be allowed to go under 65 degrees at night and for pollenizing bees are needed. If bees do not come from outside, place a bee hive inside. Water only when needed then give a thorough soaking, prevent cold drafts, fumigate with tobacco **LIGHTLY** as a heavy dose would scorch the foliage and if mildew appears use sulphur promptly. Mulch with manure and apply it in liquid form when the vines are showing healthy growth.

Express Cucumber is the most uniform Shaped, Dark Green Early Cucumber Grown.

KLONDYKE—Early, heavily productive sort with short, dark green fruit. Pkt. 10c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.80

ARLINGTON WHITE SPINE—A fine early and productive slicing variety 1 lb. \$1.80; 10 lbs. \$17.00, postpaid.

EVERGREEN WHITE SPINE—Fruit of medium length, dark green. Very productive sort. Pkt. 10c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.80.

Which Is The Best Cucumber?

The best slicing Cucumber is at present **WOODRUFF'S Hybrid**. It is hardy, withstands drought and the ravages of lice better than most cucumbers, is extraordinarily productive and the cucumbers are real beauties. Both for the home or market it is a very valuable variety, also high class for forcing.

EXTRA EARLY EXPRESS is a much earlier variety, in fact one of the earliest of all cucumbers, and for market invaluable, because it yields an immense crop of dark green rather short fruit and is suitable both for slicing as well as for pickling.

EARLY HARVEST is still earlier than Early Fortune and some growers regard it a better paying sort, for an early crop, than Express; others, however, favor Express. Which of the two is better depends to a large extent on the requirements of the market one caters to and the growers themselves must decide this question. Try both and remember that Express and Early Harvest are of value chiefly for an early crop or for a heavy crop of pickles.

JUMBO is an extra fancy sort with long and most beautiful fruit which sells in the market for more than double of other Cucumbers. It is nearly seedless. If you want to raise only one variety choose **EXPRESS**.

Cucumbers require very rich soil for very best results although surprising crops are produced with but little care. A gardener friend of ours recommends fertilizing the surrounding area, to be covered with the vines as well as the hill proper. And he says to cultivate exceedingly shallow. As he has had unusual success in his line, we are passing you this "tip." The government has issued a bulletin, No. 254 Cucumber, and No. 1320, The Production of Cucumbers in Greenhouses; also No. 1563, **CUCUMBER GROWING**, in which every phase of the industry is discussed, which may be had without cost by writing the Secretary of Agriculture, Washington, D. C.

EXTRA EARLY EXPRESS CUCUMBER

EXCEPTIONALLY EARLY DARK GREEN

The most beautiful and the best shipper of all White Spines. It grows from 8 to 10 inches long. It is truly an evergreen, retaining its glossy green color until fully ripe. Bearing small fruit for pickling in 40 days from germination, and large fruit for slicing can be pulled in 45 days. Vine is a strong grower, foliage broad leaved, deep green, close jointed, does not sunburn. Blooms very early at every joint, consequently very prolific. The fruits are very symmetrical and straight and of rich dark glossy green throughout the entire length of the fruit. Our extra Early Express Cucumber is a great profit producer and the Southern Truckers who are shipping to the Northern markets will find this variety as one of the best. Price: Pkt. 10c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.80; 5 lbs. or over at \$1.60 per lb.

DAVIS PERFECT CUCUMBER

First class variety, fruit dark green, somewhat pointed at both ends, of high quality, quite early, deservedly popular with growers all over the country. Measures about 10 inches long and 2½ inches through, average weight 2 lbs. Pkt. 10c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.80.

KIRBEY'S STAY GREEN CUCUMBER

A small, early shipping cucumber, notable for its intensely dark green color. An enormous yielder. Recommended chiefly for the earliest shipping sections, where length is not a necessity. Unexcelled in earliness, color and heavy yielding. Average size 6½x2¼ inches. Pkt. 10c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.80.

IMPROVED LONG GREEN CUCUMBER

Suitable for slicing, and the best variety for big yellow pickles. Fruit handsome, averaging 12 inches in length, dark green, flesh white, crisp and solid. Heavily productive. Highly rust and disease resistant, producing a crop under conditions when other cucumbers fail. Pkt. 10c; oz. 15c; ¼ lb. 50c; 1 lb. \$2.00, postpaid.

CUCUMBER WINDERMoor WONDER

Beautiful in appearance, of dark bluish green color with faint white stripes at the blossom end. Suitable for both the garden and forcing. A healthy, productive and fairly early variety, the fruits averaging 14 inches in length by 2½ inches in diameter and are very symmetrical. An ideal cucumber for the market grower and greenhouse man as a "straight pack" variety for shipment boxed and wrapped in paper, to markets, demanding top notch products where price is no object. The seed we offer is of the highest quality saved only from well developed straight and perfect fruits. Whether you wish to grow it in the open or under glass, rest assured that our seeds are the best money can buy. Pkt. 10c; oz. 15c; 1 lb. \$2.00.

CUCUMBER DELTUS

Deltus is a fancy sort that is equally suitable for growing under glass as well as in the field. The fruit is 8 to 10 inches long, perfectly straight, uniform in diameter, has blunt ends, smooth, rich dark green skin and crisp, tender, solid white flesh that is very deep. It is the darkest green cucumber known. Has very few seeds which are slow to form and this fact makes it a superior slicer. It is an immense yielder; the vines are strong and healthy. Its color and shape insure a good price on the market every time. Pkt. 10c; oz. 15c; ¼ lb. 50c; 1 lb. \$2.00.

Our Cucumber Seed is way above the average in quality

TO SAVE MONEY WRITE US

Whenever you are in the market for large quantities of vegetable or flower seeds write us for special quotations — we will quote you prices ON BIG LOTS that will be hard to beat.

Golden Harvest Cucumber

is a rather short cuke—but for an extra early crop and to win dollars it's just the thing.

Cucumber Golden Harvest

CUCUMBER GOLDEN HARVEST

First in Earliness—Rich Dark Green—Ideal for Market and Shipping

Golden Harvest is the earliest and most profitable dark green cucumber in the world. It is 6 to 8 days earlier than Early Fortune. Golden Harvest is an enormous producer and at all stages of its growth a model in shape, very handsome and attractive.

In color Golden Harvest is an intensely deep green. This inviting color is retained during a much longer period of growth than any other variety, the fact is, that Golden Harvest will not turn its color until it is almost dead ripe.

In shape Golden Harvest is so uniform and so much one like the earlier that in selecting fruits for our stock seed it is difficult to decide which is the best and most perfect.

In size Golden Harvest is only slightly smaller than Early Fortune, to be exact, the size is eight inches long and two and a quarter inches through. Of ample size to satisfy anybody. Being ready at a time when other varieties are just starting to bloom or in first stages of formation, it sells at fancy prices and will show the grower much better profit than the longest and fanciest varieties that ripen late and are brought to the market when everybody has cucumbers for sale. By planting Golden Harvest you will have the market all by yourself, no competition to meet for some 6 to 8 days at least. Golden Harvest is of the highest quality of delicate flavor, fine grained, solid compact flesh, exceedingly crisp and brittle, ideal for slicing. As a shipper Golden Harvest stands very high. Excepting length it has all the qualities desired—extreme earliness, splendid color and the quality of holding its crispness long after it has been picked off the vine. Pkt. 10c; oz. 15c; ¼ lb. 45c; lb. \$1.80; 5 lbs. \$8.50, prepaid.

CUCUMBER LONGFELLOW

Long, slender, dark green, desirable for greenhouse or out door culture. Ideal for market or as a "straight pack" variety for shipment. Size 12-15 in. long and 2½ in. in diameter. Fairly early and moderately productive. Pkt. 10c; oz. 15c; lb. \$2.00, prepaid.

EVERY GARDENER

should have a patch of asparagus, balm, chives, green onions, mint, rhubarb, thyme, sage and where possible also of watercress. These perennial crops once established need hardly any care, bringing a steady income for years after planting.

Cucumber—Early Fortune

CUCUMBER—RESELECTED EARLY FORTUNE

EXTRA EARLY
EXTRA DARK GREEN

PROLIFIC
WELL SHAPED

VIGOROUS GROWER
IDEAL SHIPPER

Early Fortune is a well known variety. There is more than one strain. We grew them all, compared them and now are offering the very best reselected strain that will prove all we claim for it.

Our Reselected Early Fortune surpasses other strains in several important points. In earliness, in beauty of fruit, in productiveness and freedom from disease. It is the darkest green, beautiful slim fruited strain. Also a most vigorous grower and extra heavy yielder. In favorable weather our

Reselected Early Fortune bears fully developed beautiful black green cucumbers suitable for slicing in from thirty-eight to 40 days after planting. All who grew our Reselected Early Fortune pronounced it the best early cucumber, unsurpassed, either for local market or for shipping. Pkt. 10c; oz. 15c; ¼ lb. 45c; lb. \$1.80; 10 lbs. \$17.00; 100 lbs. \$160.00.

We sell half and quarter pounds at pound rates, 5 pounds or over at 10 pounds rate, 25 pounds or over at 100 pounds rate.

Cucumber Jumbo

I had two acres in cucumbers, 8 different varieties; also Jumbo in between. I lost ALL with downy mildew except Jumbo, which is still bearing.—N. A. B., Talavat, Florida.

A VIGOROUS DISEASE RESISTANT GROWER—IMMENSELY PRODUCTIVE

By the introduction of this cucumber, we are placing on the market a variety of exceptional merit, and one which will meet with the heartiest reception by all market gardeners as well as private planters.

JUMBO CUCUMBER differs from all other cucumbers in many respects.

FIRST—It has very handsome, smooth, long and slim fruits. The skin is of a dark green color, nearly black, and with only few spines that are hardly noticeable. It is very symmetrical, 18 inches long, and never more than three inches in diameter, except when fully ripe. It is faintly striped. The illustration gives a correct idea of its shape.

Second—It is a very vigorous grower with vines twice as long and leaves twice as large which stand twice as high as of other varieties.

THIRD—Jumbo Cucumber is enormously productive. The strong vines are heavy bearers and those growing Jumbo Cucumbers will certainly be elated, when looking over their patch of beautiful long slim fruits.

FOURTH—Jumbo Cucumber is the finest eating cucumber on earth. It has few seeds and the seeds are only half the size of other slicing varieties. The flesh is so tender and brittle that a slice of this cucumber taken on the end of a fork will break in two with only a slight jerk. We are certainly fortunate and glad to be able to offer a cucumber so extraordinarily good, and assure you that you never had as fine a cucumber as our Jumbo in your garden. Pkt. 10c; ¼ oz. 12 c; oz. 45c; lb. \$4.00.

WOODRUFF'S HYBRID

CUCUMBER—WOODRUFF'S HYBRID HANDSOME—HEAVY PRODUCER

The fruit averages 8 to 10 inches long, is regular in outline with an intensely dark green, almost black skin, marked with distinct white lines at the blossom end making it even more attractive than the well known and justly popular Davis Perfect variety. Woodruff's Hybrid is, in fact, a highly improved Davis Perfect. On our seed farms as well as with all gardeners who tried this variety it proved to be a very heavy yielder, even under very adverse conditions. Because of a prolonged drought the vines were at one time nearly dried up but with first rains they quickly revived and set new fruit in abundance and of the very best grade. Simply wonderful when it comes to productiveness and the fruit is all well formed with hardly any culls. Pkt. 10c; oz. 15c; lb. \$2.00; 10 lbs. \$19.00.

WHITE WONDER Heavily productive medium early sort. The cucumbers are smooth, 7-8 in. long, square and blocky at the ends, of unexcelled eating qualities and snow-white at all stages of growth. Pkt. 10c; oz. 20c; lb. \$2.40.

Cucumber Beetles

Mr. John H. Griffith, a Maryland gardener, says: "The most effective remedy I have ever tried for striped cucumber beetles on cantaloupes, cucumbers and similar vine crops is to smear some pine tar on a corn cob and place the cob on a hill between the young plants. Add more tar to the cob at intervals of 7 or 8 days. The odor of turpentine is offensive to the beetles and they pack up and get away. It is a simple thing, but it beats all other remedies I have ever tried."

BASIL is an annual plant, strongly fragrant in all its parts, grown by some for its perfume, by others as a kitchen herb and sometimes as a medicinal herb. Dwarf Basil grown in pots makes a fine house plant, emitting a pleasant perfume when its leaves are touched by hand, it grows in symmetrical compact bushes about 6 inches high. Sweet Basil is grown as an ornamental plant. Lettuce Leaved Basil is used as "greens" by many people. The two last named varieties grow a foot high. Basil should be planted outdoors when all danger of frost is past in rich soil and in a sunny situation and should be spaced 8 inches apart.

SWEET BASIL—LETTUCE LEAVED BASIL—DWARF BASIL—Any variety. Pkt. 10c; oz. 30c.

CUCUMBER NATIONAL PICKLE

Also called Packer's, Heinz's and Monarch Pickle.

Robust in growth, bearing extra heavy crop of well-shaped fruit that shows up well finished when pickled; firm, not hollow inside and fresh green in color. Considered by both the growers and packers as the best of all pickling varieties. Pkt. 5c; oz. 15c; ¼ lb. 30c; lb. \$1.20; 10 lbs. \$11.00, prepaid.

CUCUMBER BLACK DIAMOND

Extremely early, fruit well shaped, 8 inches long, produced freely on strong, vigorous vines. Skin smooth, intensely dark green. Considered by some of the largest truckers in the South as an ideal cucumber for shipping. Pkt. 10c; oz. 15c; lb. \$1.80; 5 lbs. \$8.50.

BATAVIAN FULL HEART ENDIVE

Improved Batavian. A superior strain. Larger heads, leaves broad, thick and tender, the heart well filled out and fairly well blanched even without tying. Of pleasant flavor, loaded with health promoting salts and vitamins. Pkt. 5c; oz. 10c; lb. \$1.20.

We sell half pounds at pound rates, 5 lbs, or over at 10 lb. rate, 25 lbs. or over at 100 lb. rate.

Chicago Pickle

CHICAGO PICKLE—Deep green fruit of medium length, slightly pointed at both ends, with prominent black spines. True stock. Pkt. 10c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.80; 10 lbs. \$17.00, prepaid.

SNOW'S FANCY PICKLE—A very fine strain of Chicago Pickle. The fruit is a little smaller than Chicago Pickle and is used for fancy pickles. Pkt. 10c; oz. 15c; 1 lb. \$1.70; 10 lbs. \$17.00, prepaid.

WEST INDIA GHERKIN—A distinct sort with rough, prickly fruit. Is used for pickles only. Pkt. 10c; oz. 20c; 1 lb. \$2.00, prepaid.

PARISIAN PICKLE—Produces long, thin, crisp fruit, with numerous spines, resembling short, stout hairs. The fruit is usually gathered as soon as formed when very small, and makes so-called "gherkins." Pkt. 10c; oz. 20c; 1 lb. \$1.80, prepaid.

IMPROVED JERSEY PICKLE—Fruit short, rather light colored, skin thin. Quality very good. Very heavily productive. Pkt. 10c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.80; 10 lbs. \$17.00, prepaid.

DANDELION

(SEE Page 32)—

HOW TO MAKE A HOT BED

In a sheltered spot, away from shade, dig a trench 6 feet wide, 2 feet deep and long enough to accommodate the number of sashes to be used. Standard hot bed sash measures 3x6 feet. Line the sides of the trench with boards, brick or concrete and to secure good drainage place medium sized rocks on the bottom in a layer of about 4 inches. Above the surface of the ground erect a frame 12 inches high in the rear, sloping to 8 inches in front to give an angle for sun rays and to secure enough "fall" to swiftly carry off rain water. Fill the trench with fresh horse manure which you must first pile up and allow to heat. When heated and steaming, work the pile over into a new pile. This new pile will get hot and steaming again in about 10 days and by this time has lost enough excess heat and is now safe to place into the pit. Fill up the pit to the surface of the ground, pack down firmly and evenly, then place over it 4 inches of good friable dirt. Put on sashes and do not sow until the heat under the sash registers between 80 and 90 degrees. Ventilate your plants, give them all the air possible by raising the sashes on cold days and removing them entirely on warm days. Water enough to soak the soil, but not to reach the manure below. **COLD FRAME** is built on the surface of the ground, like a hot bed in appearance, but without the manure.

A FINE LAWN

six weeks after seeding can be had by using our Special Lawn Grass Mixture. You can buy lawn grass mixtures for half the price we ask, which fact is well known to us. We also know that this low priced mixture frequently contains an incredible amount of weed seeds and other matter that it should not contain.

We would lower our prices with pleasure, if we could get high grade seeds that we use, at low prices. We do not and never will send out low grade seed in order to meet low prices of others.

To completely satisfy you, to create and maintain a feeling that prompts you to recommend our seeds with a happy smile, is not an easy task and impossible to accomplish when sending out dead seeds, chaff, weeds, and dust mixed together and call it lawn grass seed.

LICE ON VINE CROPS (Aphis). An excellent bulletin giving information on how to get rid of aphids and other "bugs" was issued and will be sent free to you if you'll write to: Iowa Agricultural Experiment Station, Ames, Iowa. Ask for circular No. 90. Insect Enemies of Melons and Cucumbers in Iowa.

PLEASE NOTE

That you may order half and quarter ounces priced at 45c per ounce or over at ounce rate, half and quarter pounds at pound rate. Our trade packets are double the quantity of retail packets and our retail packets are well filled and you will get your money's worth every time.

MANY LONG ESTABLISHED, big, wise and experienced growers use our seeds. There is a reason.

Endive Green Curled

Endive

CULTURE—Half ounce to 100 feet of row, 5 lbs. per acre.

For an early crop sow in the later part of April in rows 20 inches apart, and thin to 12 inches apart in the row. When the outer leaves have reached the length of 6 inches the crop is ready for blanching. Select a sunny day for this work, bring the outer leaves together over the top of the plant, tie closely together to prevent rains from coming through. About two weeks afterwards the plants will be blanched and ready for use. Endive is not particular as to the soil but it must be kept free from weeds until plants attain their full size for blanching purposes. For a late crop sow about August 10.

Which Is The Best Endive?

In this country Endive is not an important vegetable and for that reason only a few varieties are offered by the American seedmen. The sorts we are listing are the best, each representing one of the principal forms of this vegetable. The **GREEN CURLED** is the best of the green varieties, **STAGHORN** the best of the white varieties and **BATAVIAN FULL HEART** is the best broad leaved sort. In France and Germany Endive is very popular and should be so in this country also, because it stimulates digestion and is beneficial in liver and kidney troubles. It is used as salad and sometimes also boiled. The leaves of Endive are very crisp with a slightly bitter but aromatic taste and form a grand salad, which comes early in the fall and can be had up till frost if sown in August.

ITALIAN RED RIB ENDIVE

Also called Pancaller, is a large curled variety with green leaves and a faint pink stripe on the outside of the base leaves. Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. \$1.20; 10 lbs. \$10.00, prepaid.

NEAPOLITAN ENDIVE An Italian variety (Cicoria scariola) forming large heads like lettuce. Leaves tender, large and somewhat curly. An extra good variety. Pkt. 10c; oz. 20c; ¼ lb. 50c; 1 lb. \$2.00.

STAGHORN ENDIVE A handsome variety, forming a very full rosette 14 to 16 inches in diameter. It does not go to seed if transplanted from the hotbed. This is a very important feature. It may be brought to market early, when it is a "money maker." It is of beautiful appearance and fine quality. Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. \$1.20; 10 lbs. \$10.00, prepaid.

GREEN CURLED ENDIVE

Standard variety, producing beautifully curled leaves, crisp, tender and blanches cream white. Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. \$1.20; **FRENCH ENDIVE**—Same as Witloof Chicory, see page 32.

BIG CROP OF KALE

three and four times as much per acre will you get by sowing our Evergreen Gem Kale.

Egg Plant

CULTURE—1 ounce will produce 3,000 plants; 6 oz. to the acre.

About March 20th sow the seed in flats filled with 4 inches of dirt, place the flats close together in frames filled with fresh manure over which is spread a layer of dirt 1 inch thick. This dirt is placed there to absorb the steam and ammonia escaping from the hot manure. As soon as the seedlings appear move them into a spent hot bed and there grow them on. When true leaves appear set out the plants in rows of 6 inches apart and 4 inches apart in the rows. If you will plant them closer together your plants will not be stocky and healthy. This method of sowing egg plants in flats instead of direct in the hot bed, minimizes the danger from ammonia. Unless conditions are favorable plants raised direct in the hot bed become hard and wiry in the stem. This is caused by ammonia escaping from the manure and plants thus affected sooner or later turn yellow and sick and instead of producing saleable fruit, the field is filled with dying plants. Many other plants are affected in the same way especially asters. In the field Egg Plant should be placed in rows 5 feet apart and 2 feet apart in the rows. In our locality we plant into the field about May 25th.

New York Egg Plant

IMPROVED NEW YORK SPINELESS

Produces large, handsome, satiny smooth fruit of deep purple color. The plants are of low, stocky branching habit and quite productive, a single plant bearing usually from 8 to 10 large and perfectly shaped fruits. Finest Northern grown seed. Pkt. 10c; oz. 40c; ¼ lb. \$1.00; 1 lb. \$4.00, postpaid.

EGG PLANT FLORIDA HIGH BUSH

A variety that produces pear shaped, black-purple colored fruits on strong bushes and as a rule high above the ground so that there is no waste. The bushes grow taller than is the rule, are upright and stiff, the fruit medium in size. A very productive variety. Pkt. 10c; oz. 40c; ¼ lb. \$1.00; 1 lb. \$4.00.

BLACK BEAUTY EGG PLANT

Two weeks earlier than New York Spineless, with broad and thick fruit of lustrous purplish black color. Coming two weeks earlier, they readily bring double prices. Pkt. 10c; ½ oz. 20c; 1 oz. 40c; ¼ lb. \$1.00; 1 lb. \$4.00, postpaid.

EARLY LONG PURPLE EGG PLANT

Extra early, fruit shaped like a cucumber, about a foot long and 3 to 4 inches through. Skin dark violet. Heavy cropper. Pkt. 10c; oz. 40c; 1 lb. \$4.00.

MANATEE SPECIAL—A heavily productive strain of New York Spineless popular for shipping. Oz. 40c; 1 lb. \$4.00.

Which Egg Plant Is the Best?

There are quite a number of varieties of Egg Plants differing in shape of fruits as well as in color. In this country the black colored varieties are the only ones that are popular. We think that **BLACK BEAUTY** is the best variety. In order to get fine shaped and extra large fruits of Egg Plant a certain number only should be allowed to remain on each plant. Pinch the flowers towards the end of the summer and you will be rewarded with Egg Plants of immense size and splendid quality and flavor.

Prague Model

CHICORY

CULTURE—1 oz. for 3,000 plants; 4 lbs. for 1 acre.

Sow the seed of Witloof late in spring (May-June), in rows 15 inches apart and thin out to 4 inches apart in the rows. In the fall dig the roots, discard all that are less than 1¼ inch thick at the crown also roots with narrow leaves or several heads. Cut off the tops about an inch from the neck, shorten the ends of roots to a length of 8 inches and store in cool, until wanted for forcing. Force under greenhouse benches at a temperature of 50-55 degrees. Set the roots close in the trenches, tops just below the surface, pack the soil firmly around the roots and water. On top of the trenches place 8 inches of moist soil. The heads well blanched will be ready in about 30 days. The roots can be forced also in the cellar, if temperature is right.

Witloof Chicory

A paying crop easily disposed of, first class hotels being the buyers. The part used are tender shoots served as salad. A real delicacy. Pkt. 10c; oz. 15c; 1 lb. \$1.60.

Large Rooted Madgeburg Chicory

The dried roots are roasted, ground or pounded and mixed with coffee or used as a substitute for coffee. The young leaves are used for salads. Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. \$1.20; 10 lbs. \$11.00 postpaid.

ASPARAGUS CHICORY

Known also as Italian Chicory or Ciccioria Catalogna. A distinct variety which instead of forming into a rosette grows in erect, strong, meaty, thickly set shoots. Makes very delicate salad or boiled is served like asparagus. Of vigorous growth, may be cut several times in season as new shoots appear after each cutting. Pkt. 10c; oz. 30c; 1 lb. \$2.60.

PRAGUE MODEL KOHLRABI

The finest variety today. The bulb is round somewhat flattened, skin silvery white, with very short top. Of excellent quality, crisp and exceedingly tender. It ripens fully two weeks earlier than the old standard sort of White Vienna. Very hardy and may be sown quite early, also fine for forcing. Pkt. 10c; oz. 30c; 1 lb. \$3.50, postpaid.

Early Purple Vienna Kohlrabi

Of same usefulness as the White Vienna, but having purple skin. Very tender. Pkt. 10c; oz. 20c; ¼ lb. 50c; 1 lb. \$2.00, postpaid.

Early White Vienna Kohlrabi

An excellent old variety, very early, white and tender. Choicest seed of true stock. Pkt. 10c; oz. 20c; ¼ lb. 50c; 1 lb. \$2.00, postpaid.

We sell half pounds at pound rate, 5 lbs. or over at 10 lbs. rate, 25 lbs. or over at 100 lbs. rate.

Italian Winter Leek

Leek

CULTURE—1 oz. to 100 feet of row.

LEEK is a refined green onion in taste, milder, sweeter, yet possessing the same health-promoting qualities of the onion. Great appetizer, as palatable as crisp, juicy radishes.

Sow in the spring as soon as the ground can be worked, in rows 1 foot apart; cover the seed 1 inch deep and when the plants are about 6 inches high thin out to 3 inches in the row. When cultivating draw the soil well about the plants in order to blanch them.

Which Variety of Leek Is the Best?

Leek is a fine vegetable but very much neglected and grown only by a limited number of people. It merits wide popularity. It is fine for soups, has an agreeable onion-like flavor and once you try it you will grow it steadily.

ITALIAN WINTER is without doubt the best variety. Try it this year and we assure you that you will be delighted with the results; you will grow Leeks twice the size of ordinary Leeks and of the finest flavor.

ITALIAN WINTER LEEK

The best of all Leeks. Extremely hardy and of enormous size, the stalks are tender up to a height of 15 inches. Of fine, mild flavor, and always beautifully blanchd. Fine for bunching. Pkt. 10c; 1 oz. 20c; ¼ lb. 45c; 1 lb. \$1.80; 10 lbs. \$17.00, postpaid.

American Flag

Fine for fall and winter. Of quick growth producing long stems of uniform shape and size. Very popular and largely grown variety. Pkt. 10c; oz. 15c; ¼ lb. 35c; 1 lb. \$1.40.

Large Musselburg Leek

Extra broad leaved variety, blanches to a large size. Of mild and pleasant flavor. Pkt. 10c; oz. 15c; ¼ lb. 35c; 1 lb. \$1.40.

FENNEL—FINOCCHIO

Of quick growth and easy to raise. Sow early for a Spring crop and late in summer for a fall crop. Florence and Sicilian Fennel have very fleshy stalks which are served either raw or boiled. Sweet Fennel is raised for its seeds. All these Fennels are sweet and sugary and possess delicious perfume.

FLORENCE FENNEL—Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. \$1.20.

SICILIAN FENNEL—Heavier than Florence. Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. \$1.20.

SWEET FENNEL—Pkt. 5c; oz. 10c; 1 lb. 80c.

Kohlrabi

A Vegetable Delicacy

To our way of thinking this is the peer of all fresh cooked vegetables but one. And, unless that one is of first quality, then it must take second place to Kohlrabi. We refer to the cauliflower.

Crisp, tender, savory Kohlrabi is a real delicacy. It is a dish that you'll always remember. One doesn't need to be fond of vegetables to like Kohlrabi prepared as one prefers—and there are several ways of serving. Boiled and served in cream or butter is by far the most common. It is an especially easy dish to "get ready" and young and old like it.

Kohlrabi is a high class vegetable and "by rights" should be one of the most popular of vegetables. It will be, the time is coming.

For the market grower the important thing to know is what variety to grow to meet the tastes of his customers. If the customers are Southerners (French, Italian, Spanish) grow the Vienna varieties. The Southern people prize in Kohlrabi both the bulbs as well as foliage. Vienna Kohlrabi has plenty of foliage. The Northern people (Germans, Scandinavians, etc.) demand tender and juicy bulb and care nothing about the leaves. For them Prague Model is the variety.

CULTURE—Sow the seed as early as you do early cabbage, transplanting to stand 6 inches apart in the row, keep on sowing till July 15th if located North and till August 15th if located South.

LETTUCE HOT WEATHER

AN EXCELLENT SUMMER VARIETY—MILDEW RESISTANT

HOT WEATHER is an early variety, forming large, firm, well defined, well blanchd cabbage-like heads, with broad, very thick leaves slightly crumpled, entire at margins never spotted nor brownish in any part. Of most excellent quality, sweet and very buttery in flavor.

HOT WEATHER is absolutely the best firm heading lettuce to grow through the summer months. It will not scald or burn, and will make a head where other varieties utterly fail. It somewhat resembles Salamander in character of leaf, color and size, but the head is larger, more compact, and will stand much longer before shooting to seed. In fact, it is all head, having very few outer leaves.

HOT WEATHER is extremely hardy and there is no variety that can compare with it for wintering over outdoors. It has all the good qualities that can be desired in a head of lettuce save one and that is that it is not adapted for forcing. The usefulness of Hot Weather has been proven beyond all doubts and we highly recommend it. We grew this variety at first in our trial grounds and later as a market crop in conjunction with market gardeners connected with our organization with the most satisfactory results. We earnestly ask you to try this lettuce. You will be rewarded with a fine crop and at the same time be convinced that we have the right stuff when it comes to seeds. Pkt. 10c; oz. 20c; ¼ lb. 45c; 1 lb. \$1.80, prepaid.

SWEET MARJORAM—MAGGIORANA

(Marjanka) An annual kitchen herb with a very pleasant smell much used in soups and various dishes as seasoning. Sow the seed outdoors when all danger of frost is past, in rows foot apart. Height 9 inches. Pkt. 10c; oz. 30c; 1 lb. \$3.50.

PARSNIP SEED

if sown alone is not up as a rule before thirty days from date of sowing. A long time. In the mean time a dry spell may set in, the hot sun creates a hard crust on top of the soil, the feeble seed, although sprouted, cannot push through and the sowing is a failure. Quite often the seed is blamed. Yet it is not the seed. Try sowing parsnip seed with some radish seeds. Radish has vigorous sprouts that break up the hard top crust and if there is enough moisture in the ground, you will get a perfect stand of parsnip that way, in the incredible short time of from 4 to 5 days.

BIG CROP OF CABBAGE

can be had by planting the new Pennsylvania State Ballhead variety, described elsewhere in this catalog.

Our catalog describes many new and **SUPERIOR** strains of vegetables. We make our descriptions as accurate and truthful as is possible.

If in doubt, nothing is easier than to order a nickel or dime's worth of seed and raise a little crop for a sample so that you could see the stuff actually produced on your own ground. You will believe them—seeing is believing. And if you should say that you have no time to bother with a dab of seed like that, we would say that you should take time. It will be well spent.

SEED IS THE KEY to crops. It takes mighty good seed, true to name and of **RIGHT VARIETY** to produce results that count.

We are well aware of the fact and are doing our best to supply the right kind of seed, seed that will produce paying crops. Users of our seeds are getting the benefit of our forty years of experience as seedmen.

Lettuce

CULTURE—Three lbs. of seed will plant an acre, and ounce of seed will produce 3,000 plants.

To insure success in lettuce growing, rich soil, moderate moisture at all times, plenty of sunshine and proper spacing is imperative. Start the seed and transplant outdoors early so as to escape the hot and dry summer weather. Or start the seed late in July for a fall crop and in case of an early frost protect the crop by covering with hay or muslin. Space the smaller sized varieties like May King 8 inches apart in the row, the heavier like Boston or New York 10 inches apart. If you grow lettuce without transplanting thin out to proper distance as soon as the plants appear.

Sow the seed in hot beds about January 20th and when the plants are about an inch high transplant to cold frames 3x3 inches. As soon as the soil is thawed out about 3 inches deep in the field set out the plants. Lettuce cannot be successfully grown during summer and it is of utmost importance to sow early. The home gardener should sow in the open as soon as ground is thawed out sufficiently to allow the operation real early in March. As soon as the plants appear thin out to six inches apart. When the heads begin to crowd each other cut out every other plant. Provided that your soil is very rich or that you use nitrate of soda you will get fine heads following this method of growing. Do not hesitate to sow real early as all varieties of lettuce are quite hardy with the exception of New York and the crop can go through several frosts without injury.

Lettuce White Boston

LETTUCE WHITE BOSTON

**SURE HEADING—BIG AND SOLID
OUTSTANDING SUPERIOR QUALITY SORT**

A great improvement over the Big Boston in that it is lighter green in color, free from red tinge, therefore more attractive, very free from bottom rot, tip burn and that it grows higher off the ground than Big Boston. Does not scald in hot weather or turn red from cold, and produces very close to 100% of solid, large, compact, crisp and tender heads, very white inside. Originated in New Jersey and becoming the favorite with the growers upon first trial. Unbeatable for forcing as well as for spring and fall planting in the open ground. Pkt. 10c; oz. 25c; ¼ lb. 50c; lb. \$2.00.

CHICKEN LETTUCE—Grows 4 feet tall, produces no heads, the leaves are gathered as needed and provide fine feed for chickens and rabbits. When the plant is spent cut it off and the stump will soon produce an abundance of new leaves. Pkt. 10c; oz. 20c; lb. \$1.25.

OAK LEAF LETTUCE—Long standing cabbage butter type of lettuce, heads imperfect of medium size, leaves light green, lobed like an oak leaf of exceptional tenderness Pkt. 10c; oz. 35c.

We sell half and quarter pounds at pound rate, 5 pounds or over at 10 pound rate, 25 pounds or over at 100 pound rate.

Grand Rapids Special

GRAND RAPIDS SPECIAL

GRAND RAPIDS SPECIAL forms compact, heavy heads with thick stalks and it is the most handsome lettuce you ever saw. The heads are not only of the most beautiful appearance, but they also possess high quality. The leaves are crisp, sweet and tender and of much substance, and are in no way inferior to head lettuce.

GRAND RAPIDS SPECIAL is the best stock we have been able to secure and we tried all the important and reliable seed houses of the entire country. So said the owners of an immense greenhouse establishment located in our state. This concern uses about 80 lbs. of Grand Rapids Lettuce annually. They use our Special Grand Rapids exclusively. Pkt. 10c; oz. 15c; ¼ lb. 30c; lb. \$1.20.

About Varieties

There are four main types of Lettuce. The crisp, cabbage-heading, of which New York is the best type. Then comes the Butter variety. To this class belong varieties that form firm, large heads, not quite as hard as those of New York, possessing quality in the highest degree. Buttery, leaves soft, of much substance. Hot Weather and California Cream Butter are in this class. This quality lettuce should be most largely grown. It is not, most markets demand the big hard heads of New York. Butter head lettuces are demanded by particular buyers. These being in the minority, the gardener must grow the rather coarse New York and if he is enterprising, he will also grow Romaine lettuce. Romaine or Cos lettuce makes large heads, oblong in shape, will head under adverse conditions and is a lettuce very high in quality, sweet and crisp. By many, Cos lettuce is regarded as the best of all. The fourth type of lettuce is Leaf lettuce of which the best example is Grand Rapids. Leaf lettuce does not possess the high quality of the above named types but it is easily raised, will stand much neglect and lots of adverse weather. When well grown, the heads are all that can be desired in appearance and almost in quality. Note that we say "when well grown."

Well grown Grand Rapids is all we say it is, if it is grown under glass and not allowed to suffer for moisture and air and if the plants are allowed enough space to develop. Under such conditions, you will get from our seed big and heavy heads, easy to sell.

Much more could be said about lettuces, but most gardeners know as much about lettuce as we do. Those that do not, soon will learn from their brothers so we will stop right here and say no more, except to remark that all lettuce seed we send out is grown for us in a favored climate, is grown by a specialist and is the best there is.

Lettuce New York

LETTUCE—NEW YORK

A late variety forming very large heads. Leaves are crumpled and thick, with large protruding mid-rib. Quality good, exceedingly crisp and firm in texture, very sweet.

The seed we offer is the best strain selected with extra care and is thoroughly dependable, and of strong germination. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 50c; lb. \$2.00; 10 lbs. \$17.00, prepaid.

NEW YORK SPECIAL NO. 1 A type of New York that is protected from unfavorable weather by outer leaves, umbrella-way, and known in the far West as Umbrella New York. Pkt. 10c; oz. 25c; lb. \$2.00.

EARLY NEW YORK More attractive in appearance than original New York, being lighter green, heads only a trifle smaller but ready for the market 10-14 days earlier. Pkt. 10c; oz. 25c; lb. \$2.00.

NEW YORK LETTUCE NO. 12 A strain recommended for home gardeners because it will make heads even under gross neglect. Pkt. 10c; oz. 20c.

ICEBERG Large, late crisp, cabbage heading variety of medium green color. Quality first class. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 35c; lb. \$1.40; 10 lbs. \$13.00, prepaid.

BIG BOSTON—Forms big heavy heads, forces well, stands lots of cold without injury and makes a good shipping sort. Quality fair. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 35c; 1 lb. \$1.40; 10 lbs. \$13.00.

CALIFORNIA CREAM BUTTER—A heading variety of excellent quality. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 30c; 1 lb. \$1.20; 10 lbs. \$11.00.

EARLY CURLED SIMPSON—A bunching or leaf lettuce that will make heads under the most trying conditions. Quality fair. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 30c; 1 lb. \$1.20.

HANSON OR IMPROVED HANSON—Forms very large heads of light green color and succeeds well in all parts of the country. Stands heat quite well and is a sure header. Wholly unsuited for wintering or forcing. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 30c; 1 lb. \$1.20; 10 lbs. \$11.00, prepaid.

MAY KING—An early sort forming medium large compact heads of fine quality. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 30c; 1 lb. \$1.20.

PRIZEHEAD—A bunching sort of good quality, sweet in flavor, tender and crisp. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 30c; 1 lb. \$1.20.

ST. LOUIS MARKET—Forms large heavy heads of very good quality. Pkt. 5c; oz. 15c; 1 lb. \$1.20; 10 lbs. \$11.00, prepaid.

TENNIS BALL BLACK SEEDED—Sure header, medium in size, quality very good. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 30c; 1 lb. \$1.20.

UNRIVALED—Forms large, compact, light green heads, is adapted for wintering over as well as for forcing. Quality good. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 35c; 1 lb. \$1.40; 10 lbs. \$12.00, prepaid.

WAYAHEAD—A head variety of very high quality. Sure header. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 35c; 1 lb. \$1.40; 10 lbs. \$12.00.

WHITE SEEDED SIMPSON—Same thing as Early Curled Simpson.

EARLY CURLED SILESIA—A variety of leaf lettuce. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 30c; 1 lb. \$1.20; 10 lbs. \$10.00, prepaid.

Cos or Romaine Lettuce

A type of head lettuce without an equal in quality, that will head when other varieties will not, in spite of most unfavorable weather. Heads oblong like Wakefield cabbage, but not pointed. Should be very popular. Try a few rows, you will find it easy to raise and easy to sell. Buyers for first class hotels will buy it eagerly and there will be other buyers. Culture same as for head lettuce.

PARIS WHITE COS LETTUCE

Heads of immense size, often weighing six pounds each. Those who have never grown this class of lettuce should try it. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 35c; 1 lb. \$1.40; 10 lbs. \$13.00, postpaid.

EXPRESS OR TRIANON COS—Very early, heads medium in size, self blanching and self closing, of excellent quality, exceedingly sweet and crisp. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 35c; 1 lb. \$1.40.

LOBJOIT'S GREEN COS

Strictly self-closing, extra large, compact, well blanching firm head, rounded at top. Color dark green. Quality excellent hard in texture but exceedingly crisp, sweet, firm, possessing a freshness and distinct quality not found in other lettuces. Succeeds very well in summer and grows to an immense size. In England where Cos lettuce is the favorite type, Lobjoit's Cos is the leading variety. Pkt. 10c; oz. 15c; 1 lb. \$1.40.

You can order all seeds priced at 40 cents per ounce or over in quarter and half ounce lots at ounce rate. Quarter and half pounds at pound rate. Five pounds or over at 10 pound rate. 25 lbs. or over at 100 pound rate.

ABOUT LIME

LIME makes heavy soils porous and lighter, light soils more binding, it makes food elements the soil already contains available for the use of plants. Lime is not a fertilizer. It is beneficial to certain crops and harmful to other crops. On some soils liming results in greatly increased crops, on others it is decidedly harmful. Do not use lime before thoroughly posting yourself—write to Dept. of Agriculture, Washington, D. C., for information.

TO KILL CABBAGE WORMS

Dissolve 2 tablespoonfuls of saltpeter in a gallon of water. This nonpoisonous solution gets the worms in a hurry. It beats paris green, is inexpensive and safe.

HALE'S BEST muskmelon is valuable because early. There are now several strains of Hale's Best on the market differing in earliness and quality. Some of these new strains produce high quality melons but at the expense of earliness. Our Hale's Best is not only a melon of good quality but is as early as any strain if not earlier. All our seed is from selected melons, hand cut and only from crown set fruit.

Lettuce

Improved Big Boston Lettuce

Sure Header and Very Hardy—Splendid Shipper

This is a selection made from the well known and popular Big Boston. The mature plants are compact, forming a well defined, broad, slightly pointed, hard well-blanced heads, with outside leaves characteristically turned and twisted backward at their uppermost borders, but otherwise very tightly and completely overlapping one another. Leaves very broad, smooth, thick and stiff, not easily torn, making it a splendid shipper. Color light green. It surpasses the old variety by being of rich buttery flavor, and forming extra large sized heads which sometimes weighs 5 pounds each. It succeeds admirably well in all parts of the country. Fine variety to grow in late autumn in North, sure header, very hardy, slow to shoot to seed, and reliable in every way. We can say with confidence that this is the finest strain of Big Boston in the whole world, and well worth the money we ask for it. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 40c; 1 lb. \$1.60; 10 lbs. \$13.00, prepaid.

Improved Big Boston

Bohemian Head Lettuce

Very early, heads medium in size and very slow to shoot to seed. It will head when all other varieties will fail and although it sells for about half the price that Big Boston does, on account of its small size, it is profitable to raise. It is of attractive light green color, of excellent quality, mild, delicate, sweet buttery in flavor, soft in texture. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 35c; 1 lb. \$1.40; 10 lbs. \$13.00, prepaid.

HUBBARD MARKET

A cabbage butter head of good size, dark green, leaves crumpled and edges straight. Quality very high; sweet and very buttery in flavor, soft in texture. Succeeds well in all parts of the country. T. pkt. 5c; 1 oz. 15c; $\frac{1}{4}$ lb. 30c; 1 lb. \$1.20; 10 lbs. \$11.00, prepaid.

EGG PLANT IS A DELICACY of the highest order, prepared for the table as follows: Boil it, drain it, mash it, mix with enough flour to a consistency of pancake batter, then fry as you do pancakes. Use young egg plants only.

Lettuce Black Seeded Simpson

BLACK SEEDED SIMPSON LETTUCE

Black Seeded Simpson is the finest leaf lettuce, and absolutely reliable, succeeding admirably well whether planted in the spring, summer or fall; whether in the open or under glass it never disappoints. Stands more heat, more drought and succeeds under the most unfavorable conditions, where most other lettuces would be a failure. Our seed has been saved from the largest, earliest and most perfect heads, and can be relied upon in every way. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 30c; 1 lb. \$1.20; 10 lbs. \$1.10, prepaid.

ALL SEASON LETTUCE

HEAT AND DROUGHT RESISTANT SORT

This is a fine, sweet, tender and large Head Lettuce. A decidedly butter variety with thick soft leaves of much substance, strictly cabbage-heading, very slow to shoot to seed, of regular growth, medium early in season. Heads globular, very compact, well defined, extremely well blanced. Leaves broad in shape, peculiarly smooth, very little blistered, unusually thick in appearance, crisp, tender, sweet and white, as large as Late Flat Dutch Cabbage, of grayish green color, never spotted nor brownish, extremely solid. A distinct sure heading variety for all seasons, unsurpassed as a Head Lettuce for general home and market garden use in Northern climate. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 35c; 1 lb. \$1.40; 10 lbs. \$13.00, prepaid.

Lettuce All Seasons

We sell half pounds at pound rate, 5 pounds or over at 10 pound rate, 25 pounds or over at 100 pound rate.

Muskmelon

CULTURE—2 oz. of seed for 50 hills; 2 lbs. for 1 acre.

Sandy soil, well enriched with manure, is the best for melons. Have the hills 4 by 5 feet, dropping 25 seeds in each hill, so as to feed mice and cutworms and still have a good stand. Leave only three strongest plants in each hill. When the plants start to vine we fertilize the field with 300 lbs. of cotton seed meal to the acre. Open shallow furrows between the rows, scatter the meal moderately thick and cultivate same in the ground. This pays us handsomely because it hastens the crop to maturity, the melons are of bigger size and are more heavily netted and almost free from culls.

In case of a cold spell with plants up early in the spring, go over the patch with a hoe and cover up the young plants with dirt and remove the dirt when danger of frost is past.

To make Muskmelon growing a paying proposition plant the seed as early as in your judgment is safe. While in the "baby" stage, the plants are liable to be badly injured if not ruined by a cold beating rain. All growers know these cold spring rains and the resulting damage. A beating rain destroys the thread-like roots of the young plants, severely checking them in growth. In many cases the plants "come out of it" but to expect an early crop of melons is out of question. To get an early crop of melons examine your plants after every rain and replant whenever you see that the plants were damaged. You cannot expect an early crop from plants that have been checked in their growth. Melons placed on the market ahead of the parade bring real returns, therefore replanting and watching the crop pays.

Which Is the Best Muskmelon

Every year the all ready long list of melons is made longer by new arrivals. We are adding these new ones as fast, as fairly sure, that they are of real value.

Too often a new this or that appears, is being praised highly, but when put to test, is not found deserving. When it comes to melons, the new varieties offered by us are all good and you need not hesitate giving these new ones a trial. See novelty pages for the offers and descriptions of new muskmelons, pages 1 to 10 in this catalog.

As to the older varieties listed by us, would say, that many of these will stay in favor for a long time to come. Such varieties as Hearts of Gold, Hale's Best, Sugar Sweet and even the odd shaped Banana melon, are not easily replaced. They all have their particular merit. So it would be "walking on thin ice" to come out with a statement that so and so melon is the BEST. There is no "BEST." You do not want Tip Top if you want a shipping melon and you do not want Rockyford, no matter how highly improved in quality, if you are catering to a local market where nothing but big melons are wanted.

So the only thing to go by is, to read our descriptions and bear in mind that these descriptions are reliable. Try the new melons. As a rule one trial will suffice to tell of just what value the new melon will be to you.

VICTOR MUSKMELON

Just imagine a rich flavored, luscious melon with firm, tender, deep green flesh extending close to the rind; of immense size, from 12 to 18 inches in length and 8 to 10 inches in diameter; a splendid shipper because of its deep netting and large size—and you have our Victor Muskmelon.

VICTOR is a splendid melon for hotel or restaurant trade. Its size appeals. One melon is good for eight slices on an average. The quality impresses the patron and results in an insistent demand. Get your order for seed in early. Pkt. 10c; oz. 15c; lb. \$1.20.

MARKET KING MUSKMELON

MARKET KING is not only extra early, but also extra large. Its size is enormous for a muskmelon. A whole field will average 20 to 25 lbs. and selected specimens will weigh as much as 35 lbs. In spite of its mammoth size, the melon is of good quality.

MARKET KING is a salmon fleshed variety, with very thick flesh, and its seeds are nearly twice as large as those of other melons. All who are looking for a large muskmelon will find our MARKET KING to fill the bill. Pkt. 10c; oz. 15c; ¼ lb. 40c; 1 lb. \$1.60; 10 lbs. \$15.00, prepaid.

Ours is the most critical trade—gardeners and florists. We cater to the wise and experienced. We give value. Among our customers are the foremost florists and market gardeners,

SUGAR SWEET MELON

A fine early melon, ripening a few days earlier than the Rocky Ford. It is a netted melon similar in shape to the Rocky Ford. Rather large sized and therefore not suitable as a crating melon. The flesh is green with a golden lining next to the seed cavity. Sweet and sugary. Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. \$1.00.

ROCKY FORD

We have an exceptionally fine strain of this standard melon. Our melon is very early, heavily and finely netted, weighing about 1½ pounds each. Highly rust resistant, very heavily productive. Pkt. 5c; oz. 10c; ¼ lb. 20c; 1 lb. 80c; 10 lbs. \$7.00, prepaid.

MALABAR MELON

A variety of gourd the meat of which when cooked, will become golden yellow color and come out in strings resembling finely cut noodles and is called by some "Noodle Plant." Very tasty when served hot with melted butter. Highly interesting novelty that may or may not become widely popular. Regardless of what the future will bring, growers should find it worth while to try this new vegetable. Pkt. 10c; oz. 45c.

MUSKMELON EXTRA EARLY OSAGE

Ten days earlier than the old type of Osage, of same shape and same quality, only this new variety is a trifle smaller. It is slightly ribbed, fairly well netted, oval in shape, dark green. Flesh very thick, salmon colored and very sweet. Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. \$1.00, postpaid.

EARLY KING

is the name of a new and splendid Cauliflower described elsewhere in this catalog. For an early crop no other cauliflower will pay you as well. To get the highest price for your cauliflower pack them so that the snow white heads will not get bruised and spotty. The public buys "through the eye" and will pay more for them if your cauliflower have the "looks."

MUSKMELON SUNKIST

and HONEYMEL are two new melons that are "comers" and of great importance to all melon growers. Described on pages 3-4.

We sell half pounds at pound rates, 5 lbs. or over at 10 lb. rate, 25 lbs. or over at 100 lb. rate.

MUSKMELON—Hale's Best

The original H. B. lacked quality, its value was earliness and appearance. Since then numerous strains were developed. The strain we offer is the BEST of all, the same as used by the growers in Imperial Valley, who are very hard to satisfy. Their using of our strain of H. B. confirms what we claim, namely that it is the best strain, possessing earliness and producing melons of large size, beautifully netted with THICK sweet flesh. Every pound of seed is hand cut, all melons not perfect are discarded. This raises the cost of seed, but the better quality of the seed is well worth it. Pkt. 10c; oz. 15c; lb. \$1.00.

Muskmelon Perfection Orange Flesh

HEAVILY PRODUCTIVE—HARDY—HIGHEST QUALITY

At present this is the highest type of Rockyford.

The melons are almost perfectly round, heavily netted, no ribs, the orange flesh is extremely thick, sweet and spicy. Heavily productive. First rate shipper, local or long distances. Considered by many as the finest melon in existence when quality is the first consideration. Pkt. 10c; oz. 15c; lb. \$1.20.

Muskmelon Banana

BANANA MUSKMELON

The fruit attains a length of 20 to 30 inches, and a diameter of about 4 inches. Flesh of rich orange color, deep and of exquisite flavor. Smells and looks like a gigantic banana. This is a very valuable melon and sells in choice city markets, 50 cents or more being sometimes demanded for a single specimen. Pkt. 5c; oz. 10c; ¼ lb. 25c; lb. \$1.00.

MUSKMELON HEARTS OF GOLD

Same as Hoodoo. A very popular, round melon, size 7 by 5 inches, weight two pounds per melon. Moderately netted, ribs fairly distinct, pink flesh, very thick, sweet and spicy. First class shipping melon as it remains edible for several days. The seed we offer is the strain used by the growers in the Imperial Valley—the best strain there is. Pkt. 5c; oz. 10c; lb. \$1.00.

THE BENDER MUSKMELON

An extra large melon often weighing 8 to 10 lbs. with deep orange flesh that is very sweet and thick, highly fragrant and deliciously flavored. The rind is light yellow, heavily netted with prominent ribs, very hard, making it suitable for trucking or shipping long distances. An excellent variety. Although growing to be a very large size, it is comparatively early ripening, about 85 days from date of planting. Pkt. 5c; oz. 10c; ¼ lb. 25c; lb. \$1.00.

MUSKMELON TIP TOP

A big round melon, salmon flesh, thick and heavy, very sweet, excellent flavor, ripening clear to the skin. When ripe, the skin is greenish yellow, coarsely netted. A grand melon for local sales or shipping. If you are looking for an extra large genuine Tip Top of extraordinary quality try our seed. Our strain of Tip Top is well nigh perfect for genuine quality impossible to surpass. Pkt. 5c; oz. 10c; lb. \$1.00; 10 lbs. \$9.00.

MARYLAND or EARLY KNIGHT—A fine very early melon, flesh green, sweet, shaped like Rocky Ford, slightly larger, well netted. Oz. 10c; lb. \$1.00.

MUSKMELON LAKE CHAMPLAIN

A medium sized, salmon fleshed melon valuable because of its extreme earliness. Edible in 87 days. Moderately netted with fairly prominent ribs and almost round in shape. Quality fair to good. Average weight 3 lbs. Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. \$1.00.

MUSKMELON GREELEY WONDER

Large salmon fleshed melon perfectly round, about 7 in. through, weighing about 5 lbs. each. Highest quality. Fine for local markets. Pkt. 5c; oz. 10c; lb. \$1.00.

TEN TWENTY-FIVE—High class type of Rockyford. Beautifully netted, uniform in shape, an ideal melon for shipping and a favorite in many melon-producing sections. Our strain of this melon is the finest strain in existence. Pkt. 5c; oz. 10c; lb. \$1.00; 10 lbs. \$9.00.

MUSKMELON OR CANTALOUPE?

Cantaloupe is a local name for muskmelon in a certain part of Italy and should not be used. When applied in the U. S. it designates a shipping type of melon, small to medium in size.

HOW TO TELL WHEN A MUSKMELON IS RIPE—The net on a ripe melon is hard, the net on unripe melons is soft, so that it can be easily rubbed off.

Muskmelons are rich in health-giving vitamins. Of the total solids in a ripe muskmelon about 70% are invert sugars.

Muskmelons should not be wrapped preparatory to a long distance shipment, because when wrapped they are slower in cooling and do not retain their edible qualities as long as when shipped unwrapped.

MUSKMELON SUGAR ROCK

Medium sized, of striking appearance, almost round, heavily netted, flesh deep orange, sweet, sugary and VERY firm. Rind very tough. Quite early coming right after our strain of Hale's Best. Pkt. 5c; oz. 10c; lb. \$1.00.

Our Watermelon and Muskmelon Seed is saved from selected hand cut melons from unusually pure and true stocks to begin with. Our fields are rigidly rogued for freedom from diseases and purity of strain. Our seed costs no more than seed that may be and may not be as good as ours. We will be glad to quote lowest prices to those interested in high quality and in the market for large quantities of seed.

Watermelon

CULTURE—1 oz. for 50 hills, 1½ lbs. for 1 acre.

Large crops of delicious watermelons can be raised in any good soil but sandy soil mixed well with manure is ideal for melons. To grow watermelons successfully we recommend to seed the whole bed to rye in the fall. In the spring open two furrows with a plow throwing the soil together and plant the seed in hills 6 feet apart. When the plants start to vine open another furrow and continue this plowing under of the rye till the whole ground is covered with the vines. This does away with cultivating, fertilizes the ground and materially increases the yield.

THIN OUT watermelon vines to one plant per hill when the vines are in the fifth true leaf stage to get melons of the largest size. Do not allow more than one or two melons per vine. To keep striped beetles down apply lime but **ONLY** when the vines are dry, never when damp with rain or dew. Lime applied when the vines are wet burns and stunts them.

Which Is The Best Watermelon?

There is no variety that can be pointed out as the best of all. If you want a melon for your own use, grow Klondyke. Our strain is the finest for edible qualities, with brilliant red flesh, delicate in texture, with no trace of stringiness, carrying the highest amount of sugar content of any watermelon. If you want a small but good melon, the size of a large musk melon, King and Queen will suit you. Growing for market you must grow the variety the market demands. About the best in that line is Wondermelon, as it possesses high edible qualities, size and is early. Long Icing is another fine melon. An old variety yet still popular in many markets because highly attractive in appearance and in edible qualities not easy to beat. Tom Watson is safe to grow for long distance shipping. At present the most popular watermelon is Stone Mountain, a variety that is almost perfect save for its shape. We are working hard in order to produce Stone Mountain of oblong shape and hope to be able to introduce an oblong Stone Mountain after another year or two.

WATERMELON STONE MOUNTAIN
DIXIE BELL OR LIPSEY

Very large, round, smooth melon, rapidly gaining in popularity. Rind light green, flesh deep red and very sweet. Almost solid heart, having but few seeds which are white, tipped with black. It is not adapted for long distance shipping but for nearby markets, an excellent high quality variety. Pkt. 5c; oz. 10c; ¼ lb. 18c; 1 lb. 70c.

Kleckley Sweet Watermelon

KLECKLEY SWEET WATERMELON

The melon is oblong with square ends, color dark green, flesh bright scarlet with broad solid heart, absolutely stringless, with very few seeds placed close to the rind. Flesh of the highest possible quality, very crisp, sugary and fairly melting in the mouth. The individual melons weigh from 25 to 40 pounds. The rind is too thin for shipping, but for home market or family garden this melon has no superior. Equally suitable to any part of the country except too far North. The seed we offer is of the very highest quality saved only from large and perfect specimens and can be depended upon in every way. Pkt. 5c; oz. 10c; ¼ lb. 18c; 1 lb. 70c; 10 lbs. \$6.50, prepaid.

Watermelon Klondyke

WATERMELON KLONDYKE

Long in shape, rind dark green, the flesh a distinctive shade of deep red. Average weight 25 lbs. Suitable for shipping, ripens in 82 days from date of planting. When it comes to quality no melon is the equal of Klondyke. Plant your favorite variety that you know sells well in your market and besides the old standby plant some Klondyke. The public appreciates quality, willing to pay for quality and sure to remember the party that is selling quality melons. Pkt. 10c; oz. 15c; 1 lb. \$1.00.

WATERMELON THURMOND'S GRAY

A long, large melon with splendid edible qualities. Flesh crisp, tender, bright red, seeds brownish. The rind is light in color and almost like a horn in hardness, making it an excellent shipper. Average weight 35 lbs. per melon. Pkt. 5c; oz. 10c; 1 lb. 80c; 10 lbs. \$6.50, prepaid.

WATERMELON FORDHOOK EARLY

An ideal variety for sections where the growing season is short or wherever an extra early melon is wanted. As early as Cole's Early but larger and heavier. Slightly oval in shape, rind dark green, mottled with stripes of still deeper color. Flesh pink in color, luscious and sweet. Seed white. Pkt. 5c; oz. 10c; ¼ lb. 20c; 1 lb. 80c.

You can order all seeds priced at 45 cents per ounce or over in quarter and half ounce lots at ounce rate. Quarter and half pounds at pound rate. Five pounds or over at 10 pound rate. 25 pounds or over at 100 pound rate.

Watermelon New Wonder

WATERMELON NEW WONDER

AS GOOD AS KLECKLEY—AS BIG AS WATSON

Oblong in shape, longer and thicker in diameter than Kleckley, of dark green solid color with thin but hard and tough rind; for that reason just as good for shipping as Tom Watson. It has bright scarlet, very sweet and stringless flesh that never becomes hollow, and light colored seed. New Wonder has a good deal bigger heart than Kleckley and grows from 45 to 70 lbs. in weight. Heavily productive under trying conditions.

Offered for sale side by side with other good melons it is the best seller of all. Pkt. 5c; oz. 10c; ¼ lb. 18c; lb. 70c, postpaid.

Georgia Rattlesnake

GEORGIA RATTLESNAKE

A long, large melon, light green, irregularly mottled with stripes of dark green. The two contrasting colors make this melon of striking appearance. An excellent shipping kind with unexcelled eating qualities. Flesh red, sweet and solid. Pkt. 5c; oz. 10c; lb. 60c; 10 lbs. \$5.50.

TOM WATSON WATERMELON

Similar in shape and size to Kleckley's Sweet, but has a tougher rind and for that reason is well adapted for shipping. It does well in some parts of the South. In quality it cannot compare with Kleckley's Sweet, as it lacks the sweetness and the flesh is quite stringy. Pkt. 5c; oz. 10c; ¼ lb. 15c; lb. 60c; 10 lbs. \$5.50, prepaid.

GOLDEN HONEY WATERMELON

Oblong in shape, flesh sparkling golden color, very attractive and fully as delicious as its appearance indicates. Rind dark green striped darker green. Medium early. Pkt. 5c; oz. 10c; lb. 60c.

IRISH GRAY WATERMELON

Long and large, averaging 35 lbs. per melon. Flesh bright red, tender and melting, seed brown, the rind light green in color. Quality very high and when first introduced was accepted with unbounded enthusiasm by all growers. Size 18x11 inches. Pkt. 5c; oz. 10c; lb. 70c.

WATERMELON PRIDE OF MUSCATINE

In shape and quality resembles the ever popular variety KLECKLEY SWEET. Highly wilt resistant and is regarded as the best of the wilt proof varieties. If your soil is infested with melon wilt rotate so that same piece of land will not be in melons more often than once in five years and grow Pride of Muscatine. Pkt. 5c; oz. 10c; lb. \$1.00.

LONG DARK ICING—A long melon with a very dark green rind. Medium early and of medium size averaging 25 lbs. per melon. Flesh bright crimson, unusually sweet and tender. An old variety yet still quite popular both for home garden and market. Pkt. 5c; oz. 10c; lb. 60c.

ALABAMA SWEET—Long, dark green melon with sweet crimson flesh and hard rind. Called by some Rubber Rind Kleckley.

COLE'S EARLY—Oblong shaped melon. 20 inches long. 12 inches through, with mottled green skin. Flesh crimson, sweet, rind thin. A high-class melon in every way except that it cannot be shipped as the rind is too thin and brittle.

CUBAN QUEEN—A large melon from round to slightly oblong. Heavy producer, fine shipper, rind striped dark and light green. Ripens in 90 days. Excellent quality, for that reason still popular although quite an old variety. Black seeded.

EXCELL—Large, oblong melon of dark green color, with faint stripes. Flesh solid, red, crisp and of excellent flavor. Productive and a good shipper. Seed is of mixed color, some is black, some white.

FLORIDA FAVORITE—Long striped melon, flesh crimson, quality good.

HALBERT HONEY—Long, dark green, flesh red, very sweet, rind thin. Of about the same value as Kleckley's Sweet.

HARRIS EARLIEST—Of the very highest quality. Being very early it is a favorite in the North as well as in the East. Round in shape, of good size, skin mottled green, flesh crimson, sugary, crisp, tender and of fine flavor.

ICE CREAM—Same as Peerless. Round in shape, of good size, skin mottled, flesh crimson, sweet and of excellent quality.

KING AND QUEEN WINTER MELON—About the earliest of all melons. Of Russian origin, heavily productive and a sure cropper. Flesh bright crimson of very high quality, seed very black. Skin light green striped darker green. Perfectly round and smooth resembling a Honey Dew Melon. Average weight 10 lbs. When stored keeps for a long time and is a first class shipper.

SWEETHEART—Oval shaped, large, light skinned melon of very high quality.

SHAKER'S BLUE A big round melon, skin dark green, almost black, flesh bright red, solid, of fine quality. Not recommended for shipping but a good melon for local markets.

ALL WATERMELONS

NAMED ABOVE ARE SAME PRICE:

Pkt. 5c; oz. 10c; ¼ lb. 15c; lb. 60c; 10 lbs. \$5.50, prepaid

MUSTARD BAKTOY

Different from other mustards and of all "greens" the king. Resembles an immense head of lettuce, but the leaves have very prominent midribs, exceedingly tender and juicy. The hearts are most excellent to be eaten raw either as celery or with salad dressing as a salad proper. Boiled or stewed no other greens quite equal it in tenderness and exquisite flavor. The whole plant is remarkably succulent, crisp and tender. All who have tried Baktoy are hearty in their praises of its flavor and high quality. Of quick growth, can be sowed in the spring, and again for a fall crop. Baktoy will stand nearly six weeks and all this time will remain in prime condition and shoots to seed only when the weather is quite dry and hot. Baktoy will be popular upon first trial and should appeal to growers who cater to a special trade where quality is appreciated. Pkt. 5c; oz. 10c; ¼ lb. 20c; 1 lb. 80c.

Mustard

CULTURE—1 oz. for 100 feet of row; 6 lbs. for 1 acre.

Mustard will do well in most any kind of soil. Sow very early in the spring or late in the fall. Have the rows 10 inches apart and do not thin at all if the crop is intended for greens. If grown for seed it must be thinned out to 6 inches apart in the row.

MUSTARD OSTRICH PLUME

Our special strain of Ostrich Plume Mustard will stand 10 days to two weeks longer before shooting to seed. Of very dark green color—the best Mustard there is.

The most beautiful of all mustards. The leaves are long, ruffled and curled as gracefully as an ostrich plume. Stands summer heat splendidly. Pkt. 5c; oz. 10c; ¼ lb. 15c; 1 lb. 60c; 10 lbs. \$5.00, prepaid.

CHINESE MUSTARD SPECIAL

There are several varieties of Chinese Mustard. What we offer is a variety with broad, flat leaves, twice the size of those of common white mustard, resembling the leaves of Bloomsdale spinach. Pkt. 5c; oz. 10c; ¼ lb. 15c; 1 lb. 60c; 10 lbs. \$4.80.

SOUTHERN GIANT CURLED

It forms a great mass of leaves beautifully ruffled and finely curled and crimped around the edges; succulent, pungent and of sweet flavor. Pkt. 5c; oz. 10c; ¼ lb. 15c; 1 lb. 60c; 10 lbs. \$4.80, prepaid.

WHITE—The dark green, smooth-leaved mustard. Pkt. 5c; oz. 10c; 1 lb. 40c; 10 lbs. \$3.75, prepaid.

MUSTARD BAKTOY—In appearance like an immense head of bunch lettuce, stalks much heavier, full of juice and flavor, the finest green vegetable to our way of thinking. For full description see novelty pages. Pkt. 5c; oz. 10c; 1 lb. 80c.

Which Mustard Is Best?

The best mustard is, at present, the **OSTRICH PLUME** variety. It is of the most beautiful appearance and will stand for ten days before shooting to seed.

The new **BAKTOY** Mustard is the coming variety, a superb sort. Being an entirely new type, will not be easy to sell at first. However, grow some Baktoy, make your customers buy and try it—they surely will come back to you for more.

MUSHROOM SPAWN

Genuine Lambert's

PURE CULTURE—made in America and the best in the world, fresh and full of vitality. A cultural leaflet "Mushroom Culture" free when requested with orders. Price: Brick 50c; 5 bricks \$1.75, postpaid. Not prepaid, 10 bricks \$1.80; 100 bricks, \$17.00.

Parsley

CULTURE—1 oz. to 100 feet of row, 4 lbs. to one acre.

Parsley does best in deeply worked good soil. Sow early in the spring in rows a foot apart, thin out the rooted varieties to 3 inches apart in the row but do not thin the curled varieties. Parsley is slow to germinate and it is a good plant to sow a small quantity of radishes with the parsley. Radishes come up quickly and mark the rows and you can cultivate long before the parsley comes up. It takes a month or longer for parsley to come up.

IMPROVED PERFECTION PARSLEY

Dark green, densely curled, almost entirely free from plain leaves and of very robust and quick growth. For the largest amount of leaves also for growing under glass this is the best parsley you can get. Pkt. 10c; oz. 15c; 1 lb. \$1.00. **PARSLEY GREEN GEM**—Darkest green and most densely curled. Of dwarf compact growth. Not a single leaf in this parsley but that is most exquisitely and closely curled. For open field culture this is the finest parsley to be had. Somewhat a slow grower in the first stages of its growth. An exhibition variety. Pkt. 10c; oz. 15c; 1 lb. \$1.60.

Which is the Best Parsley

PERFECTION is as the name says perfection and in curled varieties there is absolutely nothing else as good. We know because we tried hundreds of strains of curled parsleys. It is the most highly bred curled parsley of vigorous growth with not a trace of "wild" parsley in it. Perfection is the only variety to grow in greenhouses where space is costly and where it does not pay to bother with poor stuff.

The best rooted parsley is our **RECORD**. It is little later than **Hamburg Rooted** but the roots are much larger, resembling well grown roots of parsnip, white smooth and of high quality.

CHAMPION MOSS CURLED PARSLEY

Of quick and robust growth, very hardy, with leaves of dark green color, finely curled. Pkt. 5c; oz. 10c; ¼ lb. 15c; 1 lb. 60c; 10 lbs. \$5.50, prepaid.

PLAIN LEAVED PARSLEY

Leaves flat, deeply cut, but not curled. Pkt. 5c; oz. 10c; ¼ lb. 15c; 1 lb. 60c; 10 lbs. \$5.50, prepaid.

GIANT ITALIAN PARSLEY

New variety of plain leaved parsley that yields several times as many leaves as the old variety does. These plants grow 3 feet high and must be spaced 10 inches apart. Pkt. 10c; oz. 20c; 1 lb. \$2.40, prepaid.

HAMBURG ROOTED PARSLEY

The root resembles a miniature parsnip. This variety is very early and fine flavored. Pkt. 5c; oz. 10c; ¼ lb. 20c; 1 lb. 80c; 10 lbs. \$7.00, prepaid.

RECORD—Produces extra heavy, smooth, white roots the size of well shaped roots of parsnip. Pkt. 10c; 1 lb. 80c.

MORAVIAN ROOTED—Roots large, thick, smooth, straight and of high quality. Fine for winter use. Pkt. 5c; oz. 10c; 1 lb. 80c.

Reliable Onion Seed

CULTURE—1 oz. for 100 feet of row; 3 lbs. for one acre. For sets 60 to 70 lbs. of seed should be sown to the acre, more if the ground is light. For a good crop of onions you must have rich ground. Have the land spaded or plowed in the fall. Do not plow again in the spring. The idea is to have a firm seed bed which is one of the important conditions for success. Before you sow work the top soil very fine with a rake then sow. Get the weeds as soon as they appear. It is very important to sow as early as it is possible to get the ground in shape. For extra large and heavy bulbs, such sorts as Ailsa Craig or Prizetaker are sown in hotbeds and later transplanted into rows a foot apart and 4 inches apart in the rows. The most popular method is to sow the seed in rows a foot apart and thin to 3 inches apart in the rows.

What Is The Best Onion?

For winning money **EARLY BEAUTY** and **SILVERBALL** are the best. One is a yellow skinned variety, the other has skin that is almost white. Both are of fine appearance and ready for the market days ahead of the old varieties. Both will make money for the grower.

For main crop, there is no better Onion than any of the **SOUTHPORT GLOBES**. Whether you choose the white, red or yellow, you are making no mistake and wherever the Globe sorts can be successfully raised they should be preferred over all other varieties. The Globe Onions as far as we know are not particularly adapted for Texas. There it is where the Bermuda onions are popular and most largely grown. As is well known Bermuda Onion is the mildest flavored of all onions but its drawback is that it is not a very good keeper and is good only for quick consumption. **BERMUDA ONIONS** can be grown in any state of the Union but good seed can be grown only on the Canary Islands and all our seed comes from there.

AILSA CRAIG. Properly grown, this forms the biggest bulb of all Onions and can be grown everywhere except very far north where the season is short. Is a fairly good keeper.

The best pickling Onion is **WHITE PORTUGAL** or Silver Skin. It keeps well, is early and retains its silvery white color which such sorts as Bartletta and others never do. Bartletta turns green and never makes as nice looking bulbs as Portugal.

In the last few years quite a few gardeners have undertaken to grow a fairly large planting of Onions, planning to market them. To all such who have not heretofore grown Onions in a large way we offer this suggestion: Always plant the variety of Onion demanded or favored by your market rather than the sort you personally prefer. In every market certain sorts of onions are preferred over others. There are markets where you cannot sell and do well financially unless it is a red onion. Other markets again demand yellow, and still others white onions. In some markets you cannot sell anything but Yellow Danvers, etc. Therefore before you place your order for Onion seed get reliable advice as to which is the most reliable variety for the market where you intend to dispose of your crop. Commission men or your grocer is the party to see about this.

If you will address the Secretary of Agriculture, Washington, D. C., for Bulletin No. 354 Onion Culture, it will be sent you without cost.

Our **ONION SEED** is dependable. Germination close to 100%. Lots of seed on the market germinates 80% or less. Many of our customers that raise onions on a large scale tried low priced seed from many sources. They cut their expense at the time of buying their seed but lost and in some cases they lost heavily on the crop. These customers use our seed again they do not want the low priced stuff.

BERMUDA ONIONS

WHITE OR YELLOW BERMUDA ONION—The flesh is white, the skin light yellow, mild in flavor so that many people eat it raw like an apple. We offer the best seed, genuine Tenerife. Pkt. 10c; oz. 20c; 1 lb. \$2.20.

CRYSTAL WAX BERMUDA—Somewhat larger than the yellow variety, absolutely pure white. Pkt. 10c; oz. 25c; 1 lb. \$3.00.

We sell half pounds at pound rate, 5 lbs. or over at 10 lbs. rate, 25 lbs. or over at 100 lbs. rate.

SOUTHPORT RED GLOBE ONION

Our strain is famous for the large sized bulbs it produces. Perfectly globe shaped, color deep bright red. There is no finer strain than ours. If you understand that the important thing is the value of the **CROP** and not the price of the **SEED** you will try our seed so as to be able to compare the **RESULTS** our seed produces with the results of low in price seed. You will be surprised. This is also true when it comes to other seeds we send out. A comparison will **SHOW** you that the seed offered for a very low price is **NOT** the bargain it seems to be. Pkt. 10c; oz. 20c; lb. \$2.90; 10 lbs. \$26.00, prepaid.

WHITE WELSH ONION

Does not form bulbs and is grown exclusively for green or bunching onions. A perennial variety. Will stand any amount of frost, never winter-kills. Although a later variety than our Prosperity its stalks are not quite as heavy and not quite as white as those of Prosperity. Plant in rows wide enough so that you can hill up the onions, so as to get longer, white and more tender stalks. White Welsh can be sold before and after seed onions are available, therefore a well paying crop. Pkt. 10c; oz. 20c; lb. \$2.20.

ONION VALENCIA

Immense in size, single bulbs weighing as high as 4 lbs., but usually averaging a pound per bulb. Perfectly globe shaped, skin clear, bright yellow, flesh white, mild in flavor, highly attractive in appearance and an extra good keeper. Also called Riverside Spanish. Pkt. 10c; oz. 20c; lb. \$2.90; 10 lbs. \$26.00.

MOUNTAIN DANVERS ONION

An early maturing type of Danvers Globe, slightly smaller in size, but ripening 10 days before the old type of Danvers. Of fine appearance, skin dark yellow, the bulbs are long keepers and whoever needs this type of Onion and gets his seed from us can rest assured, that he will get the right kind of seed. Seed grown by the Associated Growers of Colorado absolutely reliable, the best seed in existence. Pkt. 10c; oz. 20c; lb. \$2.90; 10 lbs. \$26.00.

EBENEZER ONION—In shape a flattened globe skin dark yellow, flesh white mild and very firm. Properly stored will keep almost the year around. Makes beautiful onion sets and is used for that purpose extensively and the sets are known in the East as Japanese Onion sets. Pkt. 10c; oz. 20c; lb. \$2.20.

Ours is the most critical trade—gardeners and florists. We cater to the wise and experienced. We give value. Among our customers are the foremost florists and market gardeners.

SOUTHPORT WHITE GLOBE

A perfect globe, large and very solid. One of the best for storing over winter. Sells well in any market, especially if harvested as soon as ready and dried in the shade so as to preserve its whiteness. Heavy users of onions like hotels, restaurants, etc., buy S. White Globe whenever they can get it. Also fine as a bunch onion. Our seed is of the highest quality and if you will try you will find it is the best and for less. Pkt. 10c; oz. 30c; 1 lb. \$4.00, prepaid.

You can order all seeds priced at 40 cents per ounce or over in quarter and half ounce lots at ounce rate. Quarter and half pounds at pound rate. Five pounds or over at 10 pound rate. 25 pounds or over at 100 pound rate.

SOUTHPORT YELLOW GLOBE ONION

Perfectly round, solid, fine grained of mild flavor, with deep golden yellow skin. Extra good keeper and a ready seller in all markets, especially so in the East. The seed we offer is raised in the East by a grower of long years of experience who specially selects this seed from large perfectly shaped, well colored and solid bulbs, well cured and ripened, carefully avoiding all thick necked ones. Pkt. 10c; oz. 30c; 1/4 lb. \$1.00; 1 lb. \$4.00, prepaid.

Do you know that we are the actual growers of many seeds we sell?

YELLOW GLOBE DANVERS—Quite globular in shape entirely free from thick necks, heavily productive. Pkt. 10c; oz. 25c; 1 lb. \$3.60.

GROWING LARGE ONIONS

To grow fancy, extra large onions, sow the seed of Prizetaker or Valencia in a cold frame about Feb. 1st. Keep the frost out by covering the frames with sashes before you sow as well as after sowing. When the plants are 6 in. high and about as thick as a pencil, they are ready to be set out. Clip the tops about one-third. Also the roots if too long, to avoid doubling up of roots when setting. Plant in rows foot apart and 6 in. apart in the row. Use a "dibble" with ten pegs nailed 6 in. apart. Set the plants in holes made by the "dibble" about an inch deep.

ONION EARLY BEAUTY

EXTRA EARLY—HIGHLY ATTRACTIVE

Weeks ahead of other Onions in earliness and ready for market at a time when other onions are the size of marbles. Bulbs very large and almost a globe in shape, slightly flattened on top. The skin is dark, rich yellow, adhering firmly to the bulb, making it conspicuously clean and neat. Early Beauty Onion was on exhibit in one of the large local grocery stores together with many other onions, that we grew, for comparison and for trial. Early Beauty was unanimously pronounced to be the choicest of all. The appearance of the bulb is such that at first sight anyone can see that it is a very solid onion, and one that has long keeping qualities. Early Beauty ripens evenly and being highly attractive in appearance and matured long before other onions are ready, it is readily salable at top prices on any market. Early Beauty will make money for the grower—that has been proven. Pkt. 10c; oz. 40c; 1 lb. \$4.50, prepaid.

ONION EARLY BEAUTY

A local grower regarded here by all who know him as one of the best gardeners in our locality grew for a trial in 1929 our Early Beauty Onion. He says this: That onion of yours is certainly the thing. Had I planted my few acres all with this onion, the way the prices were this year, I could have easily made ten thousand dollars.

We are harvesting at this time your Early Beauty Onion. This seed, planted under precisely same conditions as three other early varieties from other seedmen, proved itself the better. A nice bulb admired by all. It is all you claim for it, etc. From a customer in New Jersey.

ONION SETS

Onion set prices are subject to market change. Write for prices on quantity lots. We grow Onion Sets on a large scale.

All Postpaid	1/2 lb.	1 lb.	CARROT GOLD GOIN
White Onion Sets.....	\$0.15	\$0.30	is weeks ahead in earliness, the
Red Onion Sets.....	.15	.30	roots of just right size. Makes
Yellow Sets15	.30	money for the grower.

ONION SILVER SKIN

SAME AS WHITE PORTUGAL—An early, flat, silvery white variety, without a flaw. Good keeper, retaining its fine white color much better than Barletta or any other pickling sort and a variety about which it can be truly said that "once grown always grown." Pkt. 10c; oz. 20c; 1/4 lb. 85c; 1 lb. \$3.40, prepaid.

VARIETIES OF ONION

EXTRA EARLY PEARL—Extra early, white, globe shaped, rather small, pickling variety. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 50c; 1 lb. \$2.00, prepaid.

WHITE BARLETTA—Small, white sort, good for pickling or bunching. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 45c; 1 lb. \$1.80; 10 lbs. \$17.00, prepaid.

WHITE PICKLING—Used exclusively for pickling. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 45c; 1 lb. \$1.80; 10 lbs. \$17.00, prepaid.

WHITE PORTUGAL—See Silver Skin.

WHITE QUEEN—Extra early, white skinned, pickling variety. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 60c; 1 lb. \$1.80; 10 lbs. \$17.00, prepaid.

ONION SILVERBALL

The Earliest Onion in Existence

Globe shaped, very large, similar in shape and size to Prizetaker, the skin white or creamy white, the flesh pure white, mild and tender and ready for the market from 3 to 4 weeks earlier than the popular Southport White Globe and fully 12 days earlier than Bermuda.

Silverball has size and is a heavy producer. Growers that tried Silverball onion speak of it in the highest terms of praise. There is NO onion that we know of that will pay better than Silverball. We urge all our customers to whom onions mean anything to try Silverball. You can try Silverball at our expense. Upon request we will send you a packet of seed free of charge. Not recommended for storing. Its value lays in its earliness. Should be marketed early. Pkt. 10c; oz. 40c; lb. \$4.00.

ONION MINNESOTA GLOBE

LONGEST KEEPER OF ALL ONIONS

Minnesota Globe is the result of over 30 years of selection. The bulbs are of beautiful appearance, real dark and real bright red, a slightly elongated globe, a shape superior to any other globe shaped onion now in existence.

Minnesota Globe will keep in storage till June without sprouting, an absolute fact established by us by actual trial extending over four years. This cannot be said about any other onion and makes Minnesota Globe the longest keeping of ALL onions.

When a grocer or commission man buys Minnesota Globe and finds that there is no waste, that his onions stay solid and unsprouted, he certainly will want Minnesota Globe and no other Red Globe.

The above are absolute facts. All that will grow Minnesota Globe will gain as the buyers will be glad to pay a slight premium for so valuable an onion. Pkt. 10c; oz. 35c; lb. \$3.80, prepaid.

PRIZETAKER ONION

Prizetaker is of excellent quality, of attractive appearance, always uniformly and perfectly globe shaped, of bright clear straw color and as mild in flavor as the imported Spanish onions. No other onion ever met with such universal favor and became popular as rapidly as Prizetaker. It is the best onion for size, mildness of flavor, keeping qualities as well as large yield, and succeeds well everywhere, North, South, East and West. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 75c; 1 lb. \$2.90; 10 lbs. \$26.00, prepaid.

WHITE BUNCHING ONION

A quick growing new variety, unexcelled for bunching. Develops into saleable size 40 days after sowing. Sown as late as July 4th, is ready in the early part of August. Does not knob like other varieties, at least not as early as for instance Silverskin. Stalks white and tender. Start early in the spring, make several sowings. All that tried this onion report very satisfactory results. Pkt. 10c; oz. 45c; lb. \$3.00.

Ailsa Craig
Onion

AILSA CRAIG ONION

One of the largest of all onions, rapidly gaining in popularity. The bulbs are very uniform in size, shape almost globular, with sulphur yellow skin, neck very small, the interior white, fine grained, flavor mild and sweet and a good keeper. Ailsa Craig is in every way as large and handsome as the finest imported Spanish Onion and superior to it on account of its remarkable keeping and very heavy yielding qualities. To attain the greatest possible size this variety should be sown early in the spring in a hot bed and transplanted later in the open. Ailsa Craig is a variety of English prize winning stock. Anyone wanting an extra large fine looking onion, especially for exhibition purposes, should plant Ailsa Craig. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 73c; 1 lb. \$2.90; 10 lbs. \$26.00, prepaid.

Okra

CULTURE—2 oz. for 100 feet of row, 8 lbs. for 1 acre. Plant when the ground is thoroughly warm, in rows 3 feet apart and thin out to 2 foot in the rows. Gather the pods while they are young.

BRUNSWICK OKRA Also known as Improved Dwarf Green Prolific. Is heavily productive, with tender, thick pods of the highest quality, slightly corrugated and rather blunt pointed. The plants grow 2½ to 3 ft. high. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 15c; lb. 60c.

PERKIN'S MAMMOTH OKRA An early and heavily productive variety. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 15c; 1 lb. 60c.

OKRA WHITE VELVET A distinct variety with large, tender, smooth pods. Also known as Creole Okra. What we offer is an extra choice strain, producing pods that remain tender until nearly full size. Pkt. 5c; oz. 10c; lb. 60c; 10 lbs. \$5.50, prepaid.

OKRA FIRST CHOICE

First Choice Okra placed on the market in competition with other Okra will sell first. The buyers will give it preference every time. It is First Choice Okra's fine appearance and apparent high quality that makes it a favorite with the buyers. The pods are thick, very fleshy, exceptionally tender and fine flavored, 6 inches in length by 1¼ inches in diameter at the bottom end and carrying the thickness well throughout the entire length. An attractive green color and the shapely form of the pods makes an irresistible appeal to all who love this vegetable. The plants are sturdy and dwarf, only about 30 inches in height, producing pods at each leaf joint. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 80c; 10 lbs. \$7.50, prepaid.

Garden Peas

CULTURE—3 lbs. for 100 feet of row. 3 bushels for 1 acre.

EARLY VARIETIES—Plant as early in the spring as the ground is thawed out to the depth of about 3 inches, sow by hand very thickly in a trench about 2 inches deep.

Peas properly sown lay in the trench at places so thick as to touch one another and of course in some places they will be an inch or two apart, in other words, you cannot sow them evenly by hand. The idea is to sow as thick as to have the vines close together so that they will hold each other erect. This does away with support and the pods will be kept off the ground. Many gardeners have been very stingy with the seed, they planted way too thin. The results of thin planting are: The vines since they are wide apart cannot support each other and the first rain that comes beats them down and they lay in the mud, the pods start to rot and half the crop is lost. To pick the pods from such planting is no pleasure. To sow thickly as we are advising is the only profitable method. It will insure a heavy crop and the job of picking will be an easy one.

LATE PEAS—These can be planted at any time from March 15th up to May 1st. The method of culture is the same as given for early peas but long vined varieties like Telephone and others must be supported by trellis or brush. Peas do well on most any soil, but low and excessively rich ground should be avoided as on such ground the crop has a tendency to grow rank vines but not pods.

SMOOTH AND WRINKLED VARIETIES—Seed of some sorts of peas is smooth and other wrinkled. You have been at all times advised not to plant the wrinkled sort as early as the smooth seeded. In our experience we find that the wrinkled sorts can be planted just as early as the smooth seeded without any injury.

LAXTONIAN PEA LARGE PODS—VERY EARLY

The vines are of sturdy, vigorous and healthy growth, with deep green leaves, grow only 16 to 18 inches high, require no supports of any kind, bear in prodigal abundance from top to bottom of vines, large dark green plump pods which contain 8 to 10 delicious Peas of double the size of any other early Pea. Laxtonian has pods as large and the seeds are of such high superlative quality that they fully equal the best main crop Marrowfat variety. Hardy and very early. Pkt. 10c; ½ lb. 18c; 1 lb. 35c, prepaid. 10 lbs. \$2.00; 100 lbs. \$17.00, not prepaid.

LITTLE MARVEL PEA A MARVEL OF PRODUCTIVENESS

It is a great improvement over American Wonder, having larger pods which contain usually two or more peas to the pod. The pods are of deep green color, a feature of great importance, filled almost to bursting with luscious, sugary, large and better peas, frequently borne in pairs. The vines are of uniformly even growth, averaging 15 inches in height, the pods average 3½ inches in length and are square at the ends, remaining in prime condition for a week longer than those of either American Wonder or Nott's Excelsior. Pkt. 10c; ½ lb. 18c; 1 lb. 35c, prepaid. 10 lbs. \$2.00; 100 lbs. \$18.00, not prepaid.

POTLACH OR BIG DINNER PEA

The vines are vigorous and strong, of even growth, 20 to 24 inches in length, with luxuriant dark green foliage, bearing pods of rich green color which average 4 inches in length and are filled to bursting with 9 to 11 luscious, sugary Peas of finest flavor and best quality. The pods are quite broad, pointed at the ends and usually borne in pairs. No other variety will produce more pods, and no pods could shell out better. In season it is quite early, pods being fit for table use in about sixty days after planting. The Potlach is a variety of great merit. Pkt. 10c; ½ lb. 15c; 1 lb. 30c; 10 lbs. \$1.90; 100 lbs. \$16.00, not prepaid.

PRICES: FOR PEAS IN LOTS OF 10, 25, AND 100 LBS. ARE F. O. B. COUNCIL BLUFFS. We sell 5 pounds at 10 pound rate, 25 pounds or over at 100 pounds rate.

DE GIORGI'S MODEL PEA

BIG PODS—EXTRA FANCY—EVERBEARING

Wonderful extra early pea, ready in 50 days from date of planting, yielding an enormous crop of dark green pods 4 inches long, fairly broad pointed, containing 8 to 9 large dark green peas, tender and sweet. The vines are short, not over 18 inches. Unlike other peas MODEL can be planted for succession of crops throughout the entire season as it bears even in hot weather. From one planting you will harvest two full crops of pods. When you pick the first crop, your vines will cover themselves again with bloom and produce another crop. And under good cultivation MODEL produces three crops from one planting. DeGiorgi's Model is one of the best extra early, large podded peas we know of, sure to pay you handsomely. 1 lb. 30c, prepaid; 10 lbs. \$2.00; 25 lbs. or over at 17 cents per lb. F. O. B.

ALASKA—An early smooth seeded pea of fair quality. A very old variety yet still popular with many growers. Pkt. 10c; 1 lb. 30c, prepaid. Not prepaid: 10 lbs. \$1.70.

DWARF TELEPHONE—A medium early Pea with large pods holding from 7 to 9 peas of fine quality. Pkt. 10c; 1 lb. 30c, prepaid. 10 lbs. \$1.90; 100 lbs. \$17.00.

GRADUS—An early variety bearing on vines 3 feet tall, handsome pods about 4 inches long of light green color. The pods are frequently not well filled. This is the nature of this pea and has nothing to do with the quality of the seed. Pkt. 10c; ½ lb. 20c; 1 lb. 30c, prepaid. 10 lbs. \$1.90; 100 lbs. \$17.00.

Sorrel

Sow in drills 18 inches apart, early in the spring, thin out to 6 inches apart in the row, keep the flower stems cut off as they appear. The first crop of leaves is ready 60 days from date of sowing. The plants continue in full bearing for 4 to 5 years. An excellent vegetable prepared for the table like spinach, also used as a salad. Or cooked with spinach, one-third sorrel and two-thirds spinach.

FRENCH SORREL—Produces quantities of large pale green, tender leaves of excellent quality. Pkt. 10c; oz. 20c; 1 lb. \$2.40.

All of our specialties and novelties are items of real merit, superior either in earliness, quality or productiveness, varieties that pay to grow.

Quality vegetables, quality flowers will always find a buyer and a better price will always be paid for vegetables or flowers placed on the market early. Right kind of seed is the key to better profits.

Our duty as seedmen is to have good seeds, seeds of superior varieties. We are doing our duty—just see the long list of the new and superior, in both vegetables and flowers. We search the world for the new and good in seeds and thus serve our own and our customers' best interests. We feel that we deserve your patronage.

WELCOME PEA

Welcome is a new pea that produces pods fully as large as those of Laxtonian, ten days earlier. See description on page 4.

NEW LEADER PEA

Leader is the best pea of the Alaska type. About the same in earliness, has much larger pods and is a tremendous producer. Pkt. 10c; lb. 30c; 10 lbs. \$1.70; 100 lbs. \$14.00.

SUGAR DWARF GRAY SEEDED—This variety is used the same as snap beans, both pod and pea being eaten. The pods are broad, and when young very sweet and tender. Pkt. 10c; ½ lb. 20c; 1 lb. 40c, prepaid. 10 lbs. \$2.00.

WHICH PEA IS THE BEST?

ABOUT PEAS—Market growers must plant only the highly developed new varieties, in order to stay on the right side of the ledger. These are: For the earliest crop **WELCOME**, a large podded pea with pods not very well filled out and of rather pale green color. Welcome makes a crop days ahead of even the finest strain of Alaska, and no other pea will show the grower better profit. Mark, that we recommend Welcome **ONLY** for the earliest crop. To follow Welcome, Laxtonian or Model should be planted. Blue Bantam will be ready 4-5 days after Laxtonian and should be planted by every grower because the pods are extra large, well filled, dark green and of the very finest quality, so that Blue Bantam will sell even when the market is flooded with peas. The best medium early pea is Potlach and for a late crop Chieftain is hard to beat. We would never touch such varieties as First and Best, Alaska, Gradus, etc. All these WERE fine varieties years ago and are a poor excuse for peas today. We list these varieties however because there are still calls for these "back numbers."

WHAT KEEPS PRICES DOWN?

Inferior stocks. Too many gardeners bring to market vegetables, that really should never reach the market—poor in quality. Poor stuff is hard to sell, even for a low price. These producers of low grade vegetables stand on the market for hours, their vegetables are not moving, they lose patience and in the end sell to peddlers for whatever they can get. And they get mighty little. The peddlers then start on their routes, they cover the whole city, they sell to households. That kills the call for good stuff, for sale in the regular stores. The storekeeper cannot sell, because his customers are loaded with the cheap peddler's stuff. What is to be done about it? Organize, educate, preach quality. Grow less, save time, hard work and expenses, offer for sale only the very best. For high grade produce you will get good prices.

We sell half pounds at pound rate, 5 lbs. or over at 10 lbs. rate, 25 lbs. or over at 100 lbs. rate.

SOUTHERN TABLE PEAS

Southern Table Peas or edible Cow Peas resemble bush beans in growth, requiring same culture and being prepared for the table same as beans. The dried seeds are highly prized by many, either boiled, baked or in soups. These peas produce immense quantities of pods which are much longer than those of beans, the pods are straight, round and packed with as many as 21 luscious, sugary peas, very tasty and nourishing. You'll like these, just try them once.

EXTRA EARLY BLACK EYE—Ready in 65 days from date of planting, bearing a heavy crop of fine, long, straight, well-filled pods. Popular market variety because early. Pkt. 10c; lb. 30c, prepaid. Not prepaid, 10 lbs. \$1.60.

CREAM CROWDER—Almost as early as the preceding variety, pods extra long, large and heavy. Pkt. 10c; lb. 30c, prepaid. Not prepaid, 10 lbs. \$1.60.

NEW PEA—CHIEFTAIN

Chieftain Pea—(Starosta) leads all other peas, dwarf or tall, early or late, in size of pod and productivity. The vines are truly burdened with large, broad, medium dark green pods, and every pod is well filled with extra large, tender, delicious sweet peas. It is the best and most profitable pea to grow, to follow Gradus or Laxtonian and ripens just a few days ahead of Telephone. The pods are very attractive in appearance, they are very broad and heavy, and soon fill the baskets. The vines are 2½ feet tall, requiring no staking, very strong and sturdy of deep green color. The pods are from 4½ to 6 inches long, and contain from 8 to 10 large, bright green peas.

Chieftain is the largest podded pea that we have ever grown, and we have never seen so many pods on a vine, not even in the far north where the climate for the perfect development of peas is ideal. Chieftain can be justly called the Jumbo of the pea family and we recommend it strongly as the best main crop variety to all, and especially to those who wish to grow the largest sized pods for exhibition purposes. Pkt. 10c; ½ lb. 20c; lb. 40c; postpaid. Not prepaid: 10 lbs. \$2.30; 100 lbs. \$21.00.

Chieftain Peas

ALDERMAN PEA

A medium early pea, heavily productive, with very large, straight dark green pods. An excellent sort. Pkt. 10; ½ lb. 20c; 1 lb. 40c, prepaid. 10 lbs. \$1.90; 100 lbs. \$16.00.

IMPROVED TELEPHONE—A late variety with vines growing 4 feet tall, bearing immense quantities of large, heavy, dark green pods filled with 8 to 9 sweet, tender peas. Pkt. 10c; lb. 30c, prepaid. 10 lbs. \$1.80; 100 lbs. \$16.00.

LAXTON'S PROGRESS—Laxtonian type, pods 4-4½ in. long, dark green, well filled. Heavy yielder, extra early, first class market sort. Height 18 in. Lb. 40c, prepaid. 10 lbs. \$2.00; 100 lbs. \$20.00, not prepaid.

THOMAS LAXTON—Considered a better variety than Gradus, because the pods are darker green and blunt at the blossom end. Height 3 feet. Pkt. 10c; lb. 30c; 10 lbs. \$2.00; 100 lbs. \$17.00.

CHAMPION OF ENGLAND—A late variety, vines 4-5 feet tall, pods 4 in. long containing 6-8 large and sweet peas. Heavily productive. Pkt. 10c; lb. 30c; 10 lbs. \$1.90; 100 lbs. \$16.00.

BLUE BANTAM—Quite early but not the earliest wrinkled-seeded variety. Vines 15 inches tall, pods 3-4 inches long and 8-10 very large and very sweet peas in each pod. A variety that is hard to beat. Pkt. 10c; lb. 40c; 10 lbs. \$2.20; 100 lbs. \$20.00.

How to Get a Crop of Early Peas

By cultivating intensively. Peas do not need any great deposits of manure in the ground, they gather the nourishment from the air (nitrogen), they leave the ground in better shape after giving a crop of pods and all you have to do is to cultivate and again cultivate, the more the sooner you will have pods to pick. By this method we hasten maturity of a crop from a week to 10 days.

PEPPER HARRIS EARLY GIANT

Extra early, only a few days later than Harris Early. Fruit 5 in. long, 3½ in. through, green at first, turning scarlet when ripe, mild and sweet. Pkt. 10c; oz. 40c; lb. \$3.60.

PEPPER EARLY GIANT NEAPOLITAN

Produces on short plants not over 20 inches tall a heavy crop of sweet, meaty peppers, averaging 4 inches in length and 3 inches in diameter. Two weeks earlier than Ruby King, more productive, and the fruits bigger in size. Pkt. 10c; oz. 40c; lb. \$14.00, prepaid.

PEPPER CALIFORNIA WONDER

New, medium early variety, producing from 5 to 9 square shaped fruits per plant, 4½ inches long and 4 inches through, with flesh over ¼ inch in thickness. The fruits are dark green turning to bright crimson when ripe, remarkably smooth. The immensely thick flesh is tender, crisp, sweet without trace of pungency and it is not unusual to find specimens weighing a full pound. A valuable shipping variety and of all peppers the meatiest. Pkt. 10c; oz. 45c; lb. \$5.00.

PEPPER EARLY GEM

Same as Harris Earliest. The name of Ey Gem is used to avoid mistakes in filling orders. Please order under the name of Early Gem.

Extra early and a paying sort as it ripens two weeks ahead of other peppers. The peppers are rather small but the bunches are covered with bright red fruit which you can harvest by lifting the bush, picking it clean and rush the peppers to market at a time when the less progressive growers have no red peppers at all. Can be planted closer together as the bushes are dwarf and compact. Bell shaped, 3½ inches long, sweet. Pkt. 10c; oz. 40c; lb. \$3.80.

SWEET TOMATO PEPPER Same in shape as Tomato or Squash Pepper but not hot. It is a thick meaty sweet pepper that ripens early. Popular with many that eat it raw in salads, etc. In our locality it is sometimes called Pimento pepper an entirely different variety. See description Pimento or Perfection Pepper. Pkt. 10c; oz. 30c; lb. \$3.00.

THE BEST is the only thing to grow. To produce best vegetables or best flowers you must have the best seed. If you are not careful and buy your seed anywhere you will get a batch of seed not quite up to the mark. Your product will be of second grade quality and when you will market your produce you will dispose of it only at second rate prices. Seed business is a science, a real seedman is a near scientist. He has to know a great deal about seeds before he can render real service to his customers. If you are new in the game of raising vegetables or flowers ask some old gardener or florist what he thinks about it.

Peppers

Pepper
Chinese
Giant

Very
large
fruited

ANAHEIM CHILI—Bears an abundance of slightly pungent peppers, six inches long, about an inch thick at the stem tapering to a blunt point, very attractive. Color brilliant scarlet. Pkt. 10c; oz. 40c; ¼ lb. \$1.00; lb. \$4.00.

BULL NOSE—Also called Large Bell or Bullnose. Is early, heavily productive, green at first, bright red when ripe, 3 inches long, 2 inches broad, flesh fairly thick and fairly hot, a favorite pepper for pickling. True strain. Pkt. 10c; oz. 40c; lb. \$3.00.

CAYENNE LONG THICK—Pkt. 10c; oz. 40c; lb. \$3.00.

CAYENNE LONG YELLOW—Fruit yellow, very hot. Pkt. 10c; ½ oz. 20c; oz. 40c; ¼ lb. \$1.00; lb. \$4.00.

CAYENNE LONG RED—Very pungent. Pkt. 10c; ½ oz. 15c; 1 oz. 30c; ¼ lb. 70c; 1 lb. \$2.80.

CELESTIAL—Plants compact, 16 in. high, fruit numerous, small, conical, hot to taste, bright red when ripe. Pkt. 10c; oz. 60c.

GIANT CRIMSON—A very valuable variety as it is one of the earliest, large fruited, sweet pepper. Green at first, deep crimson when ripe. Pkt. 10c; 1 oz. 40c; 1 lb. \$4.00.

CHINESE GIANT—Very large mild fruited variety. Quite late and a shy bearer. Pkt. 10c; 1 oz. 40c; 1 lb. \$4.00.

NEAPOLITAN—Very early and heavily productive. An upright growing variety. Fruit green at first, scarlet when ripe. Pkt. 10c; ½ oz. 15c; 1 oz. 30c; ¼ lb. 55c; 1 lb. \$2.20.

PIMENTO OR PERFECTION—The fruits are perfectly smooth, very thick meaty and very mild. Ripens late. In our locality it does not redden up and is caught by frost while the peppers are still green. See description Sweet Tomato Pepper. That may be the pepper you want. Pkt. 10c; ½ oz. 15c; 1 oz. 30c; ¼ lb. 60c; lb. \$2.40.

RUBY KING—Early, fruit large, flesh thick and sweet. Pkt. 10c; 1 oz. 20c; 1 lb. \$2.00.

RED CHILI—Fruit small, pointed, bright scarlet and quite hot. Pkt. 10c; ½ oz. 15c; 1 oz. 30c; 1 lb. \$2.60.

SWEET MOUNTAIN—Our Sweet Mountain Pepper is the true variety which is fairly hot and not sweet. Price same as for Bull Nose.

TABASCO—The hottest of all peppers. Fruit quite small. Pkt. 10c; 1 oz. 40c; 1 lb. \$4.00.

WORLD BEATER—An early and large sweet pepper, green at first, red when ripe. A fine variety. Pkt. 10c; oz. 40c; ¼ lb. \$1.00; 1 lb. \$4.00.

OSHKOSH—Heart shaped, smooth, without lobes, 3 inches wide at the base, 5 inches long, tapering to a blunt point. Green at first, yellow when ripe, sweet, medium early. Pkt. 10c; oz. 40c; lb. \$4.00.

HOT BULLNOSE PEPPER is a pepper in demand on many markets. The true Bullnose is fairly but not excessively hot. If you want the true strain of Bullnose we have the seed.

NEW PEPPER GOLIATH

HEAVILY PRODUCTIVE—EARLY—FRUITS LARGE

Fruits of mammoth size, averaging 5 inches in length and 3½ inches in width at both ends. Fully as early as Ruby King and very productive, some plants producing as high as 32 marketable peppers. The fruit is green at first and later turns to a beautiful shade of scarlet. Flesh is thick and sweet and keeps in prime condition for a long time.

Grow Goliath Peppers For Market

We assure you that there will be no time when you will have to take unsold peppers back home. GOLIATH PEPPER will sell itself and you will not have enough to supply the demand. That is our experience. GOLIATH PEPPER is unlike all other peppers, it is a real wonder, it is immense, a great surprise. We grow GOLIATH PEPPER on our seed farm and many market gardeners from our city and Omaha went through our field of GOLIATH PEPPERS. Were they surprised by the sight? Judge yourself. One said: "This is the most wonderful and largest pepper I have ever seen." Said another: "I have never seen so many big peppers on a plant," Says a third: "DeGiorgi, you have a most wonderful pepper, something that will make money for all gardeners that will plant it."

GOLIATH PEPPER will give at least double the returns from an acre over other varieties, because it yields more than twice as heavy a crop and because it brings double the price common peppers do.

So very valuable is GOLIATH PEPPER that many of our customers who have been growing it before are saving their own seed, as they do not want to take the chances of us having a crop failure. They know that if they should be unable to procure the seed of GOLIATH PEPPER it would mean a big loss to them.

All gardeners that have seen our crop of Peppers for seed were surprised by the sight and all asked us to save some seed for them. We showed GOLIATH PEPPERS to the owner of the largest and finest grocery store in our city. He did not believe his eyes and when told we grew those peppers right here on our farm he showed signs that he did not believe us. "No," says he, "these peppers were shipped to you from somewhere, do not tell me that peppers like that can be grown here in Iowa." Well, we showed him our field and he now believes. We say about our GOLIATH PEPPER: At a single picking you will get from a single plant 10 or more most beautiful and largest peppers you have ever seen. The peppers are so large that it is impossible to put more than 20 peppers in a market basket of one-third bushel capacity. It beats Chinese Giant or any other pepper in size. It is sweet as an apple, thick meated and VERY EARLY. Place your order NOW. Pkt. 10c; ¼ oz. 15c; 1 oz. 60c; ¼ lb. \$1.75; 1 lb. \$7.00.

MAGNUM DULCE—This is a very large pepper, the fruit reaching a size of 7 inches long by 4 inches through. Flesh thick, mild flavored. A late variety. Pkt. 10c; ¼ oz. 15c; ½ oz. 30c; 1 oz. 60c; ¼ lb. \$1.25.

HOT TOMATO OR SQUASH Early variety with tomato shaped fruit, glossy red, flesh thick, somewhat hot. Heavily productive. Pkt. 10c; oz. 30c; 1 lb. \$3.00.

SZEGEDINER ROSEN—Hungarian variety, bearing large fruits of bright red color, somewhat pungent. Pkt. 10c; 1 oz. 40c; 1 lb. \$4.00.

GOLDEN KING—This is the largest fruited yellow colored pepper. Very productive and the fruits are smooth and mild in flavor, not hot. Pkt. 10c; 1 oz. 40c; 1 lb. \$4.00.

LARGE RED CHERRY—Fruits are rather small sized, bright red when ripe and quite hot. Pkt. 10c; 1 oz. 30c; ¼ lb. 75c; 1 lb. \$3.00.

Your Goliath Pepper sold on the market better than any other pepper.

H. P. L., Sewell, N. J.

A letter from a Minnesota customer:

Must tell you of the luck I had with the Giant Neapolitan and Goliath peppers this last season. They were the largest and finest ever grown here in the last 10 years anyway, so that means for all time. Of the very largest 12 filled a bushel basket level full. There was no trouble selling the large peppers at 40 cents per dozen and the largest ones for 10 cents each.

TO DO BETTER

To be more prosperous, grade better. It rarely pays to market second grade produce. It is very important that you start right by planting and growing only the best and finest new strains of vegetables. We are offering many such new and exceptionally good strains.

GOLIATH PEPPER makes large sturdy plants and should be allowed more space than common varieties. We plant 30 inches apart each way. If in addition to giving this variety ample room to develop water in plenty be supplied, it will produce bigger peppers than shown in our illustration.

WHICH IS THE BEST PEPPER?

For an extra early crop, Goliath and Early Neapolitan. Goliath is also good as a main crop variety and hard to beat. California Giant and Magnum Dulce are extra large but late. Best hot and long pepper is Anaheim Chili. Best mildly hot pepper is Bull Nose.

CULTURE—1 oz. of seed will produce about 2,000 plants; 6 ozs. plants an acre.

The culture of the peppers is similar to Egg Plant. Have the plants in hot beds 3x3 inches and in the field in rows 3 feet apart and 18 inches apart in the rows. Pepper requires very rich soil in order to develop fruit of large size.

Rhubarb

CULTURE—1 oz. for 100 feet of row. Sow in rows 18 inches apart and thin to 6 inches apart in the row. The following spring set out your roots in rows 4 feet apart and 3 feet apart in the rows. Rhubarb requires very rich soil.

FORCING RHUBARB—This is profitable. If you have room under benches, plant the rhubarb. No attention necessary except watering. Only heavy roots full of life are suited for forcing. Dig up in the fall, pile up, cover lightly with soil and allow to freeze before planting under the benches. Early in spring dig the roots and plant back in the field.

VICTORIA—Choice strain with heavy deep red stalks. Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. \$1.00; 10 lbs. \$8.50.

RHUBARB ROOTS—Each 20c, postpaid. In lots of 25 or over, heavy roots \$5.00 per 100; light roots \$2.00 per 100, not prepaid.

We sell half pounds at pound rate, 5 pounds or over at 10 pound rate, 25 pounds or over at 100 pound rate.

Parsnip

CULTURE—1 oz. to 100 feet of row (3 lbs. to the acre.

Parsnip is very hard to germinate. To insure success sow either in the fall or very early in the spring while the ground is moist. The seed of parsnip is very light and if it happens that a hard crust is formed on the ground the young and feeble plants, instead of pushing through the crust run underneath and suffocate. To overcome this difficulty use a wheel hoe in loosening the crust. Set your knives so that they turn out. Through the cracks and crevices the young plants will make their way. Have the rows 16 inches apart and thin to 4 inches apart in the rows, cover the seed half an inch deep and press the soil well to insure better germination. It is a good plan to sow radishes or lettuce with parsnip seed and thus loosen the ground for the weak and tender parsnip plants. Sowed together with radish, parsnip seed will come at the same time with radish or soon after, whereas sowed alone it quite often takes a whole month before the seed shows up.

Parsnip Hollow Crown

HOLLOW CROWN — Long, smooth, heavy roots, tender and sweet. Our strain is a good selection. Pkt. 5c; oz. 10c; ¼ lb. 15c; 1 lb. 60c; 10 lbs. \$5.50, prepaid.

PREMIUM PARSNIP—The roots are less than two-thirds as long as those of Hollow Crown. At the same time it yields heavier, is easily pulled and a grand sort for stiff, clayey soils. Pkt. 5c; oz. 10c; ¼ lb. 15c; 1 lb. 60c; 10 lbs. \$5.50, prepaid.

Sage Salvia Officinalis

An annual kitchen herb much used for seasoning. Sow the seed early in the spring. In the North protect by light covering of dry straw or hay. Hardy in the South without protection. Height about 15 inches. Pkt. 5c; 1 oz. 30c; 1 lb. \$2.40.

CABBAGE DELUX will stand a great amount of drought and will make heads so hard and solid that in our locality the storekeepers sell it as shipped in Northern grown cabbage.

We sell half and quarter pounds at pound rate, 5 pounds or over at 10 pound rate, 25 pounds or over at 100 pound rate.

Pumpkin

CULTURE—1 oz. for about 15 to 30 hills, 3 to 5 lbs. per acre, depending on variety, whether small or large seeded.

Japanese Pie Pumpkin

About Pumpkins

Can be easily grown in corn or potatoes. If planted by itself in hills 6 by 4 feet. Give frequent but shallow cultivation until the vines cover the ground. Rich moist soil is the best for pumpkins.

The biggest of all is the King of Mammoths and it is the best variety to grow for exhibition purposes. Winter Queen has the most delicately flavored flesh and it is the best variety to grow for the table. Large Cheese is a sort from which you will get the most good because it is the most solid fleshed of all pumpkins, a heavy yielder of good eating quality, keeps for a long time and if you should happen to have surplus you may store it away without fear of it spoiling or it may be sold to canning factories or stores.

Sugar Pie is extra sweet fleshed and extra good for pie making. Striped Cushaw because heavily productive, out yielding other varieties in tonnage and because of really good quality, is gaining in favor.

KING OF GIANTS—On rich ground and given plenty of room (one plant to a hill) will reach enormous proportions, specimens have been grown as large as 200 pounds. Although very big it is of high quality. Pkt. 10c; oz. 15c; lb. \$1.00.

PUMPKIN WHITE CUSHAW—Fruit crook-necked, creamy white, thick-fleshed, of high quality. Early and heavily productive. It is sometimes called Trombone or Jonathan. Average weight 10 lbs. Pkt. 5c; oz. 15c; lb. \$1.00.

PUMPKIN STRIPED CUSHAW—A superior variety of fine appearance, rind white, mottled in a distinct way with green. One of the most popular sorts for pies, baking and even feeding. It is a heavily productive sort. The flesh is yellow, fine grained, solid, sweet and of fine quality. Quite early. Average weight 12 lbs. Pkt. 10c; oz. 15c; lb. \$1.00.

CONNECTICUT FIELD—Almost round, orange yellow, heavily productive. Pkt. 5c; oz. 10c; 1 lb. 80c, prepaid.

LARGE CHEESE—Flat like a cheese box. Very meaty, sweet and of fine flavor and keeps well. Color buff. Pkt. 5c; oz. 10c; 1 lb. 60c, prepaid.

SUGAR PIE—Small flat fruit of the very finest flavor of all pumpkins. Pkt. 5c; oz. 10c; 1 lb. 80c.

TENN. SWEET POTATO—Bell shaped, flesh white, quality good. Pkt. 5c; oz. 10c; lb. 60c.

WINTER QUEEN OR LUXURY—Of very high quality and of all pumpkins the best keeper. Of medium size. Skin yellow, closely netted. Pkt. 5c; oz. 10c; 1 lb. 80c.

JAPANESE PIE PUMPKIN—In shape crook-necked, sometimes bottle-necked, skin dark green, sometimes striped light green. The seeds are all in the blossom end, the neck being solid flesh, that is sweet, dry, mealy, therefore a popular variety. Early. Average weight 12 lbs. Pkt. 5c; oz. 10c; lb. 80c.

PEANUTS

They can be grown with profit and give big crop on sandy soils in all states where common corn is successfully raised.

CULTURE—Shell the peanuts before planting, use one and a half pecks of Virginia and only one peck of Spanish Peanuts to the acre. Cover the seed about an inch deep on heavy soil and two inches deep on light sandy soil. Plant the running varieties in rows 3 feet apart and a foot apart in the rows. Cultivate as soon as the crop is planted and continue until the vines cover the ground. Never cultivate when the peanuts start to form pods. When the nuts are fully developed is the best time to harvest. Plow the peanuts and then stack them against stakes stuck into the ground, the roots with the peanuts on them to the center and leaves outside. Weight per bu. in hull: Virginia 22 lbs; Spanish 30 lbs. Peanuts resent coming in contact with manure, therefore must not be planted on freshly manured soil.

VIRGINIA PEANUTS

This variety is the most generally grown for commercial use, and makes considerably larger nuts than the Spanish. By mail, postpaid: Pkt. 10c; ½ lb. 20c; 1 lb. 40c.

SPANISH PEANUTS

This variety is the earliest of all peanuts and will mature in the Northern States. The nuts are very sweet and used largely as a substitute for almonds. By mail, postpaid: Pkt. 10c; ½ lb. 20c; 1 lb. 40c.

SUPERIOR PRODUCE is the only way to better profits.

Radishes

CULTURE—1 oz. for 100 feet of row; 12 lbs. per acre. Sow as soon as the ground is open, on fairly rich soil to induce quick growth and roots of good quality. Have the rows 12 inches apart and thin out to 2 inches apart in the row. Radishes can be grown throughout the growing season provided you have the moisture. Whenever radishes suffer from lack of moisture or the absence of nourishment in the ground the roots will be mis-shapen and of poor color and very strong in taste. They must be brought to maturity quickly in order to be of good quality. Winter Radishes should be sown about August 1st; if sown earlier they become of excessive size and are pithy.

Which Is The Best Radish?

PERFECTION WHITE TIP the most popular. Of the long varieties, **ICICLE** is the most tender and least pungent. The best summer variety is **WHITE STRASSBURG** and the finest winter radish is **CALIFORNIA MAMMOTH WHITE**. **SAXA, EARLY DAISY, EXTRA EARLY ICICLE** are ready to pull in 3 weeks after sowing. Must be sown early, late sowings during hot weather means with these three varieties, roots that are hollow and hot.

GIANT BUTTER—This variety is a few days later in maturing than the earliest sorts but when it is ready you will pull Radishes which will be a real delight to you.

PERFECTION WHITE TIP

Perfection White Tip Radish is of a very attractive appearance, half of the root being of sparkling scarlet, and the lower half being pure snow-white. It is perfectly round and smooth, and very uniform in size. The quality is excellent, mild, crisp, tender and never pithy. Pkt. 5c; oz. 10c; ¼ lb. 15c; 1 lb. 60c; 10 lbs. \$5.00; 100 lbs. \$45.00, prepaid.

WHITE TIP SPARKLER

A highly developed globe shaped, white tipped variety, of high quality and fine appearance. The red and white of the root is sharply contrasting, the colors are clear and lively, making the roots very attractive. 10 lbs. \$5.00; 100 lbs. \$45.00; 1 lb. 60c; ¼ lb. 15c; 1 oz. 10c; Pkt. 5c, prepaid to any point in the United States.

ICICLE

Very early, being ready in 25 days from germination. The roots are long, plump, absolutely smooth and of very attractive appearance, the flesh pure white, brittle and very mild flavored. Our strain of this radish has very short and small tops so that it can be planted quite closely. A first class radish for bunching. Pkt. 5c; oz. 10c; ¼ lb. 15c; 1 lb. 60c; 10 lbs. \$5.00; 100 lbs. \$45.00, prepaid.

RADISH EARLY DAISY

Of exactly the same appearance as Perfection White Tip or Sparkler radish. Upper part of the root being bright scarlet, lower part pure white. Daisy differs in earliness, in the fact that it has a small top, that it gets pithy if sown late. It is ready in three weeks after sowing and if sown real early in the spring the roots are solid not pithy at all and of high quality. Pkt. 5c; oz. 10c; 1 lb. 60c; 10 lbs. \$5.00, prepaid.

WINTER RADISH BLACK LUXURY

Top-shaped, three to four inches in diameter and three and one-half inches long. Flesh white, mild, sweet, of very highest quality, much better than other winter radishes. A very superior new variety. Pkt. 5c; oz. 10c; ¼ lb. 20c; 1 lb. 80c.

GIANT BUTTER RADISH

The largest globe shaped early red radish of high quality. Ready for market in from 4 to 5 weeks, remaining solid, crisp and sweet for a long time. Pkt. 5c; oz. 10c; ¼ lb. 15c; 1 lb. 60c; 10 lbs. \$5.00, prepaid.

EARLY SCARLET GLOBE

Very early round variety with skin bright scarlet, pure white flesh and always tender, mild and sweet. Our seed is grown from carefully selected roots of perfect shape, color and size, and will satisfy the most critical. Pkt. 5c; oz. 10c; ¼ lb. 15c; 1 lb. 60c; 10 lbs. \$5.00; 100 lbs. \$45.00, prepaid.

Our Radish Seed is far Northern grown producing radishes earlier than is the case when using seed grown further South. Our seed is produced from selected transplanted roots. The radishes for our seed crop are dug up, sorted out by men of experience and only roots of perfect shape, bright and clear colored with slender tap roots are planted back for the production of seed. Our seed produces radishes that are of uniform appearance highly attractive, possessing real quality and the crop matures evenly with tops of the right size. We supply radish seed to many large growers every year, the call for our seed is heavier, a proof that the seed is of the right quality.

CRIMSON GIANT

Roots large, round to oval in shape, of vivid scarlet, the flesh white, sweet and mild. Medium early. Specimens when not planted too close grow to the size of medium sized apples, and still are most tender and sweet. Pkt. 5c; oz. 10c; ¼ lb. 15c; 1 lb. 60c; 10 lbs. \$5.00; 100 lbs. \$45.00, prepaid.

RADISH SAXA

Saxa is a bright, deep red globe shaped radish with small tops and makes well developed, full sized roots in three weeks from the date of sowing. It is fine looking radish, it tastes good, it sells good and is never pithy or hollow if sown early in the spring or under glass. Unless your market demands white tipped radish exclusively, this is the finest early radish for you to grow. Pkt. 5c; oz. 10c; ¼ lb. 15c; 1 lb. 60c; 10 lbs. \$5.00, prepaid.

Our Special Icicle. Note the thickness of roots. Quite superior to ordinary Icicle.

White Strassburg Radish

A Fine Solid Summer Radish

Remains mild and sweet even in midsummer. It resembles the Icicle in shape, but its roots are larger and not as brittle as those of the Icicle. This is an advantage because the roots of the White Strassburg will not break as easily as those of the Icicle when washing. Both flesh and skin are pure snow-white. It is always very saleable. Any gardener that is not growing White Strassburg is missing a good thing. Pkt. 5c; oz. 10c; ¼ lb. 15c; 1 lb. 60c; 10 lbs. \$5.00, prepaid.

ALL SEASONS RADISH

Can be sown in the spring, summer or fall, and is always sweet and solid. Matures in six weeks.

CALIFORNIA MAMMOTH WHITE—A winter radish of very attractive appearance with long, large, pure white roots of excellent quality.

CINCINNATI MARKET—Similar to long scarlet. Remains a little longer in condition for use.

EARLIEST WHITE TURNIP—Same as White Box which see.

EARLY SCARLET GLOBE FORCING—About the earliest radish in cultivation. Roots globular, of bright scarlet color, having a short top. Quality very high.

EARLY LONG SCARLET SHORT TOP—Roots 5 to 6 inches long, cylindrical, bright scarlet. Must be pulled as soon as ready as it is likely to become pithy if allowed to get old.

EARLY SCARLET GLOBE WHITE TIP FORCING.

FRENCH BREAKFAST—An oval-shaped radish of deep scarlet, with a slight white tip. Early and of high quality.

GOLDEN GLOBE—An early yellow, globe shaped sort, of high quality, resisting the summer heat quite well.

LONG BLACK SPANISH—A winter variety with cylindrical roots 7 to 10 inches long, skin black, flesh white.

LONG WHITE VIENNA—Roots long, white.

ROSE OR SCARLET CHINA—A winter variety with bright rose colored roots about 6 inches long. Quality good.

ROUND BLACK SPANISH—Large round roots, skin black, flesh white, quality good.

VICK'S SCARLET GLOBE—Extra select stock.

WHITE BOX—Nearly round and will attain a size of two inches in diameter before becoming pithy. Skin smooth, ivory white, flesh pure white, somewhat pungent, firm and crisp. Medium early but can be pulled quite early, before fully matured. Is grown both under sash and outdoors.

PRICE—All radishes listed on this page 5c per pkt.; 10c per oz.; 60c per lb.; \$5.00 per 10 lbs., prepaid.

EXTRA EARLY ICICLE—Ready three weeks from date of sowing, roots half long, white, crisp, mild but only when sown early, as soon as the soil is in condition. Pkt. 5c; oz. 10c; lb. \$1.00.

Spinach—Specialty

You need 1 oz. of seed to sow a row 100 feet long, 12 lbs. per acre if drilled or 15 lbs. if broadcasted. Sow early in the spring as soon as the ground is open. If you will sow in August you will get a crop in September. To winter over, sow early in September and protect the planting by covering with straw after the ground freezes up. Many gardeners sow their spinach for early spring any time during the winter, provided the ground is in shape, as it is almost every winter during a mild spell of weather.

WHICH SPINACH IS BEST?—There are two types of spinach. The savoyed and the so-called smooth leaved. New Zealand spinach is the third type and is good only during the hot weather when regular spinach is out of question. Of the savoyed spinaches the best for an early crop is Bloomsdale and if smooth leaved spinach is wanted the best variety is Big Crop. Where the ground is infested with disease use Virginia Savoy, a disease-resistant variety. New Zealand spinach is not easy to sell at first but the buyers soon find out that it has not the dirt like common spinach, is just as good to eat and your spinach will be in demand. Then too, it can be had during hot weather when regular spinach cannot be had.

There Are Two Kinds of Spinach Seed

Good and bad. We have the good seed. We used to grow our own seed, and we did our best to produce seed of high quality. This we could not do as the climatic conditions were too much against us. We tried seed from other growers; people with reputation for quality, but the results did not satisfy us. Finally we tested seed from a certain grower in Europe. It proved to be the most uniform, heaviest and hardiest kind that we ever run across. Since we know this, all our seed is grown by this particular grower. The seed is produced on the grower's own lands, under his supervision, and it is raised in a climate exceptionally favorable for the development of perfect seed, and it is the best seed money can buy.

Because we handle very large quantities, we are in position to offer at very attractive prices.

Field of Select Bloomsdale Spinach

BLOOMSDALE SPINACH

Is ready to cut from 7 to 10 days earlier than most other sorts. The leaves are thick twisted and crumpled, giving them, when ready to ship, an elasticity, adapting them for transportation to long distances and at the same time giving the crop large measuring qualities. What we offer is the genuine true Bloomsdale. 1 lb. 40c; 1 oz. 5c, prepaid. Not prepaid: 10 lbs. \$1.80; 100 lbs. \$17.00.

BIG CROP SPINACH—Very large. So called smooth leaf type. For full description see novelty pages.

BLIGHT RESISTANT—Virginia Savoy Blight Resistant. For full particulars see novelty pages.

GIANT FILL BASKET SPINACH

Early and Very Large

Produces plants often measuring 25 inches across, and has a quantity of thick, succulent leaves in the center resembling a half developed head of lettuce. The leaves are of dark glossy green color, notably thick in texture, moderately crumpled. It cooks very tender, is of excellent flavor. Oz. 5c; lb. 40c, prepaid. Not prepaid: 10 lbs. \$1.80; 100 lbs. \$17.00.

LONG STANDING BLOOMSDALE

Exactly the same thing as the old reliable Bloomsdale. Its value lays in the fact that it will stand longer before bolting to seed. Oz. 5c; lb. 40c, prepaid. Not prepaid: 10 lbs. \$1.80; 100 lbs. \$17.00.

SPINACH—PRINCESS JULIANA

A new variety producing plants that grow compact and have well filled out heart and almost no spreading outside leaves. Although the plants of Juliana are not as big around as other spinaches, it fills the baskets faster because of the heavy, full hearts and thick, fleshy and heavily crumpled leaves, which are green in color.

Will stand two weeks longer than Bloomsdale before shooting to seed. Seed small, somewhat hard to germinate, sow when the soil is well supplied with moisture for best results. Oz. 5c; lb. 40c, prepaid. Not prepaid: 10 lbs. \$1.80; 100 lbs. \$17.00.

NEW ZEALAND SPINACH

Produces a crop of greens, closely approaching the true spinach in flavor, from June to frost. Soak the seed in water for 24 hours. Plant 3 seeds to each 3 inch pot, thin out to one plant to each pot. Plant outdoors when all danger of frost is past, spacing the plants at least 2 feet apart. Start the seed in April. Many will not bother planting spinach in pots (the idea). A good reason why you should. There will be no oversupply on the market, you will get paid for all your extra work. One plant of N. Z. Spinach well grown produces as much as one peck of greens at one picking. The plants continue in production from June to frost. The shoots and leaves of N. Z. Spinach are fleshy and thick, very tender, delicious when cooked. For a maximum crop use fresh manure liberally. Oz. 5c; lb. 40c, prepaid. Not prepaid: 10 lbs. \$2.60.

Squashes

CULTURE—1 oz. for 20 to 40 hills, 4 to 6 lbs. to one acre, depending on the variety whether small or large seeded.

Squash does best on heavy well manured and moist soil. Plant about May 10th, as the later plantings are subject to be attacked by the striped beetle. Plant the bush varieties in hills 3 by 4 feet, dropping 5 seeds in each hill. The winter varieties, like Hubbard, require more room and the hills should be 8 by 6 feet. Cultivate often but shallow.

About Squash Varieties

Squash is divided into two broad classes, summer squash or those prepared (as a rule) by slicing, rolling in flour, cracker crumbs, ground parched sweet corn, etc.; and winter squash, which is cut or broken into moderate sized pieces and baked in the oven or made into pies.

If you want a real treat in Summer Squash try COCOZELLA. It is in its prime when about 8 inches long. At this stage they are very tender and sweet and have no hard rind. If prepared like Egg Plant you'll find a dish you'll truly like; it is good all through, tender and pleasant with positively no bitter taste. The finest flavored and best squash for baking and pies is DELICIOUS; for storing for winter the old standby, HUBBARD, has no superior. Banana is of large size and wherever this feature is particularly desirable it is the sort to plant.

SUMMER SQUASH

ENGLISH VEGETABLE MARROW—Large, white oblong fruit, striped light green. A most delicious vegetable. Pkt. 5c; oz. 10c; ¼ lb. 20c; 1 lb. 80c, prepaid.

FORDHOOK—Fruit oblong, about 10 inches long, nearly smooth of yellowish color. Quality very high. Pkt. 5c; oz. 10c; ¼ lb. 20c; 1 lb. 80c, prepaid.

GIANT SUMMER CROOKNECK—Fruit rich yellow, thickly warted. Of dwarf bush habit, heavily productive. Pkt. 5c; oz. 10c; ¼ lb. 20c; 1 lb. 80c, prepaid.

SQUASH COCOZELLA—The above picture shows Cocozellas in their baby stage, soft and extremely tender. At that stage the fruits weigh around a pound each. Cocozellas are a delicacy even when weighing up to 5 pounds.

ITALIAN COCOZELLA—Fruit oblong, dark green at first and marbled with light green when ripe. Quality excellent; a real delicacy. Pkt. 5c; oz. 10c; ¼ lb. 20c; 1 lb. \$1.00.

EARLY YELLOW BUSH—Like Mammoth Bush but the fruits are yellow. Pkt. 5c; oz. 10c; ¼ lb. 20c; 1 lb. 80c.

EARLY SUMMER CROOKNECK—A week earlier but not as big as Giant Summer Crookneck, exceedingly prolific. A fine and very popular variety. Pkt. 5c; oz. 15c; ¼ lb. 35c; 1 lb. \$1.20.

SQUASH MAMMOTH WHITE BUSH White
Patty
Pan. A productive bush variety, fruit rounded, creamy white, scalloped, about 10 inches in diameter. Pkt. 5c; oz. 10c; ¼ lb. 20c; 1 lb. 80c, prepaid.

GIANT STRAIGHTNECK—Is the same as Giant Crookneck but without the curved neck. For full description see novelty pages. Pkt. 10c; oz. 15c; 1 lb. \$1.40.

ASPARAGUS SQUASH—Special selection of Cocozella. Pkt. 5c; oz. 10c; 1 lb. \$1.00.

WINTER SQUASH

DELICIOUS—This squash varies somewhat in color and form, usually oval shaped with green smooth skin. Quality very high. Early. Pkt. 5c; oz. 10c; ¼ lb. 20c; 1 lb. 80c, prepaid.

GOLDEN HUBBARD—Same as Hubbard, skin reddish yellow. Pkt. 5c; oz. 15c; ¼ lb. 25c; 1 lb. \$1.00, prepaid.

TABLE QUEEN—After many years of effort, we finally are rewarded and offer perfectly fixed seed producing nothing but dark green fruit of uniform size of unequalled quality. Pkt. 5c; oz. 10c; 1 lb. \$1.00.

Hubbard Squash

HUBBARD SQUASH

Ours is the true old time Hubbard, famous for its high quality and hard to beat for storing. The quality of the True Hubbard can hardly be improved upon. By saving for a number of years, the seed from fruits formed on the strongest and thriftiest vines, we succeeded in putting higher yielding qualities into our strain of Hubbard. Besides being a heavy producer our strain is valuable because several days earlier than most other types of Hubbard. Pkt. 5c; oz. 15c; ¼ lb. 25c; 1 lb. \$1.00.

BLUE HUBBARD—Some growers claim that Blue Hubbard is superior in quality, more productive and a surer crop than regular Hubbard. We are unable to distinguish much difference. We do agree that its appearance is very attractive on account of its blue color. If you favor Blue Hubbard you will find our strain true to type. Pkt. 5c; oz. 15c; 1 lb. \$1.00.

BANANA SQUASH

Produces a heavy crop even when other winter squashes fail, owing to diseases or unfavorable weather. The strain we offer is the better strain of two, namely the orange skinned and orange fleshed, a much better strain than the Gray Banana strain. For quality, sweetness of flesh, high flavor, productiveness and high cropping qualities, try our strain of Banana. Pkt. 5c; oz. 10c; 1 lb. 80c.

Salsify-Oyster Plant

Also called Vegetable Oyster, forms long, white somewhat mealy roots which are used the same as carrots or parsnips. Breaded and fried in butter it resembles Oysters in taste. Scorzonera or Black Salsify has even finer flavor than common Salsify and the roots are larger. The roots of both may be left in the ground over winter and used in the spring when fresh vegetables are hard to obtain.

MAMMOTH SANDWICH ISLAND

The roots are long, smooth, white in color, of uniform growth, the tops are grassy. Of excellent quality and delicate in flavor. Pkt. 10c; oz. 20c; ¼ lb. 45c; 1 lb. \$1.80.

SCORZONERA—BLACK SALSIFY

Considered by many better than white salsify. It has a flesh tap-root resembling that of salsify in size and flavor and distinguished from it by the black color of the skin. Very hardy. Pkt. 10c; oz. 20c; ¼ lb. 45c; 1 lb. \$1.80.

You can order all seeds priced at 45 cents per ounce or over in quarter and half ounce lots at ounce rate. Quarter and half pounds at pound rate. Five pounds or over at 10 pound rate. 25 pounds or over at 100 pound rate.

Tomatoes

CULTURE—1 oz. for 4,000 plants.

Sow in hot beds about March 1st, in rows 3 inches apart, transplant when 2 inches high in cold frames. When plants are about 6 inches high set into the field, the early varieties in rows 4 feet apart and 3 feet in the rows and the late varieties, such as Stone or Great Baltimore, 5 feet apart and 4 feet apart in the rows.

In the North it is advisable to tie plants to poles or trellis and prune the vines to some extent, so as to allow all light possible and hasten the crop to maturity. Tomatoes tied to stakes can be as close as two feet apart each way.

Tomatoes will give a heavy crop on any fairly good soil. On freshly manured ground tomatoes make a heavy growth of vines, but the ripening of fruit is retarded. Never plant tomatoes after potatoes as bugs are sure to appear and damage the crop. Read the description of Tomato Earliana.

Tomato Marvelous Pink Globe

TOMATO—MARVELOUS PINK GLOBE

Extra Large—Extra Good

An early, heavily productive variety, bearing large, heavy, smooth, bright PINK tomatoes in large clusters. Very solid and meaty, globe shaped of very high quality, in fact, in both quality and appearance almost as good as the famous Marglobe. If your market demands a pink colored tomato this is the variety to grow if you want to bring to the market something extra fancy. Pkt. 15c; $\frac{1}{8}$ oz. 20c; $\frac{1}{2}$ oz. 50c.

DWARF PERFECTION TOMATO

Fruit large, smooth, almost globe shaped, bright scarlet, very meaty and of high quality. Ripens to the stem, has tough skin and is a first rate shipper. Vines potato leaved, short, very vigorous and healthy. Medium early. Pkt. 10c; oz. 40c; lb. \$4.00.

TOMATO EARLIANA

Our strain is extra choice. Fruit as smooth and as free from cracks as can be expected, large and bright red. In our trials, our strain proved absolutely superior and we have tried many strains, some pretty high priced among them.

To get a heavy crop of high quality tomatoes ahead of others, you must grow Earliana in heavily manured ground. Use well rotted manure and prepare your ground in the fall whenever possible. You must stake the plants, because when plants are left laying on the ground the fruit develops a green spot where it touches the ground. Do not use manure for other varieties of tomatoes except Bonny Best and Break O' Day. Both these varieties do much better when grown on manured ground. Otherwise the rule is for all tomatoes: no fresh manure. Pkt. 10c; oz. 30c; lb. \$3.00.

TOMATO 100%

Large Wilt-Resistant Red—Early, Smooth, Solid

An extra good new variety equally suitable for outside as well as for forcing. Absolutely wilt resistant, in fact 100% so. Proved immune to wilt in the field and under glass produced a splendid crop on clean vines free from wilt in a greenhouse that the year before was full of wilt. Shaped like Bonny Best of larger size, more solid, deep dark red, most attractive in appearance. The vines are of vigorous growth yet without excessive foliage, bearing heavily in clusters of 3 to 5 fruits of uniform size, almost free from culls. For years to come 100% will be the leading early variety. It has attractive color, size, earliness, high in quality and can be marketed in competition with any other tomato at all seasons early or late. Supply of seed is very limited. Pkt. 15c; $\frac{1}{8}$ oz. 20c; $\frac{1}{4}$ oz. 25c; $\frac{1}{2}$ oz. 50c.

More Tomatoes

ACME—Second early, fruit large, pink.

BONNY BEST—Fruit round, smooth, scarlet, produced in quantity, ripening almost as early as Earliana.

BEAUTY—Second early, fruit large, pink.

DWARF CHAMPION—Large fruit, purplish.

DWARF STONE—Large fruit, heavy, solid, scarlet, very good.

CHALK'S EARLY JEWEL—Bright scarlet, round, smooth, solid medium early tomato.

EARLIANA LANGDON'S.

EARLIANA PENN STATE.

ESSEX HYBRID—Large pink fruit, second early.

GOLDEN QUEEN—Fine large fruited sort. Color golden yellow.

IMPROVED STONE—Late, fruited large, scarlet, solid, meaty, productive, in a word, an excellent sort in every way.

JOHN BAER—Extra early, scarlet fruit of medium size.

JUNE PINK—Extra early, fruit large pinkish, quality poor.

KANSAS STANDARD—True stock.

LIVINGSTONE'S GLOBE—Second early, fruit globe shaped, rose pink. True stock.

MATCHLESS—Late sort, fruit large, solid, scarlet.

ANY ABOVE TOMATO: Pkt. 10c; oz. 30c; lb. \$3.00, postpaid.

HAVE YOU university education? If you have and if you had 100 university educations, you would not be really educated unless you understood MONEY. A newspaper man regarded by many as an extremely smart man, writing for a chain of newspapers, repeatedly states in his newspaper column that nobody understands money. Well! If nobody understood money, the fix the world would find itself in would be the same as when people could not understand each other in every day conversation. It is EXTREMELY important to understand money. You will understand money, you also will understand WHY the depression is on, why so many are near starvation, in short you will get wise and you will know a great deal more than you may know now, if you will read "The Book", which we will mail to you for only 25 cents.

GREATER BALTIMORE TOMATO

BETTER THAN STONE

VERY LARGE AND HEAVY

IMMENSELY PRODUCTIVE

The best red colored main crop variety, as well as for canning purposes. It is very meaty and fleshy, and consequently heavy. It ships better than most of the old sorts, ripens 10 days ahead of Stone and yields much more than Stone. It resists blight and other diseases better than any other variety. All gardeners and truckers are well aware of the fact that as soon as the Stone reaches the market, the early Tomatoes like Earliana and others, at once become back numbers. Now judge for yourself, the value of this Tomato which ripens as early as Chalk's Jewel and is of even better quality than Stone. Greater Baltimore means quicker sales and better prices, and a loss of money to those who will not plant it. The Purdue University Agricultural Experiment Station, at Lafayette, Indiana, undertook Tomato investigation and published the results in Bulletin No. 165, Vol. XVI, April, 1913. Extracts from that bulletin are as follows:

"The average calculated yields for three years for 11 varieties shows 'Greater Baltimore' ranking first with a yield of 16.26 tons per acre against Stone 13.38 tons per acre."

"Considering yield and quality, the 11 varieties tested will rank as follows as a field crop for canning: First, 'Greater Baltimore.'"

"Picking season from July 25th to October 1st, the 'Greater Baltimore' yielded nearly 22 tons per acre."

"The 'Greater Baltimore' which has been gaining in popularity with the Canning Trade during the past two years, begins bearing 12 to 16 days earlier than Stone, when both are sown and handled in a similar manner throughout the season."

"It will also be seen that 'Greater Baltimore' is as early a bearer as Chalk's Early Jewel, which is considered an early sort."

"It is largely the earliness and the uniformity with which the plants bear a large number of large, smooth fruit throughout the ripening season that makes the 'Greater Baltimore' superior to the Stone which has been the Standard canning variety for many years."

"The average date of first ripening for the 'Greater Baltimore' variety was 120 days from the sowing of the seed in the hot beds and 65 days from the time the young plants were set in the field."

Pkt. 10c; oz. 25c; ¼ lb. 75c; 1 lb. \$3.00, postpaid.

PONDEROSA—Enormous scarlet fruit. Pkt. 10c; oz. 40c; ¼ lb. \$1.00; 1 lb. \$4.00.

GOLDEN PONDEROSA—Same in size as Ponderosa, only the fruit is golden yellow. Pkt. 10c; oz. 40c; ¼ lb. \$1.50; 1 lb. \$6.00.

RED PLUM, RED PEAR, YELLOW PLUM, YELLOW PEAR—Either variety: Pkt. 10c; ½ oz. 20c; oz. 40c; ¼ lb. \$1.00; 1 lb. \$4.00.

YELLOW HUSK OR GROUND CHERRY—Pkt. 5c; oz. 30c.

TRUCKER'S FAVORITE—Pkt. 5c; oz. 30c; ¼ lb. 75c; 1 lb. \$3.00; 10 lbs. \$28.50, prepaid.

McGEE TOMATO As early as any known variety with the peculiar habit of bearing both purple as well as red fruits on the same plant. The purple fruits resemble the well known June pink variety, the red fruits resemble those of Earliana. Claims are made that McGee will yield 1,200 bushels of fruit to the acre. It is a popular variety in the Southwest and shipped to Northern markets. Pkt. 10c; oz. 30c; ¼ lb. 75c; 1 lb. \$3.00, prepaid.

TO SURVIVE depressions make your business real business and not a speculation. Outdo your competitors by producing high quality merchandise. With quality on your side you'll come through. Also read "The Book." See page 113.

TOMATO DWARF GIANT

A dwarf tomato and a good one, that will make profit for the grower, both when planted for a crop of fruit or to sell plants to the public. It is about the meatiest and tastiest tomato there is and if you will sell plants, those that bought will sure come back for plants the following season. Dwarf Giant is a late tomato, ripening 120 days from date of sowing, the fruits are all meat, frequently two pounds in weight, attractive, smooth, skin rich purple-crimson. Pkt. 10c; oz. 60c; lb. \$7.50.

TOMATO SCARLET TOPPER

(Pritchard.) Quite early, coming about three days later than Earliana. Very heavy producer, fruit in clusters, globe shaped, of good size, very solid, very red, ripens very red clear to the stem. Vines of medium height with abundant foliage to protect the fruit from hot sun. Wilt resistant. New and extra good. Pkt. 10c; oz. 40c; lb. \$4.00.

TOMATO CLARK'S EARLY

An extra early sort, ripening with Bonny Best, unusually attractive on account of its unexcelled bright scarlet color. The fruits are large, smooth, very solid, almost a globe, exceptionally deep through from stem to bottom. Heavily productive. The percentage of culls is very small. A coming variety. Pkt. 10c; oz. 40c; 1 lb. \$3.00.

HOW TO GROW TOMATOES ON STAKES

Early in June place 5 foot stakes within two inches of the base of each plant. With a sharp blade reduce each plant to three of the strongest branches and tie these to the stakes, using soft but stout string. Remove all side shoots at the base of each plant and all suckers which develop at the leaf joints. When the plants reach the top of the stakes begin to prune out the centers also. Staked tomatoes yield 30 to 40% more of perfect fruit than plants that spread over the ground and the plants bear earlier.

TOMATO—Ideal Forcing

New. Fruits slightly larger in size than Crackerjack, vines shorter, slightly darker red in color with very tough skin therefore a good shipper. Do not hesitate to try as Ideal is worthy of its name and if you prefer slightly larger tomatoes than our Crackerjack, Ideal may prove just the variety. Ideal is just as productive as Crackerjack. Pkt. 25c; ¼ oz. 50c; 1 oz. \$2.00.

TOMATO—Gulf State

In a field of Livingston's Globe every vine was killed by blight but one. From this one vine originated Gulf State Market. This happened at Crystal Springs, Miss., where tomatoes are grown on an immense scale. Gulf State is a blight proof Livingston's Globe. We offer seed grown by ourselves from originator's stock seed. Pkt. 10c; oz. 40c; lb. \$3.40, prepaid.

TOMATO CRACKERJACK

A GREAT VARIETY FOR GREENHOUSE FORCING

Crackerjack produces ten times as many fruits as other varieties and under glass will make more money for you than any other crop. The fruit is solid, smooth, globe shaped, bright red and there is no waste, every tomato is saleable. Medium in size, just right as the grocers of our city put it. It takes 3 to 5 Crackerjacks to a pound, for this reason grocers prefer Crackerjack over the big sized tomatoes which are so hard to weigh unless cut in pieces. Nobody wants cut tomatoes, Crackerjack weighing without cutting is the sort desired. Crackerjack is a strongly self pollenizing variety, every bloom is sure fruit which is produced in bunches of 5 to 10 every 6 inches of a plant growth. Once it starts to turn in color it ripens quickly and evenly to the core. Crackerjack will yield bigger sized fruit if grown 10 degrees cooler than is required for other tomatoes. (Night temperature of 55 deg.)

One of our customers writes: I have been growing Crackerjack Tomato for the past four years with splendid results, getting on the whole about 80% of what we term 48 lbs. pack, that is that many tomatoes to a 10 pound box, which brings the highest price in our markets, especially when tomatoes retail for 40 or 50 cents per lb. We have grown tomatoes for the past 20 years—Comet and Sutton's Best—but Crackerjack skins either kind. Another grower says: I grew Crackerjack in my greenhouses and in a single season made enough money to enable me to make a trip to Europe. Price: Pkt. 15c; ½ oz. 30c; oz. \$2.00.

NEW TOMATO MARGLOBE

Introduced by the U. S. Dept. of Agriculture under the supervision of Dr. F. J. Pritchard from whom we received stock seed. We grew a crop of Marglobe and saved the seed from the choicest fruits of the first setting to insure top notch quality. Marglobe is a masterpiece and we could write a long line of praise but will not do so, because Marglobe although a new variety is already famous. There is not an up to date gardener that has not either read or heard about it. You simply must grow Marglobe and it is important to you to know that we have a high class seed. Description: Globe shaped, smooth, very large, averaging half a pound per fruit, bright red, and all meat. When you cut a Marglobe it is like cutting an apple, it is that solid. Almost coreless, ripens its fruit well around the stem, of fine flavor. Skin thick, almost as early as Bonny Best with a longer picking season. Highly resistant to fusarium, nail head rust and puffiness of fruit. Also to a degree resistant to early blight, leaf mold and septoria leaf spot. Valuable for forcing when a big tomato is wanted. Marglobe is a variety in a class by itself that will make a back number out of many a good and popular variety as there is no tomato that can anywhere compare with it in quality. We offer seed from our own growing saved from the choicest set fruit. Pkt. 10c; oz. 40c; lb. \$4.00.

LIVINGSTON'S GLOBE

Early, distinctly globe shaped, smooth, firm-fleshed, of glossy rose color, tinged with purple and without the slightest tinge of yellow at any stages of ripening. The plants are short jointed, fruit in clusters of 3 to 7, making it an extra heavy producer. Hard to beat as a keeper and when picked quite green will ripen perfectly enroute to market. Pkt. 10c; oz. 40c; lb. \$3.00, prepaid.

NORTON WILT RESISTANT TOMATO

Similar in shape and season of ripening to Improved New Stone. Fruit solid, large, smooth, solid red. An excellent sort for shipping, as a main crop market variety and for canning. Developed by the U. S. Dept. of Agriculture. Pkt. 10c; oz. 30c; ¼ lb. 75c; lb. \$3.00.

THYME—Dymian Timo o Pepolino

A hardy perennial kitchen herb, once planted lasts for years. The dried leaves have a very pleasant scent. Height 8 inches. Pkt. 10c; oz. 40c; lb. \$4.00.

We sell half ounces at ounce rate, half pounds at pound rate.

A New Jersey customer says: Send me 10 lbs. of Rutabaga Süßerba seed. I grew the finest roots last year from your seed that I ever raised.

DO NOT MARKET

field run of tomatoes, potatoes, parsnips, etc., etc. Select your produce and put on the market **ONLY** choice stuff. It will pay you to grade your produce—yes, it will pay **VERY** much.

This is written Nov. 2, 1931. The writer was the day before in one of the important potato producing sections in the state of Minnesota. He saw that the potato growers almost to a man marketed their potatoes just as gathered in the field. Large tubers together with smaller ones down to the size of marbles. These potatoes thrown into box wagons were delivered to the potato warehouse. The warehouse man graded the potatoes into large choice tubers, smaller sized tubers and marble sized tubers. The grower received for his field run of potatoes nine cents a bushel. To make this statement fool-proof we will say, that the grower received a dime a bushel for his potatoes less one cent. Some growers picked over their potatoes and received 20 cents a bushel. Still other growers selected the very finest tubers and sold them for 50 cents a bushel. Growers, by marketing field run stuff, cheat themselves. Had they picked out high class tubers and kept the undersized ones, which would be high class for their own use and maybe for feed, they would be much money ahead. There is no use to make this talk too long. Anybody can see that grading pays. Not only when it comes to potatoes but also tomatoes and everything else.

TOMATO—RESELECTED REDHEAD

An early variety, a heavy producer, fruit large, almost round, meaty, smooth, firm, solid, skin deep red. Redhead although early, can be marketed all through the season as it is large enough and has enough quality that it will sell in competition with main crop varieties. A good forcing variety, many greenhouse growers claiming that it is a better variety for that purpose than Bonny Best. Pkt. 10c; oz. 40c; lb. \$4.00.

EARLY DETROIT FINE EARLY PINK TOMATO

Fruits very smooth, uniform in size, nearly globe shaped, firm-fleshed, never cracks or blisters, of rich pink purple color. The vines are free from blight, of vigorous growth, very heavily productive, yielding in the aggregate more marketable tomatoes than the popular Beauty, which variety it most closely resembles. In season it is early, although not the earliest, ripening at the same time as Globe. It is a leader in pink tomatoes. Pkt. 10c; ½ oz. 20c; 1 oz. 40c; 1 lb. \$3.40, prepaid.

TOMATO COOPER'S SPECIAL

Large, smooth, meaty, globe-shaped, pinkish-red tomato. Free from acidity, superior to Livingston's Globe in size and heavy yielding qualities. Popular in all markets where pink colored tomatoes are the favorite. Very early. Called by the Florida growers "Self Pruning Tomato" because the plants need no pruning, due to their limited branching habit and because the vines are shorter than those of Globe or Gulf State Market. The vines are of vigorous growth and bear fruits in clusters of four to five every five to six inches of vine. Pkt. 10c; oz. 40c; ¼ lb. \$1.00; lb. \$4.00.

TOMATO TEXAS SPECIAL

An early variety, fruits large, regular in shape, smooth, bright scarlet, deep through from stem to bottom. Almost a globe. Vines vigorous, heavily productive, bearing fruits in large clusters. Will stand shipping to distant markets better than any other tomato known. Ripens in 90 days after planting, average weight per fruit one-half pound. Average yield of marketable tomatoes close to four tons per acre. Southern growers that tried this variety report Texas Special a highly profitable sort. The seed we offer is far Northern grown of very superior quality. Pkt. 10c; oz. 40c; lb. \$4.00.

TOMATO PURPLE HUSK

Ground Cherry for pickling and preserving. The fruit has the dimensions of medium sized peach, measuring about an inch in diameter. The flesh is green, the skin purple and when made into preserves has the appearance of purple colored plums. Very heavily productive and easy to raise. 1 oz. 40c; ½ oz. 20c; pkt. 10c.

ABOUT TOMATOES

There are too many varieties of tomatoes. New ones appearing every year and when you read the descriptions of these new ones, they are most wonderful, almost as wonderful as one of the seven wonders of the world. Yes, the descriptions are wonderful, but the tomatoes sometimes and in some parts of the country and on some soil, under certain conditions, do not come up to the mark. Now, how then can we as seedsmen tell our customers, grow this or grow that tomato and be safe. It cannot be done. Not enough is known about the new varieties that were placed on the market in the last few years, some of which were originated by the government. We heard growers say that for instance Marglobe is a marvel but here and there you meet a grower that is finding fault with Marglobe and does not want it.

So one is lost in the maze of varieties. We ourselves grow tomatoes for seed and know something about varieties. From our experience we can say, that it will pay you to go slow when it comes to a new variety. Before you change for a new one, try it on a small scale, meanwhile relying on the variety that you know did well for you and on your soil under existing conditions.

We must recommend to ALL growers, no matter where located and what their soil, **FIRST:** Tomato 100%. This will never fool the grower. **SECOND:** Marvelous Pink Globe. And here we will stop. Read the descriptions; you can rely on these; we always state facts and nothing but facts about seeds and varieties so far as known to us.

TOMATO BREAK O' DAY

A new wilt-resistant tomato that is approximately if not fully as early as Earliana and as productive as the Marglobe. Its fruits are large, smooth, meaty, red and globular, very similar in fact to those of the Marglobe but usually larger. In widely separated field tests Break O' Day gave phenomenal results, in fact everywhere it has been tried the growers have been delighted with its performance. The above is a description of the originator. Dr. Fred J. Pritchard, of the U. S. Dept. of Agriculture. Pkt. 10c; oz. 40c; lb. \$2.40.

One of our New Jersey customers says: Under field conditions not very good, turns yellow in ripening has not enough foliage, hot weather wilts it down, ripens too quick and is soft. In other parts of the country growers say—a great variety is Break O' Day.

Is worth trying under glass. It bears a heavy crop of fine fruit in soil enriched with a handful of potash per plant.

TOMATO LATE BONNY BEST

About a week later than Bonny Best. Produces a heavy crop of fine fruit, even under the most adverse conditions. Never fails to produce a full crop. The fruit is large, very solid, perfectly smooth, bright scarlet. The strain we offer is a special selection, wiltproof and free from other diseases. A profitable sort for a main crop, for shipping as well as forcing under glass. Pkt. 10c; ¼ oz. 20c; oz. \$1.00.

TOMATO ORANGE SUNRISE

A new tomato with orange skin. Of high quality, large in size, practically smooth, flesh solid, almost free from seeds and of an evergreen piquant flavor. Its color, namely that of a tangerine or of an orange makes it conspicuous and attractive. A fine show tomato. Late. Pkt. 30c.

MARVANA—Extra early disease resistant resembling Earliana. Pkt. 10c; oz. 40c; lb. \$4.00.

TOMATO OXHEART

A mighty attractive tomato, unusual in shape, meeting with instantaneous favor everywhere. Heart-shaped, pink in color, meaty and solid, of large size, specimens weighing two pounds or over being quite common. Almost seedless. Fairly early. Pkt. 10c; ¼ oz. 15c; oz. 60c.

TOMATO BIDE'S N. C. 0.—Forcing sort, early, fruit red, firm, solid, round smooth 3 to 4 tomatoes weighing a pound. Vines short jointed, vigorous, healthy producing immense quantities of fruit in double bunches. Pkt. 20c.

TOMATOES FOR CANNERIES

As an answer to many inquiries, we say that canners favor Improved Stone and Greater Baltimore. Most canneries furnish the seed to the growers. If the choice of the variety is left to you, try besides the two named our 100% variety or Norton, if your land is infested with disease. Both are wilt and disease resistant varieties.

PURPLE TOP WHITE GLOBE SELECT

Our select Purple Top produces beautiful, globe shaped turnips, clear, bright purple at the top and snow-white at the bottom without small side roots. Flesh sweet, never bitter at all stages of growth. Absolutely the finest strain to be had. Oz. 5c; lb. 50c; 10 lbs. \$4.00, prepaid.

JAPANESE TURNIP YORI

Resembles in shape the well known Milan variety. Almost a globe or a flattened globe, white in and out and fully a week earlier than either Milan variety. Pkt. 5c; oz. 10c; lb. 80c.

TURNIP SHOGGIN

Produces globe shaped roots with smooth skin and upright foliage furnishing the highest class of "greens." This is the finest foliage turnip in existence and we have an extra selected high class strain with leaves strictly upright and closely "bunched up." Pkt. 5c; oz. 10c; lb. 80c; 10 lbs. \$6.00, prepaid.

TOMATOES UNDER GLASS

Sow in flats, transplant into 2½'s when the plants are about 4 inches high, set them 15 inches each way, keep well watered and growing fast till they get to blooming. While in bloom water sparingly until the tomatoes set. When you get five clusters on the plants top them and water plentifully. Be careful in watering. Marglobe will not mildew even if the walks in the greenhouse are wet, but to be successful with most other sorts, Marvelous Globe and Crackerjack included, you must grow them in a house with glass tight so there will be no drip and your walks must be dry. Some growers keep their tomatoes wet from start to finish which is a mistake. Watering, as we say, will result in a splendid crop. Crackerjack and Ideal Forcing runs about five fruits to the pound. For the earliest sales, while prices are highest, grow small fruited sorts like Crackerjack or Ideal Globe, for a later crop Marglobe or Marvelous Globe pay better.

SURE CROP TOP TURNIP

Yields a big crop of "greens" in hot and dry weather and is the only variety grown for tops that will come through, when sown during hot summer months from June to September, when Seven Top is out of the question. The tops of Sure Crop are of dense, robust, upright, compact growth and practically free from insects and louse. It is claimed that once tried, prepared for table, it is preferred to other turnip greens, because the leaves of Sure Crop are of milder taste, fine flavored, tender and free from acidity and bitterness. Of much quicker growth than Seven Top. Roots edible, globe shaped with pearly white skin and white, mild, sweet flesh. Oz. 5c; 1 lb. 50c; 10 lbs. \$4.00.

TURNIPS AND RUTABAGA

CULTURE—One-half ounce for 100 feet of row, one and a quarter pounds per acre. If sown broadcast use two pounds to the acre.

For best results and highest prices sow as soon as the ground is open. Drill into rows foot apart and thin to 4 inches apart in rows. Frequent cultivation warms up the ground and hastens the crop to maturity. For general crop turnips can be sown at any time until the latter part of August.

RUTABAGA should be planted 18 inches between the rows and thinned out to 6 inches in the row. Requires longer season to mature than is the case with common turnips.

The most desirable early turnip to grow is SNOWBALL. It is large and of the highest quality. The best late Turnip is PURPLE TOP WHITE GLOBE.

VARIETIES OF TURNIP

All Prepaid	oz.	¼ lb.	lb.
GOLDEN GLOBE	\$0.05	\$0.10	\$0.40
SEVEN TOP05	.10	.40
PURPLE TOP WHITE MILAN—Extra early.	Oz. 5c; ¼ lb.		
15c; lb. 60c, prepaid.			
WHITE MILAN—Extra early.	Oz. 5c; ¼ lb.	15c; lb. 60c,	
prepaid.			
WHITE EGG—Oz. 5c; ¼ lb.	10c; lb. 40c, prepaid.		
PURPLE TOP STRAP LEAF—Oz. 5c; ¼ lb.	10c; lb. 40c.		

Turnip Snowball

TURNIP SNOWBALL or JERSEY LILY

Extra Early—Extra Good

The roots are a perfect globe, snow white in and outside, highly attractive when bunched, the flesh solid, sweet, tender and perfectly delicious whether eaten raw like an apple or cooked. Of much better quality than the Milan varieties. Oz. 5c; lb. 50c; 10 lbs. \$4.00, prepaid.

RUTABAGA SUPERBA

The finest rutabaga that grows. Perfectly round, bright, clean, yellow in color, fine grained and sweet. Earlier than other varieties and neckless. A trial will convince you that it is a high class variety. Originated by a New England gardener. Superba sells on the New York market at 50 to 75 cents per barrel above all other stocks. Pkt. 5c; oz. 10c; lb. 80c; 10 lbs. \$7.00, prepaid.

AMERICAN PURPLE TOP

Globe shaped, upper portion of the root rich purple. Flesh yellow and sweet. An old variety yet still popular. Is ready about two weeks later than Superba. Oz. 5c; ¼ lb. 14c; lb. 55c; 5 lbs. \$2.50, prepaid.

MANGELS

If you raise stock you will save money by feeding besides grain, beets and carrots. These roots have the same influence on the health of your stock as fruits and vegetables have on yourself. You cannot eat all meat and stay in good health, neither can your stock eat all grain and stay well. All grain diet means ill health. You have to buy stock powder, call the veterinary maybe. Both cost money. Feed roots and your stock will be in pink of condition. You will do better financially, your stock will feel better and would thank you heartily if stock was endowed with the gift of speech. If in doubt as to what is the truth, whether it pays or does not pay to grow and feed roots, write to Dept. of Agriculture, Washington, D. C., for information about root crops, write to your Agricultural paper, ask your friends and then ACT.

GIANT YELLOW ERFURT

Also called Golden or Yellow Tankard. Flesh yellow, roots cylindrical shaped, growing well above the ground. Very nutritious. Pkt. 5c; $\frac{1}{4}$ lb. 10c; $\frac{1}{2}$ lb. 20c; 1 lb. 40c; 10 lbs. \$3.50, prepaid.

YELLOW OBERNDORF

Also called Yellow Globe, Golden Globe, Champion Yellow Globe, etc. It is a fine variety with nearly globe shaped roots that grow two-thirds above the ground, making it easily gathered. Best variety for poorer soils. Pkt. 5c; $\frac{1}{4}$ lb. 10c; lb. 40c; 10 lbs. \$3.50, prepaid.

MAMMOTH LONG RED

This variety has been known to produce mangels over 60 pounds in weight. Pkt. 5c; $\frac{1}{4}$ lb. 10c; $\frac{1}{2}$ lb. 20c; lb. 40c; 10 lbs. \$3.50, prepaid.

FANCY TURNIPS

To get richly colored, fancy turnips of any of the purple top varieties, you must not allow the roots to crowd one another out of the ground. And you must not allow the roots to starve from lack of water. Properly thinned out, you will get beautiful roots from the seed we send out.

How to Make Gardening Pay

Work, work, work, and some thinking will do it. Thinking plays an important part. To make gardening or any other business pay is not easy. There is strong competition—there are too many gardeners. But no matter in what line you may be engaged, you would find the same conditions—hard struggle, lasting for years before one is a success. That can not be helped, we must submit to that, must never get discouraged. You work hard, all gardeners do, in working you are hard to beat. But how about thinking, planning ahead? There it is where too many gardeners are below the mark. Thinking, weighing facts in your mind as you see them happen, noticing the constantly changing conditions and chances, is what counts.

Noticing, for instance, that a certain crop is bringing very low prices, you can gain by planting this same crop on an enlarged scale the following season. A little thinking will reveal to you, that you can gain by cutting down or planting only the usual acreage, the season to follow, of crops that at present are paying well. Why? Take potatoes in 1927. That year potatoes sold for real money, but in 1928 prices were below the cost of production. Everybody planted potatoes, folks planting potatoes in 1928 must have been under the impression that because in 1927 potatoes paid well, they will always pay well. They did not, the growers lost money. Another case. In 1927 carrots in our market were hard to sell even at very low prices. Disgusted, the growers in 1928 either did not plant carrots at all or very few only. Result was that in 1928 carrots were among the crops that paid well. Spring crop of beans in 1928 did not bring the cost of picking them, the growers were "sick" of beans and did not plant any for a late crop. A few gardeners did and made money, beans were scarce and prices good. This proves that low prices are followed by high prices and high prices are followed by low prices. It is easy for the thinking man to foretell how the market will go for months ahead.

And that is very important as it means the difference between profit and loss. Think twice, before you place an order for seeds. It pays to plant the best only, regardless of what the seed costs. Ordering wisely chosen varieties will help a great deal to make gardening profitable. We know of a local gardener, who in 1927 planted a new superior variety of late cabbage, of a muskmelon, a new tomato, besides a few other items of less importance. His melons, cabbage and other vegetables being of superior quality fetched fancy prices; he found gardening a well paying business, while many other gardeners had a hard time to make expenses. They did not think, our gardener friend did.

SUGAR BEETS

VALUE—Are grown for the rich sugar content. They also make rich, juicy and sweet feed that materially increases the flow of milk in milk cows and makes it rich in cream.

CULTURE—Select a piece of mellow ground, plow to the depth of at least 9 inches, pulverize the ground by harrowing, and put the soil in as fine condition as you can make it. The idea is to free the field as much as possible from all weeds and grasses. Cultivate thoroughly. If you plan to plant only a small field of beets plant by hand, using 8 to 12 lbs. of seed to the acre. If large fields are planted use garden drill, and 12 to 16 lbs. of seed to the acre. Cover the seed to a depth of 2 inches. Have the rows from 16 to 28 inches apart depending on conditions. Plant as soon as the ground is warm enough to cause germination of the seed, about the early part of May. The crop must be well cultivated at all times to hold the moisture in the soil and to destroy all weeds.

KLEIN WANZLEBEN

Very productive, flesh snow white. The most popular sugar beet. Pkt. 5c; $\frac{1}{4}$ lb. 10c; $\frac{1}{2}$ lb. 20c; lb. 40c, prepaid.

HALF SUGAR

This fine sugar beet, while giving nearly as large a yield of easily grown and harvested roots as a crop of mangels, supplies a food of very much higher nutritive value. Pound for pound, the roots for feeding purposes being really more valuable than those of the very best strains of sugar beet, and yield under equally favorable conditions, being more than double. Pkt. 5c; lb. 40c; 10 lbs. \$3.50, prepaid.

PLANTS SUITABLE FOR DEEP SHADE—Cypripedium, Funkia, Gentian, Christmas Rose, Lily of the Valley, Ruscus, Veratrum, Asperula Odorata, Corydalis, Pachysandra, Trillium, Maiden Hair Fern, Ostrich Fern.

OUR SEEDS ARE TRUE TO NAME

Of the Highest Quality—Fresh and Strongly Germinating—You can not buy better seeds anywhere, no matter what price you pay.

Grasses and Clovers We handle only the best grades. Prices change from day to day. We will quote lowest market prices upon request. When writing for prices please state quantities wanted.

Alfalfa Nebraska Grown. If your ground is fairly free from weeds, 15 to 18 lbs. per acre is ample, but if the ground is weedy use 20 to 25 lbs. per acre. Lowest market price on application.

Alfalfa Grimm—Claimed to be the hardest and most productive of alfalfa varieties. Wt. per bu. 60 lbs.

Alsike—For wet, cold or stiff soils. Weight per bu. 60 lbs.

Red Clover—Weight per bu. 60 lbs.

Mammoth Red Clover—Weight per bu. 60 lbs.

White Clover—Extra cleaned seed. 1 lb. 55c; 10 lbs. \$4.50; weight per bu. 60 lbs.

Sweet Clover Our seed is hulled and scarified, insuring perfect germination and of the highest grade. Sow at the rate of ten pounds per acre. We can supply both the White Blooming as well as the Yellow Blooming variety. Write for lowest market price.

Awnless Brome Grass—(Bromus Inermis). A hardy perennial standing extremes of heat and drought. Sow 30 lbs. to the acre.

Timothy—Choice, clean seed. Weight per bu. 45 lbs.

Creeping Bent Grass—The ideal grass for lawns.

English or Perennial Rye Grass.

Italian Rye Grass.

Kentucky Blue Grass—Extra fancy seed. 1 lb. 40c; 10 lbs. \$3.25.

Orchard Grass—A most excellent grass for either pasture or hay.

Red or Creeping Fescue—Valuable in lawns.

Red Top Grass—Fine for either hay or pasture.

Sweet Vernal True Perennial—The leaves when partially dried emit an agreeable odor which is imparted to the hay.

Tall Meadow Fescue—Excellent grass for permanent pastures and for hay.

New Zealand Fescue—A fine leaved grass that thrives in shade.

Sudan Grass—Our seed is northern grown, free of Johnson Grass. When sown in drills 18 in. apart 10 lbs. sows an acre or 30 lbs. per acre when broadcasted. Write for latest market price.

Grass Mixtures Scientifically composed with the view to give maximum yield. Nothing but the highest grade of seed is used. We know how to make a good grass mixture and assure you that our mixture is vastly superior in returns to what is mostly used now—timothy and clover alone. That this is so, you will see if you will try our mixture. Lawn Grass Mixtures are offered on page 14.

Permanent Meadow No. 1—For good land, neither too dry or wet. Contains the proper amount of clover to increase the nutritious value of the hay.

Permanent Meadow No. 2—For high and dry land.

Permanent Pasture No. 5—For high and dry land.

Permanent Pasture No. 6—For good land, neither too wet or dry.

Price for the Above Grass Mixtures—10 lbs. \$2.00; 30 lbs. \$5.25; 100 lbs. \$17.00. Sow at the rate of 30 lbs. per acre.

RUSSIAN SUNFLOWER Produces enormous heads, measuring 15 to 20 inches in diameter. Will yield, under favorable conditions, 40 to 60 bushels to the acre. It is highly recommended for poultry, and the best egg producing food known. May be planted on a waste piece of ground any time from early spring until middle of July, at the rate of 3 lbs. to the acre. The thick stalks may be used for fuel. Price: 1 lb. postpaid, 20c; packet 5c. By freight, your expense, 10 lb. lots and over, at 8c per lb.; 100 lbs. \$6.75.

DWARF ESSEX RAPE Can be sown from April to late September. Use 5 lbs. of seed broadcast or 2 lbs. if drilled wide apart to allow horse cultivation. 1 lb. 20c postpaid. Not prepaid, 10 lbs. 90c. Price on application for larger quantities.

TOBACCO

CONNECTICUT SEED LEAF—Forms a stock plant with leaves not very long, but of good width; suitable for cigar fillers. Pkt. 5c; oz. 25c.

GENERAL GRANT—Leaves 44 inches long, matures crop early, ideal for cigars. Pkt. 5c; oz. 30c.

LATAKI TURKISH TOBACCO—This is a fine Turkish variety producing leaves of delicious texture and first class for cigarettes. Pkt. 10c; oz. 60c.

Field Corn Our seed corn is grown especially for seed—true to name, well cured and better seed you will get nowhere. Ours are highly bred strains. Twelve pounds plants an acre. 56 lbs. per bu. **Reid's Yellow Dent**—Iowa type, ears golden yellow, from 10 to 13 in. long, 18 to 24 rows of kernels on an ear, small cob and shank, grains close together, butts and tips well covered. Average yield on poor land 40 bu. per acre, on rich bottom land 80 bu. per acre and under high cultivation way over 100 bu. per acre. Ripens in 100 days.

Iowa Gold Mine—Yellow ears, very heavy. Ripens in 110 days.

Murdock Yellow Dent—The best yellow dent corn for the whole northern zone. Ears averaging eight inches in length, very uniform in size and type, kernels very deep and large, set in 16 to 20 rows on the cob. The tips perfectly filled out with dent, not flinty kernels. Considering its earliness—it ripens in 85 days—it is a heavy cropper, yielding from 70 to 90 bu. per acre.

Iowa Silver Mine—Pure white in color, ears heavy, from 10 to 13 inches in length, grains densely set on cob in straight rows. Recommended for light soils. Matures in from 100 to 110 days.

Improved Leaming—Golden grains on a red cob. A favorite variety for ensilage. Ripens in 100 days.

Boone County White—Resembles Silver Mine, ripens 10 days later and is heavily productive. **Seed Corn Prices**—1 lb. 20c, postpaid. In lots of 10 lbs. or over, 5c per lb., not prepaid.

CANNAS

True to name not a mixture can be had from us at as low prices as quoted anywhere. See our offer. Write for special prices if in the market for large quantities. Our bulbs are grown here in Iowa by ourselves. They are full of life, the divisions VERY liberal.

We sell half pounds at pound rate, 5 lbs. or over at 10 lbs. rate, 25 lbs. or over at 100 lbs. rate.

RADISH IN SUMMER

If you have a piece of exceptionally rich, heavy ground including gumbo soil, that will hold moisture during summer or that you can flood, it will pay you to grow White Strassburg radish on an extensive scale. Radishes grown in heavy soil are a job to clean, but you will get paid for that extra trouble. You will have sweet, tender radishes that customers will be glad to pay a good price for.

You should also grow Extra Early Icicle, a white radish that you can place on the market three days before regular white tip radish is ready.

PUMPKIN—A vegetable of the highest value. Nourishing, tasty, inexpensively raised, easily stored.

FLORISTS—GARDENERS

We are careful seedmen knowing that good seeds benefit and bad seeds harm the grower. To do well we MUST do the growers good. We strive hard to do this and take no chances. We make SURE that the seed we sell is what it ought to be. Every year we spend quite a sum of money buying seeds for trial from seed growers located in all parts of the world. The seed grower that claims superior qualities for his seeds gets our money, we get his seed, we watch it grow, add it to our offers if found superior and praise it as it deserves.

In the majority of cases, the trials we undertake show, that the seed so highly recommended is no better than what we had ourselves already.

Your position is different from ours. You cannot experiment, you have no time for that. We take the time in order to protect your interest and to maintain our reputation as seedmen.

Raffia AA WESTCOAST. Use Raffia for tying vegetables. You will save money as Raffia is light but very stout tying material and your bunched vegetables will look classy.

String shows dirt, Raffia does not, it stays neat and clean.

Bale 225 lbs. 15c per lb.; 100 lbs. 19c per lb.; 10 lbs. 24c per lb.; 5 lbs. 23c per lb., not prepaid. Prepaid, 1 lb. 35c; sample (2 ozs.) 10c.

SEED GERMINATES SLOWLY

Whenever this mention is made, it means that you need not look for a stand before 6 to 12 months. Sow all such seeds in a flat, after sowing, fill up with sphagnum moss, place the flat in a shady spot, keep moderately moist. If you find that the seed is sprouted late in the fall, with freezing weather on the way, place the flat in a cold frame. Sprouted seed or very young and tender seedlings even of the hardiest perennials cannot go through freezing weather unharmed. Because it takes so long for the seed to "come up" is NOT a reason to abandon the idea of growing the plants. On the contrary it is a reason TO GROW such perennials because MANY will not bother with slowly germinating seed, there will be no overproduction and when the plants are finally finished you'll find it a paying proposition. It will pay you to wait for the results and whatever PAYS is worth doing.

PLANTS IN FLATS

To get healthy, strong and deep green looking vegetable plants in flats for spring sales, lay on the bottom of each flat about an inch of rotted manure and soil on top. That will make your plants of even height, stocky, in a word, superior and better prices and more sales will be your reward.

What is a Rock Garden?

To add "finishing touches" to large grounds, parks, drives, etc., rock gardens are laid out by placing rocks of irregular outline fairly close together, the spaces between filled with dirt, where rock plants are sowed or planted. On level ground place a boulder in the middle and group smaller rocks around it, on sloping ground arrange rocks so that the soil between will not get washed out in heavy rains. No "style" to be followed, the arrangement of the whole thing is a matter of individual taste.

WHAT IS A FLAT—When the word "flat" is mentioned in this catalog it means a shallow box, 18 inches long, 12 inches wide and 3 inches deep.

THE BEST SOIL for growing seedling plants is soil containing a good portion of sand or leaf mould. You can lift the seedlings from such soil without the loss of roots and your seedlings will grow after transplanting, without check.

We sell half ounces at ounce rate, quarter and half pounds at pound rate.

RAISING FLOWERS FROM SEED

I would like to raise flowers but flowers is something that I do not know anything about. We have read this remark from many people always followed with a request for advice which follows:

Read "Outline" of gardening on page 9 of this catalog. These directions apply to both flowers and vegetables. There are many different kinds of flowers—the beginner should know that the so-called **ANNUALS** are flowers blooming the first year from seed. Most of these are "hardy," meaning that the seed can be sown outdoors early in the spring. When "half hardy annual" is mentioned, it means that the seed cannot be sown outdoors before warm weather sets in. When the word "perennial" is mentioned, it means flowers that will bloom the second year from seed, although some perennials will bloom the first year from seed. Perennials are divided into "hardy" which do not winterkill, "half hardy" which must be protected over winter. **ANNUALS** bloom and die the same year, perennials live for many years. **BIENNIALS** are flowers that you sow one year to get bloom the following year. After blooming, the biennials die and must be sown again if their flowers are wanted. **CLIMBERS** are vining plants used for covering porches, etc. Finally **GREENHOUSE** plants which the beginner generally cannot raise with much success. If you want to grow flowers in a greenhouse and do not know how, before you do, hire yourself to some florist and read Fritz Bahr's "Commercial Floriculture" which book can be had from The A. T. De La Mare Company, New York, N. Y. Reading on flowers, you will run across such terms as: rock plant, stove plant, foliage plant, etc., which terms will be plain to you after some studying, which you will have to do in order to be a success as a flower grower.

FLOWERS AND GRASSES FOR DRYING

FLOWERS: *Acroclinium*, *Ammobium*, *Celosia Plumosa*, Chinese Woolflower, *Catanache*, *Echinops*, *Eryngium*, *Comphrena*, *Gypsophila*, *Paniculata*, *Helichrysum*, *Lunaria*, *Physalis*, *Rhodante*, *Statice*, *Xeranthemum*, *Carthamus*.

GRASSES: *Agrostis*, *Briza*, *Tricholaena*, *Coix*, *Erianthus*, *Lagurus*, *Pennisetum*, *Stipa*. Cut the flowers before they are fully developed, when they commence to open, as they will fully open during the drying process. The material cut and the foliage stripped off, the stems should be tied in small bunches and hung with the heads downward in a cool, dark, dry and airy room, except *Physalis* which must be hung up to dry in a horizontal position, so that the lanterns would not cling close to the stem.

WINTER BLOOMING FLOWERS

To have flowers for Christmas sow Snapdragon Cheviot Maid and others in June-July, *Begonia Romance*, Christmas Cheer and Christmas Pink in July, *Cyclamen* 16 months previous to Christmas, Cleveland Cherry and Dwarf Pomegranate in December to early in January. Christmas Pepper January to March, *Coleum*, *Stuttgartia* Cherry, March-April, *Calendula* in September, *Freesia*, pot up in August, use largest sized bulbs, *Mignonette*, sow in August, *Nemesia*, sow in August, *Oxalis Rosea*, sow in September, *Primula Chinensis* and *Obconica*, sow in April, *Primula Malacoides* in July, Pansies, sow July-August, *Saintpaulia* in June, *Stephanophysum* in August, *Myosotis* Christmas Boquet in May-June, *Schizanthus* in September, Early Wonder and *Kewensis* Wallflower in July-August. *Doronicum* Field grown plants brought in and planted in fairly good soil Oct. 15, will bloom for Christmas. Stock Early Harbinger if sown July 10.

The following items described in this catalog are also winter-bloomers: *Alyssum*, *Anemone*, *Clarkia*, *Cynoglossum*, *Delphinium*, *Dimorphotoca*, *Digitalis*, *Gerbera*, *Gillia*, *Heliophila*, *Linaria*, *Lupin*, *Ranunculus*, *Swansonia*, *Trachymene*, *Troilus*, *Ursinia*, *Venidium*.

Suitable for Shade

The following flowers of which we offer the seed can be successfully raised in partial shade: *Achillea*, *Aconitum*, *Aquilegia*, *Bellis*, *Campanula*, *Begonia*, *Colinsia*, *Fuchsia*, *Impatiens*, *Lobelia*, *Cardinalis*, *Mignonette*, *Mimulus*, *Nemophyla*, *Nierembergia*, *Pansy*, *Torenia*, *Thalictrum*, *Viola*, Sweet Violet, *Anemone*, *Astilbe*, *Digitalis*, *Bleeding Heart*, *Polemonium*, *Primula Troilus*, *Anchusa* *Myosotidiflora*, *Myosotis* and *Doronicum*. For shady places nothing beats Hardy Ferns.

PLANTS FOR GRAVES

Many plants can be used for this purpose besides those on the list that follows. Plants of medium height suitable for the center and good for one season only: Dwarf *Ageratum*s, *Cineraria* *Maritima*, *Geranium*, *Nigella*, *Lantana*, *Matricaria*, *Capensis*, *Centaurea* *Gymnocarpa*, *Nierembergia*, *Petunias*, *Phlox Grfl.*, Ten Weeks Stocks. Perennials: *Aquilegia* *Coerulea* and Rose Queen, *Cheiranthus* *Ailioni*, *Bleeding Heart*, *Dianthus* *Cyclops*, *Lychnis* *Haageana* and *Arkwrightii*, *Stokesia*, *Platycodon* *Mariesi*, *Peony* *Officinalis*. Annuals for border of graves: *Alyssum* *Lobelia*, Dwarf *Marigold*, *Matricaria* *Golden Ball*, Dwarf *Phlox*, *Nolana*. For a perennial border use: *Bellis*, *Cerastium*, *Pyrethrum* *Golden Feather*, a most excellent plant for this purpose, *Dianthus* *Deltoides*, *Saxifraga*. Some of these plants spread and must be kept in shape by occasional trimming. For a solid cover use: *Gypsophila* *Repens*, *Saponaria* *Occymoides*, *Saxifraga*, Mahogany Clover or *Vinca* *Minor*, the best plant of all for this purpose. Hardy *Verbena*.

CARPET BEDDING—As an answer to queries would say that to merely learn the names of plants suitable for carpeting means nothing, because carpet bedding is an art, must be understood, besides not being easy, it is an expensive form of gardening and will hardly ever become popular in this country. Those interested in carpet bedding should procure a book on this subject from A. T. De La Mare Co., New York, N. Y.

FOR DRY PLACES

Androsace, *Eriophyllum*, *Herniaria*, *Hieracium*, *Lindifolia*, *Phacelia*, *Portulaca*, *Whitflavia*, *Anthemis*.

FOR HANGING BASKETS

Ageratum, *Begonia* *Semperflorens*, *Cuphea*, *Geranium*, *Heliotrope*, *Lantana*, *Lobelia* *Gracilis*, Dwarf *Marigold*, *Nierembergia*, *Petunia*, *Alyssum*, *Verbena*, *Coleus*, *Dracanea*, *Centaurea* *Gymnocarpa*, *Cineraria* *Maritima*, *Grevillea*, *Pyrethrum* *Golden Feather*. All named are upright growing plants. The following are trailing plants: *Maurandia*, *Linaria* *Cymbalaria*, *Thunbergia*, *Lobelia* *Pendula*, *Asparagus* *Sprengheri*.

FOR BORDER AND BEDDING

Very dwarf, 6 to 12 inches high: *Alyssum*, *Brachycome*, *Candytuft*, *Centaurea* *Candidissima*, *Myosotis*, *Lobelia*, *Mignonette*, *Pansy*, Dwarf Compact *Petunias*, Dwarf Annual *Phlox*, *Pyrethrum*, *Portulaca*, *Verbena*. Plants 12 to 24 inches high: *Ageratum*, *Amaranthus*, *Snapdragon*, *Asters*, *Balsam*, *Coleus*, *Cineraria* *Maritima*, *Centaurea* *Gymnocarpa*, Dwarf *Larkspur*, Dwarf *Marigold*, *Nasturtium*, *Phlox* *Grandiflora*, *Salpiglossis*, *Salvia*, *Scabiosa*, *Stocks*, *Vinca* *Rosea*, *Zinnia* *Gracilis*.

CLIMBING PLANTS suitable for covering porches, trellis work, walls, etc., see *Ampelopsis*, *Aristoiochia*, Balloon Vine, Cardinal Climber, *Clematis*, *Cobaea*, *Cypress* Vine, *Dolichos*, *Gourds*, *Ipomea*, *Lathyrus*, *Maurandia*, *Mina*, *Nasturtium*, *Scarlet Runner*.

SICK PLANTS Whenever your plants get sickly, look for insects in and above the soil, and apply a remedy. However most troubles are caused by overwatering. If you will water ONLY when water is needed and then do so thoroughly, you will save yourself worry and money.

Protecting Hardy Plants

Straw, hay or manure is used in order to keep the frost in the ground till spring comes. Continued freezing and thawing causes the ground to heave, resulting in loss of plants, covering prevents that. It is important to cover the plants after the ground is frozen to a depth of 6 inches or more—not before. The covering should be light, a layer about 6 inches is right.

Government bulletin No. 1381, entitled "*Herbaceous Perennials*," may be had free on request to the Department of Agriculture, Washington, D. C.

Flowers For the South

Many customers ask us what flowers to grow in the South. Our answer: All flowers can be raised in the South and many that we in the North cannot raise on account of our severe winters. The only flowers that you should leave alone, no matter where located, are those that require constant moisture, shade, special soil, etc., and you happen to be unable to provide these conditions. If your first trial with flowers is not a success try again—perhaps you did not afford the plant right treatment. Learn by mistakes. The following flowers, most of them very beautiful, need protection over winter here in Iowa, but in the South do well without it and bloom profusely: *Anemone*, *Candytuft*, *Gibraltarica*, *Cheiranthus* *Ailioni*, *Chrysanthemum*, *Digitalis*, *Geum*, *Gerbera*, *Hedysarum*, *Hibiscus*, *Lavandula*, *Lobelia* *Cardinalis*, *Pentstemon*, *Platycodon*, *Violas*, *Salvias*, *Scabiosa* *Japonica*, *Trachelium*, *Tritoma*.

There is no end of varieties of flowers that do well in the South, the few named are especially choice and worthy of raising.

GREENHOUSE OWNERS Whenever you have trouble in growing crops under glass or outdoors, no matter whether the trouble is caused by some new insect pest or a new plant disease and you are at a loss as to what remedy to apply, write to: Department of Agriculture, Washington, D. C. State the nature of the difficulty in full and you will be advised promptly and absolutely free by experts. In some cases a government man will call and give you expert advice and help—absolutely free.

House Plants

Many florists having calls for house plants, inquire as to what are the best plants to satisfy this demand. We suggest a few that you can raise from seed we have to offer: *Abutilon*, *Acacia*, *Agatheia*, *Ageratum*, *Asparagus*, *Begonia*, *Browallia*, *Cactus*, *Calceolaria*, *Carneration*, *Cineraria*, *Cleveland Cherry*, *Cuphea*, *Cyclamen*, *Cyperus* *Dracanea*, *Gloxinia*, *Grevillea*, *Geranium*, *Echeveria*, *Fuchsia*, *Heliotrope*, Ice Plant, *Impatiens*, *Lantana*, Lemon *Verbena*, *Mignonette*, *Myrtle*, *Oxalis*, *Primula*, *Rhodante*, *Schizanthus*, *Snapdragon*, *Stocks*, *Wallflower*.

PLANTS FOR ROCK GARDENS

We offer the seed of the following perennial rock plants: *Alyssum* *Saxatile*, *Arabis*, *Armeria*, *Campanula* *Carpatica*, *Candytuft*, *Sempervirens*, *Catananche*, *Cerastium*, *Cheiranthus* *Ailioni*, *Dianthus* *Deltoides* and *Plumarius*, *Geum*, *Heuchaera*, *Gypsophila* *Repens*, *Eryngium*, *Linaria*, *Lychnis* *Haageana*, *Myosotis*, *Oenothera*, *Oxalis* *Tropaeoides*, *Papaver* *Nudicaule*, *Pentstemon* *Grfl.*, *Platycodon* *Mariesi*, *Primula* *Auricula* and *Officinalis*, *Saxifraga*, *Stachys*, *Statice*, *Stokesia*, *Viola*, *Saponaria* *Occymoides*, *Yucca*, *Valeriana* and *Inula*. Hardy Ferns and *Myosotis* should be employed in shady parts of the rock garden, also in wet places. A few annuals suitable for rock work: *Abronia*, Dwarf *Ageratum*, *Asperula* *Setosa*, *Candytuft* *Umbellata*, *Eschscholtzia*, Ice Plant, *Nemesia*, *Nemophyla*, *Nolana*, *Petunia*, *Portulaca*, *Viscaria* *Cardinalis*.

BEE PLANTS—We sell the seed of the following honey bearing plants: Sweet *Alyssum*, *Centaurea* *Odorata* Marg., *Clarkia*, *Echium*, *Candytuft* *Umbellata*, *Nigella*, *Scabiosa*. Others are: *Phacelia*, *Bartonia*, *Collinsia*, *Malope*, *Mathiola*. Real honey bearing plants are: Clover, Buckwheat also Linden or Basswood tree.

Reliable Flower Seeds

PLEASE NOTE

That you may order half and quarter ounces at ounce rate, half and quarter pounds at pound rate. Our trade packets are double the quantity of retail packets and our retail packets are well filled and you will get your money's worth every time.

ABRONIA—SAND VERBENA

UMBELLATA GRFL—Trailing Verbena with numerous clusters of sweet scented, rosy lilac flowers in June to November. Fine for borders, hanging baskets and rock work. Thrives in poor soil. Hardy annual, 6 in. tall. T. pkt. 10c; oz. 45c.

ABUTILON—FLOWERING MAPLE

Easily started from seed. Placed in 2 inch pots by April, carried outside over summer and put back on the benches in September will be in full bloom for Christmas. The bell-shaped flowers are in shades of pink, red and yellow. First class house plant, fine for beds, hanging baskets and as a border. Hardly ever out of bloom. The seed we offer are best varieties in mixture. T. pkt. 20c; 1/16 oz. 45c; 1/8 oz. 80c; oz. \$6.00.

ACACIA—MIMOSA

Easily grown greenhouse plant. Sow the seed in January, soak in hot water for 24 hours. Pot off, use sandy soil and always give plenty of water. Plunge the pots in soil, keep the plants cool from 40 to 50 degrees. Never try to force it and you will have fine blooming plants in March and April. They make fine Easter plants. There is scarcely a thing in flowers more beautiful.

PODALYRIIFOLIA—A gem. Early flowering, fine silvery foliage, producing elegant sprays of beautiful golden-yellow flowers in quantity. Of great value for cutting. Height 3 ft. 25 seeds 20c; 100 seeds 60c.

ACACIA DEALBATA—Large fern-like silvery leaves, flowers clear yellow, scented. Winter blooming sort. T. pkt. 10c; oz. 50c.

ACACIA LOPHANTA—(A. L. Speciosa Nana Compacta). Flowers pale yellow. T. pkt. 10c; oz. 50c.

ACACIA ARMATA—Fine pot plant, yellow globular heads of flowers freely produced. Height 3 ft. T. pkt. 15c; oz. \$1.60.

ACACIA MIXED—Includes many dwarf compact growing varieties, the best there is in Acacia. T. pkt. 15c; oz. \$1.60.

ACANTHUS LUSITANICUS (Mollis) — An elegant, stately, hardy perennial. Protect North. Height 3 ft. T. pkt. 10c; oz. 50c.

ACHILLEA THE PEARL

Easily raised, blooming from June to October and useful no matter for what occasion flowers are needed, doing well in any kind of soil both in shade or sun. Will never fail to furnish a wealth of bloom and will last forever if divided and reset every year late in summer. Hardy perennial. Height 2 feet. If sown early will bloom the first season. T. pkt. 10c; 1/8 oz. 40c; oz. \$3.00.

ACHILLEA FILIPENDULINA—Produces during June and July large flat heads of flowers that are the brightest yellow, carried on long stout stalks 30 inches tall. A fine perennial that can be used either fresh or dried in bouquets and flower arrangements. Height 3-4 ft. T. pkt. 10c; 1/8 oz. 40c; oz. \$3.00.

ACHILLEA TOMENTOSA AUREA—Forms a carpet of finely cut grayish green foliage, flowers golden-yellow in flat heads in spring and summer. Extra good rock plant, hardy and long lived if exposed to the sun and planted in light rather dry soil. Height 8 in. T. pkt. 10c; 1/16 oz. 25c.

ACHILLEA PERRY'S WHITE—Twice as large as Pearl, extra double snow-white, a real flower but produces no seed. Multiplies fast by plant division. Do not order the seed of this, we have none. Plants only, 3 for 40c; 10 for 80c, prepaid.

ADENOPHORA POLYMORPHA

Hardy perennial, spikes of fine dark blue flowers produced freely in midsummer. Of robust growth in any good garden soil. Fine for large beds, borders and large rockeries. Height 3 ft. T. pkt. 10c; 1/16 oz. 25c; 1/8 oz. 45c; oz. \$3.00.

ACONITUM—MONKSHOOD

CULTURE—The seeds must never be allowed to dry out after they are planted, the seedlings must be shaded from the hot sun. Sow in soil free of weeds as weeds when pulled disturb the tiny rootlets of the seedlings, resulting in loss. Aconitum likes rich heavy soil, perfect drainage and should be set 4-5 inches deep to avoid loss from winter-killing. Hardy perennial.

NAPELLUS—Long spikes of curiously shaped blue flowers, from July to October. Plant in shrubbery or shady spots of the garden. Height 3 to 4 feet. T. pkt. 10c; 1/8 oz. 25c; 1 oz. \$1.40.

ACONITUM PRAECOX—Napellus type, blooming in May and June when plants sell the best and you will make more money by having this Aconitum. Beautiful and rarely seen, just the thing the public wants. Height 3 ft. T. pkt. 20c; 1/8 oz. 45c; oz. \$2.60.

ACONITUM FISCHERI—Exceptionally beautiful and of great value for cutting. The flowers are large, deep bright blue, a shade of blue that harmonizes well with other flowers, produced in dense heavy spikes so that three stalks make a large bouquet. Nothing finer for vases, baskets and made-up floral pieces. Blooms in August and September. Height 3 ft. T. pkt. 10c; 1/8 oz. 25c; oz. \$1.40.

AETHIONEMA PERSICUM

A lovely rock and border plant that can easily be included in the 10 or 12 very best low growing hardy perennials. The plant forms a broad cushion covered with charmingly beautiful, pink flowers in April and May. The foliage is clean, neat, bluish-green, making the plant highly attractive in or out of bloom. Easily raised from seed and perfectly hardy. Height 6 in. T. pkt. 25c; 1/32 oz. \$1.00.

ACROCLINUM—STRAW FLOWER

Easily raised, thrives in any kind of soil and can be sown early in the spring indoors and set outside in May or sown directly outside in May. Bloom from June to frost. Annual. Height 1 foot.

DOUBLE MIXED—T. pkt. 10c; oz. 35c; lb. \$2.80.

ACROCLINUM NEW HYBRIDS—Flowers very double, twice as large as of the old type, in bright shades of pink, carmine-rose, yellow and lavender. T. pkt. 15c; 1/16 oz. 25c.

AGATHEA—BLUE DAISY

An elegant pot plant with large sky blue very beautiful flowers. Easily raised. Height 18 inches. Space the plants 10 inches apart in rows foot apart. In bloom from November till July. When cutting flowers, cut away down to make the plants break from the bottom. Clayey loam mixed with about 10 per cent of sifted ashes and a little bone meal added is the soil to use and 40 to 50 deg. is the right temperature. They love the sun and plenty of air.

A. COELETIS—Blue Marguerite. T. pkt. 10c; oz. \$1.00.

AGROSTEMMA WALKERI—Large, single, bright dark purple flowers from May to September. Hardy perennial 25 in. tall. T. pkt. 10c; oz. 60c.

We sell half pounds at pound rates, 5 lbs. or over at 10 lb. rate, 25 lbs. or over at 100 lb. rate.

AGERATUM—FLOSS FLOWER

Fine as a pot plant, for winter blooming, or for bedding in the garden. Plant 6 inches apart. To get blooming plants for spring trade, sow in February. In bloom from July to frost.

LITTLE BLUE STAR—The plants grow only 5 inches high and are literally covered with bright blue flowers during summer and autumn. This is the best Ageratum for edging purposes. T. pkt. 10c; oz. \$1.80; 1/8 oz. 25c.

IMPERIAL WHITE—Large pure white flowers, early and constant bloomer. This is the prettiest white Ageratum. Height 9 in. Oz. 40c; lb. \$3.20; T. pkt. 5c.

BLUE PERFECTION—This is the darkest colored of all large-flowering Ageratums with deep amethyst blue flowers, plants even in growth. Height 8 in. Oz. 40c; lb. \$3.20; T. pkt. 5c.

IMPERIAL BLUE—T. pkt. 5c; oz. 40c; lb. \$3.00. Height 9 in.

TALL AGERATUM MIXED—Fine large flowered, white and blue, unexcelled for flower work and as cut flowers. Height 2 ft. T. pkt. 5c; oz. 20c; lb. \$2.50.

AGERATUM BLUE BALL—Plants of compact growth, ball-shaped, only six inches high, resembling a shapely and huge bouquet when in bloom. Deep blue flowers of very large size. T. pkt. 10c; 1/8 oz. 30c; oz. \$2.00.

AGERATUM CONSPICUUM—Blooms in winter under glass, producing quantities of fine white bloom, first rate for cutting. Height 4 ft. Tender perennial. T. pkt. 10c; 1/8 oz. 25c; oz. \$1.80.

AGERATUM LASSEAUXXII—Produces masses of mauve-blue flowers in winter under glass, fine for cutting. This variety as well as Conspicuum is a tender perennial, both bloom first year from seed, both enjoy lots of sun and require light soil. To get flowers in June till frost sow in February or March. Height 1 ft. T. pkt. 10c; 1/8 oz. 25c; oz. \$1.80.

AGERATUM BLUE CAP—Clear, deep rich blue, plants dwarf, very compact, completely covered with bloom. Extra choice new variety. Height 5 in. T. pkt. 10c; 1/8 oz. 30c; oz. \$2.00.

AGROSTIS NEBULOSA—CLOUD GRASS

Ornamental grass useful for mixing with cut flowers, fresh or dried, blooming in July and August. Annual. Height 18 inches. T. pkt. 10c; 1 oz. 50c.

ALLIUM Hardy, easily raised, bulbous plants thriving in any soil with good drainage in full sun. When cut, the flowers "stand up" for several days out of water and are widely employed in floral work by the florists in Europe. Can be forced to bloom in winter. In this country used mostly in rockeries.

ALLIUM PULCHELLUM—Flowers in umbells, rosy-lilac in August. Height 15 in. T. pkt. 15c.

ALLIUM CYANEUM—Sky-blue flowers in July and August. Height 8 in. T. pkt. 20c.

ALLIUM THIBETICUM—Lilac mauve flowers in June and July. Very vigorous grower, multiplies fast. Height 8 in. T. pkt. 20c.

ALLIUM STELLATUM Flowers globular, rosy pink, two inches through, borne on stout stiff stems two feet long in August and September. Height 2 ft. T. pkt. 25c.

ALONSOA GRANDIFLORA

A. Warscewicii Compacta. An easily raised annual fine for bedding, rockeries and pots. Flowers large tomato-red. Under glass, blooms in winter. Height 1 ft. T. pkt. 10c; oz. 50c; lb. \$4.00.

Alyssum Little Gem

Alyssum

CULTURE—Sow the seed as soon as the ground is in workable condition. Cover the seed 1/4 inch and have the plants stand a foot apart. They will do well in almost any soil. For winter blooming sow the seed under glass early in September. When out of bloom cut back and the plants will produce till frost.

ALYSSUM SWEET—The well known sort with sweet scented white flowers. T. pkt. 5c; oz. 20c; lb. \$2.00.

CARPET OF SNOW—Choicest stock, seed saved from selected, transplanted plants with snow white flowers without a trace of green. Will satisfy the most fastidious gardener. Each plant absolutely flat, a solid mass of glistening whiteness. T. pkt. 10c; oz. 50c; lb. \$4.00.

ALYSSUM LITTLE GEM—Very dwarf, only 3 to 4 inches in height. A single plant will cover a space a foot in diameter. Densely studded from spring until fall with beautiful spikes of deliciously fragrant flowers. T. pkt. 10c; oz. 50c; lb. \$4.00.

ALYSSUM LILAC QUEEN—Dwarf and compact, flowers of pretty deep lavender color. T. pkt. 10c; oz. 60c; lb. \$5.00.

ALYSSUM MINIMUM—Dwarfest and daintiest of its class. The neat round plants are a sheet of white bloom raising only two inches above the ground and make the most beautiful edgings imaginable. T. pkt. 10c; oz. 60c; lb. \$6.00.

ALYSSUM SAXATILE COMPACTUM—(Basket of Gold.) Flowers brilliant golden yellow completely hiding the foliage. Height 9 inches. Enjoys sun, and not too much moisture. Hardy perennial. T. pkt. 10c; oz. 60c; lb. \$7.00.

ALYSSUM ROSTRATUM—Hardy perennial rock plant producing quantities of yellow bloom from June to September. Height 15 in. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.40.

ALYSSUM SAXATILE SULPHUREUM—Plants compact, flowers of beautiful pale yellow shade in April and May. Hardy perennial. Height 16 in. T. pkt. 25c.

ALYSSUM SINUATUM—Vigorous hardy perennial producing masses of sulphur yellow bloom in May and June. Height 15 in. T. pkt. 10c; oz. \$1.00.

ALYSSUM SERPYLLIFOLIUM—Fine hardy perennial rock plant with silvery gray foliage and pale yellow flowers in racemes during April and May. Height 6 in. T. pkt. 20c.

MOELLENDORFIANUM—An extra choice, compact growing hardy Alyssum forming dense cushions of silvery foliage foot across, covered in May and June with vivid yellow bloom of unusual beauty. Height 4 in. T. pkt. 30c; 1/32 oz. 45c.

ALSINE PINIFOLIA

A choice hardy perennial of neat growth, blooming in April and May if the plants are started early. The plants resemble miniature pine trees in growth and are covered with elegant snow white blooms in June and July when set in a rockery or used for bedding. Does best in sandy ground and fully exposed to the sun. Height 6 in. T. pkt. 25c; 1/32 oz. 50c.

ALSTROEMERIA CHILENSIS (A. Pulchella)—Hardy Amaryllis. An extremely pretty half hardy bulbous plant, flowers large trumpet-shaped in umbells deep pink to red from May to October. Fine for cutting, bedding and as a pot plant. Requires rich, perfectly drained soil, partial shade and during hot weather lots of water. Easily raised from seed which, however, lays long and germinates unevenly. Height 3 ft. T. pkt. 20c; 1/8 oz. 45c.

AMELANCHIER ALNIFOLIA (Shad Bush)—

Highly ornamental shrub producing a wealth of attractive white flowers in large racemes in April and May and quantities of berry-like edible sweetly scented fruit in July. Does well in a variety of soils. Perfectly hardy. Height 10 ft. T. pkt. 15c.

AMBERBOA MURICATA ROSEA

The flowers resemble those of a cornflower, the color a pleasing shade of soft pink. Valuable for cutting as it will "stand up" for a long time in or out of water. Annual Blooms in July and September. Height 30 in. T. pkt. 10c; oz. 80c.

AMPELOPSIS—BOSTON IVY—CLIMBER

VETCHII—A hardy perennial climber with green leaves, which turn to scarlet in the fall. Clings firmly to the smoothest surface of rock or wood. Height 30 feet. T. pkt. 10c; oz. 50c; lb. \$3.20.

ANAGALIS COERULA

An extremely showy and floriferous annual for beds, edgings, rockeries and pots. Flowers bright deep blue in July up to September. Sow where the plants are to grow in May. Height 8 inches. Pkt. 10c; oz. 80c; lb. \$10.00.

ANCHUSA MYOSOTIDIFLORA

Of neat compact growth, not over 20 inches high, with fine, heart shaped foliage and bearing quantities of deep blue forget-me-not-like flowers. Valuable because it blooms during April and May, is fine for cutting and an excellent rock plant. T. pkt. 20c; 1/8 oz. 50c.

ANCHUSA ITALICA—"Dropmore"—Hardy perennial, bearing all summer flowers of the richest gentian blue. Height 4 feet. T. pkt. 10c; oz. 80c; lb. \$8.60.

ANCHUSA CAPENSIS BLUE BIRD Plants of neat compact habit producing masses of brilliant intense dark blue flowers in sprays that are excellent for cutting. Very attractive. Annual. Height 20 in. T. pkt. 10c; 1/8 oz. 30c.

ANDROSACE CORONOPIFOLIA

Hardy perennial, flowers snow white, in large umbells, very graceful, from April to end of June. Fine pot and rock plant for sunny positions. Height 6 in. T. pkt. 15c; 1/8 oz. 35c; oz. \$2.40.

ANEMONE WINDFLOWER

ST. BRIGID—The flowers are 3 to 5 inches across, single, semi-double and produce in great abundance in April to June. The colors are of all shades, and markings, scarlet, pink, maroon, purple, lilac, striped, mottled, etc. It is one of the most gorgeous flowers unsurpassed for cutting. Height 15 inches. Hardy perennial. Year old corms of this Anemone started late in August will bloom late in December and January. Temperature 45 deg. T. pkt. 10c; 1/8 oz. 35c; oz. \$2.00; lb. \$30.00.

ST. BRIGID THE GOVERNOR—Double bright scarlet. T. pkt. 15c; 1/8 oz. 40c; oz. \$3.00.

ANEMONE SYLVESTRIS—Beautiful and very useful variety, producing quantities of large, pure white flowers, on stout stalks, resembling the bloom of snowdrops. A first rate cut flower, fine for rockeries and a readily saleable plant. In bloom from May to July. Height 12 in. T. pkt. 10c; 1/8 oz. 30c; oz. \$2.00.

ANEMONE CAEN—Also known as Coronaria, Chinese or French Anemone. Very showy, of the same usefulness and same habit as St. Brigid. Flowers single, large in many colors. MIXED. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.00.

ANEMONE JAPANESE—Beautiful specie and highly valuable for cutting. Equal in keeping qualities to Gerbera. Flowers single or semi-double, three inches across born on long stems. Perennial and hardy and long lived if planted in well drained location and slightly covered over winter with straw or strawy manure. Blooms in August till frost. Prefers shade and loves moisture. It is easily raised from seed that should be sown in spring and that germinates in 30-60 days. Worth all the trouble of raising. We offer two varieties mixed. One an extra large white, the other rich pink. T. pkt. 25c; 1/32 oz. 40c.

ANEMONE PULSATILA—Produces in April and May single, violet-lilac flowers almost 3 inches across. Valuable for spring sales, first rate rock and border plant. Requires well drained soil in full sun. Height 10 in. T. pkt. 10c; 1/8 oz. 35c; oz. \$2.00.

ANGELONIA GRANDIFLORA

Tender perennial, blooming first year from seed. Produces a wealth of lilac-blue flowers with tigred throats, in dainty sprays interspersed with elegant dark green foliage. Sweet scented. A first class pot plant. Start the seed in January or early in February to have plants for spring sales. Height 30 in. In bloom from May till frost and in winter under glass. T. pkt. 20c.

ANTHEMIS—HARDY MARGUERITE

KELWAXI—Hardy Marguerite. A most satisfactory hardy perennial, bearing all summer daisy-like golden yellow blossoms. Height 2 feet. T. pkt. 10c; oz. 30c; lb. \$4.00.

ANTHEMIS MONTANA Drought and heat resisting perennial rock and border plant, producing from April to July, masses of beautiful pure white flowers. Height 10 in. T. pkt. 10c; oz. \$1.00.

AMARANTHUS

Hardy annual, with brilliant foliage, from July to frost. Splendid for window boxes and for edging Canna beds. Prefer sunny exposure and soil not too rich. Require a fair amount of room for best development.

AMARANTHUS SUNRISE Strikingly beautiful. Red, yellow and dark green foliage, each branch terminating with a brilliant large scarlet, carmine head. Fine for groups or singly. T. pkt. 10c; oz. 60c; lb. \$6.00.

AMMOBIUM ALATUM GRANDIFLORUM

An annual everlasting with very large white flowers, from June to November. Height 2 1/2 feet. Of easiest culture. T. pkt. 10c; oz. 50c; lb. \$3.20.

ANTIGONON—QUEEN'S WREATH

Antigonon Leptosus is a handsome summer-blooming climber, doing well in a hot and sunny position, producing numerous sprays of rose pink flowers that every florist can use to advantage. Water liberally when in bloom, keep dry when at rest, plant deep and keep well protected over winter or store over winter like dahlia roots. Height 20 ft. Half hardy perennial. T. pkt. 10c; oz. 45c; lb. \$4.20.

Antirrhinum Majestic

Represents the furthest advance in Antirrhinums. The flowers as well as flower spikes are of maximum size, the placement of individual flowers is ideal and were it not for the fact that Majestic does not produce flowers in mid-winter, many new grand and valuable varieties would become an absolute back number. Height 18 to 24 inches.

MAJESTIC AVALANCHE—Heavy spikes, perfectly formed, snow-white.

MAJESTIC CHERRY—Cherry-red, very rich color.

MAJESTIC DELIGHT—A most fascinating shade of delicate salmon pink.

MAJESTIC GOLDEN DAWN—Exceptionally vigorous in growth. Color golden-buff, overlaid salmon-pink. A magnificent flower.

MAJESTIC ROSE MARIE—Rich rose, golden center.

MAJESTIC ROSE BEAUTY—Pure rose pink self of extraordinary brilliancy.

MAJESTIC SNOWSTORM—Flowers extra large, snow-white, early flowering, valuable for forcing under glass.

MAJESTIC SUNSET—Bright terra-cotta shading into rosy-salmon.

MAJESTIC TWILIGHT—Flowers of enormous size, color a blend of rich gold with terra cotta. Will bloom under glass in the early spring months but not in mid-winter and is a cut-flower that is hard to beat.

MAJESTIC MIXED—Contains every variety listed by us, in proper proportion. Any variety; T. pkt. 20c; 1/8 oz. 30c; oz. \$2.00.

SNAPDRAGON BLACK DIAMOND

If you grow plants for sale to the general public, your sales will increase if you will grow for snapdragon plants our Black Diamond variety. The plants of Black Diamond are dark-greenish-red, entirely different from all other snapdragon plants. This unusual color makes the plants sell. Black Diamond has very large, dark red, almost black flowers. Height 20 in. T. pkt. 10c; 1/8 oz. 15c; oz. 80c.

DOUBLE SNAPDRAGONS

Of unusual beauty, destined to create sensation in all flower markets. The doubling up of the flowers makes the magnificent, heavy flower spikes present an appearance as of an entirely new race of flowers, unrelated and unlike the single snapdragon. No words can describe the beauty of the flowers, this double snapdragon must be seen to be fully appreciated. Plants of vigorous growth, just as free flowering as the single type, best grown with supports. Height 30 in. **DOUBLE GOLDEN DREAM** Canary yellow. **DOUBLE DELIGHT** Pure pink with a touch of white in the throat. **DOUBLE PURITY** Snow-white. **DOUBLE MIXED**. T. pkt. 40c; 1/16 oz. \$1.00. Comes about 70% true from seed.

ACHILLEA FILIPENDULINA is a wonderful cut flower. Strong grower, very floriferous inexpensively raised furnishing a abundance of real flowers in June and July in any soil in a sunny situation. Heat and drought resistant.

OUR TRADE PACKETS

are double the quantity of retail packets. Our retail packets are well filled, the seeds are fresh and of strong germination. You will get only the best from us, so don't be afraid to place the order with us.

Antirrhinum—Snapdragon

Perennials, flowering the first year from seed.

All the varieties listed by us produce fine spikes of very large flowers. The tall varieties are best for greenhouses, the half dwarf are best for garden culture, as they do not need supports, and the dwarf varieties make fine borders and edgings. The soft coloring and daintiness and genuine beauty of the blooms make the Snapdragons more popular every year. They do well almost in any soil. The seed may be sown outdoors early in May and will produce blooming plants from July to frost. For early flowering sow in the house or frames in February or March. Cover the seed very lightly. Set the plants 9 inches apart.

GREENHOUSE CULTURE—To get a crop for Christmas sow from June 25 to July 31, depending upon the time you wish to bench the plants. Use well prepared LOOSE soil, cover this with a thin layer of fine clean sand, then sow the seed and be sure to cover the same very lightly. Covering the seed too deep and overwatering before or after germination, will mean a poor stand. When your plants are large enough, put them into 2½ inch pots, use sifted sod soil, that contains no fresh manure. Pinch the plants once and allow 6 to 8 breaks to grow on each. Early in September the plants will be nearly pot bound and it is time to place them into benches 10 inches apart. Remove all suckers and prune the shoots at the base of the plants if they should crowd one another. Provide carnation supports early. Temperature 58-60 degrees at night. To prevent rust never allow water to touch the foliage even when the plants are first potted.

You will never have any trouble with rust or disease if you will water carefully, not crowd the plants and ventilate, but if rust should appear write for bulletin No. 221 to Agricultural Experiment Station, Urbana, Ill.

Half Dwarf Snapdragon—Height 18 in.

NELROSE—Salmon pink.

FIREFLAME—Scarlet, throat white.

QUEEN OF THE NORTH.

CRIMSON QUEEN—Crimson.

DAFFODIL—Large pale lemon—yellow, high class early flowering. Forcing variety.

DAPHNE—Soft blush pink.

DEFIANCE—Orange red.

FAWN—Pink and yellow.

PEERLESS PINK—La France pink.

SILVER PINK—True.

FIREBRAND—Rich deep red.

GOLDEN QUEEN—Rich yellow.

RUBY—Ruby red.

DARK SCARLET.

FIREFLY—Scarlet and white.

CARMINE QUEEN—Rosy carmine.

MONT BLANC—Pure white.

ROSE QUEEN—Rich rose.

MIXED—All colors.

ANY OF THE ABOVE—1 oz. 80c; lb. \$8.00; T. pkt. 10c; ¼ oz. 15c.

TALL SNAPDRAGON—Height 24 to 36 in.

APPLEBLOSSOM—Pink and white.

ROSE—Brilliant rose pink.

WHITE—Pure white.

GARNET—Rose pink.

PINK—Delicate pink.

ANY OF THE ABOVE—1 oz. 80c; lb. \$8.00; T. pkt. 10c; ¼ oz. 15c.

SCARLET—Bright.

YELLOW—Rich yellow.

DARK PURPLE with bluish sheen.

SALMON—Salmon-rose.

MIXED—All colors.

SNAPDRAGON SPECIAL MIXTURE

Includes all the Giant, Half-Dwarf Snapdragon varieties as well as many new sorts. T. pkt. 10c; oz. 80c; lb. \$8.00.

ANTIRRHINUM GOLIATH MIXED

This is a well balanced mixture of giant flowering forcing varieties of snapdragons, mixed by us from separate varieties and safe to use. Contains every half dwarf variety such as Ceylon Court, Cheviot Maid, etc. T. pkt. 20c; ¼ oz. 50c; oz. \$3.00.

SNAPDRAGON CHRISTMAS GEM—Tom Thumb type only 9 inches tall, color rich deep pink. The finest dwarf snapdragon. You can have fine plants in pots ready for Mothers Day from January sown seed. T. pkt. 10c; ¼ oz. 40c; oz. \$3.00.

Antirrhinum

SPECIAL FLORIST FORCING STRAINS

We list every variety of importance on page 6.

AQUILEGIA CRIMSON STAR

Flowers extra large long spurred, brilliant dark crimson. Height 3 ft. T. pkt. 40c.

AQUILEGIA OXYSEPALA—Very beautiful Siberian Columbine, flowers during April and May in blue, yellow and white. Hardy perennial 30 in. high. T. pkt. 10c; ¼ oz. 30c; oz. \$2.00.

Arabis Alpina Grfl. Superba—Sweet Rocket

Hardy perennial of easy culture withstanding heat and scorching sun even in quite poor soil. Resembles Alyssum in habit and is covered with a sheet of glistening white flowers as soon as the snow disappears. Height 6 inches. T. pkt. 10c; oz. 60c; lb. \$6.00. **ARABIS ALPINA ROSEA**—Of compact growth, flowers delicate pink from March to June. Height 1 ft. T. pkt. 20c. **ARABIS ALPINA** can be forced to produce flowers in February and earlier that will come handy on many occasions. Keep the plants on the dry side, grow COOL and provide perfect drainage.

DWARF TOM THUMB SNAPDRAGON

YELLOW—WHITE—PINK—SCARLET—MIXED

All large flowered varieties. Height 8 to 15 inches. T. Pkt. 10c; ¼ oz. 20c; oz. \$1.00; lb. \$8.50.

ARCTOTIS NEW HYBRIDS

New. This new annual produces a wealth of large daisy-like extremely showy flowers in many brilliant and many delicate colors, from May to September. Highly valuable for cutting and fine for bedding. Enjoys full sun, requires well drained soil. Height 10 in. T. pkt. 20c; 1/16 oz. 50c.

ARCTOTIS GRANDIS—AFRICAN DAISY

A remarkably handsome annual forming much branched bushes about 3 feet high with flowers borne on long stems well above the foliage. The flowers are large and showy, being pure white on the upper surface, the reverse of the petals pale lilac-blue. Very easily raised. Blooms from early summer till killed by frost. An exquisite cut flower lasting in water over a week. Sow in frames in March or the open ground in May. T. pkt. 10c; oz. 60c; lb. \$6.00.

AQUILEGIA—COLUMBINE

In bloom from April to July, among the first of the cut flower perennials to bloom. Will do well in partly shaded position as well as in full sunlight, and once established requires no care. Perfectly hardy. Two year plants carried over in a cold frame over winter and planted out in a cool house late in February will give a crop of splendid spikes three weeks before the outdoor crop. Force same way as Delphinium. Plant a foot apart.

MRS. SCOTT ELLIOTT'S HYBRIDS—Extra large, long spurred flowers, in all imaginable colors. There are shades of pink, red, yellow, blue, purple, light and dark brown, etc., never before seen in columbines. Of vigorous growth. Height 3 ft. T. pkt. 15c; 1/8 oz. 30c; oz. \$2.00; lb. \$25.00.

ROCKY MOUNTAIN COLUMBINE—Sepals deep blue, petals white, Height 2 feet. T. pkt. 10c; 1/8 oz. 25c; oz. \$1.40; lb. \$18.00.

ROSE QUEEN—The plants produce on long slender stalks in great profusion flowers of light to dark rose with white center and yellow anthers. Height 2 1/2 ft. 1/8 oz. 35c; T. pkt. 15c; oz. \$2.60; lb. \$32.00.

LONG SPURRED HYBRIDS—Very vigorous growers with luxuriant foliage and frequently over 3 feet in height. The colors of the flowers are most gorgeous; pure white, yellow, deep blue, lavender, mauve, chocolate, pale lilac, scarlet, pink, salmon, cerise, etc. T. pkt. 10c; 1/8 oz. 25c; oz. \$1.60; lb. \$20.00.

SKINNERI—Scarlet. T. pkt. 10c; 1/16 oz. 20c; oz. 35c; oz. \$2.40. Height 30 inches.

CHRYSANTHA—Yellow, strong tall grower. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.40; lb. \$18.00. Height 3 1/2 feet.

SILVER QUEEN—Flowers pure white, long spurred. Height 3 feet. T. pkt. 15c; 1/8 oz. 35c; oz. \$2.00; 1/16 oz. 20c.

COPPER QUEEN—Large flowered, long spurred variety with broad petals of dark copper red and straw colored corolla. T. pkt. 10c; 1/8 oz. 25c. Height 2 1/2 feet.

LEMON QUEEN—Robust growing variety, blooms large, long spurred of pleasing pale yellow. T. pkt. 10c; 1/8 oz. 25c; oz. \$2.00. Height 2 1/2 feet.

AQUILEGIA FLABELLATA—Hardy perennial rock plant only a foot high, not of rank growth yet long lived. Foliage dainty, charming, in fact, so that the plants are an asset even without its perfectly shaped ivory-white flowers which are produced on graceful stalks 10 inches above the foliage during April and May. Height 1 ft. T. pkt. 25c.

AQUILEGIA DOUBLE MIXED—Many colors mixed. Height 2 to 3 feet. T. pkt. 5c; oz. 40c; lb. \$5.00.

ARISTOLOCHIA—DUTCHMAN'S PIPE

One of the best perennial hardy climbing plants. Trained against a house or over a trellis it is matchless. Foliage abundant, rich deep green, never bothered by insects. Flowers small, but very pretty, yellow and brown mottled and curiously shaped. Height 30 feet. Space foot apart. 1 oz. \$1.00; T. pkt. 10c.

ARUNDO DONAX

Giant Reed—Absolutely hardy, rapidly growing bamboo-like grass attaining a height from 5 to 15 ft. Succeeds in any soil. Grown for its showy foliage and silky plumes that appear in July and are the finest ornament in dry bouquets, especially when bronzed. T. pkt. 10c; oz. 60c.

ARMERIA—SEA PINK

Hardy perennial of robust growth, producing from dense grass-like foliage masses of globe shaped flowers on long stiff stalks from May to August. The flowers are excellent when dried or fresh, retaining their brilliancy for months after cut. First rate cut flower, fine rock plant, easily raised from seed.

ARMERIA CEPHALOTES—Fine large heads of rosy pink on stiff stems two feet long. T. pkt. 10c; oz. \$1.00; lb. \$12.00.

ARMERIA FORMOSA—Rosy red flowers. Height 2 ft. T. pkt. 10c; oz. \$1.00; lb. \$12.00.

ARMERIA FORMOSA RUBY

This Armeria forms extra large heads of the brightest and lustrous carmine pink from the end of May to October. Fine cut flower, rock plant, bedding plant. Height 18 in. T. pkt. 20c.

ARENARIA MONTANA

A first class hardy perennial rock plant easily raised, doing well in any soil fully exposed to sun. Mat forming covered with silvery white lovely flowers from May to August. Height 4 in. T. pkt. 20c; 1/32 oz. 45c.

ASCLEPIAS TUBEROSA

Butterfly Weed. Hardy plant, 2 to 3 ft. high with very showy flowers of brilliant scarlet, blooming in July and August. T. pkt. 15c; 1/16 oz. 25c; 1/8 oz. 45c.

ASPERULA ODORATA—WALDMEISTER

A hardy perennial, easily raised from seed. Requires a shaded position and moist soil. Height 6 inches; have plants 6 inches apart. The dried leaves retain their fragrance even over a period of years. Blooms in May. T. pkt. 10c; oz. 80c; lb. \$6.40; 1/8 oz. 15c.

ASPERULA HEXAPHYLLA—Hardy perennial of robust growth, easily raised from seed, furnishing from early spring till frost quantities of graceful bright green material for filling in bouquets. Flowers small, white, from April to August. Height 3 ft. T. pkt. 10c; oz. 60c.

ASTILBE DAVIDII

A very beautiful hardy perennial bearing graceful spikes of rosy violet or mauve flowers in July and August. Fine for cutting. Awarded first class certificate in England by Royal Horticultural Society. New. Height 4 ft. Easily raised from seed. T. pkt. 20c; 1/32 oz. 40c.

ASTILBE HYBRIDA—Also called Spirea Japonica. Seed saved from finest varieties such as America, Gladstone, Gloria, Superba, including also the best new tall Arendsi varieties. Hardy perennial. Height 15-30 in. T. pkt. 20c; 1/32 oz. 40c.

ASPARAGUS

Both Asparagus Sprengheri and Plumosus will stand quite cool growing temperature but best results are obtained if grown in a night temperature of 50 degrees.

Sow in light sandy soil in well drained shallow flats at any time. December to April is especially good period. You can grow it in solid beds, benches, boxes, bulb pans and even in hanging baskets. To do well Asparagus needs a bed of soil 8-10 inches deep. Most florists cut their own asparagus fronds when the market is high and buy when the price is down.

Asparagus Plumosus

ASPARAGUS SPRENGHERI—100 seeds 20c; 500 seeds 65c; 1,000 for \$1.20; 5,000 for \$5.00.

ASPARAGUS PLUMOSUS NANUS—100 seeds 25c; 500 for 85c; 1,000 for \$1.60; 5,000 for \$7.00.

Our Asparagus Plumosus and Sprengheri is quality seed, saved from selected plants true to type.

ASPARAGUS FALCATUS

Beautiful greenhouse climber, similar to Sprengheri, with large shining, dark green leaves. A rapid and vigorous grower. Height 10 ft. 10 seeds 15c; 100 seeds \$1.00; 1,000 seeds \$8.00.

ASPARAGUS MARKET KING—See page 12.

ASTER EXPRESS or EARLY WONDER

Of the Comet type, flowers large and full, produced a few days ahead of the well known Queen of the Market. Height 20 in. **DEEP PINK—WHITE—LAVENDER—DARK BLUE—MIXED.** PRICE: Any color T. pkt. 20c; 1/8 oz. 30c; oz. \$2.00.

Asters

A grand cut flower and a highly paying crop for that purpose. The most popular colors are the soft pink and lavender shades. They are extraordinarily showy when planted in masses. They will stand more cold than cabbage and can be sown or set out quite early. If sown as late as June 1st, will give a good fall bloom, even in the North.

LAVENDER GEM is the earliest cut flower variety, ROYAL the best for early market, DAYBREAK are ideal for pots, design work, bedding and borders. All these are extra good and early. MIKADO are medium early, a good type of branching asters, but they are not worth much for shipping. CREGO, OSTRICH FEATHER, PEERLESS PINK, HEART OR FRANCE, AUTUMN GLORY, AMERICAN BEAUTY, KING are all late varieties. Of all asters KING is the best shipper and popular in cut flower markets. Most beautiful of all asters is CALIFORNIA GIANTS variety. The easiest aster to disbud is AMERICAN BEAUTY. In clean soil and on a piece of land with perfect drainage asters are seldom attacked by any kind of disease.

CULTURE—Sow outside the latter part of April, cover the seed not more than $\frac{1}{8}$ of an inch, transplant into rows 2 feet apart and a foot apart in the row, as soon as the seedlings are large enough to handle. Early transplanting insures vigorous and healthy growth, the plants will be less apt to suffer from disease. If for bedding, space them foot apart each way.

If you want to sell the blooms, plant in rich soil, cultivate every two weeks until the buds appear, when you must stop all cultivation and keep the patch clean by pulling the weeds by hand. When they start to bloom mulch with tobacco stems to kill the root lice and keep the weeds in check. In blooming time keep a sharp watch for black beetle. Go through the field three times a day. If the beetles do show up, put about a pint of water and halfpint of gasoline in an old can and hold it under the bugs. They drop into it. These pests last only for a few days so the task is not as arduous as one might imagine. Or you can destroy these beetles by dusting with arsenate of lead, washing the open flowers clean before marketing them.

For early blooming the seed is sown in March in pots, boxes, hot beds or greenhouses, but nothing is gained by sowing earlier. Plants from seed sown in January or February will not bloom a bit earlier than from seeds sown in March.

In order to get choice extra large blooms you must not allow more than about 10 blooms to each plant. It will pay you to disbud, as choice flowers always sell for a good price.

In the South Asters suffer from blight much more than in the North. The florists there grow asters under glass only, use the cleanest dirt they have and water them late enough in the afternoon to prevent burning but in time so that the foliage may get dry before night.

DO NOT SOW aster seed before March. If you sow in January and February you may find yourself with a lot of plants that are too old—stems hard as wood through which sap cannot pass. Your plants will not be robust and healthy as they would be if sown after March 1st.

Aster Daybreak

AMERICAN BEAUTY ASTER

In bloom from early July until killed by frost. Flowers almost globular, fully double, never showing any yellow centers, born on extra stout stems 18-24 in. long. Of unsurpassed keeping qualities, excellent for shipping. Height 3 ft. **ROSE-PINK—CRIMSON—LIGHT BLUE—CARMINE ROSE—PURPLE—LAVENDER—WHITE—SEPTEMBER PINK—BLACK BLUE, MIXED**—Any color: T. pkt. 10c; $\frac{1}{8}$ oz. 20c; oz. \$1.40; lb. \$14.00.

GIANT IMPROVED CREGO ASTER

A magnificent American strain especially adapted to our climatic conditions. The plants form strong, branching bushes about 2 feet high bearing on long stems handsome chrysanthemum-like flowers averaging 4 inches or more across. In bloom from 2 to 3 weeks after the average type thus lengthening the aster season until after frost. Extremely free flowering and a grand cut flower.

AZURE BLUE, CRIMSON, FLESH PINK, LAVENDER, PURPLE, ROSE PINK, SHELL PINK, WHITE, YELLOW, LAVENDER PINK, CATTLEYA, DARK VIOLET, MIXED. Any color: T. pkt. 10c; $\frac{1}{8}$ oz. 15c; oz. \$1.00; lb. \$12.00.

QUEEN OF THE MARKET ASTER

An early aster, usually in full bloom, weeks before most other sorts begin to blossom. Plants are about 15 inches high, of graceful spreading habit; flowers of good size borne on long stems, making them valuable for cutting.

CRIMSON, ROSE, PINK, FLESH, LIGHT BLUE, WHITE, SCARLET, DARK BLUE, DARK LAVENDER, PURPLE, MIXED. Any color: T. pkt. 10c; oz. 60c; lb. \$8.00.

THE ROYAL ASTER

In size like Crego Aster, earlier, remaining in bloom for a longer period, the petals are broad, distinctly shell-shaped, giving an effect of shading that enhances the beauty of the color producing a striking effect. Splendid for bouquets. Height about 2 feet. **BLUE, WHITE, SHELL PINK, ROSE PINK, LAVENDER, PURPLE, MIXED.** T. pkt. 10c; $\frac{1}{8}$ oz. 15c; oz. \$1.00.

ASTER AURORA

A new type, flowers about 5 in. across, with well-built cushion-like centers, composed of tubular petals and several rings of broad, substantial regular petals for a border. The center is delicate canary-yellow, the border clear light blue, the whole flower a combination of grace, daintiness and refined beauty. Branching type, medium early, 40 in. tall. Wide range of colors. Wilt resistant. **MIXED:** T. pkt. 20c; $\frac{1}{8}$ oz. 35c; oz. \$2.00.

KING ASTER

These have very narrow petals like needles, are very double and bloom from August to October. Invaluable for cutting. Height 20 inches. **MIXED:** $\frac{1}{8}$ oz. 15c; oz. 80c; lb. \$10.00; T. pkt. 10c.

ASTER DWARF BOQUET

An extra early flowering class of dwarf upright, compact growth, bearing double flowers about $1\frac{1}{2}$ in. across. An ideal plant for spring sales especially when potted. Height 10 in. Many colors. **MIXED:** T. pkt. 10c; $\frac{1}{8}$ oz. 20c; oz. \$1.40.

Aster Giant Ostrich Feather

GIANT OSTRICH FEATHER ASTER

The plants are strong growers, attain a height of about 30 inches and bloom in August. The flowers are borne on long stems.

BRILLIANT CARMINE, WHITE, ROSE, CRIMSON, DARK BLUE, VIOLET BLUE, LIGHT BLUE, LAVENDER, MIXED. Any of the above: $\frac{1}{8}$ oz. 15c; oz. \$1.00; lb. \$11.00; T. pkt. 10c.

DAYBREAK ASTER

Early flowering variety, plants 2 feet high, erect and of very robust habit, withstanding unfavorable weather better than most other asters; flowers very large, very double, with petals curving outward instead of folding in, making it one of the best for decorative purposes.

MIXED—T. pkt. 10c; $\frac{1}{8}$ oz. 25c; oz. \$1.60; lb. \$18.00.

ASTER AMERICAN BRANCHING

Of vigorous growth, producing a heavy crop of flowers from midsummer to frost. The flowers are perfectly double, long petaled with well filled out centers and from $3\frac{1}{2}$ to 4 inches across, borne on stout stems often 2 feet long. Plants branching $2\frac{1}{2}$ to 3 feet high. The seed we offer is of the choicest quality.

DARK LAVENDER (AZURE BLUE), DEEP CRIMSON, SALMON ROSE, DEEP ROSE, DEEP PURPLE, PALE LAVENDER, SHELL PINK, WHITE, DEEP SILVERY ROSE, MIXED. Any color: T. pkt. 10c; $\frac{1}{8}$ oz. 15c; oz. \$1.00; lb. \$12.00.

ASTER GIANT CALIFORNIA SUNSHINE

A greatly improved strain producing giant flowers on long stems. Broad petaled star-like with a cushion center of exquisite beauty, high class for cutting. Plants branching, medium early. The seed we offer comes 80-90% true. **WHITE, BLUE, LAVENDER, ROSE, ENCHANTRESS-PINK, PURPLE, MIXED.** Any color: T. pkt. 30c; $\frac{1}{8}$ oz. 45c; oz. \$3.00.

ASTER EGYPTIAN ROSE

Egyptian Rose, a new shade in asters, is one of the loveliest colors one can imagine. Deep cinnabar rose, highlighted with a coppery sheen, extremely double and full petaled, it is a gorgeous thing. The plants are robust growing, branching, about two and a half feet in height, and very free flowering. A Crego type aster. T. pkt. 15c; $\frac{1}{8}$ oz. 25c; oz. \$1.80.

ASTER IMBRICATED POMPON

A charming type, flowers extra double completely filled out with short imbricated petals borne on stout stems. Plants of upright growth producing large amount of bloom from very early in the spring till fall. Height 18 in. Many colors. **MIXED.** T. pkt. 15c; $\frac{1}{8}$ oz. 25c; oz. \$1.60.

ASTER LOS ANGELES

CALIFORNIA GIANTS ASTERS

Very beautiful vying in size of flower and length of stem with well grown chrysanthemums. The flowers measure 6 inches across and are filled with broad, long, incurved petals resembling in formation the well known Crego type of asters. Born on 2 feet long, stiff and strong non-lateral branching stems, requiring no disbudding. Unexcelled for cutting and whether assembled in a bouquet or as a single bloom fully as impressive as chrysanthemums or double peonies.

WHITE, PEACH BLOSSOM, LIGHT BLUE, DEEP ROSE, DARK PURPLE, MIXED—Any of the above: T. pkt. 15c; $\frac{1}{8}$ oz. 30c; oz. \$2.00.

ASTER HOWARD'S GIANTS

A true non-lateral branching strain, each flower being borne at the terminal of a long stout stem 18 to 24 inches in length, with no lateral growths manifesting themselves in their entire length. The tedious method of disbudding in order to obtain size is entirely done away with. In formation of bloom they resemble the well known American Beauty and are really an improved and highest class of the Beauty type.

Size of flowers 4 to $4\frac{1}{2}$ inches across, medium, early

SWANSDOWN, pure white, **MAIDEN'S BLUSH**, delicate flesh pink. **PEACH BLOSSOM**, lavender pink. **AZURE FAIRY**, clear sky blue of even tone. **PURPLE ROSE**, purple blue. **ROSE BUD**, deep rose. **MIXED.** Any color: T. pkt. 15c; $\frac{1}{8}$ oz. 30c; 1 oz. \$2.00.

NEW ASTER LOS ANGELES

Of the Giants of California type, same habit only the flowers are much larger, more double and ready to cut earlier. Well grown, the flowers attain the immense size of 8 inches across. So far there is one color only, namely pure shell-pink. The introducers, Bodger Seed, Ltd., call this new aster **SUPER GIANT**. In time they will doubtless supply us Super Giants in many colors. If they also could furnish the public with plenty of funds (they would if they could, they are fine, generously minded people) so that we as a nation could maintain our reputation as a nation of liberal spenders, what a pleasure it would be to grow lots of this Aster as well as other flowers? What an immensely increased demand would that bring about. T. pkt. 20c; $\frac{1}{16}$ oz. 35c; $\frac{1}{8}$ oz. 65c; oz. \$3.60.

THE KEY TO SUCCESS for you is **GOOD SEEDS**. **GOOD SEEDS** are also the key to our success. We are doing our very best in order to have seeds of the best quality and the latest creations in flowers and vegetables.

Peony Type of Aster

ASTER SPECIAL MIXTURE

Composed of the finest large flowered tall growing varieties, covering the widest range of colors. Every care is taken, not the slightest detail overlooked to make this mixture the most valuable and besides varieties listed in this catalogue, it contains new creations in asters especially purchased for this mixture. Lb. \$12.00; oz. \$1.00; T. pkt. 10c.

EVERLASTING ASTER—Can be dried and used in winter bouquets. Color flesh pink. Late. Height 2 ft. T. pkt. 10c; 1/8 oz. 20c.

Hardy Asters

For sheer beauty there is nothing that can compare with a large bed of hardy asters in bloom. Every plant a hill of color, the whole bed a sea of bloom. They thrive without care in any soil in full sun.

HARDY ASTER AMELLUS—These hybrids are of neat growth never over 30 in. high, the flowers of perfect form, some small, others as much as 2½ inches across in light and dark blue, violet, dark and light pink and bright red. They bloom from August to almost frost. Very floriferous, high class for cutting. T. pkt. 20c; 1/16 oz. 30c.

ASTER ALPINUM GOLIATH

Absolutely hardy, easily raised from seed, flowers large, daisy-like, deep lavender in color, with a small yellow disc on stout stalks 10 in. long. In bloom from May to July, fine for cutting and rock work. Height 1 ft. T. pkt. 10c; 1/8 oz. 30c; oz. \$2.00.

HARDY ASTER YUNNANENSIS—New hardy perennial aster, flowers very large, perfectly formed, carried on long stems, color brilliant lilac blue, disc yellow. Height 16 in. T. pkt. 40c.

ASTER FLORISTS DELIGHT

Hardy Aster, flowers light blue, single, four inches across during May and June, born on long wiry stalks, fine for cutting. Height 2 feet. T. pkt. 25c.

HARDY ASTERS MIXED—Our mixture contains best varieties early and late as well as dwarf and tall. T. pkt. 10c; 1/8 oz. 30c; oz. \$2.00.

AUBRIETIA EYRII

Rock Cress. A dainty and very beautiful, dwarf, creeping plant, forming brilliant sheets of dark blue from April to July. A gem for planting in crevices of rocks or walls, forming a cataract of color. Of all Aubrietias Eyrii is the best because a strong grower and most hardy. Start the seed in flats then place in pots. Aubretia having single slender root does not transplant easily. Potting up the plants is therefore recommended. Height 6 in. T. pkt. 15c; 1/8 oz. 60c; 1/4 oz. \$1.00.

Aster Heart of France

HEART OF FRANCE Branching type. Flower stems long, blooms medium large, fully double to the center, of deep ruby red color. Height 2 ft. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.20; lb. \$15.00.

Other Asters

AUTUMN GLORY—The flowers are very double, very large, borne on long stiff stems of pure shell pink color. Its most distinctive characteristic is that it blooms later and comes at a time when other asters are nearly gone and before Chrysanthemums are ready. Height 2-3 ft. T. pkt. 10c; 1/8 oz. 25c; oz. \$1.60.

BALL'S WHITE—Blooms very large and very double. Borne on long stout stems. Of branching habit, medium early in season. Height 20 in. T. pkt. 10c; 1/8 oz. 15c; oz. \$1.20; lb. \$14.00.

LAVENDER GEM—Most charming. The flowers are of a true lavender shade and the petals are gracefully curled and twisted, and the blooms are borne on long stems. Height 2-3 ft. T. pkt. 10c; 1/8 oz. 25c; oz. \$1.60; lb. \$20.00.

PEERLESS PINK—The flowers are enormous, globular in shape, many five inches across, of a most delightful and pleasing rich shell pink. First flowers appear about the middle of August, but the plant is at its zenith about four weeks later. Height 3 ft. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.20.

PEERLESS YELLOW ASTER

Flowers extra large, perfectly double, ball shaped like a chrysanthemum, long petaled of a most attractive soft and beautiful yellow. A color that harmonizes in any color scheme. Finds ready sale on any flower market. Branching type, medium early in season, plants of vigorous growth often yielding 15 flowers on perfect long stems, per plant. You will grow this aster in quantity if you will once try it. Height 3 ft. T. pkt. 10c; 1/8 oz. 25c; oz. \$1.80.

SINGLE ASTER—The blooms of these are very graceful, the petals long with but very small yellow centers. Our mixture contains every color. Height 2½ feet. T. pkt. 10c; 1/8 oz. 15c; oz. \$1.00; lb. \$10.00.

ASTER FIREFLAME—The reddest of all Asters. Peony flowered, very double, color flaming crimson with a metallic lustre. A fine aster for all purposes. Early. Height 15 in. T. pkt. 15c; 1/8 oz. 25c; oz. \$1.00.

ASTER YELLOW QUEEN—New. Peony flowered, clear bright yellow aster. Of all asters the deepest yellow. Early. Height 15 in. T. pkt. 15c; 1/8 oz. 25c; oz. \$1.60.

Column Daisy

DOUBLE BALSAMS—LADY SLIPPER

Our balsams produce masses of beautiful brilliant colored double flowers and for quality they cannot be excelled. To grow fine specimens they should not be closer than 18 inches apart. Tender annual. Height 18 to 20 inches.

GARDENIA FLOWERED—Bush Balsam. New. Plants compact, bushy, 20 in. high, flowers double, large gardenia-like in clusters at the top of the stems, not hidden in the foliage, throughout the season. High class for bedding. The colors are hermosa-rose, vermilion red, rosy-white and pure white. **MIXED**: T. pkt. 15c; 1/8 oz. 40c; oz. \$3.00.

CAMELLIA FLOWERED MIXED—Large and double. T. pkt. 10c; oz. 40c; lb. \$4.80.

GOLIATH MIXED—Robust growing variety with large double flowers. Height 4 feet. Fine for groups of flowering hedges. T. pkt. 10c; oz. 40c; lb. \$3.00.

BAPTISTA AUSTRALIS—FALSE INDIGO

Produces during May and June, fine spikes of sky-blue, lupin-like flowers, good for bouquets. Foliage neat, dark green, an ornament in itself. Height 3 feet. Perfectly hardy. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.00; lb. \$14.00.

BALLOON VINE—Love in a Puff. Rapid growing annual climber covered with white bloom and later by "balloons" producing quite an effect. Height 5 ft. T. pkt. 5c; oz. 10c; lb. 90c.

BELLIS—DOUBLE ENGLISH DAISY

Lovely edging perennials with cheerful button-shaped flowers in early spring. They thrive in moist and somewhat shady situations. They must be transplanted every year and in our climate protected over winter with a layer of about 4 inches of straw. They grow readily from seed and should be sown indoors in February or March or in August in a cold frame and protected over winter. Treated thus they will bloom abundantly early in the spring. Plant 4 inches apart. Height 6 in.

SNOWBALL—Large, double white flowers. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.40.

LONGFELLOW—Pink. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.40.

FINE DOUBLE MIXED—T. pkt. 10c; 1/8 oz. 20c; oz. \$1.40.

MONTSTROSA—Of robust growth, extra large, double flowers on long stout stems. **WHITE, PINK, RED, ETNA**, dark red, **MIXED**. Any color: T. pkt. 10c; 1/8 oz. 30c; oz. \$2.00.

BELLIS FUSELIER (Le Grand Fuselier)—Very high class Bellis that we did not offer the seed of, because too costly. We urge a trial. Also do not overlook the new variety American Beauty. Fuselier has double flowers 2 to 2 1/2 inches across, fine stems, flowers fine for flower work when cut in pink and white. **MIXED**. T. pkt. 25c; 1/32 oz. 45c.

BELLIS AMERICAN BEAUTY—New. Flowers extra double on long stout stems 4 inches across. Color lustrous crimson—rose a new color in Bellis. Fine for bedding and cutting. T. pkt. 20c; 1/16 oz. 30c; 1/8 oz. 50c.

COLUMN DAISY—Grows upright, is very compact, flowers large and double, snow white, and ideal as a pot plant as well as for bedding. A splendid new flower. T. pkt. 15c; 1/8 oz. 60c; oz. \$4.00.

BOLTONIA LATUSQUAMA—Hardy native plant covered with pink daisy-like flowers during summer and fall. Height 3-4 feet. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.20.

Begonia

Culture for Varieties Offered by Us: Sow indoors in January and February in shallow boxes, using leaf mould and some coarse sand in the soil. Smooth the surface of the soil, sprinkle the seed thinly on top and press the seed in with a piece of smooth board. Never cover the seed with soil. Cover the box with a piece of glass raised a bit so the air can enter; keep the soil moist by spraying in a fine mist. Transplant when the plants are large enough to handle.

For winter blooming or early spring blooming sow from August to September. Begonias are tender perennials and must never be planted outside until the weather is thoroughly settled. They require a shady, moist situation and lots of water during the growing period. Never water while the sun is shining as this causes the leaves to rust. All Begonias are slow growers and for the first two months they seem to make no progress whatever, but they are coming just the same, and if the seed is sown in January you will have bushy plants in 4's by the middle of May.

Our **BEGONIA** seed is raised for us by a German specialist. Positively none better. Same is true when it comes to Primulas, Cinerarias, etc. We believe in quality, having forty years of business experience, we know where to get the best there is in seeds.

WINTER BLOOMING BEGONIA ROMANCE

New. Can be brought into full bloom at Christmas time from seed sown in July. From then on, it will bloom uninterruptedly for months. Flowers bright carmine-red, foliage light green. Height 8 inches. Sown in January will make a high class blooming pot plant for Mother's Day. Quick growing a heavy bloom producer and disease resistant. When the plants become overgrown cut them back. After every cutting back the plants become more shapely and the cooler you grow them the richer the color of the bloom. T. pkt. 40c; 1/64 oz. 80c; 1/32 oz. \$1.50.

BEGONIA CHRISTMAS CHEER

Everblooming. Of broad, compact, globular growth, completely covered with fiery, cherry-red flowers two inches across. The foliage is dark, shiny green. Height 6 in. T. pkt. 40c.

BEGONIA CHRISTMAS PINK

Identical in every way with Christmas Cheer except in color of bloom, which is pure rose-pink. T. pkt. 50c.

BEGONIA DROOPING GEM

Of drooping habit, fine for boxes, hanging baskets, etc. The overhanging branches of the plant are crowded with small, shiny leaves from which hang double pendulous flowers in many colors. Something new and good. Popular and much employed in Europe. A tuberous rooted variety. T. pkt. 50c.

GRACILIS LUMINOSA—Vigorous grower. Brightest scarlet flowers, blooms in winter also. Foliage reddish brown. Height 10 in. T. pkt. 25c; 1/64 oz. 65c; 1/32 oz. \$1.20.

GLORY OF ERFURT—Flowers three inches in length and inch and a half across, intense glowing crimson. Profuse bloomer. Height 12 in. T. pkt. 40c; 1/64 oz. \$1.75.

GUSTAV KNAAKE—Resembles Lorraine, very free flowering flowers 2 inches across, fiery crimson. Height 10 in. T. pkt. 25c; 1/64 oz. 65c; 1/32 oz. \$2.20.

PRIMA DONNA—Limpid rose shading to carmine, most beautiful, also for winter blooming. Height 10 in. T. pkt. 40c; 1/64 oz. \$2.00; 1/32 oz. \$3.00.

SALMON QUEEN—Cinnabar red, dark leaf, very free blooming. Height 1 foot. T. pkt. 25c; 1/64 oz. 65c; 1/32 oz. \$1.20.

SEMPERFLORENS ALBA—Vigorous, constant bloomer, flowers white in drooping panicles. Height 14 in. T. pkt. 15c; 1/32 oz. 25c 1/8 oz. 50c; oz. \$3.00.

VERNON—Flowers rich red, foliage bronze-red. Height 14 in. T. pkt. 10c; 1/32 oz. 30c; 1/16 oz. 50c; 1/8 oz. 85c; oz. \$6.00.

BEGONIA SPECIAL MIXTURE—Contains Semperflorens and Gracilis varieties in equal proportions. T. pkt. 25c; 1/64 oz. \$1.75; 1/32 oz. \$3.25.

TUBEROUS ROOTED HYBRIDS—Flowers of gigantic size often 6 inches across, from white and vivid scarlet through shades of bright bronze yellow, light and dark crimson, orange, ruby-red, rose and pink. Our seed has been saved from selected flowers, is carefully hybridized and will produce tubers in six months. Single mixed. Height 14 in. T. pkt. 25c; 1/64 oz. \$1.25; 1/32 oz. \$2.25.

BROWALLIA—AMETHYST

SPECIOSA MAJOR—This can be grown in the poorest soil and makes a grand bedding plant, blooming profusely all through our hot dry summers, until frost. The flowers are of the most brilliant ultramarine color. Fine for baskets or vases but especially valuable as a pot plant for winter, and early spring flowering. Should be sown early in the spring and set out about the middle of May. If sown in August or September will make a fine pot plant, in bloom in the spring. Tender annual. Height 12 inches. T. pkt. 10c; 1,000 seeds 35c.

BROWALLIA SAPPHIRE—High class pot plant bearing hundreds of beautiful violet blue flowers from May to fall. Of compact bushy growth. Tender perennial. Height 10 in. T. pkt. 40c.

BIRD OF PARADISE FLOWER

POINCIANA GILLIESI—Easily raised. The flowers resemble a gaudy colored humming bird and appear in May and June. Fine house plant. Not hardy north of St. Louis. See also *Strelitzia*. T. pkt. 10c; oz. 60c.

BRACHYCOME—SWAN RIVER DAISY

IBERIDIFOLIA BLUE—A profuse flowering annual with blue flowers an inch across, resembling those of *cineraria*, suitable for pot culture, edgings and small beds. In bloom from June to October. Height 12 inches. $\frac{1}{8}$ oz. 15c; 1 oz. 90c; T. pkt. 10c; lb. \$8.00.

BRACHYCOME MIXED—The colors are blue, white violet, and pink. T. pkt. 10c; $\frac{1}{8}$ oz. 15c; oz. 80c; lb. \$7.00.

BRIZA MAXIMA—QUACKING GRASS

An annual grass, valuable for bouquets, either fresh or dried. The heart shaped seeds are constantly in motion. Of the same value as *Gypsophyla*. Blooms in June to September. Height 15 inches. T. pkt. 5c; oz. 20c; lb. \$2.25.

BOCCONIA CORDATA—PLUME POPPY

Very showy and quite unlike the regular poppy in that the flowers are small, creamy white and are borne on long stems quite above the massive foliage, from May to July. Height 6 feet. The seed germinates slowly. Oz. 70c; $\frac{1}{8}$ oz. 15c; T. pkt. 10c.

**Cactus**

CEPHALOCEREUS SENILIS—Old man cactus. Globe shaped, covered with long gray hair-like spines. 50 seeds 20c; 100 seeds 35c; 1,000 seeds \$2.50.

ECHINOCACTUS M. POTOSINA—Bishop's Cap cactus. 50 seeds 20c; 100 seeds 35c; 1,000 seeds \$2.75.

CEREUS MARGINATUS—Pillar-like, ribbed, thick set with spikes that resemble pearls. 50 seeds 20c; 100 seeds 35c; 1,000 seeds \$2.50.

ECHINOCACTUS SAGLINIONIS—A variety much in demand. Dark green body, spines red. 50 seeds 15c; 100 seeds 25c; 1,000 seeds \$2.00.

MAMILLARIA BOCASANA—Very odd, easily raised, very popular. 50 seeds 20c; 1,000 seeds 35c; 1,000 seeds \$2.25.

MAMILLARIA E. STELLA-AURATA—Gold Star cactus, a popular variety. 50 seeds 20c; 100 seeds 35c; 1,000 seeds \$2.75.

TIGER CACTUS—ALOE VARIEGATA—Fan-like growth, wide fleshy leaves, striped like a zebra. A self selling plant. Immensely popular in Europe as a house plant. Plants of good size can be raised in nine months from seed. 25 seeds 45c; 50 seeds 85c; 100 seeds \$1.60; 1000 seeds \$12.00.

CACTUS CHOICEST MIXED—The choicest of *Cereus* including night blooming *Cereus*, *Echinocactus* and *Mammillaria* cactuses in many forms. No *Opuntias* or other common sorts. Our seed will produce plants of shapely growth and moderate size, something that is readily saleable. The three groups of cactus have seed that germinates readily in from 2 to 3 weeks from date of sowing. The seedlings must be transplanted as soon as large enough to handle. Cactus is raised from seed about the same as directed for begonia only during winter cactus must be watered very sparingly, must be in containers provided with PERFECT drainage and the soil for cactus must be half sharp clean sand and half whatever good soil is handy. 50 seeds 20c; 100 seeds 35c; 1,000 seeds \$3.00.

For more succulents see *Euphorbia* and *Mesembryanthemum*.

CACALIA—FLORA'S PAINT BRUSH

Easily grown annual with flowers resembling a miniature brush in many colors, from June to September. Height 12 inches. **MIXED**: T. pkt. 10c; oz. 60c; lb. \$4.00.

CALLIOPSIS

Free flowering half hardy annuals of the easiest culture, doing well in sunny position, excellent for cutting and massing.

Sow where they are to stand, thin out to nine inches apart. By keeping the old flowers cut off the plants will bloom until frost.

RADIATA TIGER SPOTTED—The flowers are attractively marbled and spotted with red maroon on rich yellow ground. Height 8 inches.

CRIMSON KING—Color rich velvety crimson garnet. Height 9 inches.

CALLIOPSIS DWARF MIXED—Height 12 in.

CALLIOPSIS TALL MIXED—Height 3 ft.

ANY OF THE ABOVE—T. pkt. 5c; oz. 15c; lb. \$2.00.

CALLIOPSIS DAZZLER—Extra large, maroon-red, single flowers with a golden yellow border produced in greatest profusion from April till frost. Plants bushy and compact Annual. Height 10 in. T. pkt. 10c; $\frac{1}{8}$ oz. 20c.

CALLIOPSIS THE GARNET—Compact growing plants covered with large deep, bright scarlet single flowers from April to frost. Height 10 in. Annual. T. pkt. 10c; $\frac{1}{8}$ oz. 20c.

CALLIOPSIS—Garnet and Dazzler are an entirely new race, different from the old type of *Calliopsis*. Flowers twice as large, plants compact and very dwarf, covered with bloom of such beauty and brilliance that no flower lover will leave your place without buying if he will see the plants in bloom.

CALAMINTHA Hardy perennial of graceful, compact growth, a first class rock and border plant. The whole plant is fragrant. Does best in a sunny situation. Easily raised from seed. In bloom from May to August.

CALAMINTHA ALPINA—In bloom from May. Flowers violet-blue. Height 6 in. T. pkt. 30c.

CALAMINTHA GRANDIFLORA—Flowers bright rosy purple. Height 1 ft. T. pkt. 25c.

Calla

Easily and inexpensively raised from seed which germinates readily and produces flowering plants 2-3 years from date of sowing. Tender perennial.

CALLA AETHIOPICA—White Calla. T. pkt. 10c; $\frac{1}{8}$ oz. 15c; oz. 80c; lb. \$10.00.

CALLA PEARL OF STUTTGART—New. Heavy bloom producer. Flowers large, pure white. Height 3 ft. T. pkt. 15c; $\frac{1}{8}$ oz. 20c; lb. \$16.00.

BLUE LACE FLOWER—TRACHYMENE

An annual, producing from July till frost delicate laced flowers of dainty pale blue color, excellent for cutting.

Sow in flats, the plants demand shallow soil. Pot in 2's, transfer into 3's, place on the shelves in midwinter and when well growing apply weak manure water, once a week. Sown in September they will come into bloom in March and in May if started in January, always on long stems with great keeping qualities. Their exquisite shade of lavender goes well with everything, they are inexpensively raised and always sell well. Grow them cool (50 deg.). Height 2 to 3 feet. T. pkt. 10c; 1/8 oz. 15c; oz. 80c; lb. \$8.50.

Calendula — A Paying Crop

An annual, 2-3 feet tall, producing very large, double, brilliantly colored flowers on long, stiff stems if grown in moist and COOL atmosphere with plenty of room to develop. The first blooms are apt to be short-stemmed and must be pinched out to insure long-stemmed blooms to come. Grow in a night temperature of 45 to 60 degrees, plant a foot apart each way or pot the plants and place them a foot apart on the benches. To get bloom for Thanksgiving, sow early in August, sow in September to succeed chrysanthemums and towards the end of February to get bloom in May. Calendula is a cool weather plant, during summer when it is hot and dry, even the best strains produce undersized and mostly single flowers.

Requires very rich soil. One-half rotted manure, the other half rotted sod and 3 lbs. of bone meal to every large wheelbarrow of soil. Acid phosphate applied once in two weeks improves the bloom wonderfully. Best grown in solid beds, if on benches have at least 6 in. of soil. Will stand no shade, the soil must never be allowed to become too wet or too dry. To get well formed large double flowers disbud once a week. One ounce of seed produces 1,200 to 1,600 plants.

ON THE PACIFIC COAST, in the Mountain states and in the far North calendula if sown in succession will produce a heavy crop of flowers of the finest quality from June to frost.

Calendula, Improved Bismarck Stocks and Freesias never fail to make money for the growers. The best prices are obtained during December, January and February. Calendulas have one drawback, namely, they wilt quickly if placed in a shallow dish or bowl, but will last five days or longer if kept with fully one-half of their stems in water. Call attention of your customers to this fact to avoid disappointment. Calendulas are always in demand and are easily handled, can be produced in a 50 deg. house or less and they can be grown for less than the price demanded by the wholesale growers and be of better quality. What are the returns? That is the most important question. Fritz Bahr says: Out of a bench 5x100 feet, occupied by 400 plants, seed sown July 25th and the plants benched Aug. 27th, these were the returns: Started cutting Oct. 11th up to Jan. 12th, the bench yielded 312 dozens and these sold partly retail and partly wholesale, brought in money \$331.25. After Calendulas stocks went into that bench, that were started from seed Oct. 15th and later placed in 2 1/2's. These stocks (Imp. Bismarck) should flower around the end of March and be out of the way by April 15th. The bench put in condition, can then be planted with Gladiolus, the bulbs of which were started in 3's about March 15th.

CASTILLEJA INDIVISA

An annual of easiest culture. Flowers rosy pink and orange-red, very showy. High class for pots. Sow in February and March to get blooming plants in May. Height 12 in. T. pkt. 20c.

CALENDULA CHRYSANTHA SUNSHINE

A new type of calendula, plants of compact growth, flowers long petaled, the center petals curling inwards resembling Japanese Chrysanthemum. Born on long stiff stems, first rate for cutting. Flowers four inches across, fully as large as Campfire. Color clear buttercup-yellow. T. pkt. 10c; oz. 60c. **CALENDULA PASTEL SHADES**—New creation producing flowers in colors, some never before existing in Calendulas, namely creamy-yellow, leather-yellow, apricot shades, orange shades and bicolors. Plants of dwarf compact growth fine bedding not so good for cutting. T. pkt. 10c, oz. 60c.

CALENDULA ORANGE KING

CHOICEST QUALITY for greenhouse forcing. T. pkt. 10c; oz. 60c.

STANDARD QUALITY for garden culture. T. pkt. 5c; oz. 25c; 1 lb. \$2.00.

BALL'S ORANGE CALENDULA—A selection from Orange King, very large and double. T. pkt. 15c; 1/8 oz. 30c; oz. \$2.00.

CALENDULA—CRIMSON KING

CAMPFIRE OR SENSATION—A new and very superior forcing strain of calendula bearing extremely double, unusually large flowers on extra long strong stems, of deep orange with a sheen of crimson, especially prominent under artificial light. Comes 100 per cent double and created a sensation wherever shown. T. pkt. 15c; 1/8 oz. 30c; oz. \$2.00.

FINEST MIXED—T. pkt. 5c; oz. 20c; lb. \$2.00.

LEMON KING—Very choice stock, producing extremely double flowers of clear lemon yellow, the finest strain for forcing in this color. T. pkt. 10c; oz. 60c; lb. \$6.00.

CALENDULA ORANGE GIANT Extra large, extremely double, Orange King type. Surpasses other varieties in size and beauty. Long stemmed, color deep orange. T. pkt. 15c; 1/8 oz. 30c; oz. \$2.00.

CALENDULA RADIO A distinct break from the old type of Calendula. The petals are curled up, appearing as miniature tubes, pointed at the ends, unique and charming. Color deep glowing orange. Height 2 ft. T. pkt. 10c; oz. 60c.

CALENDULA ORANGE SHAGGY

New. The flowers, born on long stems, are large, double wide open (flat), composed of long narrow fringed and lacinated petals resembling an aster in appearance. Color deep orange. Plants dwarf only 18 in. tall. T. pkt. 20c; 1/16 oz. 35c; 1/8 oz. 60c.

COLUMNEA SPLENDENS

Easily raised greenhouse perennial, producing from September to January from seed sown in February very large, trumpet shaped fiery scarlet flowers on plants with overhanging tendrils. The flowers are very numerous and all face upward. First class house and basket plant. T. pkt. 40c.

Calceolaria

All Calceolarias are highly attractive plants, easily raised and easily sold. All classes are suitable for pot culture as well as for high class bedding. Culture same as Cineraria, which please see. In the greenhouse the plants need be partially shaded, when the season is advanced, and to minimize the danger from aphids the plants when in pots should stand on tobacco stems.

Calceolaria Hybrida Albert Kent

CALCEOLARIA HYBRIDA ALBERT KENT

Originated from the Albert Kent variety. Strikingly beautiful, unusual, new, never before seen a plant that will show a good profit to the florist. We offer the seed of these new hybrids in mixture containing 10 to 12 different colors. T. pkt. 50c.

DWARF TIGERED AND SELF COLORED MIXED—Plants dwarf and compact only 9 in. high, flowers of maximum size, the finest strain in existence, none better. T. pkt. 25c; 1/64 oz. \$2.00.

CALCEOLARIA RUGOSA GOLDEN RAIN—Produces elegant sprays of innumerable small flowers of deep golden yellow. Splendid for bedding and as a pot plant. Height 1 foot. T. pkt. 40c.

Campanula

Of easiest culture, growing in either sunny or partly shaded positions. By sowing the seed early under glass and transplanting as soon as the weather becomes settled, they will bloom the first year. Sown outdoors in April or May, transplanted to rich soil in August or September, will bloom the following year.

Campanula Medium and C. Calycanthema are biennials; all others offered by us are hardy perennials. Because quite hardy and highly ornamental Campanulas deserve same popularity enjoyed now by Delphiniums and Peonies. The seed is small but germinates readily.

CAMPANULA CARPATICA

Hardy perennial of vigorous growth producing quantities of elegant cup shaped flowers an inch across on long stems from June to September. Fine for bouquets, rockeries, beds and edgings. Loves sun but will endure partial shade and an immense amount of drought. Never bothered by insects or disease. Height 1 ft. Blue-White-Mixed. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.20; lb. \$16.00.

CAMPANULA MEDIUM ANNUAL—Blooms six months after sowing. The flowers are inferior in size and not quite as attractive as the biennial sort. Mixed. T. pkt. 10c.

CAMPANULA GLOMERATA SUPERBA—Hardy perennial, flowers at the end of stalk grouped together in an immense crown of deepest blue during June and July. Protect from the afternoon sun. Height 20 in. T. pkt. 20c; 1/8 oz. 50c.

CAMPANULA ROTUNDIFOLIA SUPERBA

Blue Bells of Scotland. Improved strain of robust growth producing a wealth of bloom from May to September. Height 1 ft. T. pkt. 30c; 1/16 oz. 65c.

CAMPANULA TELHAM BEAUTY—Hardy perennial, flowers extra large, bell shaped, soft lavender-blue from May to July. Height 30 in. T. pkt. 40c.

CAMPANULA GRANDIS—Hardy perennial, flowers bell shaped, wide open, three inches across in June and July. Height 3 ft. WHITE BLUE MIXED. Any color: T. pkt. 20c; 1/8 oz. 40c.

CAMPANULA PYRAMIDALIS—(Chimney Bell Flower). Hardy perennial. The flower spikes are crowded from May to September with numerous large blue salver-shaped flowers forming a perfect pyramid 4 to 6 feet high. Very conspicuous and beautiful. T. pkt. 15c; 1/8 oz. 25c; oz. \$1.60.

CAMPANULA MOERHEMII—Snow-white semi double flowers 2-3 inches across, grand for cutting, border decoration as pot plants and first rate for exhibition. Easily raised. Hardy. Height 30 in. T. pkt. 40c; 1/32 oz. \$1.00.

CAMPANULA RAINERI—First rate perennial hardy rock plant spreading, flowers erect, lavender blue, late in June and during the entire month of July. Drought and heat resisting, extra choice and rare. Height 5 in. T. pkt. 30c.

CAMPANULA VIDALII

Magnificent pot plant producing during winter and early spring, quantities of large, sweet scented creamy white flowers. Very uncommon and rare. Height 2 ft. T. pkt. 40c.

Campanula Medium

CUP AND SAUCER CAMPANULA

C. MEDIUM CALYCANTHEMA—An excellent cut-flower in bloom from June to August. Flowers resemble cup and saucer, extremely showy. Height 3 ft. Blue, Pink, White, Mixed. Any color: T. pkt. 10c; 1/8 oz. 25c; oz. \$1.60.

CANTERBURY BELLS

CAMPANULA MEDIUM—Large showy bells from June to August. Height 3 ft. Blue, Mixed. Any color: T. pkt. 5c; oz. 40c; lb. \$4.00. Valuable for forcing. Cut the flowers when they are half open.

CAMPANULA SPECIAL MIXTURE—This contains all of the best perennial varieties as listed with a good proportion of new and rare sorts. T. pkt. 15c; 1/8 oz. 25c; oz. \$1.60.

Candytuft Umbellata

CANDYTUFT—IBERIS

Showy plants of easy cultivation, furnishing a wealth of bloom. Fine for bouquets for ribboning or dwarf beds. Florists should sow in August and September and give the plants slight protection over winter. Fall sown plants will bloom from May to July and bear flowers of extra fine quality. Sown early in spring will bloom from July to September. For Mothers' and Memorial Days sow in the latter part of December and grow up in two in pots. Or you can sow in an exhausted lettuce or chrysanthemum bed, space the plants 8 inches apart and you will get an enormous amount of high class bloom, even without pinching in a house with carnation temperature.

To increase the size of flowers for cut flowers some of the branches should be removed. For continuous blooming sow every two weeks. They are easily forced into bloom during winter. The best variety for cut flowers is Empress. Of the perennial varieties Gibraltarica is the finest, blooming from March to June, but never attains more than 2 feet in height. If left undisturbed will form fine bush with dense foliage. Hardy but needs some protection over winter. Plant six inches apart.

EMPRESS IMPROVED—This is the finest of all the white varieties, producing spikes 6 inches long and 3 inches across. Unsurpassed for outdoor bedding and extensively used for forcing. Height 15 inches. T. pkt. 10c; 1 oz. 45c; 1 lb. \$3.00.

GIANT HYACINTH FLOWERED—Pure white, reselected florist's strain, extra. Height 15 in. Blooms in May and June. T. pkt. 10c; oz. 45c; lb. \$4.00.

CANDYTUFT SEMPERVIRENS SNOWFLAKE—Flowers exceptionally large pure white, in great masses in May and June. Height 1 ft. T. pkt. 20c; 1/16 oz. 30c.

SEMPERVIRENS—Completely covered with heads of pure white flowers in April and May. Height 1 ft. Much used for cemeteries, rockeries, etc. Hardy perennial. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.00.

CANDYTUFT GIBALTARICA HYBRIDA—Large white flowers shading to lilac, in profusion during May and June. Height 1 ft. Of all perennial Candytufts Gibraltarica is the most striking and showy. Not hardy north of St. Louis. Winter the plants in a cold frame. They are worth the trouble. T. pkt. 10c; oz. 80c.

CANDYTUFT UMBELLATA

Profusely flowering easily raised annual with dainty flowers, fine for bouquets as well as bedding. Sow outdoors early in spring and you will get blooming plants from July to September. Or plant the seed early in the fall in rows foot apart, thin out to 4 inches apart in the row, give protection over winter and your plants will bloom in May and June. If sown early in the greenhouse, will bloom for Decoration Day.

DEEP PURPLE, CRIMSON, WHITE, SOFT PINK, LAVENDER, ROSE-CARMINE, MIXED. Any of the above: T. pkt. 5c; oz. 25c; lb. \$2.40.

UMBELLATA ROSE CARDINAL—New. Most excellent sort for cutting with glistening rich deep pink flowers. T. pkt. 10c; oz. 45c; 1 lb. \$3.60.

CARNATION

Considered a half hardy perennial. We find most carnations perfectly hardy without protection.

CARNATION GRENADIN RED

Plants dwarf and compact, flowers glowing red, large and double. First rate for cutting and a fine pot plant. Height 14 in. T. pkt. 10c; 1/8 oz. 30c; oz. \$2.00.

CARNATION GRENADIN MIXED—Choice mixture that will produce fine double flowers on stiff stems in pure white, blackish crimson, bright scarlet, rose-pink as well as soft yellow of the new variety White Gold that is included in our mixture. T. pkt. 10c; 1/8 oz. 30c; oz. \$2.00.

SPECIAL CARNATION MIXTURE—This mixture includes Giant Margareth, Chabauds, Giant Fancy, Malmaison, Giant of Nice, Riviera Market, Dwarf Vienna, etc. Out of these seeds anyone can raise flowers as large as the best florist's Carnation. T. pkt. 15c; 1/16 oz. 35c; 1/8 oz. 55c; oz. \$4.00.

MARGARETH—No matter at what time of the year the seed is sown this carnation comes into bloom in five months and it can be had in bloom at any time of the year early in the spring, in the winter, etc. The flowers are from 2 to 3 inches in diameter. Height 16-20 inches. **MIXED:** T. pkt. 10c; 1/8 oz. 20c; oz. \$1.20.

CARNATION DWARF VIENNA—Perfectly hardy, plants of neat compact growth, flowers very double strongly fragrant on good stems 10 in. high, from June to late fall, in red, brick red, pink, violet and white. **MIXED:** T. pkt. 10c; 1/8 oz. 20c; oz. \$1.00.

CARNATION TAUSENDSCHOEN

New. Hardy perennial carnation of the Dwarf Vienna type, flowers large and double, color an enchanting shade of light salmon pink. Originated in Germany where it is highly prized owing to its long stiff stem and charming color that goes well in any flower arrangement. T. pkt. 30c.

NEW CARNATION—Giant Chabaud

Sown in January or early in February under glass, transferred to cold frames and when hardened off planted outside, 15 inches apart each way, in well enriched soil, properly watered, Giant Chabaud Carnations produce double, fragrant flowers 2 to 3 inches across on straight, strong stems 15 to 20 inches long, from June till frost.

JEANNE DIONIS, pure white—**RUBIS**, ruby red—**MARIE CHABAUD**, pure yellow—**LEGION OF HONOR**, blood red—**QUEEN OF ROSES**, rich pink—**L'ETINCELANT**, fiery scarlet—**PEARL**, blush pink—**MIXED.** Any color: T. pkt. 15c; 1/16 oz. 30c; 1/8 oz. 50c.

GIANT OF NICE—T. pkt. 20c; 1/32 oz. \$1.25; 1/16 oz. \$2.40. **AMERICAN CARNATIONS**—100 seeds 80c; 10 seeds 15c.

NEW FLOWERS, never before seen is what draws the trade. Many new and high class flowers are listed on front pages of this catalog.

CANARY BIRD VINE

A beautiful rapid annual climber, a variety of nasturtium with clean, handsome foliage and charming little canary-colored blossoms bearing a fancied resemblance to a bird with its wings half expanded. Culture the same as for nasturtium. T. pkt. 5c; oz. 40c; lb. \$3.00.

CANNA—INDIAN SHOT

Soak the seeds in warm water until they show signs of swelling, then sow in sandy loam and keep in warm place; when up to the second leaf, set out. The seedlings bloom the first summer. Seed saved by ourselves from the finest large flowered varieties. T. pkt. 10c; oz. 50c; lb. \$4.00.

CARDINAL CLIMBER

Leaves finely cut like those of Japanese Maples, flowers brilliant scarlet. Hardy annual. Height 20 ft. Soak seed in warm water before sowing. T. pkt. 10c; oz. 80c.

CARTHAMUS TINCTORIUS

A thistle-like annual plant, about 3 feet high. The heads carried on long stiff stalks are very ornamental and excellent for dry bouquets. T. pkt. 10c; oz. 30c; lb. \$2.50.

CARTHAMUS COLOCAULIS—New. Invaluable for dry bouquets, very effective when bronzed. The growth with flowers in the center is star shaped, in many branched, large open umbells. Annual. Height 3 ft. T. pkt. 15c.

CATANANCHE MIXED

A splendid hardy perennial strawflower, excellent for cutting, bearing on the long slender stems, flowering heads two inches across, with wide, flat-toothed, blue or blue and white rays of elegant appearance. Blooms in June, July and August, and grows 2 feet tall. Our mixture contains the *coerula* and *coerula alba* varieties, one blue, the other blue and white. T. pkt. 10c; 1/8 oz. 15c; oz. 60c.

CERASTIUM TOMENTOSUM

SNOW IN SUMMER—Hardy perennial of dwarf, compact growth, with wooly white leaves, bearing great numbers of white flowers in May and June, much used for edging and as a rock plant. Height 6 in. T. pkt. 10c; 1/16 oz. 20c; 1/8 oz. 30c; oz. \$1.60.

CELOSIA—COCKSCOMB

Sow in April indoors or in May outdoors. Plant in rich ground 8 in. apart. Water freely. Tender annuals.

CELOSIA FIRE FEATHER

Plants of compact pyramidal growth, foot high and a blaze of fire all summer. The plumy flower heads sparkle and scintillate even under artificial light. Very striking. A self selling plant. First class for cutting, bedding and as a pot plant. T. pkt. 25c; 1/32 oz. 40c.

FLORISTS—Sow some Dwarf Tom Thumb Snapdragon in February. By the middle of May they will develop into heavy 4-inch pot plants with 6 or more flower spikes, if you will grow them in 50 deg. house and shift and pinch a few times. The plants will sell themselves and they can be produced practically without cost.

CELOSIA COCKSCOMB VARIETIES

CELOSIA PRES THIERS—Combs large velvety, crimson. Very dwarf. T. pkt. 10c; 1/8 oz. 15c; oz. \$1.00.

CRESTED COCKSCOMB TALL MIXED—Oz. 60c; lb. \$6.00. T. pkt. 10c.

GLASGOW PRIZE—Very fine dwarf form with deep velvety crimson combs. T. pkt. 10c; 1/8 oz. 15c; oz. \$1.00.

CRESTED COCKSCOMB DWARF MIXED—Contains highly improved dwarf growing varieties in all colors, such as red, pink, yellow, white, violet, etc. T. pkt. 10c; 1/8 oz. 15c; oz. \$1.00.

CELOSIA CHRYSANTHEFLORA—Produces combs of immense size, foot across and over sometimes. For maximum effect for store decorations, etc., hard to beat either fresh or dried. Height varies from 2 to 4 ft. **Mixed:** T. pkt. 10c; 1/8 oz. 30c; oz. \$2.00.

CELOSIA FEATHERED VARIETIES

CELOSIA PRIDE OF GOULD—Does not come true from seed. Some flowers will be shaped like an Ostrich Plume, others will come near Chinese Woolflower. In all kinds of very bright colors. T. pkt. 10c; 1/8 oz. 50c.

CELOSIA—CHILDSII—Same as Chinese Woolflower. Mixed. Height 30 in. T. pkt. 10c; oz. \$1.00.

PLUMOSA MAGNIFICA—Feathered Cockscomb. Inexpensive bedding plants and cut flowers either fresh or dried. Of pyramidal growth colors clear, of metallic lustre. **Crimson, Yellow, Mixed.** Either color: T. pkt. 10c; oz. 45c; lb. \$6.00.

CEPHALARIA ALPINA

Robust growing, hardy perennial, about 5 feet in height, suitable for rear of borders when bold effects are desired and fine for cutting. The flowers are like scabiosa in shape, the color of green gold, very double, almost three inches across. Of elegant form, borne on long, stout stalks in June and July. T. pkt. 10c; 1 oz. 60c.

CHRISTMAS PEPPER

Sow under glass early in the spring, set out when danger of frost is over, 15 inches apart each way. Before frost and not until the plants are full of berries, lift the plants and put in 4 inch pots and grow them on in the greenhouse.

Or start the seed in April, place in 2 1/2's and in May in 5's. Place the pots in a frame, pack solid around, keep the soil wet but the soil in pots rather dry. To make a better looking plant pinch out the end shoots bearing no fruit. Move inside before frosty weather. Christmas Pepper as well as Cleveland Cherries sell well from November up to New Year. T. pkt. 10c; oz. 60c.

CHEIRATHUS ALLIONI

Hardy Siberian Wallflower, Gorgeous bright yellow flowers from early till frost if the seed pods are removed. Height 1 ft. Perennial. Not dependably hardy in Iowa. T. pkt. 10c; oz. 60c.

CENTAUREA AMERICANA

For real beauty and extreme grace, has few rivals. The flowers are double from 4 to 6 in. across, borne on long stout stems, invaluable for cutting. Cut when partly open. Stays fresh for a long time in or out of water. In bloom from July to frost. Annual. Height 3 ft.

LILAC—WHITE—MIXED—Any color. T. pkt. 10c; oz. 60c; lb. \$6.00.

CENTAUREA MONTANA—Hardy perennial growing 2 feet high with large feathery flowers from June to August.

BLUE—WHITE—RED—MIXED. Any color: T. pkt. 10c; 1/8 oz. 15c; oz. \$1.00.

CENTAUREA MOSCHATA—Sweet Sultan

Exceptionally showy, extra large, well formed, musk scented flowers from June to September. High class for cutting. Annual. Height 3 ft. **BLUE, WHITE, ROSE** with white center, **MIXED.** Any color: T. pkt. 10c; oz. 45c; lb. \$4.00.

CENTAUREA MACROCEPHALA—Hardy perennial, flowers glistening golden yellow in globular heads of enormous size, extremely showy. In bloom from June to August. Height 3-4 ft. T. pkt. 10c; oz. \$1.40.

ASPIRIN does not prolong the life of cut-flowers, they wither earlier than those kept in pure water.

Centaurea Imperialis Bridegroom

CENTAUREA

CULTURE—Sow outdoors after danger from frost, cover the seed $\frac{1}{4}$ inch deep. Transplant to stand foot apart. To get flowering plants in May sow under glass in January. Transplant when the seedlings have developed 2 to 3 true leaves and plant in the open when danger of frost is past. Candidissima should be sown as soon as possible after January 1st, and Gymnocarpa soon after February 1st, to get fair sized plants for spring use. Use sandy soil and grow in a temperature averaging 60 degrees.

Centaurea Imperialis—Giant Sweet Sultan

Produces from June to September long stemmed blossoms 3 to 4 inches across of graceful airy effect, and most deliciously fragrant. If cut scarcely opened they will last for 10 days in water. Of easiest culture. Height 2 to 3 feet. Annual.

WHITE, LILAC, CRIMSON, SUAVEOLENS—Yellow.

FAVORITE—Brilliant rose. **SPLENDENS**—Purple.

BRIDEGROOM—Heliotrope, extra large. **MIXED**.

Any of the above: T. pkt. 10c; oz. 50c; lb. \$4.50.

CENTAUREA CYANUS—CORNFLOWER

Bachelor's Button if sown in August will give an early winter crop of splendid flowers, in a cool greenhouse. Seed started in January produces flowers in April. Grow your plants first in two inch pots, transfer to solid beds late in February. Provide supports, watch for aphids, space 12x15 in. Temperature 50 degrees or less. Annual. Height 2 ft.

DOUBLE PINK, DOUBLE BLUE, DOUBLE MIXED.

Any of the above: T. pkt. 10c; oz. 45c; lb. \$4.00.

CENTAUREA GYMNOCARPA (Dusty Miller).

An ornamental leaved plant, forming a round bush of silvery fern-like leaves. Fine for bedding, vases, hanging baskets and pots, and particularly effective as an edging to a bed of dark leaved cannas or scarlet sage. Height 20 inches. T. pkt. 10c; 1 oz. 45c; lb. \$4.00.

CENTAUREA CANDIDISSIMA COMPACTA—Fine plant for borders and ornamental gardening growing 15 inches high. Its leaves are thick and velvety and of silvery gray color. T. pkt. 10c; $\frac{1}{8}$ oz. 20c; oz. \$1.20.

CINERARIA—DUSTY MILLER

CINERARIA MARITIMA DIAMOND—The foliage is snow white, finely lacinated and broad. Nothing finer for bedding. Height 15 in. T. pkt. 10c; oz. 45c; lb. \$4.50.

See also Centaurea Gymnocarpa, another "Dusty Miller."

CHRYSANTHEMUM ANNUAL

SPECIAL MIXTURE—Flowers daisy-like, single and double 3 inches across on stiff stems that last long when cut, produced from June to November. Height 2-4 ft. For big Japanese sorts see our offer "Hardy Ey Flg. Double Chrysanthemum." T. pkt. 5c; oz. 10c; lb. \$2.00.

CHRYSANTHEMUM WHITE STAR

Flowers daisy-like of giant size, $3\frac{1}{2}$ in. across, pure white with an almost invisible pale lemon center and black disc. Produced in greatest profusion from July to October, furnishing first class material for almost every kind of flower work. The cut flowers stay fresh out of water for a long time. T. pkt. 15c; $\frac{1}{8}$ oz. 25c; oz. \$1.60. This is a real flower.

CHRYSANTHEMUM PERENNIAL

Sow under glass in February or March or outdoors from April till July. Space the plants a foot apart both ways. If planted in light sandy soil they will come through the winter in good shape with a slight covering.

To get flowers in April and May, start clumps under glass in December or January. Space 14x14 in.

SHASTA DAISY ALASKA—A splendid variety with flowers rarely less than 5 inches across, of the purest glistening white, with broad overlapping petals and borne on long stems, a beautiful cut flower, remaining in good condition nearly 10 days. In bloom from June to September. Height $3\frac{1}{2}$ feet. $\frac{1}{8}$ oz. 25c; oz. \$1.60; T. pkt. 10c.

CHRYSANTHEMUM MAY QUEEN

In bloom from April to August, flowers snow-white, 4 in. across in greatest abundance. As a bloom producer May Queen deserves a gold medal. A cut flower of the highest value. Perfectly hardy. Height 30 in. T. pkt. 15c; $\frac{1}{8}$ oz. 30c; oz. \$2.00.

HARDY EARLY FLOWERING DOUBLE in choicest mixture. New. This strain produces from seed sown in February under glass, finest double (about 80 per cent will come double) flowers of the pompon as well as Japanese type, and will bloom as early or earlier than the so-called hardy Chrysanthemums. You will get a great variety of flowers of the finest type and save the work of wintering the plants. Height $2\frac{1}{2}$ feet. T. pkt. 15c; $\frac{1}{16}$ oz. 60c; $\frac{1}{8}$ oz. \$1.10; oz. \$5.00.

CASCADE CHRYSANTHEMUM

Half hardy perennial blooming 6 months from date of sowing. Flowers single, semi double and some almost double, resembling in form the flowers of gerbera. Colors bronze, crimson, white, orange, etc. Fine for cutting and a very showy pot and basket plant. Drooping habit, spikes 12-15 inches long. **MIXED COLORS**: T. pkt. 35c.

Chrysanthemum Succession Mixture

This mixture contains every choice, hardy perennial variety, with single Daisy-like bloom so valuable in flower work. By sowing this mixture, you will have daisies from early spring till frost. Made up by ourselves, contains some of the largest and choicest new English varieties besides such well known sorts as May Queen, Elder, Alaska, Mrs. C. L. Bell. T. pkt. 20c; $\frac{1}{8}$ oz. 40c.

CHRISTMAS ROSE

Hardy perennial, blooming outdoors from December to April, planted in a shady spot, sheltered from the north. Says a flower enthusiast: "The beauty of Christmas Rose when in bloom cannot be described and no photograph can picture the exquisite whiteness of the petals and the mass of the dainty, green gold stamens. Has beautiful foliage almost the entire year. Seed germinates slowly. Height 15 in. T. pkt. 20c.

CLEOME—SPIDER PLANT

PUNGENS—A very easily raised, coarse plant of strong scent. Thrives in any soil from the richest to the poorest. Should be spaced a foot apart. Height $2\frac{1}{2}$ feet. Oz. 25c; lb. \$2.40; T. pkt. 5c.

GIANT FLOWERED CINERARIA

The finest large flowered strain in existence. Sow the seed from June to August in pans, using half leaf mould and half sand. When the plants have two well formed leaves and two more just coming on, place them in small pots. When ready to repot use again leaf mould, mixing it this time with one-eighth part of coarse bone meal. When the plants are ready for large pots, use half leaf mould and half compost. Keep the plants as near the glass as possible except when they are ready to bloom, when they should be kept at a greater distance from the glass. Give plenty of air and always watch for aphids. Keep the plants cool, 40 at night and 60 degrees during the day is right. June sown seed produces bloom for Christmas. Height 12 to 16 in.

HALF DWARF MIXED—Choicest large flowered, prize varieties, raised by a European specialist, and represents the cream of the largest collection of specimens in Europe. T. pkt. 25c; 1/64 oz. \$1.00; 1/32 oz. \$1.95; 1/8 oz. \$7.50.

CINERARIA GIGANTHEA—Dark red with white. T. pkt. 25c; 1/64 oz. \$2.00.

CINERARIA GIGANTHEA—Blue with white. T. pkt. 25c; 1/64 oz. \$2.00.

CINERARIA GIGANTHEA MATADOR—Scarlet. T. pkt. 25c; 1/64 oz. \$1.25.

DOUBLE CINERARIA—Popular in Europe and may become a hit on this side. Flowers large, attractive in many colors. The seed we offer is the very best in existence, comes almost 100% true. Height 20 in. 100 seeds 30c; 1,000 seeds \$2.00.

Our trade packets of Cineraria contains 160 to 180 seeds and the seed is the VERY best there is.

CINERARIA MULTIFLORA POTSDAM

Hard to beat by anything in the line of pot plants. Individual flowers only about one-third the usual size, yet the flower-heads are of the same dimensions as seen in the choicest of large flowered strains, namely 12 to 15 inches across. The effect is wonderful. You see nothing but flowers that touch and crowd one another, the great number of individual blooms bring out the beauty of the plant so strikingly that flower lovers actually are "grabbing" the plants at sight. The colors are many, clear and decided. Height 10 in. T. pkt. 25c; 1/64 oz. 65c; 1/32 oz. \$1.20; 1/8 oz. \$5.00.

CINERARIA MULTIFLORA GRFL MAXIMA

Improved Berlin Market Strain. A strain remarkable for vigor, richness and wide range of colors. Plants compact, 12-15 in. tall, foliage neater than is the rule in Cinerarias. The bloom is a neat, semi-globular bouquet containing from 80 to 100 individual flowers, well above the foliage. Originator's seed. T. pkt. 40c; 1/64 oz. 80c.

MOST FOR YOUR MONEY—We are the producers of many seeds. When the crop is good we sell such seeds for less than we would if we had to buy the seed from others. You get the best for less.

Chrysanthemum Mrs. C. L. Bell

MRS. C. L. BELL—New. Hardy vigorously growing variety with flowers 6 inches across of purest white, with broad petals of much substance, bearing great numbers of flowers on long stems. Height 2 1/4 ft. T. pkt. 10c; 1/8 oz. 15c; oz. 80c.

Clarkia

Hardy annual effective either in beds or as a pot plant and a first rate cut flower. Does well in sun or shade, requires POOR soil, soil mixed with sand or sifted ashes. Very beautiful when well grown. Where the soil is rocky or sandy and in cloudy climates Clarkias develop to perfection, there is no flower that will make a finer display in beds large or small. Blooms from July to September. Started in August and up to January blooms from February to May. Night temperature 45 degrees. Height 12 in. Cut Clarkia when partly open.

We offer the choicest double flowering varieties that produce a striking effect and are easy to sell. Height 20 in.

ENCHANTRESS—Beautiful shade of salmon-pink. T. pkt. 20c.

BRILLIANT—Brightest carmine. **ORANGE KING**—Bright

orange scarlet. **SALMON QUEEN**—Soft shade of pink. **VESU-**

VIUS—Orange scarlet, shaded salmon, the brightest color in

Clarkias. **MIXED**. Any color: T. pkt. 10c; oz. 60c; lb. \$4.80.

STUTTGARTIA CHERRY

The plants are compact, densely branched of elegant outline, displaying hundreds of large closely placed cherries of brilliant cinabar red. One month earlier than old style cherries. The finest "cherry" in existence, that will outsell the old type 2 to 1. Height 1 foot. T. pkt. 20c; 1/8 oz. 40c.

CLEVELAND CHERRY

Sow the seed outdoors when danger of frost is past, in the fall pot the plants and keep indoors. Height 15 inches. In the field space the plants 14 inches to insure shapely and bushy plants. If you want extra heavy plants for 6 in. pots or larger, start the seed in January, lift and pot the plants early in September and grow them in rather poor soil. In rich soil they do not set fruit as freely as in poor soil. T. pkt. 15c; 1/8 oz. 25c; oz. \$1.60.

Cinnamon Vine

Bulblets planted in the spring produce tubers 5 to 9 inches long by fall. Plant 3 inches apart, cover 1 inch deep. 50 bulblets 20c; 100 for 35c; 1000 for \$2.00, postpaid.

CLEMATIS PANICULATA

One of the best of all hardy climbers, disease free, fast growing, forming dense sheets of white fragrant bloom lasting for several weeks. T. pkt. 10c; oz. 45c; lb. \$4.00.

CLEMATIS DAVIDIANA—Upright growing, non-climbing variety with large, bright green foliage and tubular bell-shaped flowers of deep lavender-blue, during August and September. Perfectly hardy, deliciously fragrant. Height 3 ft. Excellent for shady places. Pkt. 10c; 1/8 oz. 25c; oz. \$1.60.

CLEMATIS MONTANA—Vigorous hardy climber, the flowers resemble white anemone blossoms, produced in clusters. Stamens conspicuous, golden yellow. Blooms from June to September. T. pkt. 10c; 1/32 oz. 20c.

Coleus For spring sales sow the seed late in January or early in February, press the seed into the dirt and cover lightly with dirt when the seeds are beginning to sprout. When the plants are large enough to handle, pot off singly, shift as needed. Use rich and porous soil. Easily raised from seed.

FINEST MIXED—This contains the finest varieties of coleus with leaves which often measure 10 inches in length and 8 inches in width, heart shaped and handsomely crinkled, toothed and frilled, their color combinations are remarkably rich, comprising all the reds, metallic green and yellows in shades in the most delicate to nearly black. T. pkt. 15c; 1/16 oz. 35c; 1/8 oz. 60c; oz. \$4.00; lb. \$60.00.

COLEUS METEOR New. Highly attractive. Leaves dark red, bordered bright green. T. pkt. 25c.

Flowers for Bouquets

Achillea, Aconitum, Acroclinium, Ageratum, Agrostemma, Ammobium, Anemone, Anthemis, Anthirrhinum, Aquilegia, Arctotis, Armeria, Asperula, Aster, Astilbe, Bellis, Brachycome, Browallia, Calendula, Calliopsis, Campanula, Carnation, Cantanache, Celosia, Centaurea, Cheiranthus Allioni, Chrysanthemum, Clarkia, Commelina, Coreopsis, Cosmos, Dahlias, Delphinium, Dianthus, Digitalis, Dimorphoteca, Doronicum, Eryngium, Eupatorium, Gaillardia, Gillia, Geum Gerbera, Godetia, Golden Rod, Gomphrena, Gypsophyla, Helianthus, Helichrysum, Hesperia, Heuchera, Hugelia or Blue Lace Flower, Hunnemannia, Iris, Larkspur, Lavatera, Lathyrus, Lavender, Leptosyne, Linaria, Lunaria, Lupinus, Linum, Lychnis, Marigold, Mignonette, Myosotis, Nasturtium, Nemesia, Nierembergia, Nigella, Pansy, Pardanthus, Pentstemon, Phlox Physalis, Physotegia, Platycodon, Polemonium Coeruleum, Poppy, Primulas, Pyrethrum, Rhodante, Rudbeckia, Salpiglosis, Salvia, Saponaria, Schizanthus, Scabiosa, Senecio, Shasta Daisy, Silene, Statice, Stevia, Stocks, Stokesia, Sunflower, Sweet William, Sweet Pea, Valeriana, Verbena, Viscaria, Thalictrum, Trachelium, Tritoma, Xeranthemum, Wallflowers, Zinnia. See also Ornamental Grasses. Most of them are useful for bouquets.

A shorter list including only the more important bouquet flowers: Acroclinium, Antirrhinum, Arctotis, Asters, Calliopsis, Carnation, Centaurea, Coreopsis, Cosmos, Delphinium, Gaillardia, Gypsophyla, Helichrysum, Larkspur, Marigold, Phlox, Salpiglosis, Saponaria, Scabiosa, Statice, Sweet Pea and Zinnia. With Iris, Peonies and hardy ferns the above will produce during the summer till frost an uninterrupted supply.

CORNUS KOUSA

Who knows Cornus Kousa? Very few, yet it deserves the widest use because it is a beautiful and extremely showy shrub blooming in June a month after Cornus Florida. Its fruit is pinkish round balls nearly an inch in diameter making the shrub as ornamental as when in full bloom. Does well in any soil and situation including shaded places under big trees. Hardy, easily raised from seed sown in the spring or fall. Height 10-20 ft. Pkt. 10c; oz. 60c; lb. \$7.00.

Our Cyclamen seed produces short and stocky plants

Cyclamen—Best German

CULTURE—Sow seed in flats filled with sifted leaf mould mixed with enough coarse sand to insure good drainage and cover about 1/4 in. Seed germinates irregularly and germinates best in a dark place with moist and rather close atmosphere in a temperature of from 40 to 45 degrees. As the plants show up, transplant carefully into other flats in rows, spacing them an inch apart. When plants are ready, transplant from one flat to another, for about six months after that place them in 2 1/2 in. pots. In flats plant shallow, the bulbs barely covered with soil, in pots keep bulbs covered to a depth of about an inch, except when in blooming size pots when the bulbs should be placed half way above the soil. Transplant from pot to pot whenever the plants show healthy root growth around the inside of the pots. Soil for pots must be rich, mixed with well decayed cattle manure. Keep plants shaded and give them plenty of air at all times. Never allow the plants to bloom in smaller pots than 4 inches. Over summer, place in frames filled with sand, bury the pots half way into the sand, allow at least an inch of space between them, keep the hot sun out by whitewashing the glass and the plants cool by ventilating and frequent spraying with water. Or keep them in a frame house with dirt walks and keep the soil under the benches always moist but not soaking wet. When the plants are in blooming size pots, transfer them into large and airy house. Cyclamen does not like heat; to keep plants cool, ventilate, spray with water; keep shaded to avoid leaves from wilting and to avoid disease spray once a week with nicotine, and if disease appears, spray with nicotine twice a week and place powdered charcoal around the plants on top of the soil. Water carefully. The highest prices are paid for Cyclamen in December. It takes 16 to 18 months to raise a perfect plant from seed—sow accordingly.

The seed we offer is raised for us by one of Germany's best growers and is the best money can buy.

PEARL OF ZEHLENDORF—Dark salmon pink. **ROSE OF ZEHLENDORF**—Light salmon pink. **GLORY OF WANDS-BECK**—Dark clear salmon. **SUNRAY**—Pure pink, blood-red eye. Price: 10 seeds 20c; 50 seeds 65c; 100 seeds \$1.20; 200 seeds or over at the rate of \$10.00 per 1,000.

VULCAN—Glowing dark red. **BRIGHT ROSE**—Deep Murillo pink. **ROSE OF MARIENTHAL**—Lavender pink with red eye. **PURE WHITE**—PURE WHITE WITH RED EYE — **LILAC BLUE**—Price: 10 seeds 15c; 50 seeds 60c; 100 seeds \$1.05; 200 seeds \$2.00; 300 seeds \$2.85; 400 seeds \$3.60; 500 seeds or over at the rate of \$8.00 per 1,000.

CLEMATIS TANGUTICA—Perfectly hardy perennial climber of rapid growth. Flowers very large, single, golden-yellow—very beautiful and uncommon from June to September. Height 10-12 ft. T. pkt. 10c; 1/32 oz. 20c.

CLEMATIS seed germinates slowly but in the end our seed does germinate. See page 69.

COLLOMIA PURPUREA

Hardy annual of neat growth about a foot high, flowers in large umbells bright crimson pink, highly attractive. Blooms in May and June. A fine drought resisting bedding and rock plant. T. pkt. 10c; oz. 45c.

COIX LACHRYMAE—JOB'S TEARS

(Job's Tears). An annual grass producing shiny round seeds of grayish color which are used as an ornament. Plant a foot apart. T. pkt. 5c; oz. 15c; lb. \$1.00.

COREOPSIS DOUBLE

Hardy perennial, flowers large, showy, of rich lustrous yellow, semi-double, produced in abundance from June till frost. First rate cut flower. Will bloom the first year from seed if sown early. Height 30 in. If used for forcing avoid heavily manured soil. T. pkt. 10c; oz. 60c; lb. \$4.20.

CUPHEA PLATYCENTRA—CIGAR PLANT

The showiest of all Cupheas with bright scarlet flowers and clean dark green foliage. First rate for pots and bedding. Half hardy perennial. Height 1 foot. T. pkt. 20c; 1/16 oz. 55c.

COBAEA SCANDENS—CLIMBER

CATHEDRAL BELLS—A rapid growing, tender perennial generally treated as an annual. The flowers are bell shaped and of purplish lilac, the foliage is never attacked by insects. Blooms from July to October. Seeds should be placed on edge in planting and plants spaced nine inches apart. Sow in January, place the seedlings in 2 inch pots, then sift and pinch back a few times and when in 4 or 5 inch pots and tied to a stake, will be in bloom by May selling at sight. Of all summer climbers Cobaea is the finest and equally good in sun or shade. T. pkt. 5c; oz. 40c; lb. \$4.00. **DIGITALIS** will bloom in winter if field clumps are planted under glass late in October, spaced 20 inches apart and carnation temperature applied. Forces easily. Water carefully as no water must touch the center of the plant.

A PEARL

among flowers is salpiglosis. Without an equal in richness of coloring, one of the choicest, very finest, very select, yet almost unknown. Start a bed of salpiglosis so that visitors and passersby could see, stop, look, admire and inquire as well as to start them talking, mentioning your place of business as the place where they have seen the flower of fabulous beauty.

COSMOS

When your Cosmos plants will reach the height of about 3 feet, pinch out the terminal bud to induce dwarf growth, and to get flowers from 2 to 3 weeks earlier. Space the plants 18x18 in.

GIANT EARLY FLOWERING WOODSIDE COSMOS—Blooms from July until frost. Grace, daintiness and brilliancy are the characteristics of this class. Very pretty for vases. **MIXED.** T. pkt. 5c; oz. 25c; lb. \$2.80.

LADY LENOX COSMOS—Of extraordinary size up to 6 inches in diameter, of vigorous growth and most floriferous, attaining a height of 6 feet. Mixed. Oz. 25c; lb. \$2.00; T. pkt. 5c.

COSMOS ORANGE FLARE This new Cosmos displaces the old Klondyke Cosmos. Blooms in less than 5 months from date of sowing. Flowers large, brilliant orange-yellow. T. pkt. 10c; oz. 80c; lb. \$8.00.

EXTRA EARLY DOUBLE COSMOS

New. Will produce about 70% of double flowers just as beautiful as the late and will bloom 10 weeks after sowing. Will stay in bloom till frost. **PINK BEAUTY, CRIMSON KING, WHITE QUEEN, MIXED.** We mix flower seeds from separate colors, our mixed seed is NOT from mixed field culture and for that reason price for mixed seed cannot be lower than that for straight colors. PRICE: T. pkt. 15c; 1/8 oz. 30c; oz. \$2.00.

Double Cosmos

CYNOGLOSSUM AMABILE

Chinese Forget-Me-Not. Easily raised hardy annual, succeeding under the hardest of conditions producing masses of deep blue flowers, useful for cutting. Sow where the plants are to stand, thin out to stand 6 inches apart. Easily forced into bloom in two months from date of sowing. Started in September then placed in 4 in. pots will bloom in March and April. Space pots 12 in. by 12 in. Night temperature 45 deg. T. pkt. 10c; 1 oz. 60c; lb. \$4.00.

CYPERUS ALTERNIFOLIUS—Umbrella Plant

Delights in moist places and fine plants can be raised from seed in less than 3 months. Resembles an umbrella. Tender perennial sedge. T. pkt. 10c; 1/8 oz. 15c; oz. \$1.00. **CYPRESS VINE MIXED**—T. pkt. 5c; oz. 40c; lb. \$2.80.

CORYDALIS LUTEA

A short growing, perfectly hardy perennial of vigorous growth with fine spikes of golden yellow flowers in bloom from early spring till October. Easily raised from seed. Does well in sun or shade in any dry or well drained situation. Fine for covering banks, walls and rockeries. Height 1 ft. T. pkt. 30c.

CREPIS RUBRA

An annual plant producing from June to August masses of double aster-like flowers, bright dark pink in color of unusual beauty. Fine as a border plant and high class for cutting. Height 18 in. T. pkt. 10c; 1/8 oz. 15c; oz. 80c.

CHELONE BARBATA PRAECOX

Hardy perennial producing elegant spikes of elongated trumpet shaped flowers in many rich colors from May to September. Of striking beauty. Will do well in almost any kind of soil but for good success the plants must be mulched with straw or strawy manure in a layer of 4-5 inches. High class for cutting. Height 4 ft. T. pkt. 10c; oz. 80c.

CYCLAMEN SPECIAL MIXTURE

Includes every variety listed as well as new varieties all of Giant Flowering class. 10 seeds 20c; 50 seeds 70c; 100 seeds \$1.20; 1,000 seeds \$8.00.

CYCLAMEN FINE MIXED—This mixture includes all colors, the seed is fresh and although low in price its quality is very close to the very best. 10 seeds 10c; 50 seeds 35c; 100 seeds 65c; 200 seeds \$1.20; 300 seeds \$1.65; 400 seeds \$2.00; 500 seeds or over at the rate of \$4.00 per 1,000.

CYCLAMEN BONFIRE—See novelty pages.

CRUCIANELLA STYLOSA

High class hardy perennial rock, bedding and border plant producing carmine red flowers from May to September in round terminal heads. Cushion-like foliage. Does well in any soil in partially shaded position. Height 1 ft. T. pkt. 10c; oz. 60c.

DAHLIA Sown either in March indoors or in May outdoors the seedlings produce first class flowers during late summer and fall.

DAHLIA AMANT HYBRIDS

A magnificent strain producing a profusion of big double and semi-double flowers of unusual grace, on long wiry stems, from spring sown seed. Our seed is saved from selected plants that come true, the plants bearing nothing but perfect flowers in many colors, light florists colors predominating. T. pkt. 20c; 1/8 oz. 50c; oz. \$3.00.

DAHLIA—COLTNESS HYBRID

The compact bushes grow only 18 inches high, the large, single flowers are carried above the foliage and completely hide it from view, from early summer till frost. Beautiful colors. High class for bouquets. Of easiest culture. The seed germinates quickly and the plants are in bloom 10 to 12 weeks from date of sowing. T. pkt. 10c; 1/8 oz. 30c.

DAHLIA UNWIN HYBRIDS—Semi-double as well as double flowers, fine for cutting and bedding. Many colors. Seed started early in March produces bloom from June to frost. Height 18-24 in. T. pkt. 20c; 1/8 oz. 40c; oz. \$3.00.

DAHLIA ORCHID FLOWERED Different from anything so far seen in Dahlias. Each flower has eight petals, these radiate from the center like a star, are curled and twisted in an elegant fashion and do not look like Dahlias at all. Wide range of colors. Easily raised from seed, will bloom the first year and come 90% true from seed. T. pkt. 40c.

DAHLIA EXTRA CHOICE DOUBLE MIXED—T. pkt. 10c; 1/8 oz. 30c; oz. \$2.00.

DATURA—ANGEL'S TRUMPET

Easily grown annuals, the seed should be planted early and plants set outdoors when danger of frost is past.

CORNUCOPIA—Horn of plenty. Flowers large and double. white, marbled with blue. Height 3 ft. T. pkt. 10c; oz. 45c.

FASTUOSA COERULA—Large, double, dark blue, scented flowers on plants 3 ft. high. T. pkt. 5c; oz. 30c.

FINEST MIXED—This mixture contains all the best varieties such as Cornucopia or Horn of Plenty, Golden Queen, etc. Oz. 30c; lb. \$2.75; T. pkt. 5c.

DAISY—See Agathea, Arctotis, Bellis, Brachycome, Chrysanthemum, Dimorphoteca and Pyrethrum Roseum.

DIELYTRA SPECTABILIS

Bleeding Heart. Dormant roots offered elsewhere in this catalog. 100 seeds 20c; 500 seeds 60c; 1,000 seeds \$1.00.

DIELYTRA FORMOSA—Plume Bleeding Heart. Flowers just as attractive as those of old fashioned Bleeding Heart, produced from May to frost. The plant is compact, bushy, foliage very ornamental, seen by a flower loving lady you will get an order for the plant or maybe will have to dig it out right away. Worth all the trouble of raising from seed, which lays long before it comes up. Sow in a flat, cover the seed lightly, fill up the flat with sphagnum moss, place in shady place. In about 90 days the seed will begin to sprout. Hardy. Height 2 ft. 100 seeds 20c; 500 seeds 60c; 1,000 seeds \$1.00.

IN THE BEST

do we trust. We sell seeds of best quality and what is more, we supply new and superior varieties in flowers and vegetables that cannot be had elsewhere. To have new and superior in seeds is our job. We are not sleeping on the job. All you have to do, is to grow these new things or at least try them, if you do not have enough faith in us. To try is your job. And if you will try what we offer, believe us, you'll not be fooled—you will make money.

GROW MORE PERENNIALS

There are days during Spring and Summer when the florist does not have enough of his own flowers and has to

buy or miss sales. Both cost money. To prevent this loss, florists should have lots of perennials on their premises, many of which can be raised from seed with little expense. No florist should have bare places on his property where flowers could be growing, advertising his wares to visitors, furnish him blooms and make those unattractive nooks and corners cheerful with beautiful as well as paying flowers. Get the seeds and start the plants. Make every dollar you can, utilize those spots where at present nothing or weeds are growing.

THE BEST PERENNIALS

To make selection easy we arranged all perennials of which we have the seed, into several groups. The best of the list are printed in heavy type and they are the kinds that produce quantities of fine showy flowers and are absolutely hardy without protection. Consequently many a grand flower is not printed in heavy type for the only reason that it is not perfectly hardy in our extremely severe Iowa climate. Bear in mind that our winters are very changeable, we have one day 70 degrees above and in less than 36 hours the temperature is 20 or more below zero. Three or four days afterwards we are enjoying summer weather — for a while. These sudden changes kill many plants that are PERFECTLY HARDY 500 miles further north and everywhere else except here and in Montana, especially so if protected over winter by a layer of straw or hay.

PERENNIALS FOR CUTTING

Achillea, Aconitum, Agrostemma, Anemone, Anthemis, Aquilegia, Armeria, Asperula, Astilbe, Aster Hardy, Bellis, Campanulas, Carnations, Catananche, Centaurea, Chrysanthemum, Cheiranthus, Coreopsis, Commelina, Delphinium, Candytuft, Dianthus, Digitalis, Doronicum, Eryngium, Gaillardia, Geum, Gypsophyla, Hesperis, Heuchera, Iris, Lathyrus, Lavender, Linaria, Linum, Lupinus, Lychnis, Myosotis, Pansy Tufted, Pardonanthus, Pentstemon, Phlox, Peony, Physalis, Physostegia, Platycodon, Polemonium, Poppy, Primulas, Pyrethrum, Rudbeckia, Salvia Azurea, Scabiosa, Silene, Statice, Stokesia, Thalictrum, Tritoma, Trachelium, Sweet Violet, Valeriana, Veronica.

ORNAMENTAL PERENNIALS

Not recommended as good cut flowers, although some would pass as such. We are excluding for instance Anchusa, because too coarse, Sweet William because of poor lasting qualities, etc. Our aim is to make these lists dependable and a real help in ordering.

Anchusa, Dictamnus, Hollyhock, Hibiscus, Hyacinthus, Poppy Oriental, Pyrethrum Uliginosum, Oenothera, Sweet William.

HARDY CLIMBERS

Akebia, Ampelopsis, Aristolochia, Cinnamon Vine, Clematis Paniculata, Lathyrus, Pueraria, Wistaria.

SUITABLE FOR SHADE

Achillea, Aconitum, Aquilegia, Asperula, Campanula, Commelina, Doronicum, Lobelia, Lythrum, Physostegia, Primulas, Trachelium, Sweet Violet.

IRONCLAD PERENNIALS

that will grow and do well in any kind of soil, in hot and dry positions and under the hardest of conditions.

Agrostemma, Arabis, Coreopsis, Gaillardia, Pardonanthus, Physostegia, Pentstemon, Rudbeckia, Veronica.

HARDY FOLIAGE PLANTS

Acanthus, Bocconia.

LOW GROWING PERENNIALS

Alyssum Saxatile, Arabis, Bellis, Candytuft Sempervirens, Campanula Carpatia, Myosotis, Polemonium Richardsoni, Pyrethrum Aureum, Pansy Tufted.

DIVIDE YOUR PERENNIALS

Dividing keeps perennials in a healthy and vigorous condition. In dividing them, use your judgment. You can divide most perennials during the summer or early fall except those that bloom in the fall which are best divided in the early spring. Aggressive plants like Anthemis, Physostegia and others should be divided annually, Phlox, Iris and plants with their rate of growth, divide every two or three years. Do not divide: Platycodon, Dictamnus, Gypsophyla and similar plants with carrot-like roots. Peonies should be divided in the fall once in 8-10 years. But in order to increase root stock, divide Peonies once in three years, not oftener, else your roots will go blind.

DIGITALIS—FOX GLOVE

Hardy perennials, 3 to 4 feet tall, bearing large, gorgeously colored, bell shaped flowers on stout and straight stalks from June to September. Blooms the first year if sown early and will prove perfectly hardy if planted in soil with perfect drainage and covered lightly during winter. Easily raised from seed. Water only when it is really needed when the soil is half dry. The plants should stand 12 inches apart. Can be forced, treat same as Delphinium.

PURPUREA MONTSTROSA—Very large, of many colors, tigred and penciled. T. pkt. 10c; oz. 45c; lb. \$4.80.

PURPUREA—T. pkt. 5c; oz. 20c; lb. \$2.00.

GLOXINIAEFLORA—Very large bell shaped flowers rivaling those of gloxinia. Pink, White, Purple, Mixed. Any color: T. pkt. 10c; oz. 45c; lb. \$5.40.

DIGITALIS SPECIAL MIXTURE—Contains all of the choicest varieties with large flowers, self colored as well as tigred, mottled and penciled and is the best mixture in existence. T. pkt. 10c; 1/8 oz. 15c; oz. 80c; lb. \$7.00.

FOXGLOVE GIANT SHIRLEY—Produces flowers of great size, in an endless variety of colors. Beautifully spotted, blotched, self colored, in unique shades of maroon, bronze, cream and others. Of most vigorous growth, the plants attain a height of 6 to 7 feet. T. pkt. 10c; oz. 80c.

DIGITALIS MACULATA

Extremely beautiful, outstanding and very much "different" variety of vigorous growth, producing large flowers in a wide range of colors covered with prominent blotches. **MIXED**. T. pkt. 10c; oz. 45c; lb. \$5.40.

DELPHINIUM WREXHAM

Known also under the name of Hollyhock Delphinium. Wrexham strain grows 5 to 8 feet tall, the spikes have 36 to 40 inches of flowers, hence the name Hollyhock Delphinium. The colors are shades of blue and violet with white, purple and black-blue center petals. Both double and single. Perfectly hardy. T. pkt. 20c; 1/8 oz. 45c; oz. \$3.00.

DOUBLE DELPHINIUM

The double and semi-double flowers are closely set together all along the stalks for a length of 15 to 20 inches, mostly of light blue shades. Height 4-5 feet. T. pkt. 20c; 1/8 oz. 40c; oz. \$3.00.

Delphinium

Make Belladonna with Wrexham your leaders, also have some Chinensis, a variety growing only 3 feet tall, in white and blue. Very brightly colored. You can sow Delphiniums in the spring or in July and August or late in November just before the ground freezes up. The seed will lay dormant and will sprout early in the spring and produce plants with little or no attention. You get the benefit of spring rains, the time it takes to sow the seed when done in November will be at your disposal in the spring when you are more than busy, you will save time and expense because you will hardly need to water the seedlings from November sown seed. Delphinium will thrive in any good soil in full sunlight but refuses to do well in sour ground. Sourness is corrected by liming. **FORCING DELPHINIUMS**. Generally speaking it is not well to start forcing before Christmas and a temperature of not over 45 degrees at night suffices at the outset. Plant 20 inches apart both ways and twice a month give light applications of liquid sheep manure. Plant in solid beds, loosen the soil deep for every clump. Water only when really needed and never pour water into the crowns.

DELPHINIUM IN THE SOUTH will bloom and furnish a good crop of fine flowers from seed sown in the fall. The Chinese Delphinium never disappoints, the Belladonna type is somewhat unreliable.

DELPHINIUM CLIVEDEN BEAUTY

A selection from Belladonna Hybrids. Flowers extra large in shades of clear light blue. The spikes, both in width and length, are very massive. High class florists variety. T. pkt. 20c; 1/8 oz. 45c; oz. \$3.20.

BELLAMOSUM (Formosum)—Bellamosum or Dark Blue Belladonna Hybrids. We have a strain, superior to any other on the market, seeds saved from named varieties with immense bloom, including Brunonianum, a fragrant deep blue variety with white centers. Height 3 feet. T. pkt. 10c; 1/8 oz. 25c; oz. \$1.60; lb. \$20.00.

BELLADONNA HYBRIDS—Contains shades of the palest to the darkest blue and the various intervening shades of sapphire, turquoise, indigo, etc., are rich and beautiful. Plants are of dwarf growth and require no staking. They branch freely from the crown and bloom without intermission from early spring till late autumn. T. pkt. 10c; 1/8 oz. 25c; 1 oz. \$1.60; lb. \$20.00.

DELPHINIUM BELLADONNA LIGHT BLUE—T. pkt. 10c; 1/8 oz. 30c; oz. \$2.00; lb. \$24.00.

GOLD MEDAL HYBRIDS—Very choice, originally saved from very best named varieties. Blooms on stalks 2 feet long or better, mostly of light blue. T. pkt. 10c; 1/8 oz. 20c; 1 oz. \$1.40; 1 lb. \$18.00.

DELPHINIUM CHINESE BLUE—Of brighter color and more satisfactory than most other Delphiniums. Will furnish a wealth of extra fine flowers for bouquets throughout the summer. Height 3 feet. **BLUE—WHITE—MIXED**. Any color: T. pkt. 10c; 1/8 oz. 15c; oz. 60c; lb. \$6.00.

NEW DWARF SCOTCH PINK

You will gain growing these new Pinks if you grow plants for spring sales. The plants are of neat compact growth, do not become "leggy" and straggling, producing large double fragrant flowers in all colors from May to August. You will sell a quantity of these plants either in pots or placed in flats. The plants are only 10 inches high, are first class for borders and rockery. **MIXED COLORS**. T. pkt. 15c; 1/8 oz. 25c; oz. \$1.90.

DIANTHUS SWEET WIVELSFIELD

The range of colors is almost endless, it is of easiest culture and in bloom from April till frost from seed sown in January under glass. Plants in 5 or 6 inch pots should prove good sellers for Mothers' Day and that Sweet Wivelsfield will prove popular among all who have gardens is self evident. Sweet Wivelsfield loves sunlight but is not particular as to soil. Height 18 in. Annual. T. pkt. 10c; 1 oz. 80c.

DIANTHUS ARENARIUS—Drought resisting, hardy perennial thriving in poor and sandy soil, producing sheets of fragrant, single heavily feathered, snow-white flowers during May and June. An unusual and very choice rock plant. Height 1 ft. T. pkt. 15c; 1/8 oz. 35c; oz. \$2.20.

DIPSACUS LACINIATUS—Teasel. Hardy biennial valuable for winter bouquets. Produces quantities of large conical heads on very long strong stalks and when bronzed is a real ornament. Height 6 ft. T. pkt. 10c; oz. 60c.

Pinks—Special Mixture

HARDY PERENNIAL PINKS

SPECIAL MIXTURE—This mixture comprises all the best varieties perennial. $\frac{1}{8}$ oz. 15c; 1 oz. 80c; T. pkt. 10c.

GRASS OR SPICE PINKS—The flowers are large, very double and borne profusely on short stiff stems. Highly fragrant. $\frac{1}{8}$ oz. 15c; oz. 80c; lb. \$12.00; T. pkt. 10c.

CYCLOP PINKS—Colors of exquisite beauty, enlivened by a eye of velvety red. Has a sweet clove-like perfume. Single. Oz. 60c; lb. \$7.00; T. pkt. 10c.

PLUMARIUS SINGLE—Pheasant eye Pink. Hardy single flowering Scotch pinks. Our strain is extra choice, plants of upright growth, compact, flowers large, fragrant, exquisitely marked and penciled. T. pkt. 10c; oz. 60c; lb. \$6.00.

LATIFOLIUS ATROCOCINEUS—Hardy double hybrid carnation of deepest red. First class cut flower as well as fine pot plant. T. pkt. 10c; $\frac{1}{8}$ oz. 15c; oz. 80c; lb. \$6.00.

DELTOIDES BRILLIANT—A splendid perennial, forming tufts only 6 inches high covered with a sheet of gorgeous brilliant crimson bloom from May to August. Invaluable as a rock plant for borders and pots. T. pkt. 15c; $\frac{1}{8}$ oz. 25c; oz. \$1.60.

DIANTHUS CAESIUS SPLENDENS

Cheddar Pink. A splendid rock plant and one of the finest of all hardy perennials. The foliage is grass-like, very compact, the bright, rosy-pink flowers are produced in great profusion in June and July. Beautiful and rare. Height 8 in. T. pkt. 20c; $\frac{1}{16}$ oz. 45c.

DIANTHUS ALLWOODII—New race, flowers double and single in many colors. T. pkt. 20c.

HIGHLAND QUEEN—Hardy perennial, pink of upright, compact growth, flowers large, single, brilliant scarlet vermilion throughout the season. Height 12 in. T. pkt. 20c.

DIANTHUS—ANNUAL PINKS

These bloom from June to October. Height 12-18 in.

MOURNING CLOAK—Rich blackish crimson tipped and fringed with snowy white. Large double and handsome. Oz. 60c; lb. \$7.00; T. pkt. 10c.

CHINENSIS DOUBLE—Double flowers in endless variety of colors, whole summer. T. pkt. 5c; oz. 30c; lb. \$3.20.

PRIZE MIXTURE—Contains all the annual varieties listed as well as many other sorts. T. pkt. 10c; oz. 80c; lb. \$8.00.

DICTAMNUS FRAXINELLA—GAS PLANT

The hardiest and longest lived of all perennials growing about 2 feet high and bearing lemon scented hyacinth shaped flowers during May and June, fine for cutting. **WHITE—ROSY RED.** Either color. T. pkt. 10c; oz. 80c; lb. \$10.00.

PLANTS—Dictamnus Red, 2 year old plants. 3 for 50c, prepaid.

DIASCIA BARBERAE

Here is a real fine flower of extreme daintiness and elegance, that will be highly appreciated by every florist desiring to make a hit with a flower both unusually beautiful, dainty and rare. Flowers snapdragon like, small, very numerous, born on stout strong and perfectly straight stalks, foot long. In bloom in March to June if started from September to January, and from June to October if started in the spring. Fine rock plant and high class cut flower. Height 1 ft. Two colors: Rosy pink and salmon pink. **MIXED.** T. pkt. 15c; $\frac{1}{16}$ oz. 30c.

DIMORPHOTECA—NEW HYBRIDS

Flowers daisy-like, very showy, $2\frac{1}{2}$ inches across, suitable for bouquets, in shades of orange, buff, pink and salmon, through summer and fall. The flowers possess brilliant metallic lustre and are highly attractive. Will bloom in May if started end of February in a 45 degree house, and in December and January if started in August. Grow in shallow benches, space 8x10 in., or grow in 6-7 in. pots, several plants in each pot. Temperature 45 deg. Easily raised. Annual. Height 15 in. T. pkt. 10c; $\frac{1}{8}$ oz. 15c; oz. 80c; lb. \$10.00.

DIMORPHOTECA RINGENS—Glistening pure white flowers with a blue ring around the "eye," $2\frac{1}{2}$ in. across. Plants of compact growth, foot high. Annual. T. pkt. 15c; $\frac{1}{8}$ oz. 30c.

DOLICHOS—HYACINTH BEAN

A rapidly growing annual climber, flowering freely in erect racemes, followed by ornamental seedpods. Sweet scented. Sow seeds when weather is real warm. Space nine inches apart. Height 10 feet. Mixed. T. pkt. 5c; 1 oz. 15c; 1 lb. 90c.

BUSH DOLICHOS

A shapely, compact annual, bearing a profusion of pea shaped flowers in July and August on spikes 18 inches long, high class for bouquets. Sow the seed, when danger of frost is over, 3 feet apart. **WHITE, PINK, MIXED.** Any color: T. pkt. 10c; oz. 20c; lb. \$2.00.

DORONICUM

Beautiful, perfectly hardy perennials, excellent for cutting, bedding and highly profitable for spring sales. Easily raised from seed, which germinates readily. Sow from March to July. Plants of vigorous growth, thriving equally well in sun or shade. Placed under glass from middle of October to early in November will furnish bloom for Christmas and Easter. Temperature 45 deg. Divide the clumps every 3-4 years.

DORONICUM CAUCASICUM MAGNIFICUM—Extra large, daisy-like, golden yellow flowers, almost 4 inches across during April and May. Height 2 ft. 15 seeds 10c; 100 seeds 50c; 1,000 seeds \$3.75.

DORONICUM CLUSII—Large, daisy-like flowers of canary yellow during April and May. Height 2-3 feet. 15 seeds 10c; 100 seeds 50c; 1,000 seeds \$3.75.

DORONICUM PLANTAGINEUM EXCELSUM—Deep lemon yellow daisy-like flowers of great size on long stems from April to July. An exquisite cut-flower. Height 3-5 ft. 10 seeds 30c; 25 seeds 60c.

DRACANEA INDIVISA

For window boxes, hanging baskets or as a pot plant. An ornamental leaved plant with long, narrow, green foliage. Easily raised from seed which is sown in January in shallow boxes filled with a mixture of soil, sand and leaf mold. It is potted off in April and shifted to larger pots as required; must never be permitted to become pot bound. Lb. \$3.80; oz. 45c; T. pkt. 10c.

DRACANEA AUSTRALIS—Broad leaved variety, popular with many growers. Seed in berries, which must be rubbed out before sowing. T. pkt. 10c; oz. 45c; lb. \$3.80.

DRACANEA MAZELI—Similar to Indivisa. The foliage has a metallic lustre, each leaf marked with red. Magnificent. 100 seeds 40c; 500 seeds \$1.25.

DRYAS OCTOPETALA

An extra choice hardy perennial rock plant producing large, white, anemone like flowers in abundance in April and May. Must have well drained soil. Foliage evergreen. To prevent the foliage from having a scorched appearance the plants should be covered over winter with brush or corn stalks. Height 6 in. T. pkt. 30c.

DRACOCEPHALUM

DRACOCEPHALUM RUYISHIANUM JAPONICUM—Hardy perennial border and rock plant producing an abundance of blue flowers suitable for cutting from June to October. Height 18 in. T. pkt. 10c; oz. 60c.

DUSTY MILLER—See Cineraria Maritima and Centaurea Gymnocarpa and Candidissima.

EUSTOMA RUSSELLIANA

An elegant pot plant of neat, compact growth, producing in abundance large, deep purple, bell-shaped flowers with black centers and golden yellow stamens, perfectly stunning. Tender perennial. Height 20 in. Start the seed in spring, pot up early during summer. Shift as needed and finish in 3 in. pots in spring. Requires carnation temperature. Blooms in winter. 100 seeds 20c.

ERIANTHUS RAVENNAE

Plume grass. The plumes resemble pampas grass and are useful in dried bouquets. Easily raised in ordinary garden soil in sunny situation. Quite hardy. Height 4 to 7 ft. T. pkt. 10c; oz. 45c; lb. \$4.00.

ECHEVERIA—HEN AND CHICKEN

Beautiful plants desirable for bedding, carpeting, rockeries and pots. The foliage is thick and fleshy, a neat rosette fully as attractive as a flower. The color of these rosettes varies from green to white as well as red and pink and some species have a metallic lustre. The flowers are in shades of yellow, orange, red and white and last when cut for weeks, developing new flowers on the cut stalks.

DE SMETIANA—The leaves are thick and present a look as if they were covered with white powder. Particularly beautiful and desirable. Height 6 in. 25 seeds 10c; 100 seeds 30c.

ECHEVERIA MIXED—Our mixture contains many very fine species, ranging in height from 6 to 18 in. 25 seeds 10c; 100 seeds 30c; 1,000 seeds \$2.40.

ECHINOPS RITRO—GLOBE THISTLE

A rank growing hardy perennial, valuable for producing sub-tropical effects in the garden and furnishing flowers of bright metallic blue in large globular heads very striking and highly valuable for winter bouquets. Handsome foliage, deep green above, silvery beneath, in bloom from July to September. Height 3 ft. T. pkt. 10c; oz. 45c.

ERIOPHYLLUM CAESPITOSUM

A wonderfully showy, hardy perennial with velvety gray foliage and large, golden yellow, double, aster-like flowers in May and June; unexcelled for dry border and rockery. Height 10 in. T. pkt. 25c; 1/16 oz. 40c; 1/8 oz. 75c; oz. \$5.00.

EDELWEISS NEW HYBRIDS

LEONTOPODIUM AMRHEINS HYBRIDS—Hardy perennial bedding, rock and pot plant of vigorous growth producing flowers 2-3 inches across on long strong stems in June and in July. Flowers white, thick and velvety lasting for years when dried. Easily raised from seed. Requires well drained sandy soil and full exposure to the sun. Will bloom in May if gently forced. Seed very fine, sprouting in 3-6 weeks from date of sowing. Height 8 in. T. pkt. 30c; 1/64 oz. 85c.

LEONTOPODIUM SIBIRICUM—Extra hardy variety. Large, fine, velvety white flowers from June to August. Requires dry and sunny position and soil rich in lime. Height 9 in. T. pkt. 30c; 1/32 oz. 70c.

ERINUS ALPINUS

Hardy perennial rock and pot plant producing in May and June numerous racemes of dainty small, violet-red flowers. Easily raised. Sow in flats later pot up singly. Thrives in almost any soil in full sun or partial shade. Must have perfect drainage. Height 6 in. T. pkt. 25c.

ERYSIMUM ORANGE GEM

Of a true orange color, brilliant and vivid, a color rarely seen in nature. Resembles in formation of bloom true wall-flower. Can be sown late in autumn, just before hard frosts or early in the spring. Blooms 10 weeks from date of sowing, stays in bloom for two months. A fine flower for bouquets. Modern and popular in Europe. Annual. Height 2 ft. T. pkt. 10c; 1/8 oz. 15c; oz. \$1.00.

ERYSIMUM

Splendid early flowering hardy perennials little known yet, very much worth growing. Easily raised from seed, dependably hardy if planted in well drained and rather dry soil. Fine for bouquets and excellent for rockeries.

ERYSIMUM PULCHELLUM—Produces a wealth of bloom in May and June. Flowers sulphur yellow. Height 6-12 in. T. pkt. 10c; 1/8 oz. 15c; oz. 80c.

ERYSIMUM RUPESTRE AURANTIACUM—Of striking beauty, flowers of true orange color during May and June. Height 12 in. T. pkt. 15c; 1/16 oz. 25c.

ERYNGIUM AMETHYSTINUM

A real curiosity amongst flowers. Useful for winter bouquets. The plants grow about 30 inches high and bear lilac blue, odd looking flowers. Hardy and easy to raise. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.00; lb. \$6.00.

ERYNGIUM AGAVEFOLIUM—Produces extra large, globular ivory-white heads. When bronzed is a real ornament in a winter bouquet. Height 30 in. T. pkt. 15c; 1/8 oz. 25c.

EREMURUS

The plants grow 5-6 feet tall, the great flower stalks are crowned with spikes of flowers 2 to 3 feet long and are a sight not easily forgotten. Hardy perennial, lasting for many years. The seed lays from 10 to 12 months before it sprouts. Sow the seed in flats, cover with moss, water when needed. You will wait for results but when these do come, they will be worth while. You can sell your plants at from \$1.00 to \$3.00 per plant and there will be plenty of calls.

EREMURUS HIMALAICUS—Long spikes of white flowers in June, July and August. The hardiest of all Eremurus. Height 6 ft. 50 seeds 20c; 100 seeds 35c; 1,000 seeds \$2.00.

EULALIA JAPONICA Ornamental Grass, very handsome as single specimen or in groups. Height 4 to 9 ft., depending on how rich the soil. Hardy with protection. T. pkt. 10c; oz. 50c.

ESCHSCHOLTZIA—CALIFORNIA POPPY

Of low spreading growth, excellent as border plants or in masses. Sow the seeds where the plants are to remain, thin out to a foot apart, if you fail to do this you will get no blooms. Does splendidly in our climate and grows readily from seed. Annual. Height 10 inches. Special Mixture: T. pkt. 10c; 1 oz. 45c; lb. \$4.60.

ESCHSCHOLTZIA MOGUL An extra choice variety of erect, dwarf, compact growth, unexcelled for groups, borders and of the highest value for covering graves. Thrives in any kind of soil and is a mass of bloom from May to October. Color orange, shaded crimson. Height 12 in. T. pkt. 10c; oz. 40c; lb. \$4.00.

EUPHORBIA

HETEROPHYLLA—(Mexican Fire Plant). An annual resembling hot house poinsetta. The plants are of branching bush like form, with smooth, glossy foliage. About midsummer the center top leaves of each branch turn a vivid orange scarlet. Plant in rich soil and a sunny location about 9 inches apart. Height 2 to 3 feet. T. pkt. 5c; oz. 40c; lb. \$4.00.

VARIEGATA—(Snow on the Mountain or Mountain Spurge). Plants 2 feet high with beautiful foliage veined and margined with white. Annual. Height 2 feet. T. pkt. 5c; oz. 40c; lb. \$3.50.

EUPHORBIA MYRSINITES—If you are looking for something odd, quite out of the ordinary, a plant possessing beauty and charm, try this Euphorbia. A trailing plant laying flat on the ground but not rooting itself. Its branches, only about two feet long, with clean grayish green, sharply cut foliage, spread from the center in a star-like formation and are an attraction in beds or in the rockery from spring till frost. Height 4 inches. T. pkt. 15c; 1/8 oz. 30c; oz. \$2.00.

EUPHORBIA OBESA

Cactus-like plant, globe shaped, striped red in a marvelous fashion. Very choice, rare, plants selling at sight. 10 seeds \$1.00.

EUPHORBIA COROLLATA

Hardy perennial, in bloom during August and September. "It is a native or "wild" flower but one of uncommon beauty and highly useful as it comes right after hardy Gypsophylla is out of bloom. Of same usefulness as Baby's Breath, flowers snow-white in large clusters a very elegant flower. Height 3 ft. T. pkt. 20c; 1/8 oz. 40c.

EUPHORBIA POLYCHROMA—An uncommon very beautiful easily raised hardy perennial rock plant forming compact half globes covered with golden yellow bloom in May and April. The plants when in bloom sell at sight. Height 16 in. T. pkt. 30c.

EUPATORIUM FRASERI

Hardy perennial valuable for cutting. Flowers snow white, in clusters, neat and pretty from July to October. Of easy culture. Treat same as Stevia. Can be forced into bloom during winter. Also good for pots. Very floriferous. Height 2 ft. T. pkt. 10c; oz. 60c.

ERIGERON SPECIOSUS HYB. GRFL.

Absolutely hardy perennial of sturdy compact growth 3 ft. tall, bearing on single stalks 20 to 30 aster-like blooms about two inches across. The ray-like petals are in four layers around the small yellow disc making the flowers elegant and artistic. Good for cutting. In bloom during June and July and again very late in fall. T. pkt. 10c; 1/8 oz. 20c; 1 oz. \$1.20; lb. \$12.00.

ERIGERON ALPINUS—Very choice, most useful and dependable hardy perennial rock plant covered with single aster-like grayish flowers with purple eye from June to August. Extremely hardy, thrives in any soil. Height 8 in. T. pkt. 40c.

ERIGERON COULTERI—Thrives under gross neglect furnishing quantities of daisy-like, large single white flowers in May and June and will bloom first year from seed if started early. Perennial. tufted foliage, hardy, high class rock plant. Height 18 in. T. pkt. 15c; 1/8 oz. 40c; oz. \$3.00.

EVERLASTING FLOWERS MIXED—T. pkt. 10c; oz. 60c.

FESTUCA GLAUCA

Blue Fescue. A hardy perennial ornamental grass, forming dense cushion-like tufts of attractive blue-gray color, fine for rockeries and low borders. T. pkt. 10c; 1/8 oz. 20c; 1 oz. \$1.40.

FICUS ELASTICA

Rubber plant. Easily and inexpensively raised from seed which is small and germinates a month after sowing. Requires rich soil, mixed with sharp sand and some peat. Plants raised from seed are more robust than plants raised from cuttings. 100 seeds 35c.

FRANCOA GLABRATA

New. Half hardy perennial of easiest possible culture. Started early under glass will produce, during the summer months a number of elegant sprays of pure white flowers, exquisite for bouquets and flower work. Height 30 in. T. pkt. 15c; 1/16 oz. 35c.

FELICIA BERGERIANA

An annual with neat turf like foliage producing a wealth of daisy like, brilliant ultramarine blue flowers over a long period. A flower of great beauty, high class for pots and rockeries. Height 6 in. T. pkt. 25c.

FERN SPORES

Fresh spores saved from best and choicest greenhouse varieties. **FINEST MIXED.** T. pkt. 25c; 1/64 oz. \$1.00.

FUCHSIA HYBRIDA

An excellent house plant, and fine for shady places, where few other plants will answer. They make a flowering plant from seed in less than a year and come true from seed. Half hardy perennial, will stand slight frost. Do not grow them in a warmer house than 50 degrees at night.

We offer seed of true hybrids, saved from a collection of choicest new varieties, mostly double. 20 seeds 20c; 100 seeds 70c.

FOUR O'CLOCK—Pkt. 5c; oz. 10c; lb. 80c.

FREESIA

Highly paying as a cut flower and pot plant. For pot culture, place 6-8 small bulbs in a 4 in. pot, using rich sandy loam. For a crop of cut flowers plant the seed in benches with 6-8 in. of soil in a cool house as close as possible to the glass, in rows 8 in. apart and an inch apart in the rows, covering the seed lightly. When the plants get 2 in. high, apply weak liquid manure liberally, keep shaded on hot sunny days, give plenty of ventilation (this is very important) and maintain a temperature of 40 to 45 degrees. You will raise from seed in 4 to 5 months a perfect crop of flowers of better grade than you can from bulbs and you are sure of success provided you will ventilate, grow them cool and not too far from the grass. Make successive sowings from August to February.

REFRACTA ALBA—Pure white, fragrant flowers. Height 1 ft. T. pkt. 10c; oz. 45c; lb. \$4.00.

NEW HYBRIDS (Ragioneri)—The flowers comprise shades of pink, blue, orange, red, etc., often delicately spotted and veined. T. pkt. 20c; 1/8 oz. 30c; oz. \$2.00.

FREESIA TUBERGENI—Most valuable strain, flowers extra large, of extraordinary firmness in many brilliant colors. T. pkt. 15c; 1/8 oz. 40c; oz. \$2.80.

GAILLARDIA—BLANKET FLOWER

Both the annual as well as perennial varieties are first class cut flowers and they produce a most gorgeous effect in beds or borders. They bloom all summer till frost. Height 2 feet.

ANNUAL GAILLARDIAS

LORENZIANA DOUBLE MIXED—Annual. Very valuable as a cut flower producing large blooms in many colors on long stalks that last a long time in water. T. pkt. 5c; oz. 40c; lb. \$2.90.

GAILLARDIA INDIAN CHIEF—Although an annual it is of value to the florist. Plants of compact growth 20 in. high, flowers single of perfect form and of deepest metallic mahogany red color that takes the eye, from July to frost. Fine for bedding and cutting. T. pkt. 10c; oz. 60c.

PERENNIAL GAILLARDIAS

GAILLARDIA GRFL. NEW HYBRIDS—These hybrids embrace varieties with flowers of mammoth proportions both single and semi-double. The colors are pure yellow, brilliant crimson, crimson edged white, blood red bordered yellow, brownish crimson, etc. All these are absolutely hardy of easiest culture, doing well and producing quantities of large splendid colored blooms in any kind of soil, from June till frost. First class cut flowers lasting in water a week or more. T. pkt. 10c; 1/8 oz. 15c; oz. 80c; lb. \$9.00.

GAILLARDIA PORTOLA—The petals are vivid scarlet, marked at the tips with a most attractive shade of deep yellow, in a clearly defined circle. A first class flower. T. pkt. 10c; 1/8 oz. 15c; oz. 80c; lb. \$9.00.

GAILLARDIA BURGUNDY—Of all hardy perennial Gaillardias, Burgundy is the most showy. Flowers single 4 inches across, color a striking shade of copper red with a metallic lustre. Like other Grandiflora types blooms the same year if sown fairly early. T. pkt. 15c; 1 oz. \$1.20.

GAURA LINDHEIMERI—Hardy perennial, producing long spikes of pinkish flowers from June to October. Highly recommended by some horticultural writers as a cut flower. With us it falls far from the mark. May be all right in cool, cloudy climate. T. pkt. 10c; oz. 45c.

GAZANIA SPLENDENS HYBRIDA GRFL.—Half hardy perennial of dwarf and compact habit, bearing daisy like flowers with markings of brown, white, yellow and blue, very beautiful. Valuable bedding and pot plant. Easy to grow, blooms the first year from seed if sown early, will grow in the poorest soil and stand any amount of dry weather, blooming all summer till frost. Height 10 in. T. pkt. 25c.

GALEGA BICOLOR HARTLANDII

Hardy perennial, producing from May to September, quantities of pea-shaped, white and lilac flowers on long stalks, fine for cutting. Height 3 ft. T. pkt. 10c; oz. 60c.

GENISTA ANDREANA

A handsome variety of Scotch Broom, flowers yellow with dark crimson wings, shaped like those of sweet peas, borne on long, slender branches. Hardy with protection. Height 5 ft. T. pkt. 25c.

GENISTA HYBRIDA—Free flowering, robust growing perfectly hardy hybrids in pink, scarlet, buff and orange throughout summer. Sow early, pot off singly, set out where to stand, as the plants resent transplanting, late in summer. Seeds germinate unevenly, some sprout quickly, others lay for weeks before germinating. Height 4 ft. T. pkt. 40c.

GENTIANA ACAULIS

Flowers bell shaped, deep blue in May and June. Thrives in rich sandy soil and moist situation. The seed germinates slowly and unevenly. Height 4 in. T. pkt. 10c.

GENTIANA ANDREWSI—Bottle Gentian. Flowers clear blue to intense dark blue at tops of stems, in large clusters from June to September. Does well in any sandy and moist soil in partial, also in deep shade and exceptionally well when planted on margins of ponds and brooks. Dislikes lime. Seed germinates slowly. Absolutely hardy. Height 1 ft. T. pkt. 20c.

GERBERA—TRANSVAAL DAISY

Half hardy perennial easily forced into bloom during winter (night temperature 45-48, never more). Fine cut flower, unsurpassed in keeping qualities. Height 18 in.

Sow the seed in soil composed of sod loam, leaf mould, sand and some WELL decayed manure. Cover with a layer of one-quarter of an inch of soil and over the soil place a layer of sawdust or peat an inch thick. Soak the bed thoroughly and cover with burlap to preserve moisture. The seed will be "up" in 10-14 days. Leave plants in seed bed from 4 to 6 months, then transplant 8-12 inches apart each way. Keep the crowns above the ground. Keep the roots moist, crowns dry. Water once in 3 weeks when the ground is really dry and when you water, do so thoroughly. After every watering stir the top soil. Grow in deep benches. Solid beds are still better. NEVER use fresh manure. When cutting leave 3 inches of stem. Cutting closer than 3 inches means that the short stump dries in, reaches the crown and that ends the further growth of the plant. **SPECIAL MIXTURE**—Contains the French and German strains that have created a sensation in the floral world. 20 seeds 15c; 100 seeds 50c; 1,000 seeds \$3.50.

GERBERA SCARLET SHADES—20 seeds 30c; 100 seeds \$1.00; 1,000 seeds \$7.00.

DOUBLE GERBERA

The flowers are very large and full and include a wonderful range of beautiful colors such as cream, yellow, orange, scarlet, pink, salmon, purple and violet. Just as vigorous in growth as the single variety. 20 seeds 80c; 50 seeds \$1.75.

GESNERIA CARDINALIS

A handsome pot plant about a foot high, producing spikes of highly attractive flame-red flowers from Easter on if planted in heat in December. Should prove a ready seller being really beautiful and NEW. Culture same as for Gloxinia, however, Gesneria is much easier to raise than Gloxinia, it is more hardy. Pinch several times in order to get nice bushy plants. T. pkt. 25c.

GLOBULARIA TRICHOSANTHA

Globe Daisy. A dwarf, tufted, perfectly hardy perennial, with beautiful double flowers from May to July. Fine rock, bedding and pot plant. Does best in partial shade. Height 1 ft. T. pkt. 15c.

GLOXINIA

Sow the seed in November or December, prick the seedling into flats later pot singly. Use rich soil mixed with about one-third of sharp sand. During the summer keep the plants partly shaded and never water over the foliage. Gloxinias are easily raised and their large bell shaped brilliantly colored flowers are of astonishing beauty. The seed we offer contains the choicest strains of the gigantha and the new varieties with erect flowers. Special Mixture. T. pkt. 25c; 1/64 oz. \$1.75.

GLOXINIA REGINA HYBRIDA—(Sinningia). **IMPERIAL GLOXINIA**—Splendid robust growing, dark leaved hybrids, mostly erect flowered. T. pkt. 25c; 1/64 oz. \$1.75.

GEUM COCCINEUM

MRS. BRADSHAW—Hardy, perennial, easily raised from seed. Blooms profusely from June to August. Blooms resemble carnations; are large, half double, fiery scarlet. Height 24 inches. Do not hesitate to grow this flower; it is well worth while. T. pkt. 10c; 1/8 oz. 25c; oz. \$1.40.

GEUM LADY STRATHEDEN—Flowers rich golden yellow, very large and full, fine for cutting. Height 2 ft. T. pkt. 10c; 1/8 oz. 25c; oz. \$1.90.

GEUM BORISII—Flowers glowing orange-scarlet from June till late fall. Fine hardy perennial rock plant. Height 15 in. T. pkt. 15c; 1/16 oz. 30c; 1/8 oz. 50c; oz. \$3.60.

GEUM SIBIRICUM—Large lovely flowers, coppery-scarlet produced in great profusion during May and June. Height 1 ft. T. pkt. 40c.

GEUM HELDREICHII—Magnificent deep orange red flowers during May and June. Splendid rock plant. Height 1 ft. T. pkt. 40c.

GEUM is not dependably hardy with us but it will come through if protected over winter, with brush or similar coarse material.

GERANIUM

These grow easily from seed and produce blooming plants the first summer.

LARGE FLOWERING MIXED—This mixture includes the finest Zonale varieties with flowers of the most perfect form. T. pkt. 15c; 1/8 oz. 35c; 1 oz. \$2.00.

Gillia

Gillia Capitata is of the utmost value to the florist, producing on long stiff stalks, from June to September quantities of scabiosa-like flowers an inch across. The flowers have the so much desired quality of "standing up" when cut, in fact can be used dried in winter bouquets, retaining their beautiful color for months. Plants bushy, compact, of erect growth, foliage, feathery. A first rate flower from every viewpoint. Started in November blooms in March and in May if sown in January. Space in benches 8x8 in. Temperature 45 deg.

GILLIA CAPITATA BLUE Produces on long stiff stems large round flowers of attractive pale mauve color, very graceful. A cut flower of the highest class either fresh or dried. In bloom from June to September. Height 2 ft. Annual. T. pkt. 5c; oz. 25c.

GILLIA CAPITATA WHITE—Pure white, fine cut flower. T. pkt. 10c; oz. 60c.

GILLIA CORONOPIFOLIA Excellent cut-flower. Hardy biennial but sows itself, therefore as good as a perennial. Produces graceful, foot long spikes of a rich and rare shade of red on stout stalks 4 ft. long in May and June. Remarkably beautiful, greatly admired wherever seen. Sown in January or February blooms the same Autumn. Brought to market in full bloom will create a near sensation. The cut bloom sells "like hot cakes." T. pkt. 20c; 1/16 oz. 35c; 1/8 oz. 65c.

GILLIA MICRANTHA ROSEA—Of the greatest value for bedding, in sunny spots. Profuse bloomer, the neat compact growing plants are literally smothered with bloom from May to October. The flowers resemble single dahlias and are of a vivid rose pink color. Height 8 in. T. pkt. 10c; oz. 60c.

GOMPHRENA—BACHELOR'S BUTTON

A showy annual, everlasting with clover-like heads of different colors from July to October. Much used in both fresh and dried bouquets. Height 1 foot.

WHITE CRIMSON, PINK, ORANGE, MIXED. Any color: T. pkt. 5c; oz. 25c; lb. \$2.50.

GREVILLEA ROBUSTA—SILK OAK

Sow any time. For spring sales in June or early August transplant in 2 inch pots direct from the pans as soon as large enough to handle and shift on as required. This plant will stand more neglect than anything we know of, is cheaply raised requiring only very low temperature to keep on growing, and takes the place of Boston ferns and for window boxes there is nothing better. The foliage is fern like. T. pkt. 10c; oz. 60c; lb. \$6.00.

CLIMBING FOXGLOVE (*Lophospermum Scandens*)—A tender annual climbing plant of rapid growth bearing lovely pink flowers resembling foxgloves from July till frost. Height 10 feet. T. pkt. 15c; 1/16 oz. 25c.

GOURDS SPECIAL MIXTURE Contains choicest small as well as large varieties. Gourds are unexcelled for making bird houses and fancy original table lamps. T. pkt. 10c; oz. 15c; lb. \$1.50.

ORNAMENTAL GRASSES

MIXTURE—Contains only the best and most ornamental varieties both annual and perennial. T. pkt. 10c; oz. 45c.

See also: *Agrostis*, *Arundo*, *Briza*, *Coix*, *Cyperus*, *Erianthus*, *Eulalia*, *Lagurus*, *Pennisetum*, *Stipa*, *Trichoalaena*.

GODETIA

There are few plants more profitable to grow for spring sales than Godetia. Start in January-February and you will have blooming plants that will be greatly admired in April and May. The plants will find buyers very fast. Grow Godetia in POOR soil, say one part of rich soil and 3 parts of sand or sifted ashes and water VERY sparingly. That is the secret of success. Sown in April Godetias bloom from June to September. Try Godetias, if you will be not struck with its beauty, it will be past our understanding. Godetias are excellent cut flowers, pot plants and planted outdoors in sandy or gritty soil in a large bed will attract much attention.

SCHAMINI CARMINEA—Improved strain. Flowers double, resembling an Azalea. Rich pink with a strikingly fine carmine center easily the richest of the Godetias and the best florist cut flower. Height 2 feet. T. pkt. 10c; 1/8 oz. 15c; oz. 80c; lb. \$6.00.

Godetia Crimson Glow

GODETIA CRIMSON GLOW—Of close compact growth, flowers single, intense dazzling crimson. Height 10 inches. T. pkt. 10c; oz. 60c.

SWEETHEART—The very double, azalea-like flowers of brightest shell-pink completely hide the foliage of the plant. A grand variety. T. pkt. 15c; 1/8 oz. 25c; oz. \$1.80.

GODETIA MIXED—Choice named varieties, mostly double. T. pkt. 10c; 1/8 oz. 15c; 1 oz. 80c.

VERBENA VENOSA

Verbena Venosa can be used as a cut flower, for bedding, borders as a pot plant, for covering banks—can be marketed as a hardy perennial. Once established it multiplies fast. There are VERY few flowers as useful to the flower grower as this Verbena. See page 10.

MUST HAVE

perfect drainage when it comes to cactus. Poor to medium rich soil when it comes to Amaranthus. Godetias and Clarkias must have poor soil and kept thirsty, Blue Lace Flower must have some sand and a little of peat does it much good. Gypsophyla must have sunlight, never any shade, etc. There are many must haves, all are mentioned in cultural directions referring to each flower group. It is important to pay attention to these directions to avoid disappointment.

OUR TRADE PACKETS

are double the quantity of retail packets. Our packets are well filled with fresh seed of strong germination, strictly true to name. When it comes to quality our seeds are 100 per cent.

DAMPING OFF—This results from lack of ventilation. In all closed rooms there accumulates gas heavier than air called carbon dioxide. To prevent damping off, ventilate. In the greenhouse never place flats with seedlings on the bare ground, keep them on supports 6-12 inches high so that they will be above the carbon dioxide layer.

WET SOIL—Never put seed into wet soil. See to it that your flats and benches are well drained. In tight flats and benches the water cannot run off quickly, all the air in the soil is forced out, seeds suffocate and do NOT "come" up.

GYPSOPHYLA—BABY'S BREATH

The Elegans section are annuals, others are hardy perennials. Gypsophyla Elegans can be sown every two weeks from January up to the end of September producing highly valuable material. Do not sow Elegans in October and November as sowings in those two months produce NO flowers.

ELEGANS GRANDIFLORA—Large flowers, pure white, 8-9 petaled strain. T. pkt. 5c; oz. 15c; lb. \$1.20; 5 lbs. \$5.00, prepaid.

ELEGANS CARMINEA—Rich rose pink, fine for cutting. T. pkt. 5c; oz. 15c; lb. \$1.80.

ELEGANS DELICATE PINK—T. pkt. 5c; oz. 15c; lb. \$1.80.

GYPSOPHYLA PANICULATA SINGLE—Height 4 ft. T. pkt. 10c; oz. 45c; lb. \$4.00.

PANICULATA—F. pl. double. T. pkt. 15c; 1/8 oz. 30c; 1 oz. \$2.00.

GYPSOPHYLA REPENS—First rate perennial rock and border plant, completely covered with single, star shaped flowers from June till August. Height 6 in. **WHITE—ROSE**. Either color. T. pkt. 10c; 1/8 oz. 35c; oz. \$2.00.

GYPSOPHYLA OLDHAMIANA—Like the single Paniculata of more compact growth, in bloom when Paniculata is through blooming. Flowers pale pink to rich deep pink. Hardy perennial. T. pkt. 20c; 1/8 oz. 50c.

GYPSOPHYLA SNOWFLAKE New. Hardy Paniculata type that blooms four weeks ahead of the old type of perennial Gypsophyla. The flowers are pure white, double and our selected strain produces close to 90% of double flowers from seed. T. pkt. 30c; 10 pkts. \$2.75. **GYPSOPHYLA PACIFICA**—Of same usefulness and habit as Paniculata, in bloom when Paniculata varieties have passed. Flowers rose-pink. T. pkt. 20c; 1/16 oz. 30c; 1/8 oz. 50c; oz. \$3.40.

HEDYSARUM CORONARIUM French Honey-suckle — Flowers bright red, fragrant in long racemes suitable for cutting from June to August. Will bloom the first season if started early. Hardy with slight protection. Height 2-3 feet. T. pkt. 10c; oz. 45c; lb. \$4.00.

HELENium HOOPESI

A fine perennial about 30 in. high, flowers orange yellow, daisy-like, of elegant form, in bloom during May and June. T. pkt. 10c; oz. \$1.20.

HELENium RIVERTON GEM—Robust growing perennial, bearing quantities of daisy-like, reddish bronze flowers from July to October. Height 3 1/2 ft. T. pkt. 10c; oz. 80c.

HELENium BIGELOWI—Very large, daisy-like flowers, deep yellow, disc black, borne on long, stout stems during August, fine for cutting. Hardy. Height 3 ft. T. pkt. 15c; 1/16 oz. 30c.

Helichrysum

HELICHRYSUM—STRAWFLOWER

One of the best strawflowers. Flowers double, very large, making a first class cut flower. Gather the bloom when partially unfolded and suspend with their heads downward in a shady place. Hardy annual, blooming from June to October. Height 2 feet. **SILVER BALL**—white; **CRIMSON**; **GOLDEN BALL**—yellow; **CARMINE ROSE**; **PINK**; **VIOLET**; **SCARLET**; **FIREBALL**—red; **MIXED**. T. pkt. 10c; oz. 45c; lb. \$4.80.

HELIANTHEMUM ROTUNDIFOLIUM

Bears in profusion double flowers, glowing carmine rose in color from April to August. Extra good for rockeries and borders. Hardy with light protection over winter. Height 1 foot. T. pkt. 15c; 1/8 oz. 40c.

HELIOTROPE

Sow in January to March, pot off and shift as necessary. Will bloom in May or June. Make cuttings in July for winter flowers. Must have good drainage and never suffer from lack of water.

MAMMOTH MIXED—Tall growing varieties with large strongly perfumed flowers. Height 2 ft. T. pkt. 15c; 1/8 oz. 20c; oz. \$1.20.

QUEEN MARGUERITE—This is the finest dwarf extra large flowered, strongly scented variety, with deep blue flowers. T. pkt. 15c; 1/8 oz. 20c; oz. \$1.20.

HELIOTROPE FLORINA—Extra dwarf only 15 inches tall, flowers large, fragrant, light blue. T. pkt. 15c; 1/8 oz. 25c.

HELIOPSIS LEMONI

Hardy perennial of neat compact growth, flowers golden yellow, daisy-like semi-double 4 inches across from July to October. Extremely floriferous drought and heat resisting. Good for cutting. Height 30 in. T. pkt. 20c.

HELIOPSIS SCABRA GRATISSIMA—Flowers deep orange yellow, almost double. In bloom all summer. Height 2 1/2 ft. T. pkt. 10c; 1/8 oz. 20c.

HESPERIS NANA CANDIDISSIMA

In bloom April-May, plants of compact bushy growth covered with glistening snow-white fragrant bloom. Fine cut flower and pot plant. Perennial, hardy with slight protection. Height 20 in. T. pkt. 10c; oz. 80c; lb. \$8.50.

HESPERIS MATRONALIS—Evening Scented Stock. Hardy perennial 2-3 ft. tall, bearing in abundance large flat heads of single stock-like flowers from May to August. **PURPLE, WHITE, MIXED**. Any color. T. pkt. 10c; oz. 45c; lb. \$4.00.

HESPERIS NIVEA—An especially choice perennial 18 in. tall, flowers white, double, fragrant and as cut flower extremely desirable. Blooms in May. T. pkt. 20c; 1/8 oz. 80c.

HELIOPHILA LINEARIFOLIA

New. An exceedingly graceful annual, much branched, with succulent foliage. Flowers borne in slender racemes widely spaced along the stem of bright porcelain blue with white eyes. Sown in September will bloom from February onwards. Three plants grown together in a 5 inch pot produce a striking effect. A fine pot and border plant. Outdoors blooms from June to October. Height 1 ft. T. pkt. 20c; 1/16 oz. 35c.

HERNIARIA HIRSUTA—Thrives in the poorest soil, forming a solid cover of moss like dense foliage in places where grass will not grow, like under and close around trees, etc. Annual but sows itself, therefore as good as a perennial. Fine for tying loose sandy soils. Not good for deep shade. Flowers very small, greenish white. T. pkt. 10c; oz. 60c.

HIERACIUM VILLOSUM

Hardy perennial that will make money for its grower because in bloom in May and June. The bright canary yellow blooms are very double, the size of a half a dollar piece, the leaves are sparkling silvery gray, quite attractive. Perfectly hardy, of vigorous growth, easily raised from seed. Height 12 in. T. pkt. 15c; oz. \$1.00; lb. \$10.00.

HEUCHERA SANGUINEA—CORAL BELLS

This is one of the finest hardy perennials with red flowers, excellent for bouquets, blooming from early spring till frost. Does well in full sunlight as well as when partially shaded. The color is a vivid shade of coral red, perfectly charming. Height 2 ft. T. pkt. 20c; 1/16 oz. 35c; 1/8 oz. 65c.

HEUCHERA SANGUINEA SPLENDENS—Flowers bright vermilion red. Superbly beautiful. High class cut flower and rock plant. Height 2½ ft. T. pkt. 20c; 1/16 oz. 40c.

HEUCHERA HYBRIDA GRANDIFLORA—Large flowering. Very choice cut flower. Many colors from white to glowing crimson. Height 2½ ft. T. pkt. 20c; 1/16 oz. 40c.

HIBISCUS—MALLOW MARVELS

Robust growing, hardy perennials producing in July and August on long branches, beautiful cup-shaped flowers of immense size seven inches across. For store decoration, for maximum effect and to show the public something out of ordinary there is nothing better than Mallow Marvels. Height 6 ft. T. pkt. 10c; oz. 60c; lb. \$6.00.

HOLLYHOCK

DOUBLE WHITE, DOUBLE BLACK, DOUBLE PINK, DOUBLE BRIGHT RED, DOUBLE YELLOW, DOUBLE MAROON, DOUBLE MIXED. Any of the above: T. pkt. 10c; 1/8 oz. 15c; oz. \$1.00; lb. \$12.00.

HOLLYHOCK EXQUISITE

New and very superior. The flowers are extra large, fringed and curled, very double with white margined petals in various shades of pink, rose, claret, violet and purple. T. pkt. 15c; 1/8 oz. 25c; oz. \$1.60; lb. \$20.00.

HOLLYHOCK TRIUMPH—Of branching habit, 5 ft. tall, studded with waved and fringed double flowers which appear in as many as 45 distinct colorings. Blooms 10 days ahead of other hollyhocks. T. pkt. 20c.

HOLLYHOCK IMPERATOR—Flowers 6 to 7 inches across, having a very broad "collar" of frilled and beautifully fringed petals and double centers two inches across in a wide range of colors. Branching habit. Height 5 ft. T. pkt. 20c.

HYPERICUM ORIENTALE

Highly desirable hardy perennial rock and border plant producing large, cup shaped flowers of intense bright yellow. The petals of the flowers seem to be made out of gold and a genuine pleasure is derived by growing this plant. Blooms all summer. Does best in light, warm, sandy soil in a spot where the noon sun will not reach it. Easily raised from seed. Height 9 in. T. pkt. 15c; 1/16 oz. 25c.

HUNNEMANIA—TULIP POPPY

Very showy hardy biennial treated as an annual with beautiful feathery glaucous foliage producing tulip shaped flowers with crinkled satiny petals 3 inches across on stout stems foot long, from early spring to frost. The flowers last two weeks in water and several days out of water. Plants of bushy growth from 30 to 36 in. tall. If you happen to have room in a cold house during January, sow in rows 3 in. apart, thin out to 3 in. in the rows for a crop of flowers that will be ready 6 weeks after sowing and salable in any market. Cut the bloom when partly open. Give rich, well-drained soil. Like other Papaveraceae Hunnemanian is not easy to transplant.

HUNNEMANIA FUMARIAFOLIA—Bright yellow. T. pkt. 10c; oz. 45c; lb. \$4.00.

HUNNEMANIA SUNLITE—Flowers canary yellow, semi-double tulip shaped high class for cutting. Sunlite has a row of petals on the outside instead of the inside, making the flowers appear open at all times. T. pkt. 15c; 1/8 oz. 25c; oz. \$1.80.

ICE PLANT

Mesembryanthemum Cristallinum—Suitable for rock work, hanging baskets, etc. Foliage thick, frosted and wax-like. Easily grown from seed sown from March to May. Half hardy annual. Height 6 inches. T. pkt. 10c; oz. 45c; lb. \$3.00.

IMPATIENS SULTANI

Easy to raise from seed and indispensable for window boxes and bedding also as a house plant, as they will bloom profusely even in the darkest shade, where hardly anything else would grow let alone bloom. The flowers are waxy like. Brilliantly colored in all shades of red. Plant 10 inches apart. Height 18 inches. T. pkt. 15c; 1/32 oz. 30c; 1/8 oz. 80c.

INULA—ELECAMPANE Hardy perennial plants of easiest culture, bearing fine flowers in various shades of yellow from June till frost. Splendid cut flowers.

INULA GRANDIFLORA—Gold Marguerite—The plants 3 ft. high, bear in June quantities of golden yellow flowers 5 inches across. T. pkt. 15c; 1/8 oz. 40c; 1 oz. \$2.80.

INULA ROYLEANA—Splendid flowers deep orange yellow. Height 2 ft. T. pkt. 15c; 1/8 oz. 40c; oz. \$2.80.

IPOMEA HEAVENLY BLUE

Starts the seeds in pots in March and plant outdoors when danger of frost is past. A rapid grower, bearing as many as 200 beautiful sky blue flowers at a time, enormous in size, fully 5 inches across. A single vine will cover a space of 20 feet wide and 50 feet high. If you sell flowers and appreciate the value of talk about beautiful flowers on your premises, plant Heavenly Blue. Does not seed itself and will never become a pest like the common morning glory. T. pkt. 10c; 1/8 oz. 10c; oz. 60c; lb. \$7.00.

GIANT MOONFLOWER, I. NOCTIFLORA

Very showy of the annual climbers, easily reaching a height of 25 or 30 feet. At night and during dull days the plants are covered with large, pure white fragrant flowers. 5 to 6 inches in diameter. T. pkt. 10c; oz. 30c; lb. \$3.20.

IPOMEA ROCHESTER—Rochester Morning Glory. Flowers deep blue with a wide white band around the edges. Splendid. T. pkt. 10c; 1 oz. 45c; lb. \$4.00.

MORNING GLORY MIXED—T. pkt. 5c; oz. 10c; lb. \$1.00.

IPOMEA IMPERIALIS—Japanese Morning Glory. The flowers are of gigantic size, streaked, marbled, mottled, striped and bordered in wonderful fashion and sometimes show rare markings of ash-gray bronze, terra-cotta, brown and slate blue. In variety of colors, large size of blooms, no other strain can equal our Special Mixture. T. pkt. 5c; oz. 15c; lb. \$1.40.

ISATIS GLAUCA

Perfectly hardy perennial 2 ft. high, producing in June quantities of flowers in panicles, of bright yellow color, useful in arrangement with other flowers. T. pkt. 10c; oz. 45c.

ISOLOMA MULTIFLORA

Produces quantities of large, fiery-red flowers from October to April, grows from 12 to 18 in. high, the foliage is dark green covered with brownish-red hair and very attractive. Requires same culture as Gloxinia but much easier raised as it is not nearly as tender as Gloxinia. In fact it is the easiest raised pot plant and will withstand much neglect. T. pkt. 35c.

IPOMEA HEAVENLY BLUE—There is no other climber that produces such gorgeous display of color. In chilly weather the flowers assume a pinkish tint but are a glory in blue again with warmer weather returning. When your flowers turn pink do not write us a sarcastic letter. They turn pink because that is a natural trait of that plant.

Kochia

KOCHIA—SUMMER CYPRESS

An annual forming a close dense plant, about 30 inches high; has fine feathery foliage of rich, deep green which turns bright red in fall. Used for temporary hedge or in groups; also single plants. Plant 18 inches apart. T. pkt. 5c; oz. 15c; lb. \$1.00.

JERUSALEM CHERRY—See *Solanum Capsicastrum*.

LATHYRUS LATIFOLIUS—Everlasting Pea

Hardy perennial climber furnishing high class flowers good for any kind of flower work from June to October. White Pearl is extra large flowered and extra good.

LATHYRUS WHITE PEARL — **LATHYRUS PINK BEAUTY** — **BRIGHT DARK RED—FINEST MIXED**—Any color: T. pkt. 10c; oz. 45c; lb. \$4.60.

JACK IN THE PULPIT

An unusual plant with calla-like bloom, green and purple in color with a large club-shaped spadix over which leans an arching spathe. Valuable to advertise yourself in an original way. Blooms in May and June, placed in a show window will create interest, comment and sales. Easily raised from seed. Sow in rich soil in a shaded bed, pot up late in fall, place under glass in February and in your window when in bloom. Hardy perennial. Height 15 in. 15 seeds 10c; 50 seeds 25c.

JAPANESE IRIS

Beautiful, large, gracefully formed flowers in many colors and perfectly hardy if planted deep, the crown covered with 2-3 inches of soil and given slight protection over winter. Easily raised from seed. **MIXED**—T. pkt. 10c; oz. 60c; lb. \$5.00.

SIBERIAN IRIS—Produces in abundance large, gorgeously colored blooms on long, slender but stiff stalks, during May and June. Unlike the German Iris, Siberian is unexcelled for bouquets and if cut in bud can be shipped and easily handled. Our mixture contains many varieties, the finest like Emperor, Perry's Blue, etc., included. Hardy anywhere if planted deep. Height 3 to 5 ft. T. pkt. 10c; oz. 60c; lb. \$7.00.

IRIS DICHOTOMA—Night blooming Iris, producing lilac-pink flowers in great quantities during August and September. Blooms second year from seed which germinates readily. Hardy perennial. Height 3 ft. T. pkt. 10c; oz. 60c; lb. \$8.00.

LAGURUS OVATUS—Hare's Tail Grass

Bears large, egg-shaped satiny heads, suitable either fresh or dried for bouquets. Annual. Height 1 ft. T. pkt. 10c; oz. 45c; lb. \$4.00.

LANTANA

This is a showy bedding and basket plant of rapid growth, fine for pot culture in the winter or garden decoration in the summer. Verbena-like heads of orange, white, rose and other colored flowers. Tender perennial. Height 1 to 2 feet.

Compact growing dwarf hybrids in all colors. T. pkt. 10c; oz. 60c; lb. \$5.00.

LAVANDULA—LAVENDER

Perennial, hardy if planted in a well drained spot with some protection over winter. Fragrant lavender-blue flowers that retain their fragrance even when dried and produced in June and July. Height 1 ft.

LAVENDULA SPICA—False Lavender. T. pkt. 5c; oz. 25c; lb. \$1.50.
LAVENDULA VERA—True Lavender. T. pkt. 10c; oz. 45c; lb. \$4.00.

LARKSPUR HYACINTH FLOWERED

Produces fine long spikes with few or no laterals. The massive spikes are 18 in. in length and fully 2 in. through. Should be planted close. Under glass space the plants six inches apart across the bench and three inches apart in the rows. Ready three weeks earlier than the larger growing Tall Stock Flowered kind. Height 4 ft. **VIOLET-BLUE, ROSE-PINK, WHITE, LILAC, MIXED.** Either color: T. pkt. 10c; oz. 45c; lb. \$4.20.

Annual Larkspur

In the greenhouse grow in a temperature as near as possible to 50 degrees. It will then produce finer and more flowers, than when grown in the open. Given rich soil and full sunlight, it will grow 5 feet tall and bear great numbers of heavy spikes. It will yield much greater number of spikes if the terminal stalk is cut out when the plants are about 6 in. high. To get the flowers for Decoration Day, sow in December or early in January and give plenty of light and avoid cold drafts to prevent mildew. In the open, sow the seed when the apple is in bloom and set the plants 10 inches apart. The seed we offer is unsurpassed in quality. Blooms in June to September.

DOUBLE STOCK FLD. LARKSPUR **WHITE, BRIGHT ROSE PINK, BLACK BLUE, DARK BLUE, EXQUISITE PINK, LILAC, LUSTROUS CARMINE, NEWPORT PINK, ROSY SCARLET, SHELL PINK, SKY BLUE, AGERATUM BLUE, ROSAMOND,** pure rose, **MIXED**—Any of the above. T. pkt. 10c; oz. 45c; lb. \$4.20.

GIANT IMPERIAL LARKSPUR

Produces extra large, well placed flowers, the plants grow compact, branching out close to the ground. Showy, free flowering type of unsurpassed elegance. Height 4-5 feet.

BLUE SPIRE—Intense Oxford Blue.

CARMINE KING—Deep carmine rose.

DAINTINESS—Delicate lavender.

EMPRESS ROSE—Soft salmon rose.

EXQUISITE PINK IMPROVED—Flowers very large, soft pink, shaded salmon.

EXQUISITE ROSE—The large double flowers are of bright rose-pink color.

LILAC SPIRE—Beautiful shade of lilac.

MISS CALIFORNIA—Produces magnificent spikes of rich deep pink on salmon ground.

LA FRANCE—Pleasing salmon pink.

LOS ANGELES—Brilliant rose on salmon ground.

WHITE SPIRE—Pure white, extra large and double.

ANY OF THE ABOVE—T. pkt. 10c; 1/3 oz. 15c; oz. 80c; lb. \$10.00.

GIANT IMPERIAL LARKSPUR MIXED—Contains every variety listed in proper proportion. **ANY VARIETY**: T. pkt. 10c; 1/3 oz. 15c; oz. 80c; lb. \$10.00.

DWARF LARKSPUR DOUBLE MIXED—Many colors. In bloom May-June. Height 18 in. T. pkt. 10c; oz. 45c; lb. \$4.20.

LARKSPUR ROSAMOND—Fully double, stock flowered new Larkspur in an entirely new color, namely bright rose, a deeper shade than in the old variety Bright Rose. The flowers do not fade. They are born on long stems, the spikes heavily covered with fully double bloom produced two weeks earlier than other Larkspurs. Plants of uniform height, 4 ft. tall. T. pkt. 20c; 1/3 oz. 35c; oz. \$1.20.

OUR TRADE PACKETS

are double the quantity of retail packets. Our packets are well filled with fresh seed of strong germination, strictly true to name. When it comes to quality our seeds are 100 per cent.

Hardy Lilies

All lilies are easily raised from seed that must be covered very lightly and which can be sown either in the spring or late in summer. The seed germinates readily. Auratum Lily makes no growth above the ground, the first year from seed, however the bulbs begin to form soon after the seed is sown but the leaf growth appears the following spring. All lilies must have perfect drainage, fresh manure must be strictly kept away from all of them. They will be benefited if you add leaf mold to the soil, also by placing the bulbs on cushions of sand but will do well without any help in any good WELL drained garden soil.

LILIUM AURATUM—Large white flowers with broad bands of golden-yellow. T. pkt. 15c; oz. \$1.00; lb. \$12.00.

LILIUM BACKHOUSEI—An exceedingly fine race of garden lilies of robust growth producing large, star-shaped flowers in pink, yellow and orange, spotted and marbled in a wonderful fashion. Height 5 ft. T. pkt. 50c.

LILIUM CONCOLOR—One of the best lilies, thrifty and easy to grow. Of upright habit flowers open, fiery scarlet spotted dark red, fine for cutting. Hardy. Height 18 in. Blooms in June-July, likes the sun and a situation protected from strong winds. Also fine for pots. T. pkt. 20c; 1/16 oz. 40c; 1/8 oz. 70c; oz. \$5.00.

LILIUM EARLY QUEEN—Perfectly hardy producing from seed, sown in February, quantities of long trumpet-shaped and perfect flowers from August to frost. A sure money maker for the florist. Height 3 ft. T. pkt. 20c; 1/16 oz. 30c; 1/8 oz. 55c; oz. \$4.00.

LILIUM HENRYI—T. pkt. 20c; oz. \$4.60.

LILIUM JAPONICUM—One of the most attractive in the genus. Blooms 3-5 inches long, white on the inside, pink on the outside, fragrant. Height 2-3 feet. T. pkt. 15c; 1/8 oz. 20c; oz. \$1.40.

LILIUM PHILIPENSE FORMOSANUM

A new lily of refined elegance and neat habit of growth, coming into bloom late in June. The very handsome, long, trumpet-shaped flowers are white inside and reddish over the back of the sepals. Moderately fragrant. Hardy. Height 30 in. T. pkt. 15c; 1/8 oz. 25c; oz. \$1.60; lb. \$16.00.

LILIUM REGALE Easily and almost as inexpensively raised as radishes. T. pkt. 10c; oz. 60c; lb. \$8.00.

SPECIOSUM RUBRUM—Hardy. Large fragrant white flowers shaded pink, spotted brilliant carmine-red, blooming in August and September. Height 3 ft. T. pkt. 10c; oz. \$1.00.

LILIUM SULPHUREUM—The flowers are trumpet-shaped sulphur-yellow. Stems tall, wiry. Blooms in late August and September and is one of the last trumpet-shaped lilies in flower. Height 6-8 ft. **CULTURE**—Requires rich loam, good drainage and a covering of 6 in. of soil over the tops of bulbs. Over winter protect with a layer of about 3 in. of straw or hay. T. pkt. 50c.

LILIUM TENUIFOLIUM—Coral Lily. A dwarf growing lily, blooms medium in size, coral red, appearing in great numbers on stalks 2 feet tall. Hardy, easily raised from seed, a fine cut flower and excellent for rockeries. Can be forced. Grown in the open, blooms during May and June. T. pkt. 10c; 1/8 oz. 15c; oz. 80c.

TENUIFOLIUM GOLDEN GLEAM—New. Flowers rich orange-yellow in May and June. Comes true from seed. Height 2 ft. T. pkt. 25c; 1/16 oz. 45c; 1/8 oz. 75c; oz. \$5.50.

TENUIFOLIUM LILAC QUEEN—Fragrant lilac-rose flowers spotted wine color in May and June. Height 2 ft. (L. Cernuum). T. pkt. 15c; 1/8 oz. 35c; oz. \$2.20.

LILIUM WASHINGTONIANUM—Flowers funnel-shaped, pure white, dotted with purple at the throat. Fragrant. Of striking beauty, one of the finest of all lilies. Hardy. Easily raised from seed. Blooms in June and July. Requires good drainage, bulbs should be planted 5 inches deep and laid sidewise. T. pkt. 25c; 1/16 oz. 35c; 1/8 oz. 65c; oz. \$4.00.

LILIUM EARLY QUEEN—Furnishes a crop of highly valuable flowers late in summer, from seed sown in February, March and early in April. We got the best results by sowing the seed in the open early in the spring, leaving the plants stand where sown. When we transplanted the bulbs they lived one season only and then said goodbye. When we stored the bulb over winter the bulbs did not keep. Yet this Lily is a good "Queen" if sown where to stand and not transplanted. We find that it is perfectly hardy. Even bulbs that rest on top of the ground absolutely uncovered come through the winter unharmed.

LIATRIS—GAY FEATHER

Excepting *Liatris Scariosa* all other varieties, in order to produce beautiful, shapely spikes of bloom must be grown in poor soil or if your soil is rich the plants must be crowded so that they will suffer from lack of moisture and nourishment. Given care and rich deep soil they grow to rank.

LIATRIS CALLILEPIS—Same as *Pycnostachya*, but 3 weeks earlier. Height 3 ft. T. pkt. 10c; 1/8 oz. 30c; oz. \$2.00.

LIATRIS PYCNOSTACHYA—Every flower grower will gain by growing this showy, hardy perennial. Blooms during July and August, produces elegant purple flowers, spikes foot long or over. High class cut flower either fresh or dried. Requires full exposure to sun and thrives in any kind of soil, either dry or wet. Height 5 ft. T. pkt. 10c; 1/8 oz. 15c; 1 oz. \$1.00; lb. \$14.00.

LIATRIS SCARIOSA—Spikes of purple flowers foot long on stalks 2 feet tall in August and September. T. pkt. 10c; 1/8 oz. 25c; oz. \$1.60; lb. \$18.00.

LIATRIS SPICATA—Produces in July and August, spikes of purple flowers, resembling miniature thistle blooms, closely and well placed on the stalks. Height 30 in. T. pkt. 20c; 1/8 oz. 30c; oz. \$4.00.

LINARIA BELVEDERE HYBRIDS

Try this *Linaria*. It is a real flower, very beautiful, of elegant shape, the colors which are many even more lustrous and clear than those of *Nemesia*. Blooms in May, June and July, therefore valuable for spring sales. Also first class cut flower. Easily raised. Annual. Height 15 in. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.50.

LINARIA CRIMSON AND GOLD—Beautiful cut flower, flowers dark crimson with golden yellow lips. Annual. Height 15 in. T. pkt. 10c; 1/8 oz. 35c.

LINARIA FAIRY BOQUET—Very compact plants, bearing snap-dragon-like flowers in many delicate and attractive colors in abundance from June to October or earlier if sown early. Fine bedding and pot plant. Annual. Height 10 in. T. pkt. 15c; 1/16 oz. 30c.

Annual *Linarias* started from seed from August to January will bloom from February to the end of June. Grow in flats 2x2 in., temperature 45 degrees.

PERENNIAL LINARIA

LINARIA CYMBALARIA—Kenilworth Ivy. Hardy perennial trailing plant, excellent for hanging baskets, window boxes, pots and rock work. Flowers lavender and purple. Will stand good deal of shade. T. pkt. 10c; 1/16 oz. 20c; oz. \$2.00.

LINARIA CANON WANT—Hardy perennial, similar in habit to *Macedonica*, flowers pale pink, fine for cutting. T. pkt. 20c.

LINARIA MACEDONICA—Robust perennial, bearing long spikes of beautiful lemon yellow snapdragon-like flowers from May to August, excellent for cutting. Of easiest culture, blooming first year from seed and doing well in any kind of soil and exposure. Height 3 ft. T. pkt. 10c; 1/8 oz. 30c; oz. \$2.00.

ALPINE HYBRIDA—This hardy perennial *Linaria* is extremely beautiful, an ideal rock and bedding plant. Flowers produced from May to October snapdragon-like in many bright colors. Height 6 in. T. pkt. 25c.

LINDEFOLIA SPECTABILIS

An excellent hardy perennial, border, bedding and rock plant, flowers in terminal heads of rich blue, fine for bouquets, produced from April to July. Loves dry, sunny position. Height 2 ft. T. pkt. 20c; 1/8 oz. 40c; oz. \$3.00.

LEPTOSIPHON FRENCH HYBRIDS

In bloom from May to November. The plants are globe-shaped, covered with charmingly beautiful flowers in many colors. A first class border and pot plant and fine for rockeries. Annual. Height 6 in. T. pkt. 15c; 1/8 oz. 20c; oz. \$1.20.

LEWISIA HOWELLI

A rare and admirable plant for the rockery. Produces an abundance of star-shaped flowers, color a blend of pink and apricot, over a long period of time. Robust grower, easy to grow from seed, does well in any decent soil if well drained, and loves the sun. T. pkt. 30c.

THE QUALITY of our seeds is the very best every time in all cases. In actual field trials we find that our seeds are the equal and in MANY cases of better quality than seeds from other sources. Lower prices asked by us NEVER mean low quality. Our policy is—give the customers most for their money.

LINUM—FLAX

PERENNE—Perennial, erect growing, bearing on numerous branches bright blue dainty flowers in June and July. Height 30 in. Blooms first year from seed. T. pkt. 5c; oz. 25c; lb. \$2.40.

RUBRUM GRFL.—Large flowered Scarlet Flax. A neat annual plant with brilliant flowers and dainty foliage. Height 15 in. T. pkt. 5c; oz. 25c; lb. \$2.40.

LINUM CLOTH OF GOLD

Linum Flavum Compactum Nanum. Of exceptional value for rockeries and low borders. Plants of neat compact growth, foliage deep shiny green covered with glowing golden yellow bloom from May to September. Then if the plants are cut down they produce another crop of flowers in the fall. Hardy perennial. Height 6 in. T. pkt. 30c.

LUNARIA BIENNIS

KERMESINA—Of all Lunarias this is the most showy. The seed pods which are round and transparent showing the seeds inside and the size of a 25 cent piece, are used in dry bouquets. They are very ornamental. Sow the seed in August and September, give protection over winter and your plants will bloom in May to July and bear pods in great abundance. T. pkt. 10c; oz. 60c; lb. \$6.00.

Lobelia

The annual varieties are used for borders, edgings, in design work and as pot plants, for which purpose 3 to 5 plants are placed in each 3-inch pot. Of easiest culture. February sown seed will produce blooming plants in April or May. Sown outdoors in May will bloom in July and then till frost. Requires good soil and plenty of water. Where the summers are not too hot and dry they are bright and in full bloom at all times. The perennial Cardinalis variety must be planted in half shaded, cool and moist spot in soil containing sand and leaf mould. Pinch several times.

BEDDING QUEEN—Dark blue with clear, defined white eye, one of the best for bedding and ribboning. Height 4 in. T. pkt. 10c; ½ oz. 25c; oz. \$1.60.

LOBELIA RED QUEEN

Of compact, erect growth, foliage dark green, resembling in manner of growth the Crystal Palace Compacta variety. The flowers rich velvety red, a beauty indeed. Height 10 in. T. pkt. 10c; ½ oz. 25c; oz. \$1.80.

CRYSTAL PALACE COMPACTA—The finest for bedding of compact, erect growth, deep blue. T. pkt. 10c; ½ oz. 25c; oz. \$1.80.

GRACILIS—Light blue. Height 10 in. T. pkt. 5c; ½ oz. 10c; oz. 60c; lb. \$6.00.

BARNARD'S PERPETUAL—Deep blue with large, white eye, very fine variety. Height 8 in. T. pkt. 10c; ½ oz. 25c; oz. \$1.60.

HYBRIDA PENDULA SAPPHIRE—Beautiful variety for hanging baskets with large blue flowers and large white eye. T. pkt. 10c; ½ oz. 35c; oz. \$2.50.

LOBELIA CARDINALIS—(Cardinal Flower). A native perennial forming long spikes thickly set with bright crimson flowers. Height 3 feet. T. pkt. 15c; ½ oz. 50c; oz. \$3.80.

LOBELIA DOUBLE—See novelty pages.

LOBELIA RAMOSA

Beautiful and highly attractive variety of robust, upright growth, a heat and drought resisting sort, bearing light, deep gentian-blue flowers of much larger size than is the rule. High class for large beds, for borders and first rate pot plant. Different from the general run of Lobelias, unaffected by heat or extreme sun's glare, should prove of value in all parts of the country. Height 16 in. T. pkt. 10c; ½ oz. 25c; oz. \$1.80.

LUPINUS

Easily raised from seed, doing well in any soil save soils containing excess of lime for which lupins have no liking. Cover the seed only about half inch and space the plants 15 inches apart. In the greenhouse sow from September to February, shift as needed, grow them cool, 48 to 50 deg. and allow to bloom in 4 in. pots. In solid beds have them 14 inches apart. For forcing use the HARTWEGI annual variety. Easily forced into bloom in 8 weeks and easily saleable as it is, an elegant cut flower. All lupins bloom outdoors from May till almost frost.

Lupins are not easy to transplant and they resent excessive moisture.

Plant hardy lupins 2-3 plants to a "hill," planted that way they do better than when planted singly. The cut bloom will last if cut in bud stage, when the lower half of the spike is just beginning to open.

**LUPINUS NEW HYBRIDS**

A splendid hardy perennial, producing masses of gorgeous blooms in May and June on strong, stiff stems, 3 feet in length, mostly in pink, blue, lavender and white. Requires somewhat sandy soil for best results. First rate cut flower, fully as valuable as gladioli or delphinium. T. pkt. 10c; oz. 60c; lb. \$6.00.

LUPINUS POLYPHYLLUS—Hardy Lupines

LUPINUS POL. DARK BLUE, LUPINUS POL. WHITE—Both colors: T. pkt. 10c; oz. 45c; lb. \$4.00.

SMILING BEAUTY—Of most lovely, lustrous pink color. A robust grower. Height 3 ft. T. pkt. 20c; ½ oz. 45c; oz. \$3.00.

MAUVE BEAUTY—Soft lavender shaded with deep rose, a most charming color. T. pkt. 15c; ½ oz. 25c; oz. \$1.80.

LUPINUS POL. ROSEUS—A fine variety with sweetly scented light and dark rose flowers on long spikes. Height 4 ft. T. pkt. 10c; ½ oz. 15c; oz. 60c; lb. \$8.00.

SALMON BEAUTY—Tender salmon-pink, fine for cutting. T. pkt. 15c; ½ oz. 25c; oz. \$1.80.

LUPINUS HARTWEGI—An easily raised annual, bearing graceful spikes of pea shaped bloom in several dainty colors, highly valuable for bouquets. Requires rich, sandy soil and sunny situation. Sown outdoors in April, blooms in May and till September. Easily forced into bloom in 8 weeks.

LUPINUS HARTWEGI—Annual, height 2 ft. **WHITE, PINK, DARK BLUE, SKY BLUE, MIXED.** Any color: T. pkt. 10c; oz. 45c.

LUPINUS HARTWEGI GIANTS—Spikes and individual flowers very large plants branching from close to the ground 3-4 feet tall producing 4-6 spikes per plant in blue, pink and white. Annual. **MIXED COLORS:** T. pkt. 15c; oz. 80c.

LUPINUS SULPHUREUS SUPERBUS—Beautiful spikes of bright sulphur yellow. An exquisite cut flower. Annual. Height 30 in. T. pkt. 10c; oz. 45c; lb. \$4.00.

LUPINUS TEXENSIS

Texas Blue Bonnet. Annual, flowers deep violet blue, white center and VERY beautiful. Planted once, will seed itself and keep on coming year after year. Height 1 ft. T. pkt. 10c; oz. 45c; lb. \$4.00.

MESEMBRYANTHEMUM—(Ice Plant). T. pkt. 5c; oz. 45c; lb. \$3.00.

LOTUS CORNICULATUS—Hardy perennial of highest value for covering dry banks and as a rock plant. Of robust growth, plants neat semi-globes of bright green foliage covered with dainty golden yellow flowers from May to September. Easily raised, thriving in any soil in full sun. T. pkt. 10c; oz. 60c.

LUCULIA GRATISSIMA

A gorgeous winter blooming greenhouse pot plant that creates sensation when in bloom. Plants shrubby, flowers in terminal corymbs almost a foot across composed of large salver shaped rose-pink fragrant blooms. In full bloom at Christmas. Seed started in heat sprouts in 6-8 weeks. Requires light soil and partial shade. In winter little, in summer lots of water. Temperature 55-60 deg. Keep outdoors during summer, place on benches the last week of August. Height under glass 3-5 feet. T. pkt. 30c.

LYCHNIS

Blooms from July to September and is a splendid showy plant for dry soils and sunny position. Grows readily from seed and should be sown outdoors in April or May. Plant 9 inches apart.

LYCHNIS CHALCEDONICA—(Burning Star). Grows 2 feet high, producing fiery scarlet flowers of the most imaginable beauty. Hardy perennial. T. pkt. 10c; oz. 60c; lb. \$6.00.

CHALCEDONICA GRANDIFLORA—More robust in growth than Chalcedonica, flowers extra large, flaming scarlet. Hardy perennial. Height 2 ft. T. pkt. 15c; 1/8 oz. 25c.

LYCHNIS CHALCEDONICA SALMON QUEEN—Light salmon pink, beautiful and perfectly hardy. Height 2 feet. T. pkt. 15c; oz. 80c; lb. \$8.00.

LYCHNIS HAAGEANA HYBRIDA—Finest of the Lychnis family. Colors varied. Height 1 foot. T. pkt. 10c; 1/8 oz. 25c; oz. \$1.60.

LYCHNIS VISCARIA SPLENDENS—Fine hardy border plant, producing in profusion double brilliant red flowers in June and July. Height 1 foot. T. pkt. 10c; oz. 80c; lb. \$8.00.

LYCHNIS ARKWRIGHTII—New. Produces an abundance of large brilliantly colored flowers during summer in scarlet and pink shades. Hardy perennial, height 30 inches. T. pkt. 10c; 1/8 oz. 45c; oz. \$3.00.

LYCHNIS ALPINA Hardy perennial rock plant, neat and compact, bearing brilliant rose pink flowers in April and May. Height 5 in. T. pkt. 25c; 1/32 oz. 80c.

LYCHNIS LAGASCAE Hardy perennial miniature Alpine, in bloom during May and June. Flowers carmine-rose of unusual brilliancy. Plants of evergreen habit. Very choice. T. pkt. 30c; 1/64 oz. 55c.

LYCHNIS FORRESTII A fine, new hardy perennial with tufted grass-like foliage, producing quantities of showy panicles of flowers of bright pink, crimson and white on stout stalks 15 in. high from June to September. An elegant flower, valuable for cutting as a border plant and for rock gardens. Will withstand an incredible amount of drought. Height 2 ft. T. pkt. 40c.

LYTHRUM ROSEUM SUPERBUM

LYTHRUM SUPERBUM—(Rose loose-strife). Hardy perennial good for massing flowers rosy like produced on long slender spikes, from June to September. Height 3 feet. Space 2 feet apart. T. pkt. 10c; oz. 60c; lb. \$6.00.

MARVEL OF PERU—FOUR O'CLOCK

A handsome, free-flowering, half-hardy perennial, blooming the first season from seed, the flowers which are produced in clusters open in the afternoon. The colors are mostly crimson, white, yellow and violet. Our mixture contains a fine variety of colors. Height 2 ft. Oz. 10c 1/4 lb. 30c; lb. \$1.20; T. pkt. 5c.

MATRICARIA—FEVERFEW

Perennial treated as an annual because not hardy in the North. The neat graceful flowers useful in most any kind of flower work, are produced from June to November.

Sow in March in shallow boxes (2 inches deep). When the plants are large enough to handle, transplant into another box and set out in the open in May.

MATRICARIA EXIMIA GOLDEN BALL—Of compact habit, suitable for edging, with very striking double yellow flowers. Height 8 in. T. pkt. 10c; oz. \$1.00; lb. \$14.00.

MATRICARIA CAPENSIS ALBA PLENA—Free-flowering plants of bushy habit, bearing quantities of snow-white double flowers in dense clusters almost covering the plant. Fine for pot culture and for cutting. Tender perennial, blooming the first year from seed. Height 2 ft. T. pkt. 10c; oz. 45c; lb. \$4.80.

Double Marigold

Marigold—Tagetes

The tall varieties make first class cut flowers, the dwarf varieties being of dwarf even and compact growth, are valuable bedding plants. They should be planted foot apart and given rich soil from start to finish, with full exposure to the sun. The dwarf sorts grow a foot high, the tall reach 2 1/2 feet. They bloom from July to frost. Sow the seed in March indoors or in May outdoors.

Marigold is one of the most useful and best paying flowers for the florist to raise during the summer months. Thrives in almost any kind of soil and reaches the peak of its beauty in the very warmest weather even in dry season and stays fresh and beautiful for many days after being cut. Shipped for long distances arrives bright and crisp for days after other flowers would have wilted and dried up. A first class cut flower and wonderful in sprays and wreaths. A popular flower with the public and worthy of raising on a larger scale.

MARIGOLD GUINEA GOLD—Produces no single flowers. All are double, resembling a carnation in the formation of bloom, color brilliant orange. Less pungent than is the rule, valuable cut flower. T. pkt. 10c; 1/8 oz. 25c; oz. \$1.40.

TALL ALL DOUBLE—Bright orange-yellow flowers of gigantic size 4 inches across. Comes 99% double from seed. T. pkt. 10c; oz. \$1.00.

TALL MARIGOLD GOLD STRIPED—Very beautiful. Although we have rogued our seed plantation ruthlessly saving seed only from extra large and perfect flowers the seed will produce some plants not quite true. T. pkt. 20c; 1/64 oz. 30c.

TALL DOUBLE BROWN—T. pkt. 10c; oz. 60c; lb. \$6.00.

TALL DOUBLE GOLDEN ORANGE—T. pkt. 10c; oz. 60c; lb. \$6.00.

TALL DOUBLE ELDORADO—Flowers very large and double, beautifully quilled, deep yellow. T. pkt. 10c; oz. 60c; lb. \$6.00.

TALL DOUBLE ORANGE PRINCE—Large double golden orange flowers. T. pkt. 10c; oz. 60c; lb. \$6.00.

TALL DOUBLE LEMON QUEEN—Very large, extremely double, sulphur yellow. T. pkt. 10c; oz. 60c; lb. \$6.00.

TALL DOUBLE MIXED—Large flowered, colors light and dark yellow. T. pkt. 10c; oz. 60c; lb. \$6.00.

DWARF DOUBLE AURORA—Very double and large, pale yellow, flushed red, beautiful. T. pkt. 10c; oz. 60c; lb. \$6.00.

DWARF DOUBLE VULCAN—Shining purple scarlet, streaked with primrose yellow, very striking new variety. T. pkt. 10c; oz. 60c.

DWARF DOUBLE DARK BROWN—Very double, fine for bedding. T. pkt. 10c; oz. 60c; lb. \$6.00.

DWARF DOUBLE GOLDEN BALL—Very double, deep orange yellow. T. pkt. 10c; oz. 60c; lb. \$6.00.

DOUBLE LEGION OF HONOR—The flowers are orange yellow, spotted dark crimson, perfectly double and well formed, much showier than the single type. T. pkt. 10c; oz. 60c; lb. \$6.00.

MARIGOLD DOUBLE DWARF FRENCH—MONARCH STRAIN—A very compact strain, large double flowers, wide range of colors. T. pkt. 10c; oz. 80c; lb. \$9.00.

MAURANDIA—CLIMBING SNAPDRAGON

Lophospermum Scandens. A beautiful annual climber with clean, dark green, dense foliage. Sow the seed in March and plant outdoors in May. The flowers resemble those of snapdragon in shape and are of many colors and shadings from June to October. Fine for baskets. The seed we offer is of the largest flowered varieties in mixture. Height 10 feet. T. pkt. 15c; 1/8 oz. 35c; oz. \$2.40.

MECONOPSIS BAYLEI—Hardy perennial with protection over winter. Flowers brilliant sky-blue, single. Height 3 feet. T. pkt. 25c.

MIMOSA PUDICA—SENSITIVE PLANT

A curiosity among flowers; the fern-like leaves closing when touched and a clump of plants are quite a sight when hit by a handful of sand. They close their leaves instantly. Produce a whisper-like noise. Plant 6 inches apart. Height 1 to 2 feet. Pkt. 10c; oz. 45c.

FLOWERING LIVE STONES

MESEMBRIANTHEMUM L. MUNDTII—Stone plant or live stone as it is sometimes called. A succulent plant, stemless, leafless, closely resembling a small rock in shape. Yet it is a plant and very much alive, growing steadily, finally blooming and greatly admired. 50 seeds 20c; 100 seeds 35c; 1,000 seeds \$2.80.

MESEMBRIANTHEMUM PLEISPILOS BOLUSSI — Another choice variety of "live stone," resembling when out of bloom a stone so closely that only upon close examination one sees that it is a live plant. This and the above are two of the best of a long list of "live stone plants." 25 seeds 40c; 50 seeds 75c; 100 seeds \$1.40; 1,000 seeds \$9.50.

MIGNONETTE—RESEDA

CULTURE—Sow the seed outdoors in April in a half shaded moist spot. A place where they will receive the morning sun is the best. For winter and spring blooming sow the seed from August to February in pots, give all the light possible and keep in a temperature of 40 to 45 degrees.

Mignonette does not stand transplanting very well, therefore sow 5 to 8 seeds direct in a 2½ inch pot, later pull out the weak plants and leave 1 or 2 of the strongest. One plant to a pot will produce extra large spikes if pinched back only once. If you leave two plants to a pot and pinch back when about 2 inches high to make them branch out again pinching the branches until there are 5 to 8 strong shoots, you will get many smaller spikes.

To produce extra long spikes keep the plants in a temperature of 36 to 40 degrees at night. Disbud all flower spikes as SOON AS THEY APPEAR allowing only the center flower to bloom. Keep the plants erect by means of wire or other supports to avoid crooked stems.

Mignonette requires rich soil, half compost mixed with half partly decayed manure gives the best results. Keep the plants tied to stakes and place them in the benches foot apart.

NEW YORK MARKET—A strain which cannot be surpassed for the greenhouse, producing immense flower spikes, was saved for us by one of the largest growers of Mignonette for the New York Market. Height 2-3 ft. T. pkt. 1/16 oz. 35c; ½ oz. 55c; oz. \$4.00.

GOLIATH—Of compact habit, bearing large spikes of flowers often measuring 6 to 8 inches long by 2½ inches in diameter. The florets are fire-red and contrast effectively against the healthy rich green foliage. Height 1 ft. T. pkt. 10c; ½ oz. 15c; oz. 80c; lb. \$12.00.

SWEET SCENTED—This is the old original type with small spikes but with powerful and lasting fragrance. Height 1 ft. T. pkt. 5c; oz. 10c; lb. 90c; 10 lbs. \$8.50.

MACHET—The most popular and best Mignonette for all purposes, either outside or inside. Ever-blooming, the flowers last till late autumn. Highly fragrant. Our seed is the finest strain from a noted German specialist. Height 1 ft. T. pkt. 10c; oz. 60c; lb. \$8.00.

MIMULUS

MIMULUS MOSCHATUS—(Musk Plant). Fine pot plant, fragrant foliage, yellow flowers. Half hardy perennial. Height 12 inches. T. pkt. 10c; 1/32 oz. 20c.

MIMULUS TIGRINUS—(Monkey Flower). The finest tigered and spotted varieties, rivaling the Calceolaria in its bright colors. Mimulus thrives best in a moist and shady place. Seed started in February produces blooming plants in May that stay in bloom till September. A fine pot plant. Height 12 in. Finest mixed. T. pkt. 10c; 1/32 oz. 20c; oz. \$3.00.

MINA LOBATA Start in flats Feb.-Mch., use half sand and leaf mould, pot up singly, plant outdoors when danger of frost is past in rich ground and full sun. The flowers are first red, changing to orange and finally to white. Foliage clean, neat, very dense. An out of ordinary very choice climber. Tender annual. Height 20 ft. T. pkt. 10c; ½ oz. 15c; oz. \$1.00.

MONARDA CAMBRIDGE SCARLET

Produces in July and August brilliant crimson-scarlet, very conspicuous flowers. Foliage fragrant. Perfectly hardy, thriving in any soil or position. Height 30 in. T. pkt. 20c; 1000 seeds 70c.

MIMOSA PUDICA

WILL DO LOTS OF ADVERTISING FOR YOU

Mimosa, or Touchmenot, closes up its leaves when anything comes in contact with them. It will attract lots of attention and comment if you place a few plants where visitors will see them. To many, this plant is new—unusual—it will make people talk about you and that means—advertising you. **SOIL**—To produce paying crops the richer the soil the better. But when you grow Godetia or Clarkia POOR soil is the soil. Soil mixed with three parts of coarse sand or sifted coal ashes is the proper soil.

Forget-Me-Not—Ruth Fisher

RUTH FISHER—Very fine. Of compact habit with glossy dark green foliage, the sturdy flower stems bearing large clusters of lovely bright blue flowers ½ inch across. This Forget-Me-Not took first prize wherever exhibited. Height 10 in. T. pkt. 20c; 1/16 oz. 80c; ½ oz. \$1.50; 1/32 oz. 45c.

ROYAL BLUE—Grows a foot high and bears flowers in long sprays of the deepest blue. Fine for cutting. T. pkt. 10c; ½ oz. 20c; oz. \$1.20.

MYOSOTIS CHRISTMAS BOUQUET Of vigorous and quick growth. Started in February up to early in April, produces a wealth of beautiful dark blue, large flowers on long stalks late in May and for a long time afterwards. Sown in June to early in August blooms for Christmas and keeps on producing fine blooms for months. Height 1 ft. T. pkt. 15c; 1/16 oz. 30c; ½ oz. 55c; oz. \$4.00.

MYOSOTIS—FORGET-ME-NOT

Of easiest culture. For best results sow the seed of Blue Basket, Indigo Blue, Pink Beauty, Royal Blue, Blue, Victoria in July or August, transplanting into cold frames or on benches if intended for winter blooming. Your plants will be in full bloom in May. Blue Bird, Christmas Bouquet, Marga Sacher, Ruth Fischer are treated same way or can be started under glass early (February-March) to have blooming plants for spring sales. Experienced growers treat these varieties as annuals. Dissitiflora and Palustris do equally well no matter when you sow the seed and although true hardy perennials should be protected over winter not from cold but to keep the plants dormant. Uncover when danger of late spring frosts is past, not before.

MYOSOTIS VICTORIA—A popular sort, with fine heads of large, clear azure-blue flowers. Plants bushy and compact. Fine for edging of beds. Height 8 in. T. pkt. 10c; ½ oz. 25c; 1 oz. \$1.60.

MYOSOTIS DISSITIFLORA—One of the best of all myosotis. Of compact habit with mossy dark green foliage, about which are carried on sturdy stems large clusters of fine azure-blue flowers. Perfectly hardy, valuable for spring bedding, fine for pot plants at it forces easily. Height 12 in. T. pkt. 15c; ½ oz. 60c; 1 oz. \$4.00.

PALUSTRIS SEMPERFLORENS—Everblooming swamp forget-me-not. Blooms all summer. A very good variety. Height 10 in. T. pkt. 15c; ½ oz. 50c; oz. \$3.00.

MYOSOTIS BLUE BIRD—Winter blooming sort of vigorous growth, very floriferous. Dark blue, fine cut flower. Height 1 ft. T. pkt. 15c; 1/16 oz. 30c; ½ oz. 55c; oz. \$4.00.

MYOSOTIS BLUE PEARL

A fine myosotis for pots, bedding, carpeting, edging or cutting. The plants grow 8 inches tall, are compact, perfectly globular and in bloom from 8 to 10 weeks after sowing. The flowers are medium to large in size, sky-blue in color. An old florist says: "I am acquainted with all the myosotis varieties offered in the last 30 years. Blue Pearl is the only one that I care to raise." Height 8 in. T. pkt. 15c; 1/8 oz. 40c; oz. \$3.00.

MARGA SACHER—Of neat compact growth only 10 in. tall, deep sky-blue flowers over half an inch across. Blooms early. Forces easily, a high class pot plant and cut flower. T. pkt. 25c; 1/32 oz. 45c; 1/16 oz. 80c.

STRICTA GRFL. INDIGO BLUE—Blooms in April and May if started in June-August from seed. Plant dwarf, very compact, absolutely covered with bloom of very attractive blue. A highly paying plant for spring sales. If possible start a bed of this Myosotis on your premises. It will draw attention of very passer-by and your plants will sell so much faster. T. pkt. 10c; oz. 60c.

MYOSOTIS PINK BEAUTY

Of upright growth, flowers bright rosy-pink. Pink being an unusual color in Forget-Me-Nots and the fact that Pink Beauty is in bloom during May and June, should make Pink Beauty Myosotis a readily saleable plant. Height 1 ft. T. pkt. 10c; 1/8 oz. 15c; oz. 80c.

MIXED FORGET-ME-NOT—T. pkt. 10c; oz. 45c; lb. \$5.75.

MOONFLOWER—See Ipomea Noctiflora.

MORNING GLORY—Mixed. Oz. 10c; lb. \$1.00.

**Nasturtium**

Tender annual. Plant outdoors in April and May. In bloom from June to frost.

DWARF NASTURTIIUM

EMPRESS OF INDIA—Fiery crimson.

KING THEODORE—Velvety red.

CHAMELEON—Various colors on one plant.

VESUVIUS—Salmon rose.

FINEST MIXED—This is a high class mixture of dark leaved varieties including every color known in Nasturtium.

GOLDEN QUEEN—The foliage of this variety is light golden green, flowers glowing orange yellow.

MADAM GUNTHER'S HYBRIDS—This is a climbing Nasturtium and the best of all. Flowers extra large in a wide range of bright colors.

PRICE—Any of the above 5c per pkt.; oz. 10c; lb. \$1.00, postpaid.

NASTURTIIUM SCARLET GLEAM

Flowers twice the size of ordinary Nasturtium with inner petals overlapping toward the center giving the flower an appearance of doubleness. Color dazzling scarlet. A very beautiful cut flower and a bed of Scarlet Gleam is a veritable blaze of fire. T. pkt. 35c; oz. \$1.80.

GLORIUS GLEAM HYBRIDS

This Nasturtium produces practically 100% double flowers (semi double) well above the foliage in an endless variety of colors. Flowers extra large on long stems. For a maximum crop of flowers in mid-winter, grow on raised beds, never on open ground. (Temperature 45-50 deg.) T. pkt. 25c; oz. \$1.40.

NASTURTIIUM GOLDEN GLEAM

Large double, fragrant golden-yellow flowers on long stiff stems freely produced. When forced, blooms in winter and grows 6 to 8 feet tall. T. pkt. 10c; oz. 25c; lb. \$1.50.

NASTURTIIUM BEAUTY OF MALVERN

The plants are compact and bushy and produce twice as many flowers as other varieties. Flowers on long stems well above the foliage, color bright orange scarlet. Winter bloomer. T. pkt. 10c; oz. 15c; lb. \$1.60, postpaid.

NASTURTIIUM LILIPUT

A new type of dwarf Nasturtium. The plants are very compact, have smaller leaves, smaller flowers that are borne well above the foliage and literally cover the plant all summer till frost. We offer a superior mixture with a wide range of colors. T. pkt. 10c; oz. 20c; lb. \$2.60.

NEMESIA

Nemesias are easily raised annuals, bearing flowers very distinct in shape, about an inch across, embracing all imaginable colors from June to September; 8 to 12 inches tall, making a grand pot plant and beautiful edgings. Sow when danger of frost is past, space plants 6 inches apart. If wanted for Christmas start under glass about mid-August and grow cool, if for May flowering, sow in February. Any soil will suit them and grown cool their beauty is glorious.

NEMESIA STRUMOSA GRANDIFLORA

Extra large flowers, richly colored, including many beautiful and rare shades. Strikingly beautiful, always exciting admiration, fine for bedding as well as for cutting.

The seed we offer was raised with the greatest care and can be depended upon to produce flowers of maximum size. Height 1 ft. T. pkt. 20c; 1/16 oz. 30c; 1/4 oz. \$1.00.

NEMESIA FIRE KING—Plants dwarf and compact, flowers large, brilliant scarlet. High class for spring sales. T. pkt. 15c; 1/16 oz. 35c; 1/8 oz. 60c.

BLUE GEM—Of all Nemesias this is the finest. The color is a pretty Forget-Me-Not blue. 1/8 oz. 30c; 1/16 oz. \$2.00; T. pkt. 10c.

NEMOPHILA—CALIFORNIA BLUE BELLS

If you want a flower carpet of unusual beauty, Nemophila is the thing for that purpose. Very few flowers will produce so much beauty with as little effort and little expense as Nemophila. Flowers cup shaped in many bright colors with blue predominating, from April to August. Plants compact, neat, admirably adapted for low borders. The seed should be sown to where the plants are to stand, late in the fall or as early in the spring as the ground is open. Nemophila is also high class for pots. Hardy annual. Height 6 in.

NEMOPHILA INSIGNIS—Sky Blue. **MIXED**. Many colors. Either one: T. pkt. 5c; oz. 25c; lb. \$2.00.

NEMOPHILA ATOMARIA New, and of compact growth, furnishing a wealth of deepest blue, bell-shaped flowers from early spring to the end of summer. A highly valuable plant for bedding, borders, window boxes, hanging baskets, rockeries as well as in flower work. Annual. Height 6 in. T. pkt. 10c; oz. 30c; lb. \$3.00.

NEPETA BLUE WONDER

If you are looking for a high class, blue flowering perennial, *Nepeta Blue Wonder* is the plant. Its flowers are of great size, color glorious, clear, bright blue. Absolutely hardy, in bloom from May to August. Easy to raise from seed. Vigorous grower—should not be planted when employed as a rock plant, near delicate growing subjects, as *Nepeta* might crowd these out. Suitable for rockeries, as a border plant for banks and wherever there is a place for a short growing plant, that will stay from year to year and take care of itself. Height 12 in. T. pkt. 30c.

NERTERA DEPRESSA

Of compact and neat growth with ornamental, shiny foliage, covered with coral red berries the size of a large match-head. Very beautiful. Delights in light soil, once started can be easily and quickly propagated by division. Should be kept in pots over winter and watered sparingly. Stays in berries for months therefore valuable house plant, also fine for rockeries and fancy bedding. Prefers partial shade. Seed germinates quickly. Tender perennial. Height 4 in. 25 seeds 15c; 100 seeds 50c.

NICOTIANA—Sweet Scented Tobacco

Start the seed in April, set outdoors in May, 9 in. apart in rich soil and full sun. Produces a wealth of bloom from July to November, fine for groups and large beds. Tender annual.

NICOTIANA CRIMSON BEDDER

New. High class bedding plant of compact growth producing in abundance from June to November beautiful trumpet shaped flowers of deep velvety crimson. A bed of this *Nicotiana* will be much admired. Started in February is in fine bloom in May. Potted plants sell at sight. Height 2 ft. T. pkt. 15c; 1/16 oz. 25c; 1/8 oz. 45c.

AFFINIS—Three feet high, with hundreds of fragrant blossoms borne for months. Pure white. T. pkt. 10c; oz. 40c.

NICOTIANA SANDERAE—Mixed. Height 2½ ft. T. pkt. 10c; oz. 40c.

NIEREMBERGIA GRACILIS

Most elegant and beautiful annual plant growing about 15 inches high and bearing a great number of cup-shaped, lavender blue flowers on slender stems in a graceful manner throughout the season. Fine for bedding, hanging baskets or window boxes, as well as a first class pot plant and cut flower. Sow in February and March indoors or in April outdoors. Does well in half shade as well as when fully exposed to the sun. T. pkt. 10c; 1/8 oz. 15c; oz. 80c.

NOLANA GRANDIFLORA

A showy low growing plant, flowers small, deep blue, bell shaped from July to October. Suitable as a pot plant, good for vases and baskets and excellent for covering poor, dry and rocky soils as well as for borders. Sow in the open when all danger of frost is past, for early blooming start under glass. Annual. Height 6 inches. T. pkt. 10c; oz. 60c.

NOMOCHARIS PARDANTHINA

A lily-like plant, two feet high, with 12-16 large open nodding flowers with frilled petals, giving the flower the appearance of a dainty orchid. *CULTURE*—Start the seed in 5 in pots 5 seeds to a pot. *SOIL*—Sharp sand, leaf mold and granulated peat in equal parts. The seeds germinate rapidly. In the fall the plants die down, stop watering, keep the pots inside and give water again early in April. Next fall place pot again under the bench and again in April start watering. Plant outdoors the third year in a position where the plants will not be touched by the afternoon sun. The pots should be broken, the contents placed in position undisturbed. *Nomocharis* will not stand transplanting any other way. Introducer's packet 50c.

DAMPING OFF—Vinegar prevents damping off. So says Mr. Earle Stafford of Great Barrington, Mass. One tablespoonful of vinegar to each quart of water is the remedy. Immediately we sprinkle it on the afflicted beds the "damping off" vanished never to reappear. No seedlings seemed in the least injured by this mild acid bath even when submitted to it several times in one day.

And Mr. R. W. Barrett, Montour Falls, N. Y., finds that one teaspoonful of formaldehyde to one gallon of water will stop damping off like magic. We say: Use clean soil free of fresh manure, sandy clay when possible, watch your seedlings closely, remove them from shade gradually and on time and never overwater. We seldom lose from damping off; when we do, it is because seedlings were left shaded too long and from sour soil due to overwatering.

GROW NEW FLOWERS

because it pays to do so. Where will you get these new flowers? You can get them from us. We offer the seed of many good ones, absolutely new and very superior. See our novelty pages.

NIGELLA MISS JEKYLL

Hardy annual, flowers large in pure white and bright blue, plants bright green with foliage resembling asparagus, very graceful. Sown in March or April outdoors, blooms from May to September. Fine for bedding, borders, rockeries and as a cut flower. Height 20 in. Mixed: T. pkt. 5c; oz. 45c; lb. \$3.00.

ODONTOSPERMUM SERICEUM

A shrubby, half hardy perennial with silky, silver-gray foliage covered almost all the year round with golden yellow flowers 2-3 inches across. Fine pot plant. Hardy in the Southern half of U. S. Height 2 ft. 25 seeds 20c; 50 seeds 35c.

OENOTHERA—Evening Primrose

Easily raised from seed, doing well in most any soil, enjoying sunshine. The variety listed below is one of the best out of the whole family.

FRUTICOSA MAJOR—Hardy perennial with large, showy yellow flowers nearly 2 inches across, borne on strong, stiff stems. Height 1 to 3 feet, depending on the richness of the soil. T. pkt. 10c; oz. 60c; lb. \$5.20.

ORNITHOGALUM LACTEUM

Darling Chincherichee. A bulbous plant producing star-like flowers of pure white with dark eyes, in dense racemes on stalks 18-24 inches tall. A wonderful cut flower that has unparalleled keeping qualities. Can be sent long distances without refrigeration and will arrive in perfect condition. Not hardy, the bulbs must not be allowed to freeze. Seeds germinate readily. Sow in a cool house in the Spring in a seed bed, transplant into flats filled with good soil, leave the flats outdoors, carry in before freezing weather. Place flats on the benches the following year in October. About 75% of your plants will give a crop of flowers and you will get a 100% crop the third year and from then on. The plants stay in bloom for over two months and are in bloom for Easter. After blooming, the flats should be dried off and placed again on the benches the following October and this can be repeated for a period of years. If the bulbs are cold stored they do best in a temperature of 36 deg. F. *Ornithogalum* is a beautiful flower, greatly admired by all that have seen it and there is no reason to doubt that it will become one of the popular flowers like gladioli and others are today. T. pkt. 20c; 1/8 oz. 60c; oz. \$4.00; lb. \$40.00.

OXALIS ROSEA DELICATA

A neat, compact growing plant that blooms at all times, summer or winter, always covered with charming bright salmon pink flowers, fine as a house plant, for hanging baskets, borders, etc. Height 6 inches. Tender. Pkt. 15c; 1/16 oz. 50c; oz. \$6.00.

OXALIS TROPAEIOIDES—Hardy perennial, foliage reddish brown, highly ornamental, flowers yellow. Unexcelled for classy carpeting and borders, for pots and rockeries. Height 3 inches. T. pkt. 10c; 1/8 oz. 25c; oz. \$3.00.

TYPE OF AMERICAN PANSY

The flowers are well rounded, petals thick and velvety, plants dwarf and compact, a combination hard to beat.

Pansy

Pansies love a cool, moist, well enriched soil. Seed sown in spring in a partially shaded situation will produce fine plants for autumn flowering. However, as most people want pansies in the spring we will tell you how to proceed to secure the finest and best.

Sow the seed in August or September in a cold frame in rows about four inches apart, covering the seed with 1/16 inch of fine clean sand or sandy soil. This is generally applied by sifting with a screen. Dust the soil with sulphur to keep the damping-off fungus from starting. For the same reason it is advised that the boards of the cold frame be thoroughly clean of any fungus. After seeding pat down with a board and apply a light application of water with a fine spray. Then cover the seed bed with burlap to hold the moisture and hasten germination, being careful, however, to remove the burlap as soon as the plants have sprouted. Failure to do this results in drawn, spindly plants.

Be sure to keep the bed damp, as there is no way of reviving pansy plants or seeds once these have become dry. Neglect here is responsible for seeds failing to "come up." A temperature of 75 degrees or a bit less is just right for sprouting pansies.

When the plants are large enough to handle they are transplanted to stand four inches each way, in cold frames with the richest soil to be had. Pansies must be transplanted but once; the often-transplanted the smaller the flowers.

When the ground is frozen to a depth of six inches cover the frames well, not to protect against frost, but to insure the ground remaining frozen uninterruptedly until spring. There must be plenty of "fall" to the frames, so the water from melted snow and rains will run off quickly; one inch to the foot or six inches for a standard (3x6 ft.) frame is about right.

The above suggestions are for middle northern states, of the latitude of Iowa. Farther south the plants may be transplanted to the open ground with just enough mulch to hide them from view after the ground freezes. One ounce of seed produces 15 thousand plants and over.

The seed of our American Pansy will produce at LEAST twice the number of plants. The seed has an exceptional vitality because grown in the U. S. in sunny, dry climate.

PANSY—EUROPE'S BEST

This mixture represents the cream of Europe's most noted Pansy grower. The flowers are perfectly shaped and well rounded, borne on strong stiff stems, the petals thick and velvety, a large percentage of flowers have peals fluted or semi-double at the edges, the plants are robust and healthy, of neat compact growth, blooming most profusely, in every imaginable color.

For years this was the best pansy we had. It is the finest Europe's best pansy grower has so far produced and there is no question as to its high quality. 1/8 oz. 55c; 1 oz. \$4.00; T. pkt. 15c; lb. \$55.00.

BUGNOT GIANT MIXTURE—Extremely large flowers, broad blotches and from the large spots extend delicate pencilings to extreme edges of peals. 1/8 oz. 40c; 1 oz. \$3.00; T. pkt. 20c; lb. \$40.00.

MASTERPIECE—Large flowers, the border of every petal being conspicuously curled and fluted. The plants are very free-flowering, and the numerous blossoms comprise many new tints and colors. T. pkt. 20c; oz. \$3.00; 1/8 oz. 40c; lb. \$40.00.

MASTODON—Sturdy grower, very large flowers, well formed, wide range of colors. Seed grown from originator's stock. T. pkt. 20c; 1/8 oz. 80c; oz. \$5.00; lb. \$60.00.

TRIMARDEAU MIXED—Includes all known colors in Pansies, blooms not as large as those produced from higher priced mixtures, yet of quite good quality, price considered. T. pkt. 5c; 1/8 oz. 15c; oz. 80c; lb. \$10.00.

PANSY—PARISIAN MIXTURE

This mixture contains nearly thirty different varieties of Giant-flowering Pansies and embraces all colors known in Pansies. It is a mixture of high quality and will be found very superior. 1/8 oz. 30c; 1 oz. \$2.00; T. pkt. 10c; lb. \$28.00.

PANSY MAPLE LEAF GIANTS

A high class Pansy resembling our America, yet not quite as good, as you will see if you will grow both.

We introduced Pansy America. By rigid roguing and selection we mean and we WILL maintain the quality of our strain of America so that all other bedding strains of Pansies will have to take second place. To be on the safe side grow America Pansy and get the seed directly from us, to get large blooms, widest range of colors and flowers of substance in a word the best there is. Price for Maple Leaf Giant Pansy: T. pkt. 40c; 1/8 oz. \$1.50; 1 oz. \$10.00; 1 lb. \$160.00.

PANSY ROGGLI'S SWISS GIANT

A new and very superior mixture of Pansies, extra large in size of flowers, containing some new and very rich colors. Undoubtedly high class—better than the old standard strains and varieties, our American Pansy Mixture excepted. While Roggli's Pansy is "some" Pansy it cannot compare with our America. T. pkt. 20c; 1/8 oz. 50c; oz. \$4.00.

PANSY LORD BEACONSFIELD

Extra large flowers blue with white blotches at the ends of petals. A bed or edging of Lord Beaconfield pansy is a sight not easily forgotten. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.60; lb. \$18.00.

OUR PANSY AMERICA

Is better in quality every year, because we are roguing our seed bearing plants ruthlessly. No matter what claims made, what price asked for other pansies, the fact remains that there is no Pansy that can beat OUR strain of America.

PANSY—SEPARATE COLORS

ALL varieties listed same price: T. pkt. 10c; 1/8 oz. 20c; oz. \$1.40; lb. \$18.00.

GIANT STRIPED—A strain made up of various colors, all elegantly and grotesquely striped and variegated.

KING OF THE BLACKS—Almost black, of truly giant size.

GIANT ADONIS—Light blue, very beautiful.

PRINCE HENRY—Darkest blue, extra large, fine.

VULCAN—Dark red with five large spots, petals fluted extra.

GIANT MAUVE QUEEN—New. Slate or mouse color.

GIANT GOLDEN QUEEN—Pure rich yellow.

MME. PERRET—Edge of petals are frilled. The colors are dark vine, pink and red, beautifully veined and all with a white margin. Extra large flowers, very showy.

SNOW QUEEN—Satiny white.

RUBY KING—Purplish red shades, very beautiful

MERCURY—Velvety purple.

PRINCE BISMARCK—Light brown shades, with black eye.

COLOSSEA VENOSA—Light shades veined and marbled.

PANSY BRONZE BEAUTY—Flowers very large, ruffled, color bronze, with deeper spots and rays.

PANSY LULU PERRET—Large flowers color mahogany shaded with yellow with dark centers. Beautiful shade.

ODIER FIVE BLOTCHED—The petals are light colored, the blotches of dark color, the flowers large and beautiful.

EROS GOLD EDGED—Magnificent strain. Deep velvety brown with broad gold margin.

PANSY ST KNUD—Golden orange.

ANY OF THE ABOVE: T. pkt. 10c; 1/8 oz. 20c; oz. \$1.40; lb. \$18.00.

We sell quarter and half ounces at oz. rates; quarter and half pounds at pound rates.

TUFTED PANSY—See Viola.

PANSY OREGON GIANTS—Bright self colors and many five blotched blooms of great beauty and size. MIXED: T. pkt. 40c; 1/8 oz. \$1.50; oz. \$10.00.

ENGELMAN'S GIANTS—Early flowering Scottish Show type of Pansy. Flowers of immense size in light, dark, bronze and reddish shades. Plants of compact growth. MIXED: T. pkt. 40c; 1/8 oz. \$1.50.

PARDANTHUS SINENSIS

Easily raised hardy plant, growing thirty inches high and bearing star shaped tigre and marbled red flowers in June and July. Does well in any soil exposed to the sun and never winterkills. Makes a fair cut flower, blooming in June and July. T. pkt. 10c; oz. 60c; lb. \$5.00.

PENNISETUM

A very showy grass, ideal as a border for canna beds, making a beautiful contrast with their beautiful leaves and plumes. Never get them closer than 18 inches apart. Sow the seed in February. transplant singly into flats and later place them into 3 inch pots. Plant outdoors when danger from frost is past.

RUPPELIANUM—Purple Fountain Grass. Plumes purplish, foliage green, extremely graceful. Height 2 ft. T. pkt. 10c; oz. \$1.00.

LONGISTYLUM—Plumes greenish white. Height 2 ft. T. pkt. 10c; oz. 60c.

PERILA NANKINENSIS

PERILA is grown for its blood red leaves which are sometimes striped with green. It grows 18 inches high and makes an inexpensive and neat border for tall canna beds. If another border of dusty miller on the outside is grown, the effect is striking. Sow thinly, covering the seed nearly an inch deep and plant a foot apart. If closer than that the stems become crooked. T. pkt. 5c; oz. 25c; 1 lb. \$2.00.

NANKINENSIS CRISPA—Fine variety, with deeply cut and crisped foliage. Very ornamental. The leaves exhale a delicious perfume. Of same usefulness as the above. T. pkt. 5c; oz. 25c; lb. \$2.25.

PERILLA DWARF CURLED

P. Macrophylla Compacta. Of compact growth, foliage rich, bronzy-red gracefully curled, very attractive. Of great value for bedding. Height 15 in. T. pkt. 5c; oz. 40c.

PHYSOSTEGIA

Hardy, robust growing perennial of compact growth, thriving in any kind of soil fully exposed to sun. Very floriferous, in bloom from July to October, fine for cutting. Height 3 ft.

VIRGINICA—A hardy perennial, bearing spikes of delicate pink flowers. T. pkt. 10c; 1 oz. 80c.

PHYSOSTEGIA VIRGINICA GIGANTHEA—Height 6 feet. Bears extra large flowers on long stems, deep crimson rose. An excellent cut flower. T. pkt. 15c; oz. \$1.20.

PHYSOSTEGIA VA. GRFL. ALBA—White. Large flowered. T. pkt. 15c; oz. \$1.80.

Phlox Grandiflora Mixed

PHLOX DRUMMONDI GRANDIFLORA

The finest of all annual Phloxes, with largest heads of bloom as well as the largest individual flowers. Plant a foot apart. Height 15 inches.

SPLENDENS—Dark brilliant crimson. **ISABELLINA**—Pale yellow. **CINNABARINA**—Dazzling red of unusual brilliancy.

ALBA—Snow white. **COCCINEA**—Fiery scarlet. **ROSEA**—Pink.

VIOLACEA—Violet-blue. **MIXED**—Any color: T. pkt. 10c; 1/8 oz. 15c; oz. \$1.00. In bloom from June to October.

ANNUAL DWARF PHLOX

Unsurpassed for edgings and ribbon beds and as a pot plant. They grow about 8 inches in height, forming dense masses of blooms all summer. Plant 8 inches apart.

CECILY MIXED—Rich, showy colors, extra large flowers.

FIREBALL—Dark and most brilliant red. **FAIRY**—Beautiful pink shade. **SNOWBALL**—Pure white. **VIOLETTA**—Blue with white eye.

MIXED. ANY DWARF PHLOX. T. pkt. 10c; 1/8 oz. 30c; oz. \$2.20.

STAR PHLOX—Dwarf growing, with beautiful star shaped flowers in many colors. T. pkt. 10c; 1/4 oz. 15c; oz. \$1.00.

PHLOX PERENNIAL

Our mixture contains improved strains forming extra large perfectly round flowers, with petals overlapping each other. The seed of this germinates slowly, often requiring 5 to 6 months. Mixed. T. pkt. 10c; 1/4 oz. 30c; oz. \$2.00.

PHACELIA CAMPANULARIA

California Bluebell. A beautiful heat and drought resisting annual, in bloom early in the season and lasting in perfection for a long time. Flowers bell shaped, an inch long and nearly as wide. bright gentian blue in color, very showy. Height 8 in. T. pkt. 10c; oz. 60c; lb. \$6.00.

PHILADELPHUS VIRGINAL

One of the finest of all shrubs. Pure white, extra large double flowers in clusters, all summer. Easily raised from seed which is quite small but germinates readily producing shrubs 2 feet tall the first season and heavy saleable shrubs the second year from date of sowing. T. pkt. 20c; 1/16 oz. 40c.

CHINESE LANTERN PLANT

PHYSALIS FRANCHETTI—Hardy perennial with yellow flowers producing balloon like husks with a berry inside of very brilliant orange red. The husks turn red when ripe and resemble Chinese paper lanterns. The dried branches make good material for winter bouquets. Sow in April and May; space the plants a foot apart. Height 18 inches. T. pkt. 10c; oz. 60c; lb. \$8.00.

PHYSALIS BUNYARDI New. An elegant and striking hybrid, producing an abundance of glowing red "lanterns" highly decorative. Hardy. Height 30 in. T. pkt. 20c.

PLUMBAGO CAPENSIS

Half hardy perennial climber of graceful growth, producing from spring till frost large panicles of porcelain blue flowers of extreme beauty in greatest profusion. Fine pot plant for spring sales and a high class cut flower. Will produce striking effect in beds, can be left trailing over the ground, trained to trellises or trimmed into a symmetrical bush. Culture same as Fuchsia. Loves rich soil and sun. Easily raised from seed. Height 3 ft. Price: 10 seeds 20c; 25 seeds 45c; 100 seeds \$1.50.

Pentstemon

There are few perennials that are as valuable as Pentstemon. The plants are long-lived, drought and heat resisting, a quality much to be desired and needed in our climate. Will produce bloom under the most trying conditions. When other perennials are struggling to just keep alive in hot and dry weather, Pentstemon can be relied upon to produce quantities of real flowers, high class for cutting. Easily raised from seed, thrives in a variety of soils in shade or sun. Who can name the flower that has as many good qualities as Pentstemon and yet is almost unknown?

COERULUS—Bright blue flowers in elegant dense spikes of great beauty from May to August. Hardy perennial 15 in. high. T. pkt. 15c.

CYANANTHUS—Deep bright-blue flowers of large size in dense clusters from June to August. Hardy perennial. Height 15 in. T. pkt. 15c; 1/8 oz. 30c.

DIFFUSUS—Plants of branching habit two feet tall, flowers deep lilac in June and July. Hardy perennial. T. pkt. 20c.

PENTSTEMON FAIRY—An extra choice, self selling, new hardy perennial bedding and pot plant. Plants bushy and compact flowers large, the brightest deep pink imaginable from May to October if the seed is started in February. Height 30 in. T. pkt. 40c.

PENTSTEMON GORDONI SPLENDENS—Hardy perennial, producing long erect spikes of rich, dark blue flowers, high class for baskets and bouquets. Height 3 ft. Owing to excessive heat or to sudden changes in temperature, also possibly to lack of moisture, Gordoni Pentstemon changes its color. From the most lovely blue it changes into a pink—a lovely color too. Of high value in flower work whether the blooms are blue or pink. T. pkt. 15c; 1/8 oz. 30c; oz. \$2.00.

GRACIELLA HYBRIDS—This strain produces elegant spikes of graceful flowers in many colors excellent for cutting from June to October. Half hardy perennial blooming first year from seed if sown early. Height 30 in. T. pkt. 15c; 1/8 oz. 40c; oz. \$3.00.

PENTSTEMON GRANDIFLORUS

Conspicuously beautiful, absolutely hardy, thriving in good or poor soil, wet or dry in full sunshine and also in partial shade blooming during May and June. The flowers are bell shaped, carried on a stout stalk resembling foxglove in appearance, of delicate blue color. First rate cut flower. Height 30 in. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.40.

PENTSTEMON SENSATION

Flowers gloxinia-like two inches across, borne on long stems in all colors from pure white to crimson and violet. A percentage of the flowers are beautifully edged with a contrasting color and when grouped in a bed of 10 or more plants the effect is most brilliant. Sensation is not hardy in the North, it is treated same as Antirrhinum. The seed is sown in February and March, the plants start to bloom in July and stay in flower till frost. Protect the plants over winter by light covering or lift with a ball of dirt and store in a frost proof cellar. Height 3 ft. T. pkt. 10c; 1/8 oz. 30c; oz. \$2.20.

SPECIOSUS—Very showy, producing elegant long spikes of rich gentian blue flowers from June to October. Height 3 ft. T. pkt. 10c; 1/8 oz. 30c; oz. \$2.00.

SPECTABILIS—Beautiful specie, individual flowers an inch or more long of rich royal blue in long spikes from June to September. Hardy perennial. Height 3 ft. T. pkt. 25c.

PENTSTEMON SPECIAL MIXTURE—Contains every hardy perennial variety listed by us as well as some rare and new varieties to be listed when we will have a sufficient supply of seed. T. pkt. 15c; 1/8 oz. 25c; 1/8 oz. 45c.

FLORISTS RAISE CABBAGE

and other vegetable plants. Make profit before selling a single plant by ordering your seed from us. We supply many growers including some of the largest in the country.

Grow Early Flat Dutch Cabbage, a variety suitable for both early and late. Giant Pascal Celery, a quality sort that makes the nicest looking plants. Egg Plant Black Beauty, the best of all. Tomato Bonny Best, the most widely advertised and popular. Cauliflower Early Erfurt or Cauliflower Early Paris, Pepper Ruby King and Curled Parsley. See our prices.

Type of Large Single-fringed Petunia

Petunias

Bedding varieties are of the easiest culture and should be sown directly to where they are to stand after all danger from frost is over. They produce masses of small blooms. Height 9 inches. The large flowered varieties are best started in the house or frame during February and March and transplanted to the best spot in the garden. In transplanting, save all the less robust seedlings, as these are likely to produce the finest flowers. Petunias love plenty of water and rich sandy soil, must never be chilled, and should be spaced 15 inches apart. Height of large flowered sorts, 15 inches.

For best success apply bottom heat for seed germination. **PETUNIAS** are a real money crop if well grown, staked and supported, kept pinched up to the middle of May and only then allowed to bloom.

PETUNIA GIANT FLOWERING SINGLE

CRIMSON BELLE—Very large flowers, dark crimson, boldly waved and frilled. T. pkt. 20c; 1,000 seeds 75c; 1/64 oz. 80c; 1/32 oz. \$1.40.

JUNE—Plant of semi-dwarf bushy habit and robust growth with fringed pure white flowers veined crimson, very charming and effective. T. pkt. 15c; 1,000 seeds, 75c; 1/64 oz. \$1.10; 1/32 oz. \$2.00.

ROYAL PURPLE FRINGED—Fringed flowers of intense violet blue. T. pkt. 15c; 1,000 seeds, 60c; 1/64 oz. \$1.00; 1/32 oz. \$1.90.

KARLSRUHE RATHAUS—Very large flowers of beautiful violet blue. T. pkt. 20c; 1,000 seeds, 75c; 1/64 oz. \$1.00; 1/32 oz. \$1.90.

PETUNIA SETTING SUN—Brilliant rose pink flowers deeply ruffled and fringed three inches across. Plants compact foot high. New. T. pkt. 40c.

MIRANDA—Very large fringed flowers of brilliant scarlet rose color. T. pkt. 20c; 1,000 seeds, 75c; 1/64 oz. \$1.10; 1/32 oz. \$2.00.

ROYAL PURPLE—Very beautiful intense violet purple. T. pkt. 15c; 1,000 seeds, 60c; 1/64 oz. \$1.00; 1/32 oz. \$1.90.

BALCONY QUEEN—An extra large flower, larger than any other type of Balcony Petunias, deep velvety blue with rays and blotches of pure white of striking beauty. A most conspicuous and beautiful variety that no florist should overlook. T. pkt. 15c; 500 seeds, 35c; 1,000 seeds, 60c; 1/32 oz. \$1.40.

GIANT RUFFLED—The flowers of this strain are ruffled and fringed, colors rich and gorgeous, with charming deep throats of various shades. T. pkt. 25c; 1/32 oz. \$1.50; 1/16 oz. \$2.75.

GIANTS OF CALIFORNIA—Blooms of immense size. The flowers frequently measure more than 5 inches in diameter, while the colors are indescribably rich and varied, beautifully fringed and have a large open throat, superbly marked and veined. T. pkt. 20c; 1/32 oz. \$1.25; 1/16 oz. \$2.00; 1/64 oz. 65c; oz. \$26.00.

PETUNIA THEODOSIA

Extra large, fringed, bright pink flower, with well defined golden throat, very conspicuous, a flower that sells at sight. Won first prize at the Boston Flower Show in 1928. All florists that grew Theodosia report good sales at much better prices than is possible to get for geraniums. T. pkt. 30c; 1/64 oz. \$1.00; 1/32 oz. \$1.75; 1/16 oz. \$3.25; 1/8 oz. \$6.25; oz. \$48.00.

PETUNIA BLUE THEODOSIA

Identical in size, equally as graceful, as the famous Pink Theodosia. Blue Theodosia is of deep, metallic-blue with a silver sheen. The throat intensely, deep blue, the whole, beautiful, fringed flower veined with delicate lines of black-blue. The extreme size, the charming blue color and the metallic lustre of the flower will make Blue Theodosia a favorite for a long time to come. T. pkt. 30c; 1/32 oz. \$1.75; 1/16 oz. \$3.25; 1/8 oz. \$6.25; oz. \$48.00.

PETUNIA QUEEN OF THE MART Superb variety,

one that will increase your sales. Flowers 3 1/2 inches across, slightly waved of lustrous dark carmine-red with a scarlet sheen in the throat of such brilliance that no flower lover can resist its appeal and a color never before seen in Petunias. High class self-selling variety. T. pkt. 50c.

PETUNIA DWARF RAMONA GIANTS

A fine strain of Giant Single Petunias for pot culture. We have checked this type against many in our experimental grounds and consider it the most compact Giant Flowering Petunia, with best formed flowers of any dwarf type on the market. As in the illustration, when in full bloom, the plants show nothing but colorful flowers, immense in size, with open throats, beautifully veined and marked. T. pkt. 30c; 1/32 oz. \$1.75; 1/16 oz. \$3.25; 1/8 oz. \$6.25; oz. \$48.00.

FRAGRANT PETUNIA ENCHANTRESS

The only large flowered single Petunia with a fragrance. Flowers very large, single, heavily fringed of delicate pink, veined with crimson, highly attractive. Beautiful and new, should prove a good selling plant. T. pkt. 30c; 1000 seeds \$1.00; 1/32 oz. \$2.20; 1/64 oz. \$1.20.

PETUNIA DAZZLER

Flowers of maximum size, glistening white in the throat for about two-thirds of the flower, then sharply bordered with a broad band of brilliant dark crimson. An exquisite variety. T. pkt. 25c; 1/64 oz. \$1.00; 1/32 oz. \$1.75.

PETUNIA LAVENDER CHARM

A BEAUTY IN COLOR. A WONDER IN SIZE

A truly superb new Petunia. Plants of dwarf, strong and compact growth, flowers of mammoth size, single fringed, perfectly formed of a new and enchanting color namely, rich deep lavender. The throat shows a network of veins arranged in a highly artistic fashion, enhancing the charm of the flower in a wonderful way. Very free blooming. T. pkt. 25c; 1/64 oz. \$1.00.

GIANT FLOWERING PETUNIA

CREAM OF THE GIANTS—Produces flowers of maximum size, all beautifully veined and fringed, in the greatest variety of colors. There are self colored blossoms, rich and gorgeous, others of lovely delicate shades and still others of a combination of colors, blotched and margined all of incomparable beauty. T. pkt. 35c; 1/32 oz. \$1.75; 1/16 oz. \$3.25; 1/8 oz. \$6.25; oz. \$48.00; 1/64 oz. 90c.

PORTLAND PETUNIAS

This is a fine Fringed Balcony type coming from Oregon, desirable for florist use. Blooms single, very large.

SCARLET BEAUTY—**PRIDE OF PORTLAND**—Deep rose. **ELK'S PRIDE**—Plain edged, extra large in size, blackish purple. **MIXED**—T. pkt. 20c; 1/64 oz. 70c; 1/32 oz. \$1.20; 1/16 oz. \$2.20; 1/8 oz. \$4.00; oz. \$24.00.

BEDDING PETUNIAS

ADONIS—Deep rosy red with white throat. T. pkt. 10c; 1/8 oz. 15c; oz. 80c; lb. \$10.00.

BABY BLUE—Deep violet with white throat. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.00; lb. \$12.00.

COUNTESS OF ELLESMERE—Rosy pink with white throat. T. pkt. 10c; 1/8 oz. 15c; oz. 80c; lb. \$8.00.

GENERAL DODDS—Darkest red, very fine. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.00; lb. \$12.00.

HOWARD'S STAR—Dark, velvety purple with a five pointed white star. Our strain is extra select with regular, pure white stars sharply defined. T. pkt. 10c; 1/8 oz. 25c; oz. \$1.80; lb. \$18.00.

INIMITABLE—Deep rosy pink flowers, blotched and striped with white. T. pkt. 10c; 1/8 oz. 15c; oz. 80c; lb. \$10.00.

PETUNIA FINE MIXED—Includes all the known colors of the small flowered bedding varieties. T. pkt. 10c; oz. 80c; lb. \$8.00.

COMPACT BEDDING PETUNIAS

These grow erect, very compact and are a splendid class for bedding, flower boxes as well as for pot culture.

COCKATOO—Velvety deep violet purple with an irregular edge of glistening white, also spotted and starred white. A grand sight when massed in beds. Our strain is remarkably true and pure type. T. pkt. 15c; 1/8 oz. 30c; oz. \$2.00.

FRINGED BEAUTY—Try. You will find it one of the finest of dwarf compact Petunias. Flowers beautifully fringed of rich deep pink. T. pkt. 15c; 1/8 oz. 30c; oz. \$2.00.

GLORIA—Dazzling carmine rose, perfectly charming flower. T. pkt. 10c; 1/8 oz. 35c; oz. \$2.40; lb. \$22.00.

GRENADINE—Brilliant carmine red, a highly attractive new color. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.20; lb. \$15.00.

NORMA—Beautiful variety, flowers blue with white star. T. pkt. 10c; 1/8 oz. 30c; oz. \$1.80; lb. \$18.00.

RITA—Rich deep violet-blue, very conspicuous. T. pkt. 10c; 1/16 oz. 35c; 1/8 oz. 50c; 1 oz. \$4.00.

ROSE OF HEAVEN—Fiery pink flowers on short compact globular bushes literally covered with bloom and especially effective as a pot plant. More compact and more attractive than the popular Rosy Morn variety. T. pkt. 10c; 1/8 oz. 30c; oz. \$2.00; lb. \$20.00.

ROSY MORN—Throat silvery white, outer edge heavily shaded soft rose pink. T. pkt. 10c; 1/8 oz. 35c; oz. \$2.40; lb. \$22.00.

SNOWBALL—Pure white. T. pkt. 5c; 1/8 oz. 20c; oz. \$1.40; lb. \$18.00.

WHITE PEARL—Long looked for variety. Snow white, much larger than anything existing before, flowers of much substance, extra. T. pkt. 10c; 1/16 oz. 40c; 1/8 oz. 75c.

PETUNIA COMPACTA FINEST MIXED—Contains all the compact, short, upright growing bedding varieties in the many colors. T. pkt. 10c; 1/16 oz. 25c; oz. \$1.80; lb. \$20.00.

PETUNIA ALDOUBLE ROSY CARMINE

About 80% of the seed produces giant, very double, fringed, mostly fragrant flowers of fascinating rosy carmine color. The plants are dwarf and compact, producing bloom in out of the ordinary quantities. T. pkt. 50c; 500 seeds \$1.00; 1,000 seeds \$1.90; 1/64 oz. \$4.00.

BALCONY PETUNIAS

Suitable for hanging baskets, vases, boxes, etc. The colors are rich, the single blooms large, 3 inches or more in diameter.

BALCONY WHITE—**BALCONY PINK**—**BALCONY DARK RED**—**BALCONY RED AND WHITE STAR**—**BALCONY ROYAL PURPLE**—**BALCONY MIXED**. Any color: T. pkt. 15c; 1/32 oz. 25c; 1/16 oz. 35c; 1/8 oz. 65c; 1 oz. \$4.40. See also: **BALCONY QUEEN**.

PETUNIA WHITE PEARL

The finest white, dwarf, compact, bedding petunia. Very floriferous, flowers extra large, satiny-white. Height 8 in. T. pkt. 10c; 1/8 oz. 40c; 1/8 oz. 75c; oz. \$5.00.

PETUNIA LILAC QUEEN

Dwarf compact growing sort, large flowers, color a lovely silvery lilac. Height 8 inches. A new color in Petunias. T. pkt. 10c; 1/32 oz. 35c; 1/16 oz. 55c; 1/8 oz. \$1.00; 1 oz. \$6.50.

PETUNIA RITA

Dwarf, compact type, deep violet-blue, with a white throat, flowers large. The finest blue bedding petunia today. Height 9 inches. T. pkt. 10c; 1/16 oz. 35c; 1/8 oz. 60c; oz. \$4.00.

PINK GEM PETUNIA—The plants are only 5 inches high, completely covered with bloom, hiding the foliage. Plants spreading 8 inches across, flowers 2 inches across single, deep bright pink. T. pkt. 20c; 1/8 oz. 40c; 1/8 oz. 75c; oz. \$5.00.

Double Petunia

While a fair percentage of Double Petunia seed will produce double flowers, some will not, but the singles will be of unusual fine quality, richly colored and finely marked. The weaker seedlings should be carefully saved as these generally produce the finest double flowers. Our mixture is composed of the best and largest strains grown.

The seed we offer is the BEST German grown seed, producing a fair percentage of double flowers the balance are single flowers of the finest kind, extra large, many are fringed and they come in many colors. The reason why this strain of double petunia should be used by the florist is that from this German strain you will get larger flowers than so far found in the All Double strain also, you will get a much wider range of colors. Try both strains. As a flower grower you should know what is what in Petunias and the best way to find out is to grow both All Double as well as the old strain and then act accordingly.

DOUBLE FRINGED MIXED: T. pkt. 25c; 500 seeds 65c; 1000 seeds \$1.00; 1/64 oz. \$3.50.

DOUBLE VIOLET (Royal Purple)—A beautiful large flowering double fringed Petunia coming about 40% true from seed. Color violet-blue. T. pkt. 40c; 1000 seeds \$1.50; 500 seeds 80c.

DOUBLE SALMON—A superb Petunia coming almost 100% true from seed. Flowers large, fringed, color the most delightful shade of salmon pink. A new color. T. pkt. 70c; 1,000 seeds \$3.00; 500 seeds \$1.60.

PETUNIA DOUBLE MARVELS

Surprisingly beautiful, robust in growth, producing from seed better than seventy per cent of double flowers. It is impossible to fully describe the many varieties in form and color—brilliant crimson, pink, blue, lavender, white, etc. The blooms are never less than three inches in diameter and many are five inches across. They are frilled, ruffled and fluted; of unequalled beauty. Will prove a much better paying flower to the florist than geraniums and we believe that in time will replace geraniums to a large extent as a bedding plant. Florists that raised Double Marvels for trial had one regret only—that they did not sow and produce more plants as Double Marvels were selling fast and at double the price received for geraniums. Price: 500 seeds \$1.00; 1,000 seeds \$1.75; 5000 seeds \$8.00; 10,000 seeds \$15.00. T. pkt. 50c.

PETUNIA ALDOUBLE

Every plant comes double from seed, most of the plants producing very large and double fringed or waved flowers, the balance of plants producing smaller flowers of the carnation type. The range of colors is extensive the doubling of flowers perfect. Plants dwarf and compact. T. pkt. 50c; 500 seeds \$1.00; 1,000 seeds \$1.90; 1/64 oz. \$4.00.

Type of Large Flowering Double Petunia

DOUBLE BEDDING PETUNIAS

New race of Petunias. The plants are of vigorous and compact growth, 10 inches tall, producing from seed 50 to 60% of double flowers in clear colors. High class for bedding and pots. The flowers are medium to small in size. Very floriferous. **DOUBLE ROSY MORN**—Small double flowers, color bright rose-pink. **DOUBLE PINK AND WHITE**—Vivid rose, striped white. Excellent. **DOUBLE LILAC**. **DOUBLE WHITE**—Pure white. **DOUBLE CRIMSON**.

BEDDING DOUBLE MIXED—Any color. T. pkt. 20c; 500 seeds 40c; 1,000 seeds 75c; 1/64 oz. \$1.50.

PLATYCODON—Chinese Bell Flower

A campanula-like flower of uncommon beauty, blooming during June and July, perfectly hardy if planted deep, the crown covered with 2-3 inches of soil. Most valuable cut flower, splendid in wreaths and sprays. If your business is to sell hardy plants have plenty of platycodon. See to it that visitors and passers-by will see your plants—you will sell no end of them. If sown in February will bloom the same year in July. Try platycodon, you will find that it is a magnificent plant from every viewpoint.

GRANDIFLORUM—Flowers cupped, star shaped, large, showy and graceful, with good keeping qualities. The seed we offer produces quite a percentage of semi-double flowers. Height 3 ft. **BLUE—WHITE—MIXED**. Any color: T. pkt. 15c; 1/8 oz. 25c; oz. \$1.80.

PLATYCODON MARIESI. Of dwarf and compact habit with very large open bell-shaped flowers. Height 2 ft.

MARIESI BLUE—WHITE—MIXED. Any color: T. pkt. 10c; 1/8 oz. 20c; oz. \$1.40.

POLEMONIUM COERULUM

Hardy perennial bearing charming sky-blue flowers in large clusters from April to July. Requires rich soil. Height 2 ft. T. pkt. 10c; oz. 60c; lb. \$6.00.

POLEMONIUM RICHARDSONII—Flowers light blue with golden yellow anthers with a fragrance of ripened grapes from May to September, excellent for cutting. Perennial. Height 20 inches. T. pkt. 10c; oz. 60c; lb. \$6.00.

POLYANTHUS—See Primula Veris.

POLEMONIUM COERULUM PRIMA DONNA

Hardy perennial of robust growth, doing well in any kind of soil and under the hardest conditions, producing elegant, graceful, hyacinth like flowers of delicate clear blue. High class for cutting. In bloom from April to July. Height 2 ft. T. pkt. 10c; oz. 60c; lb. \$4.00.

DWARF POMEGRANATE

A new Christmas plant of dwarf, compact, bushy growth, bearing brilliant orange scarlet flowers in profusion. Start the seeds in flats in December, transfer into two inch pots, later into 4 inch, where the plants will establish themselves. Keep exposed to the full rays of the sun and start to force them early in August in a temperature of 60-65 deg. Nip the first flowers until October, when they will start to bloom heavily and be ready for Christmas and spring sales. T. pkt. 40c; 1/8 oz. 60c; oz. \$4.00.

Type of Single Iceland Poppy

ICELAND POPPIES—Papaver Nudicaule

These produce myriads of brilliant flowers, delicately perfumed on stalks, foot high, from early in May till frost if not allowed to seed. There is a certain class to these flowers and a strong appeal that makes them ready sellers and there is no flower that is more profitable to grow. In European markets millions of blooms are being sold every season and the wonder is that they are not being grown more liberally by the florists in this country. Fall is the best time to plant them, but they will bloom the same year if planted early in March. For shipping they should be cut in bud stage. Absolutely hardy. Height 15 inches. Perennial. Should be spaced 5 inches apart and exposed to full sunlight.

Sow the seed in July and August to get a big crop of bloom the following spring and summer.

ICELAND POPPIES DOUBLE MIXED—Besides white, yellow and scarlet the colors are straw, cream and deep orange shades. T. pkt. 15c; 1/8 oz. 25c; oz. \$1.50; lb. \$17.00.

ICELAND POPPIES SUNBEAM—New improved Iceland Poppies with flowers of gigantic size in all colors, borne on long stiff stems. Single. Height 18 inches. T. pkt. 20c; 1/8 oz. 30c; oz. \$2.00.

EL MONTE—Flowers extra large of a vivid deep orange color, borne on long wiry stems. In bloom six months after sowing. T. pkt. 10c; 1/16 oz. 20c; 1/8 oz. 35c; 1 oz. \$2.00.

FAKENHAM HYBRID—Result of a cross made from Sunbeam, Coonara and a Thibetian poppy. Plants of vigorous growth, flowers of good size, more open than is the rule, borne on long slender wiry stems. Free, graceful and practically perpetual flowering. Wide range of colors, including many new shades. T. pkt. 15c; 1/16 oz. 30c; 1/8 oz. 55c.

SANFORD'S GIANT—Very outstanding strain of Iceland poppies of vigorous growth flowers 4 to 6 inches across on extra strong stems in a wide range of colors. Height 2 ft. T. pkt. 20c; 1/32 oz. 35c; 1/16 oz. 65c.

PORTULACA—ROSE MOSS

Blooms profusely from early summer till autumn in any kind of soil. Colors range through shades of red, yellow, pink, striped, white, etc. Half hardy annual.

PORTULACA PARANA The flowers of this variety, which comes in one color only, distinct lovely bluish rose, are the size of a dollar piece and appear in great profusion till frost. Very showy. T. pkt. 10c; 1/8 oz. 15c; oz. \$1.00; lb. \$14.00.

PORTULACA LARGE FLD. Single —Mixed. T. pkt. 10c; 1/8 oz. 15c; 1 oz. 80c; lb. \$8.00.

PORTULACA LARGE FLD. Double —Mixed. T. pkt. 10c; 1/8 oz. 30c; oz. \$2.00; lb. \$28.00.

PLEASE NOTE

That you may order half and quarter ounces at ounce rate, half and quarter pounds at pound rate. Our trade packets are double the quantity of retail packets and our retail packets are well filled and you will get your money's worth every time.

OUR TRADE PACKETS

are double the quantity of retail packets. Our packets are well filled with fresh seed of strong germination, strictly true to name. When it comes to quality our seeds are 100 per cent. You will get no junk from us.

POPPY—PAPAVER

All poppies are first rate cut-flowers. They must be cut just before the flowers are ready to open and to prolong their blooming period all seed pods must be removed promptly. The annual sorts are hard to transplant, are best sown to where they are to stand or potted off singly. Thin out as soon as large enough. In bloom from May to August. Height 2-3 ft.

The above applies to annual poppies. Iceland, Alpine, Flanders and Tulip poppies can be sown in the spring or late in summer. Seedlings from summer sowings should be protected over winter with brush, over which is laid hay or straw. Laying of straw directly on top of the seedlings would cause them to rot. Oriental poppies can be sown spring or summer, they need no protection over winter, the important thing to remember is that Oriental poppies must be transplanted in the fall—never in the spring.

ORIENTAL POPPY—ROYAL SCARLET

The dazzling scarlet flowers are 8 inches across. Planted in a mass they will bloom for a month; individual flowers last for 10 days and cut for 5 days without fading. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.20.

TULIP POPPY An annual, but it should be sown in the fall for best results and finest blooms. The flowers are large, dazzling scarlet, effective for beds or masses. T. pkt. 10c; 1 oz. 45c; lb. \$4.40.

SPECIAL MIXTURE This includes all the double as well as single annual poppies. Pkt. 5c; oz. 25c; lb. \$2.40.

CALIFORNIA POPPY—(See Eschscholtzia)

ALPINE POPPY Papaver Alpinum. Hardy perennial of great beauty, fine for rockeries and pots. Started early, produces cup shaped single flowers 3-4 in. across in a wide range of colors from May to September. Our mixture is made from separate colors and includes the lovely fringed as well as the new Kerner species. Height 6 in. **MIXED:** T. pkt. 20c; 1/64 oz. 30c.

PYRETHRUM—Persian Painted Daisy

Dependably hardy perennials of vigorous growth. Pyrethrum Roseum blooms in May and June and again late in fall producing a heavy crop of fine daisy-like flowers that are much in demand for decoration Day. To have a good collection of P. Roseum will be to your advantage. P. Uliginosum has large, white daisy-like bloom in September and October. Thrives in any soil even in spots too damp for other flowers. P. Aureum and Tschihatchewi are foliage plants that will stand shearing and are excellent for borders. Pyrethrum Roseum grows from 2 to 3 feet high.

ROSEUM DOUBLE MIXED—The flowers are large and beautiful, saved from isolated and finest double flowers, however, the seed produces some single flowers occasionally, especially so the first year after sowing. T. pkt. 20c; 1/32 oz. 40c; 1/16 oz. 75c; oz. \$10.00.

ROSEUM BLOOD RED—T. pkt. 15c; 1/8 oz. 30c; oz. \$2.00.

ROSEUM KELWAY'S HYBRIDS—The flowers of this strain grow to an enormous size of 12 inches in circumference and present all the beautiful variations of color between light rose, pink and deep carmine. An excellent cut flower. 1/8 oz. 35c; oz. \$2.50; T. pkt. 15c; lb. \$26.00.

PYRETHRUM ULIGINOSUM—Forms large shapely bushes covered with very large white daisy-like flowers. Height 4 feet. Space the plants 15 inches apart. T. pkt. 10c; oz. \$2.00; 1/8 oz. 30c; 1/16 oz. 20c.

FOLIAGE PYRETHRUMS FOR BEDDING

PYRETHRUM AUREUM—(Golden Feather. The finest of all perennial plants suitable for edgings, carpet, bedding, ribboning, etc. Perfectly hardy, forming neat graceful bushes about 8 inches in height. The foliage is attractive yellow color, very handsome. T. pkt. 10c; oz. 60c; lb. \$4.20.

PRIMULA CHINENSIS FIMBRIATA

Large flowered, fringed varieties, seed from prize-winning pot grown plants by a noted European hybridizer. Better seed than ours does not exist. Height 9 in.

SUPERB MIXTURE—100 seeds 25c; 500 seeds 90c; 1,000 seeds \$1.75.

Primula

Sow the seeds of Chinese Primula in clean flats, filled with sifted leaf mould, loam and sand in equal parts, do not cover just press into the soil. At first keep the box in half shaded place and water carefully in a fine spray. As soon as the seeds are sprouted place in the highest spot in the house. Transplant into pots as soon as the plants are large enough to handle. Give plenty of air, water carefully. During fall and winter grow Primulas in a night temperature of 45 deg. to get high class blooming plants. Keep shaded and as cool as you can during summer and NEVER allow the plants to go dry. The plants will stand no crowding. On very hot days spray twice a day.

Primula Obconica Malacoides and Forbesii are more free flowering and much easier to raise than the Chinese variety. Use same methods as given above only Obconica you must not use leaf mould or peat as this causes the seed to germinate poorly.

For winter sales sow the seed of Obconica and Chinensis in March and April, Malacoides being more vigorous grower should not be sown before July.

Primula Veris, Officinalis and Auriculas, are hardy varieties and may be sown directly outdoors in well prepared seed-bed as soon as the ground can be worked. They do not like strong sun and over winter should be protected with a layer of straw or hay. All are easily naturalized and should be planted among shrubs or in turf. Planted in turf will not winterkill even in very cold localities.

PRIMULA OBCONICA M & M

ASTROSANGUINEA MOHNSTEIN—Dark, blood red, plants of compact growth, extremely floriferous.

ASTROSANGUINEA MUELLER—Blood red, not quite as dark as the Mohnstein type, producing flowers freely even during the dark winter months. **ROSEA MUELLER**—Pure pink.

HAMBURG RED—Glowing dark rose pink, early and large flowering. Plants of compact growth, loaded with flowers. The most accommodating of the greenhouse primulas, easy to raise and bring to bloom.

PRIMULA OBCONICA LIEBESGLUT

Fine, strong, long stems. Of shapely, compact growth, color fiery dark scarlet-red.

PRIMULA OBCONICA FASBENDER

A perfect type for pot culture, producing flowers of maximum size of deepest glowing red, deeper than the M & M strain.

PRIMULA OBCONICA GIGANTHEA

The varieties named below are all the new GIANT ARENDSII strain with extra large flowers. Height 12 in.

CRIMSON—DEEP LILAC—SOFT PINK (Salmon Queen)—**DARK BLUE—RICH PINK—MIXED.**

PRICE FOR ALL OBCONICA PRIMULAS NAMED ABOVE: 100 seeds 20c; 500 seeds 60c; 1,000 seeds \$1.00; 1/64 oz. \$2.00.

PRIMULA KEWENSIS

Decorative tender perennial of robust growth, valuable because it blooms in winter. Flowers in long spikes, canary-yellow. Height 1 ft. T. pkt. 25c.

Primula Veris

PRIMULA MALACOIDES

(Improved Baby Primrose)

Freest flowering of all Primulas, forming tufts of light green leaves and carrying on wiry stems about 10 inches long, whorls of graceful flowers in 4 months from date of sowing. While other primulas must be started for winter blooming in April, Malacoides should not be sown before the first week in July. Height 15 inches.

DEEP PINK, SNOW QUEEN—Flowers extra large pure white. Mixed. Any color: T. pkt. 25c; 1/64 oz. 50c.

MALACOIDES GIGANTHEA—New. Vivid lilac, stems stiff and long. Extra. T. pkt. 25c.

PRIMULA MALACOIDES TRUE ROSE

Flowers large, clear carmine, pink. Comes 90% true from seed. T. pkt. 35c.

PRIMULA MALACOIDES DWARF KING

New. Flowers an inch or more across of a pleasing shade of deep, lavender-pink with golden centers, produced in greatest abundance. The plants are dwarf rarely over 12 inches tall, foliage compact not spreading. T. pkt. 50c.

PRIMULA MALACOIDES ERICKSONI—Lilac pink with a large greenish yellow eye. Strong grower. T. pkt. \$1.00.

Hardy Primulas

After sowing the seed of hardy primula, place the flats or pans in a dark place and move to light when the seed is sprouted. The seed is best sown in January, flats placed in cold frames covered with snow and kept heavily shaded. Treated thus the seed comes as a rule in the early spring.

HARDY PRIMULAS can be easily forced, handled like violets and furnish lots of high class bloom at a time when flowers are flowers.

PRIMULA AURICULA

Primula Auricula. Fragrant hardy perennial. Many rich colors. An extremely free bloomer. Height 6 inches. 1/8 oz. 35c; 1/2 oz. 60c; T. pkt. 10c.

PRIMULA CASHMERIANA

A real gem. Large, dense, globular heads of flowers of pleasing lavender color, born on stout stalks high above the foliage. In bloom from early in April till June. Perfectly hardy, thriving in the most exposed places. High class for rockeries. An excellent cut flower, forces easily. Height 15 in. T. pkt. 40c.

ENGLISH PRIMROSE

Primula Vulgaris. The wild English flower, color light canary yellow, fragrant. Hardy perennial. Height 8 in. T. pkt. 10c; 1/2 oz. 35c; oz. \$2.40.

PRIMULA BEESIANA

Flowers bright velvety purple in May and June. Very floriferous and very hardy. Height 15 in. T. pkt. 40c.

HARDY PRIMULA JAPONICA

Very showy and very hardy. Sow the seed in January, place the flats outdoors, cover up with snow, shade with boards, take the boards off when the seed is up. Although a perfectly hardy perennial of vigorous growth, must be protected over winter by covering with straw or brush. The colors are shades of crimson, purple, lilac and carmine pink. Blooms in April and May. Height 18 in. **CHOICE MIXED**—T. pkt. 30c; 1/2 oz. 45c; oz. \$3.00.

PRIMULA FLORINDAE—Flowers fragrant, large, bright lemon yellow in June-July, fine for cutting. Very valuable because a strong grower and very hardy. Height 3 ft. T. pkt. 40c.

PRIMULA FLORIBUNDA—Large yellow flowers during winter under glass and early in spring outdoors. Hardy. Height 12 in. T. pkt. 40c.

PRIMULA OFFICINALIS COWSLIP. Bright yellow fragrant flowers in April and May. Very easily raised and very hardy. Does well in sun or shade withstanding prolonged dry spells. Height 10 in. T. pkt. 10c; 1/2 oz. 30c; oz. \$2.00.

PRIMULA PULVERULENTA—Bartley strain. Large flowers in many colors, during May and June. Hardy. Height 3 ft. T. pkt. 40c; 1/32 oz. \$1.20.

PRIMULA ROSEA GRANDIFLORA—Blooms in April and May, flowers large, fiery carmine-pink very bright, very appealing. It will pay you to try this Primula for spring sales. Hardy. Height 8 in. T. pkt. 30c; 1/64 oz. 45c; 1/32 oz. 85c; 1/2 oz. \$2.00.

PRIMULA SIEBOLDI. An exceptionally hardy Primula from Siberia. The seed we offer was saved from selected large flowered specimens producing extra large flowers in umbells in many bright colors with a white eye. Contrary to the rule the seed germinates freely even when sown during spring or summer. Fine pot plant also for borders. Prefers shade. Blooms in May. Height 10 in. 100 seeds 25c; 250 seeds 50c; 1000 seeds \$2.00.

PRIMULA VERIS GIGANTHEA

The flowers are of enormous size, way superior to the old strain, born on wiry and long stalks. The colors are yellow, pink and lilac, clear and attractive. Can be forced with ease and had during winter, when flowers are worth money. Try a batch of these wonderful primulas. They are a new thing and no doubt will prove a paying proposition. Height 1 ft. T. pkt. about 200 seeds 20c; 1/2 oz. 50c; oz. \$3.60.

PRIMULA VERIS MUNSTEAD

A magnificent strain, flowers of largest size, showing wonderful shades of yellow as well as purest white. Height 1 ft. T. pkt. 20c; 1/2 oz. 50c; oz. \$3.60.

PRIMULA VERIS MIXED—(Primula Elatior, Polyanthus). Finest quality mixed. Height 1 ft. T. pkt. 10c; 1/2 oz. 35c; oz. \$2.40.

PYRETHRUM TSCHIHATCHEWII

Unexcelled as a border plant, and for carpeting. Very dwarf, fine, moss-like foliage, thriving in poor soil and withstanding heat and drought to such a degree that it is used in Southern Europe for lawn making in places too hot and dry, where no grass will grow. Hardy perennial. Height 6 in. T. pkt. 10c; 1/2 oz. 25c; 1 oz. \$1.80.

RICINUS—CASTOR BEAN

Easily raised from seed planted indoors in March or April; planted in small pots and set out 30 inches apart in rich ground when all danger of frost is past.

ZANZIBARIENS—The gigantic leaves, 2 feet and 1 foot across and the great size of the plant surpass any other known Ricinus. Mixed varieties with green, brown or purplish leaves. T. pkt. 5c; 1 oz. 15c; 1/2 lb. 40c; lb. \$1.60.

ZANZIBARIENS ENORMIS—Grows 15 to 20 feet high in one season and is the biggest of the Ricinus family. Foliage bright green. T. pkt. 10c; oz. 25c; 1/2 lb. 60c; 1 lb. \$2.40.

RICINUS SPECIAL MIXTURE—A well balanced mixture of choice and distinct varieties. T. pkt. 5c; oz. 25c; 1/2 lb. 50c; lb. \$2.00.

RUDBECKIA PURPUREA HYBRIDA

An improved Purpurea and really a first class, hardy perennial. The flowers are very large, single, daisy like carried on long stems, crimson in color. Height 4 ft. Blooms in July and August. T. pkt. 10c; 1/2 oz. 20c; oz. \$1.20.

RUDBECKIA NEWMANI is not listed by us because it seeds itself so much that it becomes a pest. Its flowers are nice, even beautiful, but we think that the less of that flower the better. Other Rudbeckias are O. K.

Double Flowering Poppy

RANUNCULUS DOUBLE GIANTS

Large, double flowers in many colors, produced in May. Fine for cutting. Half hardy perennial. Divisions of clumps started in 2½ in. pots late in August, then planted 8x8 in., will produce bloom from middle of March on. Height 12 in. T. pkt. 10c; oz. 60c; lb. \$6.00. True Palestine strain.

RHODANTE

Everlasting annual bearing delicate flowers of great beauty from May to September. Splendid as a pot plant, for dry bouquets as well as a cut flower. Long favorably known in European markets and fast gaining in popularity on this side. Height 1 foot.

RHODANTE—SPECIAL MIXTURE—Contains all the best varieties, both single and double. T. pkt. 10c; ½ oz. 30c; oz. \$1.00; lb. \$14.00.

ROCHEA FALCATA

A plant with thick, fleshy foliage and flame red flowers. One of the best pot and house plants as it will stand an immense amount of neglect. Requires rich soil with one-third of sharp sand mixed in. Height 18 in. 50 seeds 15c.

SALPIGLOSIS—PAINTED TONGUE

An annual of great beauty in bloom from June to October. The colors are red, blue, yellow, pink, orange, violet, etc., in various shades, are intricately netted, penciled and veined with a glint of gold.

An ideal flower for bouquets that will sell, especially if mixed with gypsophyla. Sow thinly right outdoors as soon as the ground is ready and again about a month after that so as to have flowers to cut till frost. Blooms in winter if sown in September.

Salpiglosis to be at its best should be grown in light soil. If your soil is stiff, add some sharp sand or coal ashes. Height 2 ft. **SCARLET AND GOLD**—Velvety scarlet flowers, with numerous golden veins. A great cut flower.

VIOLET AND GOLD—Velvety violet, veined with gold. A grand cut flower.

CRIMSON—LIGHT BLUE—CRIMSON AND GOLD—Any color: T. pkt. 10c; ½ oz. 15c; 1 oz. \$1.00.

EMPEROR MIXED—A magnificent strain with extra large richly colored flowers. All colors mixed. T. pkt. 10c; ½ oz. 15c; 1 oz. 80c.

SAINTPAULIA IONANTHEA GRFL.

Winter blooming pot plant, producing flowers six months after sowing and staying in bloom for months. The flowers resemble sweet violets, are larger in size, of deepest blue, set off by brilliant golden anthers. Use soil with sharp sand and never water overhead. Height 6 in. 100 seeds 35c; 500 seeds \$1.40.

SANTPAULIA I. CORDATA—Easily raised pot and bedding plant of strong upright growth, flowers deep lavender blue, produced 6 months from date of sowing. Height 6 in. T. pkt. \$1.00.

THE KEY TO SUCCESS for you is **GOOD SEEDS**. **GOOD SEEDS** are also the key to our success. We are doing our very best in order to have seeds of the best quality and the latest creations in flowers and vegetables.

Salvia or Scarlet Sage

All Salvias are easily grown from seed, sown indoors in March or April and set in permanent location in May. Require good soil. All bloom the first year from seed and are best treated as annuals. Plant 18 inches apart each way.

Seeds mostly of our own growing, always of strong germination. To get a good stand, sow in a bed filled with clayey soil that contains no manure and no vegetable matter. Do not use good rich soil. Use clean clayey soil in your flats also. Your plants will not damp off if you will set the seedlings at the time of transplanting at the same depth they stood before you lifted them. To prevent rot and damping off give your salvias plenty of air and sunshine. If your plants in flats get spindly or overgrown clip them; they will start new growth soon again and you will have the prettiest, bushy plants of even growth you ever saw.

The Farinacea variety is one of the finest blue flowers. The plants should be pinched back during their early stage of growth two or three times. This induces the plants to branch out from the base and results in erect spikes.

When transplanting see to it that you plant the seedlings at the same depth they stood before you lifted them. If you will plant deeper they will rot and you will lose them. It is all right to set most plants deeper than they stood, but it does not work with Salvia.

SALVIA SPLENDENS—The plants grow 3 feet in height and are completely covered with scarlet flowers. 1 oz. \$1.40; ½ oz. 20c; 1 lb. \$20.00; T. pkt. 10c.

BONFIRE OR CLARA BEDMAN—Of compact growth forming oval bushes covered by flower spikes of brilliant scarlet, clear above the foliage. Brilliantly effective for bedding either planted alone or in front of other plants. Height 2 feet. T. pkt. 10c; ½ oz. 25c; oz. \$1.60; lb. \$22.00.

ZURICH—Produces flowers in such great numbers that they cause the spikes to droop gracefully with their weight. The flowers are of a brilliant, dazzling scarlet, and borne in endless profusion all summer and fall. Height 2 feet. T. pkt. 10c; ½ oz. 25c; 1 oz. \$1.60; 1 lb. \$24.00.

AMERICA—A fine variety of compact, bushy growth, producing large, heavy spikes of fiery scarlet flowers. T. pkt. 10c; ½ oz. 25c; oz. \$1.60; 1 lb. \$24.00.

FIREBALL—Robust growing variety, producing globular bushes, studded with dazzling scarlet spikes of bloom. T. pkt. 10c; ½ oz. 30c; oz. \$2.00; 1 lb. \$28.00.

FARINACEA—A perennial variety producing tall spikes of silvery lavender blooms from a dense mass of foliage from June to November. In the North needs protection over winter. Height 3 ft. T. pkt. 10c; ½ oz. 20c; oz. \$1.00.

SALVIA AZUREA GRANDIFLORA—A hardy perennial variety producing spikes of intense sky-blue flowers in great profusion. Height 2 to 3 feet. T. pkt. 10c; ½ oz. 20c; 1 oz. \$1.20; lb. \$18.00.

SAXIFRAGA

LINGULATA LEICHTLINII—Produces early in spring, erect panicles of bright red flowers and masses of bold, long narrow, deep green foliage covered with "frost." A choice plant for the rockery, border or shrubbery. Hardy perennial. Easily raised. Height 30 inches. T. pkt. 20c; 1/64 oz. 90c.

SAXIFRAGA PERENNIAL MIXED—Many varieties, including broad leaved, mossy narrow and encrusted leaved sorts, both tall and dwarf growing. Once started from seed you may select your type of plant and propagate these by divisions. T. pkt. 15c; 1/32 oz. 30c.

MOSSY VARIETIES MIXED—These form moss-like cushions in many shades of green and do not grow over 4 inches tall. T. pkt. 20c; 1/64 oz. 35c.

SAXIFRAGA COTYLEDON

Flowers white in large panicles, irresistibly appealing to flower lovers during May and June. Fine pot and rock plant. Hardy perennial. Height 1 ft. T. pkt. 40c; 1/64 oz. 60c; 1/32 oz. \$1.00.

SAXIFRAGA LONGIFOLIA HYBRIDS—Forms rosettes of leaves 4-8 in. across, that resemble the bloom of an Ostrich Feather Aster. Neat and quite out of the ordinary. Leaves "frosted," flowers white dotted with red. Height 5 in. T. pkt. 50c.

AS ROCK PLANTS, SAXIFRAGAS stand very high. They can be easily and quickly propagated by divisions. The plants sell fast. Easily raised from seed, thriving in any good soil in sun or shade. Perfectly hardy.

Schizanthus

A most desirable annual for pot and garden culture and one of the daintiest of cut flowers. Compact and bushy, lasting in bloom for months. A highly paying plant for florists. For spring trade sow in a cool house in October, pot off when large enough and shift as soon as needed. Schizanthus must never be allowed to become pot bound. For summer blooming sow when danger of frost is past, later transplant to stand a foot apart. Make several successive sowings.

If a crop of flowers is desired during December and January sow in September, allow the plants to bud in 4 in. pots, grow cool (48 deg. house). You will find it about the easiest flower to bring into bloom and the most readily saleable. To get bushy plants you must pinch and keep on pinching the plants.

DR. BADGER'S GIANT FLOWERING SCHIZANTHUS—A superior strain with perfect flowers 1½ inches across, in all imaginable colors and markings. Foliage fern-like bright green. Never fails to bring forth admiration. Height 15 in. T. pkt. 10c; ½ oz. 20c; 1 oz. \$1.20.

WISETONENSIS SNOWFLAKE—Flowers extra large, daintily fringed, glistening pure white, completely covering the foliage and exceedingly beautiful. High class florist flower. Height 15 in. T. pkt. 15c; 1/32 oz. 30c; ¼ oz. 80c; oz. \$6.00.

WISETONENSIS MIXED—Compact growing strain producing fine flowers in abundance and a first class plant. Height 15 inches. T. pkt. 10c; 1 oz. 60c.

SCHIZANTHUS RETUSUS—Flowers very large, orchid shape, in white, pink, crimson, spotted, etc. Excellent for pots or garden display. Height 2 ft. T. pkt. 10c; oz. 45c; lb. \$4.00.

SEMPERVIVUM MIXED

Our mixture contains the best hardy perennial varieties. Sempervivum or House Leeks, are interesting and attractive plants, forming rosettes of fleshy leaves in many colors such as, pinkish brown, silvery white, bluish green, etc. Flowers in red, yellow and white. Sempervivum will grow where nothing else would, on dry banks, on top of walls, they are excellent rock plants and indispensable in carpet bedding. Height 3 to 6 in. T. pkt. 30c.

SENECIO-JACOBEEA ELEGANS

DOUBLE MIXED—An annual, bearing very double flowers in large heads from June to October, excellent for cutting and as a bedding plant. The flowers are many colored, white, red, bronze, brown and shades rarely seen. Foliage feather-like, beautiful. Start the seed in March, plant out in May or sow outdoors in May. Height 2 ft. T. pkt. 10c; ½ oz. 30c; oz. \$1.80.

SENECIO CLIVORUM—Robust growing hardy perennial with rich orange yellow flowers, very decorative. Height 4 feet. T. pkt. 10c; oz. \$1.00.

SHASTA DAISY—See Chrysanthemum.

Large Flowered Scabiosa

Scabiosa

MOURNING BRIDE

One of the handsomest summer border plants, producing in great profusion splendid double flowers for table bouquets, etc. They grow about 30 inches high and come into bloom early in July and continue in never-ceasing succession till frost. Hardy annual.

AZURE FAIRY—Blue; **BLACK PRINCE**—Black Purple; **CRIMSON-FIREBALL**—Scarlet; **YELLOW-SHASTA**—Pure white, very large and double; **PEACH BLOSSOM**—Flesh pink, extra large and double; **MIXED**. Any of the above: T. pkt. 10c; oz. 45c; lb. \$3.20.

SCABIOSA GIANT LOVELINESS—Flowers very large on long stiff stems, color, shades of delicate salmon-rose. T. pkt. 10c; oz. 80c.

CAUCASICA ISAAC HOUSE—Flowers very large fringed and ruffled in shades of blue. Height 30 in. T. pkt. 25c; ½ oz. 50c; oz. \$3.80.

CAUCASICA PERFECTA—Sky blue, large flowers of elegant outline, a first class cut flower. T. pkt. 20c; ½ oz. 40c; oz. \$3.00.

CAUCASICA ALBA—Pure white. T. pkt. 20c; ½ oz. 40c; oz. \$3.00.

JAPONICA—This is a perennial variety of great beauty and elegance. The beautiful artistic lavender blue flowers are borne on long wiry stems and are 2 to 3 inches across. Very floriferous. A fine cut flower. Height 3 ft. T. pkt. 10; oz. 45c.

SCABIOSA COLUMBARIA—Hardy perennial but not hardy in Iowa. Flowers two inches across with short compact petals. Height 2 ft. In bloom May-June. Pink and lavender colors. **MIXED**. T. pkt. 10c; ½ oz. 30c; oz. \$2.00.

SCABIOSA BLUE COCKADE

An outstanding novelty. Flowers double of great depth as to be conical in shape and very beautiful. Color purest deep azure blue, deeper than Azure Fairy, entirely free of any suggestion of pink. An excellent cut flower, being strong-stemmed and free flowering. Annual. Height 3 ft. T. pkt. 15c; ½ oz. 25c; oz. \$1.60.

SCABIOSA GIANT HYBRIDS A new highly improved annual Scabiosa producing flowers of gigantic proportions in many colors. **MIXED**. T. pkt. 10c; oz. 80c.

SCABIOSA COLUMBARIA—A beauty among beauties, a high class florists' flower. But with us here in Iowa, winter-kills every time. Try it. If it proves hardy in your locality you will see some real flowers.

SCARLET RUNNER

A variety of climbing bean, bearing clusters of attractive scarlet flowers and edible pods. T. pkt. 10c; lb. 50c.

SHAMROCK

What we offer is a plant identical in growth with White Dutch Clover but there is a great difference, namely that our Shamrock has mahogany brown and wine-red foliage, is very conspicuous and a plant that sells fast if placed in pots and offered for sale in the spring. T. pkt. 15c; ½ oz. 40c.

SCABIOSA GOLDINGENSIS

Caucasica type, flowers very large, beautifully frilled of bright deep lavender on long stiff stems from June to September. Perfectly hardy. Height 3 ft. T. pkt. 25c; 1/16 oz. 35c; 1/8 oz. 60c; oz. \$4.00.

SIDALCEA ROSY GEM

Hardy perennial plant with handsome spikes of pink flowers in June and July. Needs winter protection. T. pkt. 10c; 1/8 oz. 25c; oz. \$1.80.

SILENE ARMERIA—CATCHFLY

An annual producing a solid mass of bloom in red, pink and white from May to August. Height 1 ft. MIXED. Pkt. 5c; oz. 25c; lb. \$1.60.

SILENE ORIENTAL SPLENDENS—A splendid hardy perennial fine for cutting or for the hardy border bearing fine large bright rosy pink flowers with a delicious perfume from June to September. Height 18 in. Easy to raise from seed. Space the plants 2 feet apart. T. pkt. 10c; 1/8 oz. 30c; oz. \$2.00.

SILENE ALPESTRIS—Hardy perennial rock plant of dwarf compact growth, a model of elegance in or out of bloom. Flowers in sheets of glistening white from May to July, therefore a plant that will show the grower a profit and that will sell in quantities. Height 6 in. T. pkt. 15c; 1/16 oz. 30c; 1/8 oz. 55c; oz. \$4.00.

SILENE ROSE QUEEN

Of similar usefulness as Sweet Alyssum, producing a sheet of brilliant bloom early in the spring. The color of Rose Queen Silene is glowing deep pink. The flowers are double. Highly priced in Europe. Will be admired here if given trial. Annual. Height 4 in. T. pkt. 10c; oz. 60c.

SILVER LACE VINE

Polygonum Auberti. A rapid growing, drought resisting hardy perennial climber that grows over 10 feet tall, covering a space 8-10 feet wide the first season in any kind of soil, even in soil and a position where other similar plants would not grow at all. Will do well on any side of the building. The vine is covered with beautiful, foamy, white flowers in large clusters. The plants are much in demand and it will pay you to have a few ready for spring sales. T. pkt. 20c.

SINNINGIA—See *Gloxinia Regina*.

SMILAX—CLIMBER

A graceful, tuberous rooted, perennial climber, none surpassing it for its glossy deep green most delicate foliage. Fine for vases and baskets. Sow from December to March, soak the seed 24 hours before sowing. Height 6 to 10 feet. T. pkt. 5c; oz. 30c; lb. \$3.20.

SOLANUM—JERUSALEM CHERRY

Of dwarf branching habit, with shiny small oval shaped leaves loaded with bright scarlet cherry like fruits. Fine pot plant easily raised from seed. Height 1 ft. T. pkt. 10c; oz. 45c.

SPIREA JAPONICA—See *Astilbe*.

SPERGULA PILIFERA AUREA

Hardy perennial only two inches high, flowers rich orange yellow. Fine for neat beautiful flowering lawns, for edgings and rockeries. Does well in any kind of soil in full sun. Seed very fine but sprouts readily. 100 seeds 25c.

SAPONARIA VACCARIA

An annual producing masses of graceful sprays of glistening satiny flowers, resembling an enlarged gypsophyla. Very popular in European flower markets and sure to become popular on this side. Treat like you do *Gypsophyla Elegans*. PINK—WHITE—MIXED. T. pkt. 5c; 1 oz. 20c; 1 lb. \$1.40, prepaid.

SAPONARIA OCYMOIDES—Hardy, perennial, creeping plant of dense growth, less than a foot high, covered with a sheet of brilliant bloom from May to August. Unsurpassed for covering banks and in rock work. CRIMSON. T. pkt. 10c; 1/8 oz. 15c; oz. 80c; lb. \$8.00.

SPIREA ULMARIA—Hardy perennial, flowers creamy white in large terminal heads on long stout stalks during June and July. First class cut flower. Genuinely beautiful, perfectly hardy, long-lived, drought and heat resisting, a real gem greatly deserving to be a favorite with flower lovers as well as professionals. Height 3 ft. T. pkt. 10c; 1/8 oz. 15c.

STEPHANOPHYSUM—JUSTICIA

LONGIFOLIUM—An elegant house plant, easy to raise from seed and blooming during winter under glass or in the house. The flowers are in clusters and in great numbers, of the most brilliant vermilion red. Blooms 12 months from date of sowing. Cut back after through blooming, furnishes flowers summer and winter. Half hardy perennial. Height 1 1/2 feet. 25 seeds 10c; 100 seeds 40c.

STEVIA

Stevias furnish the florist from November till March, quantities of graceful sprays; unexcelled for bouquets and design work. Grows readily from seed. Grow them outside over summer giving them 2 feet each way, pot off early in the fall and keep over winter in a temperature of 40 to 50 degrees. Any soil is good for them but they will not stand the slightest frost.

STEVIA SERRATA ALBA—White. Height 30 in. T. pkt. 10c; 1/8 oz. 15c; oz. 80c.

STEVIA PURPUREA—Purple. Height 20 in. T. pkt. 10c; 1/8 oz. 15c; oz. 80c.

STIPA ELEGANTISSIMA

Very ornamental grass growing about 3 feet high, much used in dried bouquets. Start the seed indoors and plant outdoors when danger of frost is past. Pkt. 10c; 1/8 oz. 30c; oz. \$2.00.

STIPA PENNATA—Feather Grass. Bears long panicles of very feathery appearance much used in dry bouquets, from June to September. Height 3 feet. T. pkt. 10c; 1/8 oz. 35c; oz. \$2.60.

SNAPDRAGON—See *Antirrhinum*.

STOKESIA—CORNFLOWER ASTER

A magnificent hardy perennial. The flowers, measuring 4 to 5 inches across, are produced on stiff, long stems, making an excellent plant for cut flowers, for bouquets, etc. Here in Iowa it winterkills but it is so easy of culture and produces such handsome flowers it is really worth while growing as an annual. Plant 9 inches apart. Height 2 feet. In bloom from August to October.

STOKESIA BLUE—Lavender blue. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.20; lb. \$10.00.

Double Sunflower

SUNFLOWER—HELIANTHUS

The tall growing varieties should always be planted in groups to make a background for dwarfier plants. All Sunflowers are gross feeders and require rich soil and full exposure to the sun. They bloom from early summer till frost and are excellent cut flowers. Plant seed in the open in April and May. Annuals.

CHRYSANTHEMUM FLOWERED DOUBLE—Light yellow, very large and double, with feathered petals resembling somewhat the double Chrysanthemum of the florist. Height 6 feet. T. pkt. 10c; oz. 45c; lb. \$3.00.

CUCUMERIFOLIUS MINIATURE DOUBLE—The flowers are small, extremely double with a brown colored center, very handsome. The plant produces hundreds of blooms which are first class as cut flowers. Height 5 ft. T. pkt. 10c; oz. 45c; lb. \$3.00.

SPECIAL MIXTURE—Embraces all the choice Sunflowers, both double and single. T. pkt. 10c; oz. 45c; lb. \$3.00.

STACHYS LANATA

Hardy perennial with ornamental woolly and thick silvery white foliage in dense tufts. Splendid for bedding and borders. A long lived perennial if planted in full sun and well drained position. Height when in bloom 2 ft. Height of leaves 8 inches. Flowers dark rose pink. T. pkt. 10c; oz. 45c.

STRAWFLOWERS—SPECIAL MIXTURE

This mixture contains every variety of strawflower that is worth growing and in all colors. T. pkt. 10c; oz. 60c; lb. \$5.00.

STRELITZIA REGINAE BIRD OF PARADISE

The leaves of this plant are paddle shaped, foot long, deep green, stiff and shiny, borne on upright stalks twice the length of the leaves, the flowers of most peculiar and striking form, orange and blue in color. Unexcelled as a specimen in lawn, as a pot plant, and whenever the unusual, beautiful and strongly effective is wanted. Vigorous grower, easily raised from seed, will stand much neglect but given strong soil, plenty of water and placed in full sunlight it will prove to be a plant that will be much talked about by all who see it. Grow rather cool, 50 degrees at night is sufficient. Tender perennial 3½ ft. tall. The seed germinates in 6 to 8 weeks from date of sowing and must be started in heat. 4 seeds 50c; 10 seeds \$1.10.

SWAINSONIA GRANDIFLORA

An elegant plant with large white, pink and red flowers and delicate bright green foliage, excellent for bouquets, as a green, in basket and design work, for high class wreaths and sprays and as a substitute for Valley in brides bouquets. Readily started from seed. Grow in a 50 deg. house, give rich soil and plenty of sun. The flowers resemble somewhat sweet peas, the plants are in bloom almost every day in the year if kept in a large pot or tub so as to restrict them as to root room. Once you try Swainsonia you will not be without it. Tender perennial. Height 3 feet. T. pkt. 20c; 1/16 oz. 30c.

Statice Latifolia

STATICE—SEA LAVENDER

Very useful in bouquets either fresh or dried. Easily raised from seed. All varieties require deep soil and sunny position, the perennial varieties should be left undisturbed for several years.

STATICE LATIFOLIA is a handsome perennial plant of easy culture, growing about 2 feet high. Planted in deep soil and left undisturbed will produce graceful, deep blue flowers for many years. Blooms from June to August. Cut it when in full bloom, about 20 stalks to a bunch, hang up and let dry. When perfectly dry, close the tops of the bunches tightly together and wrap up in paper to keep the dust off and store away. When ready to use it, sprinkle the bunches before unwrapping. T. pkt. 10c; oz. 60c.

PLANTS—Strong two year old field grown \$1.20 per doz., \$8.00 per 100, not prepaid.

STATICE INCANA NANA—Bears on much branched stalks great numbers of pale lavender flowers, presenting cloud-like appearance. Hardy perennial. Height 15 inches. T. pkt. 10c; oz. 45c; lb. \$4.00.

SINNUATA—A most useful annual variety growing from 2 to 3 feet tall and producing brightly colored flowers that retain their lively color when dried. Really a splendid flower for bouquets, both fresh or dried. **BLUE—LAVENDER—DEEP PINK—MIXED.** Any color: T. pkt. 5c; oz. 20c; lb. \$2.00.

SUWOROWI—Produces long branched spikes of light rose flowers shaded with crimson. Easily raised annual. Height 2 feet. For a winter crop Suworowi is sown under glass in the late fall. Sown in February, later transferred to cold frames, will give a crop the last of May. T. pkt. 10c; oz. 80c; lb. \$12.00.

STATICE TARTARICA—A hardy perennial variety, flowers white, the best sort for drying. T. pkt. 10c; oz. 45c; lb. \$4.00.

STATICE BONDUELLI—Fine for bouquets and indispensable for dry bouquets and wreaths. Flowers large, clustered at the end of stalks, of golden yellow color. Plant outdoors when danger of frost is past. Annual. Height 18 in. T. pkt. 10c; oz. 45c; lb. \$4.00.

STATICE CASPIA—Perennial variety producing graceful sprays of lavender and white flowers valuable both as fresh cut flowers or dried. Also called "Baby Statice." T. pkt. 15c; 1/16 oz. 25c; 1/8 oz. 45c; oz. \$3.00.

STATICE PUBERULA

A new hardy perennial of extreme beauty. Flowers in huge umbels borne on several stalks above a cushion of elegant foliage five months after sowing, of the deepest and brightest violet-blue color. Fine for pots, rockery and borders. Height 6 in. T. pkt. 40c.

STREPTOCARPUS—Winter blooming greenhouse plant. Flowers large, trumpet shaped in shades of violet, pink rose down to pure white. What we offer is seed saved from the finest, large flowered hybrids, the best money can buy. Treat same as Gloxinia and Saintpaulia. Seed very fine. Height 1 ft. T. pkt. 25c; 1/64 oz. \$2.00.

Statice, Gypsophyla and the Florist

When fresh flowers are high in price and scarce, dried statice and gypsophyla will save the situation as they can be used in every case almost, when wreaths and funeral designs are needed. And you save money. Store the sprays in a dry place, protect from dust and sprinkle the tops a few hours before needed so that they will absorb moisture and not crumb so easily. You will save yourself worry, expense and the customer will be just as well pleased as if fresh flowers were used.

OUR TRADE PACKETS

are double the quantity of retail packets. Our packets are well filled with fresh seed of strong germination, strictly true to name. When it comes to quality our seeds are 100 per cent.

Sweet Peas

WINTER FLOWERING EARLY GIANT SPENCERS

ALL WHITE—Largest pure-white.
AMBITION—Boldly waved lavender-lilac.
BLUE BIRD—Best deep blue, a rich shade
BLUE BONNET—Best clear blue.
BLUE SENSATION—Light blue, flowers waved.
BURPEE'S ORANGE—Brilliant orange.
CHEVALIER—Carmine-rose, extra good.
COLUMBIA—Rose and cream-rose, bi-color.
ELDORADO—The best orange.
FLAMINGO—Best salmon pink.
FRAGRANCE—Extra good frilled, extra large lavender.
GIANT ROSE—Pink on white ground.
GLITTERS—Best cerise, brilliant color.
GRENADIER—Brilliant geranium scarlet.
HARMONY—Extra good clear lavender.
HEATHER BELL—Best lavender mauve.
HERCULES—Extra good giant pure pink.
HOPE—Large waved flowers, pure white, extra good.
IMPERIAL PINK—Best deep pink.
LADY GAY—Best bluish pink.
LADDIE—Mammoth flowered rose pink.
MAJESTIC ROSE—Brilliant rose pink, hard to beat.

ORIENTAL—Extra good deep cream-colored.
PAL—Extra fine carmine rose.
QUEEN CRIMSON—Outstanding deep crimson.
SILVER KING—High class light blue.
SNOWSTORM—Popular white. White-seeded.
SPRING SONG—Salmon cerise, extra choice.
VALENCIA—Deep orange, sunproof.
VULCAN—Vivid scarlet, sunproof.
ZVOLANEK'S ROSE—Bright rose-pink.
ZVOLANEK'S PINK—Dark rose.
WINTER FLOWERING MIXED—Perfect blend of colors in the Early Flowering class, light Florists' shades predominating.
PRICE: Any variety: Oz. 40c; lb. \$4.00.

We sell half ounces at ounce rate, quarter and half pounds at pound rate.

Our List of Early Winter Flowering Sweet Peas include every color and the choicest, well-tried dependable varieties only. No matter which variety you will grow from our list, you will not be disappointed. An oz. of seed contains 370 to 420 peas.

SWEET PEA EILEEN

Early Winter Flowering Spencer. New. Rich rose, shaded salmon changing under certain lights to a dazzling cerise. This two tone effect gives the flower a brilliancy never before seen in Sweet Peas. Of largest size ruffled and waved, well placed on extra long strong stems. The best novelty in Sweet Peas in many years. Oz. 50c; lb. \$15.00.

SPENCER SWEET PEAS MIXED

Summer Flowering

This mixture includes all the finest Spencers listed as well as many new varieties. T. pkt. 5c; oz. 15c; ¼ lb. 45c; lb. \$1.80.

GRANDIFLORA MIXED

Embraces more than 75 of the best varieties of this type of sweet peas. T. pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 60c.

CUPID SWEET PEAS

These grow only 1 foot high and spread to about 2 feet and have fine dark green foliage. T. pkt. 5c; oz. 10c; ¼ lb. 38c; lb. \$1.50.

BUSH SWEET PEAS—Winter Flowering

Bush Sweet Peas or Semi-Cupids, Winter Flowering Sweet Peas grow upright, requiring no supports to the height of 18 inches, producing quantities of splendid, large sized, perfectly formed, fragrant flowers on medium long stems, excellent as cut flowers for funeral work as well as for pot plants, either for Christmas or Easter and unexcelled for the garden as a border plant. The plants are literally covered with bloom practically all summer, when planted in the open and all winter under glass. The seed we offer contains about twenty different colors. T. pkt. 15c; oz. \$1.00; lb. \$10.00.

RUFFLED OR DOUBLE SWEET PEAS—

The frilliness and duplexness of the wavy flowers that extends clear to the edges of the petals, imparts a double appearance and brightens the beauty and effectiveness of the flowers.

In the South Early Flowering Sweet Peas, sown after danger of heavy frost is past, will produce in the open a crop of flowers two weeks ahead of Late Spencers.

Sweet Peas

SUMMER FLOWERING SPENCERS

AMY JOHNSON—Old rose overlaid salmon cerise. Award of Merit. Oz. 60c; lb. \$5.00.
ANNIE IRELAND—White edged terra cotta pink.
AVALANCHE—Glistening, pure white, extra.
CHARITY—Scarlet crimson.
CHIEFTAIN—Silky mauve, extra.
CONSTANCE HINTON—Giant black seeded white.
DAMASK ROSE—Best rose carmine.
DORA—Cerise, cream wings, bi-color, extra.
DORIS—Soft salmon cerise.
ELEGANCE—Giant blush-pink.
ELFRIDA PEARSON—Giant shell-pink, exquisite.
EXCELSIOR—Best orange scarlet. Oz. 40c; lb. \$4.20.
FLUFFY RUFFLES—Rose pink, duplexed.
FORTUNE—Rich dark blue, extra.
HAWLMARK CERISE—Rose cerise on cream, extra.
HAWLMARK PINK—Giant salmon shaded pink.
HERCULES—Giant pale rosy pink.
JACK CORNWALL—Azure blue.
KING EDWARD—Crimson red.
KING MAUVE—Giant waved mauve.
KITTY PIERCE—Lilac suffused blush pink, flowers duplexed.
LADY RUFFLES—Ruffled soft pink, extra large.
MAMMOTH—Giant blazing orange scarlet, extra.
MARY PICKFORD—Cream pink, suffused salmon.
MODEL—Black seeded white, extra.
MRS. TOM JONES—Vigorous grower, large substantial flowers frilled, extra long stems. Color bright light blue.
OLYMPIA—Rich royal purple, extra.
ORANGE PICTURE—Sunproof dark orange, extra.
PICTURE—Deep pink on cream ground.
PINKIE—Giant pure deep pink, vigorous, extra.
POWERSCOURT—Finest pure lavender.
R. F. FELTON—Beautiful lavender.
REFLECTION—True clear blue, extra.
ROYAL PURPLE—Rich purple.
ROYAL SCOT—Brilliant cerise scarlet.
RENOUN—Carmine red.
RUFFLED ROSE—Rich dark rose, duplexed.
RUFFLED BEAUTY—Lilac pink on amber ground, ruffled.
SONNY BOY—Best brilliant vermillion red.
TANGERINE IMPROVED—Brilliant orange, extra large.
THE SULTAN—Black velvety maroon, extra.
WARRIOR—Red-maroon.
WHAT JOY—Deep rich cream, heavily frilled.
WEDGEWOOD—Lovely blue.
YOUTH—White rose pink edge, extra.
ANY OF THE ABOVE: Oz. 20c; lb. \$2.20, except where quoted.

SWEET PEAS UNDER GLASS Good drainage, the soil worked 18 in. deep or deeper, enriched with 30% of rotted cow manure and tramping down the soil **FIRMLY** is the key of success. Also 6 to 8 ft. of headroom.

Soak the soil thoroughly before sowing. Few days after that, when the soil is only moderately moist sow in rows running north and south and cover the seed 2 inches deep. Sow in shallow trenches 2-3 in. deep, fill up these trenches with dirt about 45 days after planting. NEVER sow in wet or loose soil. Have the rows 15-18 in. apart. Start watering only when the seeds are half inch out of the soil then water only about once a week soaking the soil thoroughly. Thin out to at least 6 in. apart in the rows. When the plants begin to bloom use liquid cow manure once a week. Keep the soil stirred, do not allow any crust to form. In the fall when the weather is cloudy some of the buds will be dropping. To minimize this trouble keep the house on the dry side, STOP WATERING and wait 'till the top soil is dry 3-5 in. deep, then pour water in trenches from underneath. Ventilate all you can but avoid drafts. Draft is fatal to all greenhouse crops. Sow in September to get a heavy crop of blooms for Christmas. Always soak the seed for 6-10 hours, use only swelled seed and chip or file seeds that did not swell up, drop them back into water, sow when they are swelled up. **SWEET PEAS OUTDOORS**—About the middle of March place 6 seeds in a 4 in. pot, thin out later, leaving only 3 strongest plants. Place pots in cold frame, field plant early in May, do not allow your plants to suffer from lack of moisture, mulch when hot weather sets in, have the plants 10-15 inches apart in the rows. Remove all poor flowers promptly.

LATE SWEET PEAS UNDER GLASS

Sown about foot apart at the same time with Early Winter Flowering Peas, after Chrysanthemums, these Late Sweet Peas being of less rapid growth will not interfere with the growth of the Early kind, until the Early ones are almost exhausted. Then the robust growing Late, will overtake the played out Earlies and you will get a heavy crop of high class bloom in May and June. **LATE SWEET PEAS** will produce fine flowers sown late in winter with spring not far off. Sown under glass in summer, will make lots of vines, but never a flower.

VIOLET QUEEN CHARLOTTE

SWEET VIOLET—Viola Odorata. Blue hardy English violet, sweetly scented. Violet requires rich, well drained, somewhat sandy soil and should never suffer from lack of moisture. Plant seed in fall or spring. Of all violets, Queen Charlotte is the hardiest—does not winter-kill even in Iowa. Blooms in the spring and again in the fall. Seed lays long before it sprouts. T. pkt. 10c; oz. \$2.20.

SWEET WILLIAM—*Dianthus Barbatus*

A favorite, old-fashioned hardy perennial, with sweetly scented flowers from May to August, of extreme richness and great variety of colors. Easily grown from seed. Height 20 in.

PERFECTION MIXTURE—This mixture contains the finest extra large flowering single varieties, such as Holborn Glory, Auricula Flowered, etc., and will produce magnificent flowers of the most beautiful shades and markings. $\frac{1}{4}$ oz. 15c; oz. 60c; lb. \$7.00; T. pkt. 10c.

OCULATUS MARGINATUS—Large flowered variety, the individual blooms having a large white eye encircled by well defined zone of red, blue, etc., very beautiful. T. pkt. 10c; oz. 45c; lb. \$4.00.

PINK BEAUTY—Large flowers of satiny pink color. T. pkt. 10c; $\frac{1}{4}$ oz. 15c; oz. 60c.

SCARLET BEAUTY—The flowers are of an intense scarlet in large trusses. T. pkt. 10c; $\frac{1}{4}$ oz. 15c; oz. 50c.

BLACK PRINCESS—Blackish crimson with satiny sheen, a color that appeals to all lovers of flowers. T. pkt. 10c; oz. 45c.

DOUBLE MIXED—T. pkt. 10c; oz. 60c; lb. \$9.00.

TEICHER'S GIANT NOBLE FORCING STOCK

Of extremely robust growth, producing perfectly formed, double flowers of gigantic size, on stout, straight stalks 30 inches long. There are 12 to 18 fine double flowers arranged pyramidal fashion around the stalk and close under the base of this leading stalk are 6 to 8 side stalks each carrying 6 to 10 perfect double flowers. Every plant a bouquet by itself. An entirely new creation. The seed produces 90% or better of double flowers. Sow the seed in August and September for a crop of flowers to come from December to March, sow again in November up to January to have flowers in May and June. **WHITE—SOFT PINK—ROSE PINK—SILVER LAVENDER—PURPLE—BLOOD RED—MIXED.** Price: 250 seeds 20c; 500 seeds 35c; 1,000 seeds 65c; 5,000 seeds \$2.50.

TEICHER'S DWARF PYRAMIDAL FORCING STOCKS

First in earliness, four weeks earlier than the Nice Stock. For winter blooming, sow the seed during June, July and August. Pot up before cold weather sets in and grow on in a cold house. For spring sales sow in December and January and in February and March if intended for the open. Fine for cutting and an excellent substitute for Dutch Hyacinths. The seed produces a high percentage of double flowers. Height 10 in.

WHITE—APPLE BLOSSOM—DELICATE SALMON—FLAMING RED—LIGHT LAVENDER—DARK PURPLE—MIXED. Any color: 250 seeds 20c; 500 seeds 35c; 1,000 seeds 65c; 5,000 seeds \$2.50.

TEICHER'S GIANT FLOWERED MAMMOTH COLUMN NON-BRANCHING STOCK

A sensational new class of winter flowering stocks. The flowers are extremely double, very large, of perfect form from 16 to 22 flowers gracefully arranged on a single, straight, stout stalk, from 30 to 36 in. in length. Sow the seed late in August for a crop of flowers in December to March.

The colors are: **SILVER LILAC (Lilac Lavender)—WHITE—CARMINE ROSE—CRIMSON—PURPLE—PINK—LIGHT BLUE—MIXED.** Any color: 250 seeds 30c; 500 seeds 50c; 1000 seeds \$1.00; 5000 seeds \$4.50.

Double 10 Weeks Stocks

Stocks

For a crop of flowers for Decoration Day, sow early in February, transplant in the bench in March, set the plants 4 inches apart if you intend to grow the single spike or 10 inches apart if you rub out the terminal flower as soon as formed and force the plant to branch out. The branched plants will give 8 to 10 spikes that will make up well in bouquets and sprays, those with single spikes one only, but this very handsome and large. For best results sow the seed thinly and avoid stiff soil or soil containing imperfectly decayed manure, cover with clean sand about $\frac{1}{4}$ inch and water only when the soil is dry and always in the early part of the day. To get nice, bushy plants for bedding purposes transplant them several times. Plant on a cloudy day or shade the plants the first day as they are apt to wilt when first set out. In beds stocks should stand a foot apart.

GIANT IMPERIAL STOCK

IMPROVED BISMARCK—The best stock for close planting. Of branching habit, flowers large on long stems. Very early blooming producing a high percentage of double flowers. Height 30 in. **ANTIQUE COPPER**, lustrous red overlaid with copper. **GOLDEN ROSE**, light rose pink. **ELK'S PRIDE**, royal purple. **WHITE ROSE**, deep rose. **LAVENDER**, clear rich lavender. **CHAMOIS**, creamy white, tinged with rose. **GOLDEN BALL**, rich canary yellow. **RED**, fiery red. **DARK BLUE**. **ROYAL PURPLE**. **MIXED**. Any color: T. pkt. 15c; $\frac{1}{8}$ oz. 45c; $\frac{1}{16}$ oz. 25c; oz. \$3.00.

LARGE DOUBLE TEN WEEKS

Best bedding variety, plants well branched, foot high, in bloom from May to September. **GRAND ROUGE**, blood red, **MOUNT BLANC**, snow white, **ROSY MORN**, flesh pink, **SAPPHIRE**, dark blue, **MIXED**—Any of them: Pkt. 10c; $\frac{1}{8}$ oz. 25c; oz. \$1.80; lb. \$22.00. **PORCELAIN BLUE**—New double Ten Week Stock distinct in color from any other stock now in commerce. Color light blue shading to a delicate blue then white at center of each floret producing a truly lovely effect. T. pkt. 15c; $\frac{1}{16}$ oz. 25c; $\frac{1}{8}$ oz. 45c.

GIANT BEAUTY OF NICE

Early flowering winter stock producing flowers in great profusion on plants over two feet high. Large percentage of these are perfectly double and all are powerfully fragrant. Sow seeds of these for winter blooming in August and September. If intended to bloom outdoors sow the seed in March. **BRILLIANT CRIMSON**, **BLOOD RED**, **LILAC**, **LIGHT BLUE**, **DARK BLUE**, **DARK VIOLET**, **DELICATE PINK**, **OLD ROSE**, **SNOW-WHITE**, **MIXED**. Any color: T. pkt. 15c; $\frac{1}{8}$ oz. 30c; 1 oz. \$2.00; 1 lb. \$24.00.

VIRGINIAN STOCK—Crimson Gem. The best variety, producing large deep crimson flowers on plants 18 in. high from May to September. Thrives in any kind of soil exposed to sun, especially so in the coast regions and is one of the best plants for bedding, borders, etc. Annual. T. pkt. 10c; oz. 80c.

COSMOS ORANGE FLARE has marigold like foliage instead of the regular cosmos type of foliage. Do not mistake the young plants for self sown marigolds when weeding.

WE ARE GROWERS

We operate two farms and grow many varieties of vegetable and flower seeds. You are buying from the growers when you buy from us.

GIANT PERFECTION STOCKS

Early flowering variety; also called *Cut and Come Again*. The plants are of fine symmetrical habit, bushy and about 2 feet in height. The numerous side branches each carry a tall strong spike well furnished with unusually large and very double highly fragrant flowers. Unsurpassed as a cut flower. **BRILLIANT**—Dark red; **CREOLE**—Canary yellow; **LA FRANCE**—Rose; **MAY QUEEN**—Lilac; **PRINCESS ALICE**—White; **SAPPHIRE**—Deep blue; **MIXED**—Many brilliant colors. Any of the above: T. pkt. 15c; 1/8 oz. 30c; 1 oz. \$1.80; lb. \$20.00.

TALL WINTER STOCKS

An aristocratic type of Stocks, producing elegantly formed, extra double flowers of gigantic proportions on tall, stout stems and can be had in full bloom for Christmas Day by sowing the seed in June. Of most vigorous growth. Will grow three feet high if not pinched. Besides producing a massive center spike, there are numerous fine side spikes all excellent for cutting. **CHRISTMAS PINK**—Glistening rich deep pink. **CHRISTMAS WHITE**—Snow white. **CHRISTMAS CRIMSON**—Glistening dark red. **CHRISTMAS LAVENDER**—Pale lavender. **CHRISTMAS VIOLET**—Dark violet blue. **MIXED**. Any color: T. pkt. 15c; 1/8 oz. 50c; 1 oz. \$3.60.

THALICRUM DIPTEROCARPUM

Very graceful plumes of rosy purple flowers conspicuous yellow anthers in June and July. One of the most graceful and decorative plants. Easily raised from seed. The foliage resembles maidenhair fern, is very decorative and no florist should be without it. Absolutely hardy. Height 3 feet. T. pkt. 15c; 1/8 oz. 30c; oz. \$2.00. **T. DIPTEROCARPUM ALBUM**—Beautiful, foamy flowers, pure white. *Thalictrum* furnishes quantities of elegant green material of exceptional beauty; nothing better for bouquets, baskets, etc. T. pkt. 20c. **THALICRUM AQUILEGIAEFOLIUM PURPUREUM**—Valuable both for its flowers which are plumes of deep pink, large and attractive and because of its foliage which the plants produce in quantity and which a florist can use in place of *Adiantum* leaves. Also valuable for spring sales. Easily raised from seed, absolutely hardy. Height 4 ft. Blooms in May and June. Clean seed. T. pkt. 20c; 1/16 oz. 40c.

THUNBERGIA ALATA—Black Eyed Susan

A fine climber with ornamental leaves and attractive blooms ranging from white to deep orange from May to August. Much used for hanging baskets. Sow in January to February under glass. Tender. Height, 6 to 8 feet. T. pkt. 10c; oz. 45c; lb. \$5.00.

THYMUS SERPYLLUM

Mother of Thyme, Wild Thyme or Mountain Thyme. A rapid growing, creeping plant, absolutely hardy, unexcelled for covering bare spots, as an edging plant and for rockeries. Blooms in June and July, filling the air with a most pleasant and delicate fragrance. T. pkt. 15c; 1/16 oz. 35c.

TORENIA FOURNIERI

FOURNIERI GRANDIFLORA—A charming dwarf-growing annual with blooms in which deep and sky blue as well as golden yellow is blended in a charming fashion, and thriving under the hardest of conditions. Will do well in rich soil as well as in dry sand, along with cacti or in moist and shady places, and is invaluable for the South, where it is used in the same way as pansies in the North. Makes a great plant for hanging baskets or window boxes, also fine as pot plant and for bedding. Very floriferous, keeping in good leaf and flowers from spring to frost. Of easiest culture. Sow the seed in January and February and when all danger of frost is past set outdoors 8 inches apart. It forms neat rounded bushes. Height 1 ft. T. pkt. 15c; 1/16 oz. 30c; 1/8 oz. 55c; oz. \$4.00.

TORENIA THE BRIDE—Of same usefulness and habit as *Fournieri* Grfl. Flowers very large, white overlaid with pink. T. pkt. 20c; 1/32 oz. 30c; 1/16 oz. 50c.

TRACHELIUM COERULUM

Half hardy perennial treated as annual of same usefulness as *Gypsophyla*. To have blooms for winter start seed in August. Started in March will bloom in August and September and in June if sown under glass in February. Grow cool. Flowers in dense heads, dark blue. Height 18 in. T. pkt. 15c; 1/16 oz. 35c.

TRITOMA—FLAME FLOWER

Sow in February or March, line out in May, lift before frost, store buried in sand in a cool cellar, set out in May. Blooms from July to October. The roots are fleshy and keep well in storage. Hardy south of Kansas City. Height 3 ft.

UVARIA GRANDIFLORA—Very striking and exceedingly ornamental Red Hot Poker or Torch Lily. The spikes are most brilliantly colored. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.00.

TRITOMA SPECIAL MIXTURE—Composed of choice early flowering varieties. Our mixture will produce elegant flowers in shades of orange, yellow, rose and salmon pink and some crimson flowers if the seed is sown early. Hardy perennial but some protection over winter can do no harm. Average height 3 ft. T. pkt. 20c; 1/32 oz. 30c; 1/8 oz. 50c; oz. \$3.60.

TRICHOLAENA ROSEA

Of all ornamental grasses suitable as fillers in bouquets *Tricholaena* is the prettiest. Grows 2 ft. tall, produces an abundance of downy plumes of pale silvery pink, dainty and striking in a bouquet of pink roses or other flowers where pink predominates. Annual. T. pkt. 10c; 1/8 oz. 15c.

TAGETES LITTLE GIANT

Extra choice *Signata* type, more compact than the type only 4-6 inches high, dense fernlike foliage flowers dainty single bright golden orange touching one another and as many as 200 blooms on a single plant that has a spread of 8-10 inches. A veritable floral cushion of striking effect when used for edgings. T. pkt. 10c; 1/8 oz. 20c; oz. \$1.20.

TROLLIUS

Perfectly hardy, free flowering perennial, producing giant ball shaped flowers resembling tulip, from May until August. A valuable cut flower. Succeeds in rather light soil and in a half shady position. The seed we offer is from a collection of new large flowered hybrids in all shades of yellow with a percentage of double flowers. Divisions of clumps placed in 2 1/2 in. pots late in August, then planted 8x6 in. will produce bloom from February on. Height 2 ft. T. pkt. 15c; 1/16 oz. 30c; 1/4 oz. 50c; oz. \$3.60.

TROLLIUS LEDEBOURI

GOLDEN QUEEN TROLLIUS. Valuable, new hardy perennial plant, of vigorous growth, attaining a height of 4 feet and producing quantities of intense orange-yellow flowers four in. across, from June till November. Unlike other varieties of *Trollius* the seed of *Ledebouri* germinates readily. Will bloom the first year if started early in the spring. T. pkt. 25c.

TUNICA SAXIFRAGA

A nice, tufted plant with pale pink, carnation-like, single flowers, born on thin, wiry stalks all summer. Fine for borders or rockeries. Hardy. Height 10 in. T. pkt. 10c; oz. 60c.

URSINIA ANETHOIDES

New. A brilliant orange daisy, two inches across, carried on long wiry stems, fine for cutting. Does not close until nearly dark. A good pot and bedding plant. Annual. Height 1 foot. T. pkt. 10c; 1 oz. 45c.

HELIOPHILA, URSINIA AND VENIDIUM sown from August to January will furnish bloom from February to May. Grow in flats, space 3x3 in., night temperature 45 deg.

VENIDIUM FASTUOSUM

Flowers daisy-like of brilliant orange with a purple black zone around the center, five inches across. Neat, ornamental, deeply cut gray-green foliage. Planted in good sized beds this flower presents a most gorgeous sight. Sow the seed where the plants are to stand, do not transplant. In bloom from June to October. Height 3 ft. Annual. T. pkt. 20c; 1/16 oz. 30c.

VISCARIA—FLAME FLOWER

CARDINALIS—Hardy annual growing in tufts and bearing fiery, red single flowers 2 inches across. Grown in a bed the brilliant coloring of these flowers makes a strong effect. Fine for bouquets, as a pot plant and for bedding. Will do well in any kind of soil and withstand hot and dry weather, blooming all summer. Sow the seed where the plants are to stand, later thin out to 6 inches apart. Height, 12 inches. T. pkt. 10c; oz. 45c; lb. \$4.00.

You can order all seeds priced at 45 cents per oz. or over in quarter and half oz. lots at oz. rate. Quarter and half pounds at pound rate. Five lbs. or over at 10 lb. rate. 25 pounds or over at the 100 lb. rate.

Verbena Special Mixture

Verbena

Sow the seed indoors in February and March or direct in the open in May. Soak the seed in warm water for a few hours to hasten germination. Plants intended for spring sales should be placed in 2-inch pots when about 1 inch high and the pots plunged in a mild hotbed. Lift the pots now and then and rub off the roots that go through the bottom of the pot to induce plants to bloom earlier. In the open the plants should be spaced 15 inches apart. Pinch the plants to induce bushy growth.

MAMMOTH FLOWERING VERBENA

DEFIANCE SCARLET, YELLOW, PINK, PURPLE, WHITE MIXED. Any color. T. pkt. 10c; $\frac{1}{8}$ oz. 15c; oz. \$1.00.
FIREFLY—Dazzling scarlet flowers with large white eye. T. pkt. 10c; $\frac{1}{8}$ oz. 15c; oz. \$1.00.
MAYFLOWER—Large bright pink. T. pkt. 10c; $\frac{1}{8}$ oz. 15c; oz. \$1.00.
VERBENA SPECIAL MIXTURE—Contains all the mammoth flowering varieties listed by us as well as other new colors. T. pkt. 10c; $\frac{1}{8}$ oz. 15c; oz. \$1.00; lb. \$12.00.
VERBENA MIXED—T. pkt. 5c; oz. 60c; lb. \$6.00.

VERBENA CITRIODORA Lemon Verbena. A low growing tender plant which may be grown in the garden in summer and in pots in winter. The dried, highly scented leaves are used for perfuming. T. pkt. 10c; $\frac{1}{16}$ oz. 25c; 1 oz. \$2.60.

VERBENA ROYAL BOQUET

Of dwarf, upright and compact growth, fine for bedding, cutting, grave decoration and excellent for pots. The plants grow only about 10 inches tall, the flowers are very large, produced till frost.
ROYAL BOQUET FIREBALL—Of very compact growth, not over 8 inches tall, color brilliant, clear scarlet.
ROYAL BOQUET VIOLACEA—Beautiful dark violet, splendid in every way. Height 10 inches.
ROYAL BOQUET SALMON ROSE—Salmon rose, very compact, height 10 inches.
ROYAL BOQUET MIXED—The colors are: deep red with white eye, clear blood red, cameo-pink, scarlet, purple, violet, salmon-pink and white. T. pkt. 15c; $\frac{1}{8}$ oz. 30c; 1 oz. \$2.00.

NEW GIANT VERBENAS

Individual flowers over an inch in diameter. Gorgeous colors, brought out further by the fact that the blooms combine into immense flower-heads, appearing from midsummer until frost. Giant Verbenas represent a great step forward and are bound to become widely popular.

BEAUTY OF OXFORD—Shades of rose pink to rose red.
ETNA—Rich, scarlet, large, deep cream eye.
LAVENDER GLORY—Clear lavender, creamy eye.
LUCIFER—Brilliant scarlet.
LUMINOSA—Glowing flame pink, shading to salmon.
NEWPORT SALMON—Beautiful bright salmon pink.
PURPLE ROBE—Shades of dark violet purple.
ROSE CARDINAL—Luminous, deep rose pink, large white eye.
ROSAMOND—Intense glowing red, cream eye.
ROYALE—Rich deep royal blue with a large creamy yellow eye.
SNOWFLAKE—Pure white, extra large well shaped heads.
MIXED—Includes all the above named varieties.
Price: Any of the above T. pkt. 15c; $\frac{1}{8}$ oz. 25c; oz. \$1.60.

VERBENA LUCIFER

Color brilliant scarlet self. Individual flowers over an inch across. Try this Verbena. It is every bit as attractive as Beauty of Oxford and some florists say that it is a finer variety and while Oxford is difficult to grow, Lucifer grows easily from seed, no cuttings to root, no troubles, less expense. T. pkt. 15c; $\frac{1}{8}$ oz. 25c; oz. \$1.60.

VERBENA AUBLETIA Hardy perennial creeping plant in bloom all summer. Flowers colored violet and carmine. Fine for covering dry banks for bedding, borders and rockeries. Height 15 in. T. pkt. 10c; $\frac{1}{8}$ oz. 20c.

VERBENA ERINOIDES ALBA Moss Verbena. Profusely blooming annual, forming moss-like rosettes of foliage with white flowers in large umbells. Blooms all summer and is a first rate plant for bedding, borders and rockeries. Height 1 ft. T. pkt. 10c; $\frac{1}{8}$ oz. 20c.

VALERIANA RUBRA COCCINEA

Hardy, 2 ft. tall, bearing lustrous carmine-red flowers suitable for cutting from June to August. Also good as a rock plant. T. pkt. 10c; oz. 60c.

VERBASCUM PHOENICEUM

Hardy perennial of neat growth, producing from May to September magnificent spikes of bloom, high class for bouquets. Fully as beautiful as Belladonna Delphinium, however the formation of bloom is entirely different. Very distinct and very desirable. Will thrive even in poor soil either in full sun or partial shade. We offer large flowered new hybrids mostly in shades of purple, pink and lilac. Height 4 ft. T. pkt. 10c; oz. 80c.

VERONICA SPICATA

Hardy perennial with long spikes of bright blue flowers, in bloom from June to September and of striking appearance. Does well in any kind of soil away from shade. Height 3 ft. T. pkt. 10c; $\frac{1}{8}$ oz. 20c; oz. \$1.20.

VERONICA GENTIANOIDES—Hardy perennial, bearing beautiful light blue flowers during May and June. Forms a neat mat and makes good ground cover for bare spots in midsummer, also a valuable border plant. Hardy anywhere in any position, shade enduring and long lived. Height 2 ft. T. pkt. 10c; $\frac{1}{16}$ oz. 25c; $\frac{1}{8}$ oz. 40c; oz. \$3.00.

VERONICA PROSTRATA COELESTINA—Hardy perennial, plants forming a neat carpet of dark green above which are borne blue flower spikes in May and June. Unexcelled for rockeries and to cover dry banks. Height 5 in. T. pkt. 25c.

VERONICA INCANA—Hardy perennial, first class rock, bedding and edging plant and for planting in crevices of walls and paved areas. Pretty silvery foliage, flowers bright blue from June to September. The plants present a neat appearance in and out of bloom. Height 1 ft. T. pkt. 20c; $\frac{1}{8}$ oz. 30c; oz. \$2.00.

VIBURNUM CARLESI

Classed by many as the most beautiful, perfectly hardy, flowering shrub now in existence. Flowers flesh pink, buds coral red possessing a marvelous clove fragrance. Easily raised from seed that germinates usually in the spring if sown in the fall or late in summer if sown in the spring. Once started grows rapidly a foot or more in a single season. There is and there will be for years to come, demand for this exquisite shrub. You cannot possibly invest your money safer than in seed of Viburnum Carlesi. T. pkt. 10c; oz. 50c (about 500 seeds); lb. \$5.00.

VINCA ROSEA

CULTURE—Sow in January or February in flats filled with good soil mixed with sharp sand. The seed germinates readily, but the box must be placed in a temperature of 70 to 75 degrees. When the plants are large enough to handle they must be transplanted into other boxes filled with the same kind of soil and when they have 2 or 3 pairs of leaves are potted, later shifted outdoors, when all danger of frost is over, one foot apart. They are good and inexpensive bedding plants and take the place of geranium, bloom profusely till frost, if the soil where planted is not stiff and if well watered. Height 18 inches.

WHITE—1 oz. 80c; 1 lb. \$8.00.....T. Pkt. 10c
WHITE with crimson eye—1 oz. 80c; 1 lb. \$8.00.....T. Pkt. 10c
PINK—1 oz. 80c; 1 lb. \$8.00.....T. Pkt. 10c
MIXED—1 oz. 80c; 1 lb. \$8.00.....T. Pkt. 10c
VINCA DELICATA—Soft pink, 1 oz. 80c; 1 lb. \$8.00.....T. Pkt. 10c

VICIA SNOWDRIFT Hardy perennial climbing plant producing immense quantities of snow white flowers from May to August. High class for floral work. No amount of heat or dry weather affects it. Thrives in any soil in full sun. Can be grown with or without supports. Height 4 ft. T. pkt. 15c.

VIOLAS OR TUFTED PANSIES

Hardy perennials, blooming first year from seed. Flowers like those of Pansies, smaller in size, scented, from May to November. Fine for bedding, rockeries and as cut flowers. Height 8 in. MIXED: T. pkt. 10c; $\frac{1}{8}$ oz. 25c; oz. \$1.80.

VIOLA APRICOT GEM—Rich apricot-yellow, tinged orange. T. pkt. 20c; $\frac{1}{8}$ oz. 40c; oz. \$3.00.

VIOLA BOSNIACA—Very floriferous, blooms perfectly formed, dark violet-blue on stems 6 inches long, invaluable for cutting and bedding. Plants compact, only 3 inches tall. T. pkt. 15c; $\frac{1}{8}$ oz. 25c; oz. \$1.40.

VIOLA CYCLOP—An extra choice hardy viola of dwarf compact growth. Flowers large of lustrous dark violet purple with a vivid snow-white center from May to frost. Height 6 in. T. pkt. 15c; $\frac{1}{16}$ oz. 25c; $\frac{1}{8}$ oz. 45c.

VIOLA JERSEY GEM—Very neat variety, bearing on straight stout stems about 6 inches long, deep clear violet flowers. Fine for bedding as well as for cutting. In our locality needs protection over winter. T. pkt. 50c.

VIOLA LAVENDER GEM—This novelty is a replica of the excellent variety "Jersey Gem," having the same admirable qualities of compactness of habit, continuous profusion of long lasting bloom, together with its wonderful drought-resisting power. The color is a soft deep shade of lavender. T. pkt. 50c.

VIOLA LITTLE GEM—Hardy perennial of trailing habit, flowers of deepest violet blue, produced in sheets in April and May. Of exceptional beauty, destined to be in great demand by all flower lovers. Height 6 in. T. pkt. 20c; $\frac{1}{32}$ oz. 35c; $\frac{1}{16}$ oz. 60c.

VIOLA PAPILIO—In bloom from early April till frost, doing well in sun or partial shade, lighting up any spot in the garden with its deep blue and white, lovely flowers. Will bloom in twelve weeks from seed and is about the most valuable and desirable of all hardy Violas. Excellent rock plant. Height 10 in. T. pkt. 15c; $\frac{1}{8}$ oz. 35c; oz. \$2.00.

ARDWELL GEM—Large shapely Viola, pure deep chrome-yellow flowers of good substance. A fine variety. T. pkt. 15c; $\frac{1}{8}$ oz. 30c; oz. \$2.00.

VIOLA PINK QUEEN—Large dark lavender-pink flowers on dwarf compact plants. T. pkt. 20c; $\frac{1}{16}$ oz. 35c; $\frac{1}{8}$ oz. 65c; oz. \$8.00.

XERANTHEMUM

IMPERIALE—Large flowering dark purple red, very beautiful. T. pkt. 10c; oz. 60c.

DOUBLE MIXED—Excellent everlasting flower with elegant double flowers in several colors from June to November. Height 2 feet. Hardy annual. T. pkt. 10c; oz. 60c; lb. \$5.00.

NON-BRANCHING STOCK

We offer these under the name of Giant Flowered Mammoth Column Forcing Stocks. We have the best seed, produced by the famous house of Teicher of Striegau, Germany, seed that produces spikes with individual double flowers two inches across. Comparing the product from our seed and from seed of others you will SEE that our seed is hard to beat.

Good seed is the foundation of a good crop. You must start with the best seed which you will get from us always.

Ours is the most critical trade—gardeners and florists. We cater to the wise and experienced. We give value. Among our customers are the foremost florists and market gardeners.

YUCCA—ADAM'S NEEDLE

YUCCA ANGUSTIFOLIA—Dwarf growing variety with narrow and long leaves resembling a Dracanea. Flowers large, creamy white. Height 3 ft. T. pkt. 10c; oz. 60c.

YUCCA FILAMENTOSA—A stately plant with broad swordlike foliage and immense spikes of drooping, creamy white flowers. Strikingly beautiful. Fine as a solitary plant as well as for large rockeries. Height 6 ft. T. pkt. 10c; oz. 60c.

Dahlia Flowered Zinnia

Gold Medal Zinnia

BODGER'S DAHLIA FLOWERED

As large as the largest double dahlias. The colors are variations in red, yellow and violet, so-called pastel shades, difficult to describe. This new race of Zinnias created sensation wherever seen. Height 3-4 ft.

To produce flowers of maximum size, 6 inches across or over, this Zinnia must be planted in rich soil and must be spaced 2 feet apart. The plants will amply fill the intervening spaces and it will pay to give the plants all this space because good flowers sell for better prices, and what is more, a good flower will always find a market. Mixed. T. pkt. 10c; $\frac{1}{8}$ oz. 15c; $\frac{1}{4}$ oz. 25c; oz. \$1.00; lb. \$12.00.

DAHLIA—ZINNIA EXQUISITE

A light rose colored Dahlia Flowered Zinnia with a center of deep rose. This contrast of colors is most pleasing and makes Zinnia Exquisite immensely popular as a bouquet flower.

GOLDEN PAWN—Golden yellow.

YOUTH—A beautiful soft rose self, valuable for forcing and a good shipper, having better lasting qualities than any of the other varieties.

OLD ROSE—A real old rose shade.

SCARLET FLAME—A large, beautiful, bright scarlet, with a delightful blending of orange throughout the petal. This is not a bi-color.

CANARY BIRD—A delicate shade of primrose-yellow.

CRIMSON MONARCH—Largest of the red shades.

DREAM—Deep lavender, turning to mallow-purple.

LUMINOSA—A charming shade of bright deep pink.

OLD GOLD—Glowing shades of old gold.

ORIOLE—Orange and black bi-color.

POLAR BEAR—A very large, pure white.

ANY OF THE ABOVE DAHLIA-ZINNIAS—T. pkt. 10c; $\frac{1}{8}$ oz. 15c; 1 oz. \$1.00; lb. \$12.00.

OUR TRADE PACKETS

are double the quantity of retail packets. Our retail packets are well-filled, the seeds are fresh and of strong germination. You will get only the best from us, so don't be afraid to place the order with us.

Verbena Venosa—See page 10

Wallflower Wonder

Zinnia Scabiosa Flowered

WALLFLOWER—GOLDLACK

KEWENSIS will bloom for Christmas, if sown late in June or early in July. The others will begin to bloom in March and then for months afterwards, if sown in April or May, planted outdoors, carried over in a cold frame and brought into a cool house about the middle of February. They furnish valuable cut flowers.

WALLFLOWER EARLY WONDER

A perfectly double wallflower, that can be had in bloom all year around. No matter what time the seed is sown, never fails to produce bloom five months after sowing. Will bloom at Christmas time if sown in July. The main spike is thickly set with large double blossoms of perfect shape, the lateral branches that appear later, also bear fine flowers, fine for cutting. The flowers have a wonderful scent. The colors are canary yellow and brown. Height 24 to 30 in.

Annual. MIXED. T. pkt. 15c; 1/16 oz. 30c; 1/8 oz. 50c; oz. \$3.00.

WALLFLOWER EARLY WONDER VIOLET—Dark violet. T. pkt. 30c.

VULCAN—Flowers of crimson, single. Makes a symmetrical, well-branched plant, fine for pots. Height 16 inches. T. pkt. 10c; oz. 80c.

GOLIATH—Flowers extra large, single dark brown, very beautiful. Height 24 inches. T. pkt. 10c; oz. 80c; 1/8 oz. 15c.

WALLFLOWER GOLIATH TRIUMPH—Immense spikes of the most brilliant crimson, individual flowers extra large in size. Of robust growth, early, an extra choice single flowering sort for pots, bedding or cutting. Fine forcer. Height 2 feet. T. pkt. 10c; oz. 80c; 1/8 oz. 15c.

WALLFLOWER KEWENSIS—The plants are freely branched, each stem carrying a long spike of fine flowers. Color a delicate sulphur shade, passing to orange-yellow or purple-violet. A valuable forcing, winter-blooming variety, producing flowers for many months. Height 30 in. T. pkt. 15c; 1/16 oz. 25c; 1/8 oz. 45c; oz. \$3.40.

RUPPERT'S PRIZE WALLFLOWER

The plants are bushy and compact 20 in. in height, the foliage is light green. Individual flowers are fully as large as a silver dollar, of a fiery garnet-red color, extraordinarily beautiful. If you will raise some of this, you can be sure that your plants will sell at a good price. An excellent variety for pots and cutting. Distinct from regular "Ruppert." The old sort is dark brown in color, the variety we offer is larger and of a dazzling red. T. pkt. 15c; 1/16 oz. 35c; 1/8 oz. 60c; oz. \$4.00.

WALLFLOWER HAMLET

New. Flowers single, very large, clear golden orange in color, much brighter than the color of Cheiranthus Allioni. Very superior and a flower that will pay to grow. Easily forced, fine for cutting as well as first rate pot plant. If you are looking for something unusual and new, this is it. Height 20 in. T. pkt. 20c; 5 pkts. 90c.

WALLFLOWER SINGLE MIXED—Choicest single varieties in many colors. T. pkt. 10c; oz. 60c; lb. \$5.00.

SINGLE AND DOUBLE MIXED—This mixture contains many choice varieties. T. pkt 10c; 1/16 oz. 15c; 1/8 oz. 30c; oz. \$2.00.

SIBERIAN WALLFLOWER—See Cheiranthus.

WHITLAVIA GRANDIFLORA

A gem for bedding, easily raised, producing masses of large gloxinia-like flowers of deep blue from May to September. Highly attractive, a real flower. Annual. Height 1 ft. T. pkt. 10c; oz. 45c.

WISTARIA CHINENSIS

A beautiful fast growing climber, producing quantities of extremely showy, light blue pendulous flowers in May and again in August and September. Easily raised from seed and perfectly hardy. Requires full exposure to the sun. T. pkt. 10c; oz. 30c; lb. \$2.60.

SCABIOSA FLOWERED ZINNIA

The flowers, about 4 in. across, have scabiosa-like centers and broad petals around the base in shades of red, pink and yellow. Eminently suited for every kind of flower work, extremely beautiful, new, never before seen, entirely different and far more graceful than the old type, so much so that upon first sight nobody would believe that this is a variety of Zinnia. When cut lasts for a long time in or out of the water, the plants are covered with bloom from May to frost. Height 3 ft. T. pkt. 15c; oz. \$2.00.

ZINNIA CROWN O' GOLD

Crown O'Gold derives its name and distinction from the fact that each petal of the flower is overlaid with a deep golden yellow at the base, while carrying out the individual flower color at the tip. The color range comprises the more popular florist shades: Old rose, cream, yellow, carmine and burnished red—the latter a new shade in Zinnias.

While not entirely fixed as to type, Crown O'Gold may be classed as Dahlia Flowered, as it has the type and size of flower, height and general robustness of this popular strain. No description and no picture, even in colors, could give an adequate idea of its iridescent beauty. MIXED: T. pkt. 10c; 1/8 oz. 20c; oz. \$1.40.

ZINNIA LILIPUT—BABY ZINNIA

Zinnia Liliput produces from spring to frost, immense quantities of very double, perfectly formed flowers, first class for florists' work. Liliput is the Queen of Zinnias, excelling in gracefulness, genuine beauty and elegance and should be made use of in bedding extensively. Massed in beds, few flowers will outshine Liliput. Height 18 in.

LILIPUT SALMON-ROSE—Brilliant showy salmon-rose color.

LILIPUT ROSE PINK—Rich rose pink.

LILIPUT WHITE—Pure white.

LILIPUT FIREFLY—Fiery scarlet.

LILIPUT GOLDEN YELLOW.

LILIPUT GOLDEN ORANGE—Bright orange yellow.

LILIPUT LILAC—Lovely shade of lilac.

LILIPUT MIXED—Includes all the above colors in proper proportion.

PRICE: Any color, T. pkt. 10c; oz. 60c; lb. \$6.00.

ZINNIA GIANT PICOTEE

Almost as large as the Colossal variety and very valuable as a cut flower because of their exceptional beauty. Each petal is distinctly marked with a narrow band of dark maroon. The ground colors are many, from pure white to dark scarlet. The seed we offer produces about 60 per cent Picotee flowers. Height 3 ft. All colors mixed. T. pkt. 10c; $\frac{1}{8}$ oz. 20c; oz. \$1.20.

ZINNIA "DELIGHT" New Zinnia of the Pumila type, very floriferous and of neat compact growth. The petals of the flowers are ruffled and curled, giving a light and dainty effect. Each petal is beautifully picoted, making it a most striking flower. This is an excellent variety for basket work and florists' use in general. The assortment of colors includes salmon shades, cream, buff, biscuit, golden yellow and lavender. Height 18 in. T. pkt. 10c; $\frac{1}{8}$ oz. 20c; oz. \$1.20.

ZINNIA DOUBLE GIANTS OR COLOSSAL

These grow 3 feet tall, bear flowers of enormous proportions very double and showy. The mixed seed contains many pastel shades, that is colors that cannot be very well defined in words. These off color plants are of startling beauty and highly interesting. As they bloom from early summer till frost they are becoming very popular. **WHITE, SCARLET, PINK, ORANGE, PURPLE, VIOLET, YELLOW, MIXED.** Any of the above: T. pkt. 10c; oz. 60c; lb. \$6.00.

ZINNIA ELEGANS DOUBLE

This strain produces perfectly double, well formed flowers, on stalks 3 feet high and makes a good cut flower. An ornament in any garden and especially fine for flowering summer hedges. **MIXED**—T. pkt. 5c; oz. 40c; lb. \$3.00.

ZINNIA BODGER'S GIANTS

This Zinnia bears imbricated and flat flowers, the reverse of petals not showing. This makes the flowers attractive from the time they open until they fully develop. Perfectly double and of extraordinary large size. High class for cutting. Our mixture contains many colors and is made up by us from the finest named varieties. Height 4 ft. T. pkt. 10c; $\frac{1}{8}$ oz. 15c; oz. \$1.00; lb. \$12.00.

ZINNIA MISS WILLMOTT A masterpiece of the Bodger's Giant type, with splendidly formed flowers that are flat, not showing the reverse of petals, of most pleasing delicate salmon-pink. A high class florists' and show flower. Height 3-4 ft. T. pkt. 10c; $\frac{1}{8}$ oz. 15c; oz. \$1.00.

ZINNIA DOUBLE POMPON

These grow 20 inches high, the flowers are extra double, forming a symmetrical elongated smooth cone. They are first class flowers for cutting, bedding, ribboning, etc. **GOLDEN YELLOW, SULPHUR YELLOW, DEEP SCARLET, SALMON PINK, VIOLET, WHITE, MIXED.** Any of the above: T. pkt. 10c; oz. 45c; lb. \$4.00.

ZINNIA EARLY WONDER A new race of early flowering dwarf growing Zinnias. The plants are 18 inches tall, flowers of medium size, the type of double pumila Zinnia borne on long stems, ideal for cutting. Will be found a highly paying greenhouse crop as it occupies very little space, produces a big crop of flowers and is ready to cut six weeks after sowing. You will get double the amount of flowers from the same amount of space and in half the length of time that would be required if another type of Zinnia was planted. There are so far only one color to be had. **FIERY SALMON-RED.** T. pkt. 10c; $\frac{1}{8}$ oz. 25c; 1 oz. \$1.60.

HARDY OSTRICH FERN

PALM OF THE NORTH

THE FINEST OF ALL HARDY FERNS

Of all tall growing, hardy ferns, Ostrich Fern is the best. It is a vigorous, quick growing fern, does well in almost any kind of soil, both in shade or fully exposed to the sun. Height 4 feet. Of unusual beauty, like a palm in appearance. Plant a few in full or partial shade somewhere where visitors will see them. You will have calls for them and will sell lots of them. We can supply dormant roots at any time in any quantity, and if you get an order we can deliver the roots without delay. **CULTURE**—Plant in rich soil, cover the crowns about an inch and apply plenty of water. Besides planting hardy ferns require no care. Space foot apart.

	By express, not prepaid:	Dozen	100	1000
MEDIUM LARGE ROOTS.....	\$1.00	\$7.00	\$60.00	
LARGE ROOTS	1.25	8.50	80.00	
EXTRA HEAVY ROOTS.....	1.75	12.00	110.00	

We sell 25 roots or over at 100 rate, 250 roots or over at 1000 rate. Prices are F. O. B. Council Bluffs. No charge for packing.

HARDY MAIDENHAIR FERN

Very graceful, leaves arranged in a semi-circle on long stiff, dark brown stems, 12 to 18 inches long. Must be planted in good, well drained soil, in full or partial shade, the roots covered with soil about an inch deep. It grows slow at first, but once established it multiplies fast. For massed effects plant about 10 inches apart. Unlike other hardy ferns, Maidenhair does well as a house plant. Selected root: 6 for 70c; 12 for \$1.20, not prepaid. In lots of 25 or over at \$8.00 per 100.

GOOD BUSINESS AHEAD

with slight changes in the present system. **The present system.** What is it? One prey on another. I cheat you and you cheat me—if you can get by with it. A fine system. No? Is there a better system? There is!

All that is needed to make the present system a human system is to place personal character above money and to adopt a few other slight changes.

That done, everyone would try to outdo the other in honesty, learning, agreeable manners and dollars would become the second fiddle.

Honest people would rule and the crooks would be made to work. We are not condemning the capitalistic system. Under it, mankind made an immense progress. The system forced the people to exert themselves to the utmost. That does not work any more, we all can see that.

We have too much of everything, yet millions are unable to make a bare living. That a change is needed we all know. Very few do know how easy it is to make a few slight changes to bring about prosperity for all.

A man, a great man wrote a book in which he explains how, by adopting a few slight changes in the present economic system ALL of us would benefit immensely. His book tells the truth. Your daily papers will not tell you the truth. You should, you MUST know the truth. Here is your chance to learn the TRUTH and the facts as to why the depression is on and how to almost instantly, sweep the depression out of the way. Read W. H. Harvey's "The Book" a book of 224 pages costing only 25 cents, postpaid, which you can get from Mundus Publishing Co., Monte Ne, Arkansas, or from us.

Bulbs and Roots

CALADIUM ELEPHANT'S EAR

Start Caladium early in March in sand with bottom heat. When the root growth is about two inches long the bulbs MUST be potted up. Caladium likes extra rich soil and good drainage.

CINNAMON VINE—Bulbets planted in the spring produce tubers 5 to 9 inches long by fall. Plant 3 inches apart, cover 1 inch deep. 20 bulbets 10c; 100 for 35c; 1000 for \$2.00, postpaid.

MADERIA OR MIGNONETTE VINE—Strong roots 10, 40c; 100, \$2.00.

How to Grow Dahlias Plant at any time from April to middle of June in thoroughly stirred soil. Lay the tuber flat on its side, space 3 feet apart and cover 6 inches deep. Dahlias show up and do much better when a few plants are grown together. Allow only one stalk to grow from each tuber and when the second set of leaves has appeared pinch out the middle bud. This will induce dwarf growth, the plants will branch freely, strong winds will not blow them down and no support will be needed. Cultivate after every rain until the plants set buds, when they will need lots of water. Do not water at all previous to bud stage as this would cause rapid but soft growth.

Mulching after the plants start to form buds with weeds, grass clippings or manure is very beneficial. If you grow for cut flowers disbud, and cut off all the faded and undesired flowers with as much stalk as possible. To make cut bloom last, cut early in the morning. Put 4 inches of hot water (not boiling) in a shallow pan, place the ends of stems into it and hold there about one minute or until stem is discolored. Then place in deep cold water. Over winter store the tubers in a cool but frost proof place.

In the South Dahlias must not be planted till middle of June. Water abundantly to help them grow and to keep them cool and you will have fine flowers from September on. If planted say in March or April the growth will be forced and weak, they will bloom in May but the first hot spell in June will put them out of commission. Dahlias do well in the South but must be planted late.

MONTBRETIA

Popular as cut flowers, outselling gladioli in some markets. Flower spikes smaller than those of gladioli, individual flowers star-shaped, dainty and classy, in many colors. Best large flowered hybrids. MIXED. 10 for 60c; prepaid. F. O. B. 100 bulbs \$4.50.

Giant Tiger Lily

Tigrinum Fortunei giganteum

Every flower grower should have a planting of Tiger Lilies. No hardy plant will give him better returns. Tiger Lily is and always has been, the most popular lily with the public, therefore readily salable, in and out of bloom. It is absolutely hardy, it never winter-kills, planted either in the spring or fall, multiplies rapidly and furnishes a wealth of first class bloom. The showy blooms are bright orange red, dotted black, and carried on stalks 4 to 5 ft. high. LARGE BULBS: 25, \$2.50; 50, \$4.50; 100, \$8.00; 1000, \$75.00, by express not prepaid.

BY MAIL PREPAID—5 large bulbs 85c; 10 for \$1.55.

DOUBLE TIGER LILY—Of robust growth and absolutely hardy. Flowers of elegant form resembling in formation of bloom several stars loosely pinned together, pinkish orange in color daintily penciled with black.

POSTPAID: 5 large bulbs \$1.00; 10 bulbs \$1.80. NOT PREPAID: 25 for \$2.75; 50 for \$4.75; 100 for \$9.00.

Lilium Regale—Regal Lily

REGALE LILY bulbs by mail postpaid: 5 large bulbs for 60c; 10 for \$1.00.

LILIUM TENUIFOLIUM

SIBERIAN CORAL LILY—Fine cut flower, for bedding, rockeries, etc. Good sound two years old bulbs. POSTPAID: 5 for 45c; 10 for 75c. NOT PREPAID: 25 for \$1.40; 50 for \$2.75; 100 for \$5.25; 250 for \$12.00; 1000 bulbs \$45.00.

YELLOW KING HUMBERT

Choice Cannas

STARTING CANNAS—The first batch of cannas is generally started up early in March. Cut the rhizomes into 2-inch or 3-inch pieces, each with one eye at least, place them in flats on a layer of coarse soil, cover with sand, water well set the flats on the returning heat pipes; it is necessary to supply a little bottom heat in order to get best results.

When a young growth is about three inches high, remove the flats to a light bench and about two weeks later pot the plants up singly in 3½-inch pots, where they can remain until bedded out. As all the eyes will not start equally fast, potting will have to be done over a period of time, allowing underdeveloped plants to continue growing in flats until proper size is reached.

Prices quoted are for dormant 1-2 eyed bulbs.

ALLEMANIA—Green leaved. Scarlet flowers, with broad yellow border. Height 5 feet. Not prepaid: 25 for 85c; \$2.50 per 100; \$20.00 per 1,000.

APRICOT—Color deep buff, base suffused plnk, flowers very large in immense trusses. Foliage green. Withstands rain and hot sun better than most other sorts. Height 4½ ft. 25 for 85c; 100 for \$3.00.

PRESIDENT—Green leaved, scarlet flower. Height 4 feet. Not prepaid: 25 for 75c; \$2.50 per 100; \$20.00 per 1,000.

KING HUMBERT—Bronze foliage, scarlet flower. Height 4 feet. Not prepaid: 25 for 75c; \$2.50 per 100; \$20.00 per 1,000.

MRS. A. CONARD—Green foliage, pink flowers. Height 4 feet. Not prepaid: 25 for 85c; 100 for \$2.50.

YELLOW KING HUMBERT—Green foliage, yellow flower. Height 4 feet. Not prepaid: 25 for 85c; 100 for \$3.00.

EUREKA—The best white canna, flowers very large, creamy white. When first introduced kept badly in storage through winter. We have lost almost the whole supply of roots more than once. Now we have stock that is easy to keep and you will do well to get a start from us. Dormant roots: 25 for \$1.50; 100 roots \$5.50.

KING MIDAS—Flowers extra large of rich deep golden yellow color in large trusses. Beautiful. 25 for \$1.35; 100 for \$5.00.

ORANGE HUMBERT—A sport from red Humbert, fine bronze foliage, flowers in immense trusses of true orange yellow color. Strong grower. Height 4 ft. 25 for \$1.00; 100 for \$3.50. We grow our own canna. Our stock is true to name, not mixed.

DOUBLE TUBEROUS ROOTED BEGONIAS

Large first class bulbs, size 1½ to 2 in. PINK, SCARLET, ORANGE, SALMON, CRIMSON. Mixed. Any color: 10 for \$1.50; 25 for \$3.20. Not prepaid: 100 for \$12.00; 1,000 for \$115.00.

PANSY—To get neat plants full of bloom in May, sow the seed in our locality by the end of August, transplant October 1st. Many growers sow the seed earlier, their plants get too big and are hard to handle.

“Bad luck” excepted one ounce of Pansy seed will produce at least 10,000 seedlings and as high as 18,000.

IN JULY seeds of cool weather plants (pansy especially) come up poorly or not at all in spite of generous watering. Avoid sowings in July as much as possible.

Choice Dahlias

All Dahlias on our list are of proven merit, true to name of our own growing, clean field grown stock, grown from roots, not cuttings, therefore free from weakness or disease.

AVALON—Decorative. An extra good, extra large, pure clear yellow Dahlia of exceptional charm, heavy bloomer, long strong stalks, etc. Hard to beat. \$1.50 per dozen; \$12.00 per 100.

DARLENE—Decorative. Shell pink with blending white at center. \$1.00 per doz.; \$6.00 per 100, not prepaid.

DREER'S WHITE—Show. Large pure white. \$1.00 per doz.; \$6.00 per 100, not prepaid.

DOROTHY ROBBINS—Decorative. Buff yellow with terra cotta shadings, long stiff stem, the best large flowering autumn shade dahlia for high class florists' trade. \$1.20 per doz.; \$9.00 per 100.

ELEANOR VANDERVEER—Dec. First rate cut and show dahlia. Satiny rose-pink, shaded silvery lilac. A flower of great beauty. 12 for \$1.60; 100 for \$10.00, not prepaid.

JANE COWL—Decorative. Giant in size, color warm buff-yellow. One of the best of the newer varieties. 12 for \$1.60; 100 for \$10.00.

JERSEY'S BEACON—In the Jersey's Beauty class, color light scarlet. 12 for \$1.20; 100 for \$10.00, not prepaid.

JERSEY'S BEAUTY—Clear rich pink, long straight wiry stems, profuse bloomer, good keeper and shipper. First class florists' variety. \$1.60 per doz.; \$10.00 per 100, not prepaid.

KATHLEEN NORRIS—Imagine an immense ball of artistically arranged long, broad petals of light rich pink on long stems and you have the image of the wonderful bloom. Considered by many as the finest of all Dahlias. \$2.20 per dozen; \$16.00 per 100, not prepaid.

MINA BURGLE—Decorative. Rich dark scarlet. Extra good. \$1.00 per dozen; \$6.50 per 100, not prepaid.

MRS. I. de VER WARNER—Decorative. Deep lavender, vigorous grower, great multiplier, splendid stems, high class in every way. \$1.00 per dozen; \$10.00 per 100, not prepaid.

ORANGE BEAUTY—Dec. Large flower of a pleasing shade of orange, first rate cut and show flower. 12 for \$2.20; 100 for \$16.00.

POLAR SNOW—Decorative. Unexcelled for size and deepness of flower, pure white even in the center. Placed in a vase with the very finest Dahlias of other colors Polar Snow is the loveliest—immensely beautiful. Each 65 cents postpaid.

PRIDE OF CALIFORNIA—Decorative. Rich crimson. \$1.00 per doz.; \$6.00 per 100, not prepaid.

QUEEN MARY—Decorative. Light pink, profuse bloomer. \$1.00 per dozen; \$6.00 per 100, not prepaid.

If great size is of no importance for a big crop of high class cut flowers Queen Mary is unbeatable, producing fine flowers no matter how unfavorable the weather.

QUEEN VICTORIA—Show. Golden yellow, \$1.00 per dozen; \$6.00 per 100, not prepaid.

SAGAMORE—Decorative. Rich deep yellow with glowing orange cast. An exceptionally good cut-flower. 12 for \$1.60; 100 for \$10.00.

TRENTONIAN—Dec. Very large, color a blend of rich yellow with bronze. A flower of unusual brilliance. 12 for \$2.20; 100 for \$16.00.

PRICES FOR DAHLIA ROOTS—In lots of half a dozen at dozen rates. In lots of over a dozen at 100 rates. If a price is quoted at \$1.00 per dozen, one-half dozen costs 50 cents. When the price per 100 roots is \$6.00 and you order 20 roots, the cost will be 20 times 6 cents, or \$1.20, etc. The prices are not prepaid.

DOUBLE DAHLIAS UNDER COLOR

Strong divisions. WHITE, PINK, RED, YELLOW, MIXED. 60c per dozen; \$4.00 per 100. Not prepaid.

BY MAIL PREPAID—No order can be accepted for less than 3 roots of a variety. Any variety priced at \$6.00 to \$10.00 per 100 will cost you per 3 roots prepaid 40c. Priced over \$10.00 to \$20.00 price for 3 roots prepaid is 75c.

BLEEDING HEART

DIELYTHRA SPECTABILIS—Readily saleable, absolutely hardy, easy to grow, fast to multiply, always in demand, a money making article for the flower grower. You can sell the roots simply divided or if you will pot them up (4 inch pots) early in February, place in a greenhouse (temperature not over 55 deg.) you will have blooming plants for spring sales. Started early in January will be ready for Easter and no matter when you will have them they sell at a good price. Dig roots intended for forcing late in October or early in November, store in frames until February, then pot them up and water heavily AFTER they start into growth.

Strong divisions with several eyes. 12 for \$1.60; 100 for \$12.00, not prepaid.

FORCING REGAL LILIES—Place bulbs 8-9 inches in circumference in 6-7 inch pots, place the pots in November in a cool dark cellar, not too cool to freeze. Early in January bring into a 55 deg. house, raise the temperature to 65 deg. when top growth is showing. You will get bloom from April to June.

Seeds with **HARD SHELL** like canna, sweet peas, will sprout quickly if placed in ice cold water for 3 hours the water drained, the seeds dropped in boiling water for 3 to 10 seconds. Bring the water to boiling point, take off the fire, drop the ice cold seeds in, stir up the seeds with a spoon and immediately drain the hot water off. That cracks the shells.

VEGETABLES UNDER GLASS As an answer to inquiries as to what vegetables can be grown successfully under glass we say: Many. What are the profits? Answer: Poor and fair only to growers that make vegetable growing under glass their specialty. That means, first class equipment, long years of experience, good connections with distributors of hot house vegetables. All this takes years, to come into being.

As we see it our correspondents are willing to work hard to earn the dollars, a hard task, because dollars are not fairly distributed. Big heaps with a few, none with millions of others. A good advice would be appreciated by many, ourselves included. We suggest: Leave vegetables alone. Raise seedlings and rooted cuttings of popular flowers including good novelties. If you heat your houses throughout winter, you can grow many plants that later can be transferred to cold frames. To get an idea what to grow study the classified ads in the trade papers. Grow strawberry plants, rhubarb, etc., for local sales. Raise vegetable plants and have a supply of these early and late in the spring and way into early summer. Your vegetable plants you can sell locally by advertising in the local papers and by hanging out a big sign in front of your place. Plants of flowers you will move through ads in the classified columns of trade papers. It costs money to advertise but to deliver vegetables to grocers, etc., costs more money yet. With careful management you will make some profit right from the start and you will work up profitable trade and the number of your customers will grow if you will supply first class plants, true to name and treat your customers as you expect to be treated yourself.

IN THE YEAR OF 1934 the season was hot and dry. Most flowers just managed to stay alive, many died from the effects of heat. The following proved to be heat and drought resistant with us. All Alliums, practically all Centaureas, Pentstemons, Antirrhinum, Euphorbias, Statice, Gaillardias, perennial Gypsophylas, Ageratum, Anthemis, Armeria, Coreopsis, Lathyrus Latifolius, Sweet Wivelsfield, Dianthus Neglectus, Marigold, Portulaca, Petunia, Silene, Verbena Venosa, Scabiosa Caucasia, Double Shasta Daisy and Chrysanthemum Mrs. L. C. Bell. Many others bloomed but the flowers produced were poor.

PROFIT AND WAGES

The word profit is used often in our descriptions. What is profit—wages? In a way both are the same. Profit is in the "may be" class, wages are sure to come. Profit is quite often, chasing a cloud—at times there is no profit. Before wages can be paid, profit must be made. Profit is less of a gamble when those working for someone, do work as well, as they would work for themselves. And they can work for profit instead of for wages, whenever they choose to do so.

To make profit easier to make, we strive to supply the best there is in seeds. That is our duty, we are well aware of that fact and no amount of work will discourage us if we see that the result of our work will benefit our customers. We, like many others, do not always make a profit, when we do, we have earned it.

LAST SOWING DATES

You can sow and be sure that they will "make," Broccoli, leek, pepper and tomato up to May 15th. Onion and parsnip up to May 20th. Lima Beans, celery, melons, cardoon and salsify up to June 1st. Swiss Chard and peas up to June 10th. Brussels sprouts, cabbage, cauliflower up to June 15th. Sweet corn and endive up to July 1st. Carrots, cucumber, winter radish up to July 10th. Beet, kohlrabi, lettuce, rutabaga, pumpkin up to July 15th. Dwarf beans and Florence Fennel up to August 1st. Chinese cabbage, kale, mustard and turnip, up to August 10th. Spinach and early radish up to September 1st.

The dates mentioned are for the approximate latitude of Chicago and New York and allowances must be made in colder and warmer sections.

Choice Gladioli

Our Gladioli bulbs are young stock, clean and healthy, free of disease, full of vitality and blooming ability, grown from bulbets or cormels on rich, well drained ground under high cultivation, properly cured and there are none better in quality. (P) means Primulinus, a race of Gladioli that is especially desirable for forcing as it can be grown closer than the larger type Gladioli. They are very early, can be more quickly grown and the valuable greenhouse space utilized for some other crop. Whenever we say in our description EXTRA EARLY we mean that that variety will bloom in about 75 days from date of planting. EARLY means 85 days. MEDIUM EARLY 95 days, LATE 105 days. VERY LATE 115 days.

ALBANIA—Medium early. Extra large, pure white, edges finely ruffled, vigorous grower. A high class florist variety.

ALICE TIPLADY—(P.) Glowing orange-scarlet, fine for cut flowers. Early.

AMERICA—Medium early. Soft lavender pink.

BERTY SNOW—An extremely valuable commercial lavender much above the average. Even the side spikes and spikes produced by bulbets are large and beautiful. Endures the terrific heat of summer better than other lavenders.

BETTY NUTHALL—Late. Orange salmon. A sensational variety and a gladioli that will be a leader for years to come as a cut flower and exhibition variety. Spikes tall, 6-8 large well placed blooms. A wonderful gladioli.

BLUE BIRD—Best large flowering early purple-blue.

CAPTAIN BOYNTON—Large flowered light lavender with a purple blotch. Tall, vigorous.

CARMEN SYLVA—Snow white blossoms on tall slender straight stems. Many growers consider it the best commercial white. Medium early.

CHAS. DICKENS—Early, tall strong grower with many open. Purple violet like Anna Eberius, but much better. High class commercial.

CRIMSON GLOW—Medium early. Glowing crimson.

DR. F. E. BENNET—Medium early. Immense in size, most vivid flame-scarlet in color; once seen always remembered.

DR. NELSON SHOOK—Extra early, extra strong grower, spikes tall with 6 to 8 open. At present this is the finest deep rose commercial.

E. J. SHAYLOR—Pure large ruffled deep pink, extra tall, one of the best forcers, a high class commercial pink. Early.

EVELYN KIRTLAND—Medium early, vigorous, deep living pink with glistening scarlet blotches on lower petals. Easily the best all-around pink cut flower variety. One of the strongest growing Glads of all gladioli. When you buy Evelyn Kirtland gladioli, you are getting most for your money. Evelyn is of exceptionally high value because it will stand much abuse in handling, will not crush, does not show black streaks when injured in packing, the blooms have substance, great size, the color is all that can be desired. There is no other glad, Mrs. Whitcomb excepted, that has such thick, velvety petals and the satiny sheen as Kirtland. Always in demand both for local use and shipping.

FLAMING SWORD—Flowers large of true flaming spectrum-red on tall, slender spikes.

GLORIANNA—Golden salmon, yellow throat. Tall, vigorous grower.

GOLD EAGLE—Extremely early, clear, deep yellow cut flower variety.

GOLDEN DREAM—Late. Extra tall, straight spikes, flowers large, pure yellow without markings. A dream in yellow.

GOLDEN MEASURE—Best inexpensive yellow. Vigorous growers, large flowers.

GIANT NYMPH—Medium early. A superb variety. La France pink with a creamy yellow throat. Immense in size, vigorous grower. Will produce practically 100 per cent saleable spikes under almost any conditions.

HALLEY—Extra early, fine forcer. Salmon pink.

HERADA—Medium early, pure mauve with deeper markings in throat. Splendid.

JEWELL—Extra early. Beautiful salmon pink with clear, golden yellow throat. Large wide-open flowers on a tall, well formed spike.

JOE COLEMAN—Medium early. Very bright spectrum-red, carmine blotch. Large flower and many open at one time.

LE MARECHAL FOCH—Medium early. Pale pink, self color except for small rose stripe on lower petals. Flowers large.

LAUGHING WATERS—New forcing variety, clear, rather dark salmon. A big and very good florist in Massachusetts says: The most profitable forcing Gladioli that I ever grew.

LONGFELLOW—Medium early. Wonderful florist and exhibition variety. Flowers large, perfectly placed, well opened, La France pink in color, with a prominent lighter midrib. Tall and vigorous grower.

CLARKIAS AND GODETIAS

To bring out the beauty of both these flowers you must grow them in rather poor soil. Clay or good soil mixed with lots of sand or sifted ashes is the thing. They also do well in partly shaded position. A successful grower says: Grow both these flowers in 3 in. flats, disbudding to one stem and keeping them wilted most of the time through lack of moisture. Both Clarkias and Godetias are flowers of striking beauty, but if supplied with plenty of water and grown in deep soil they are worthless.

GROW NEW FLOWERS

because it pays to do so. Where will you get these new flowers? You can get them from us. We offer the seed of many good ones, absolutely new and very superior. See our novelty pages.

LOS ANGELES—Medium early. The "Cut and Come Again" as it sends up new spikes after the old are cut. A good commercial variety, very strong grower. Fine forcer. Color, rich pink.

MAIDEN BLUSH—(P). Very free flowering, long stemmed, enchantress pink and best money making forcing Gladioli in existence. Extra early.

MARMORA—Supreme for exhibition or commercial use. Hugh florets of smoky gray lavender with a deeper blotch. Perfect in spike formation, growth and habits.

MINUET—Outstanding among lavenders. Large flower of perfect form, perfectly placed, tall stately spikes.

MRS. E. C. PETERS—Orchid lavender blotched crimson, fine show and cut flower.

MRS. LEON DOUGLASS—Medium early. Salmon-rose pink striped with brilliant scarlet. A real wonder gladiolus, tall and showy. Blooms five inches across. Popular as a commercial variety.

MRS. FRANK PENDLETON—Medium early, bright rose pink on white ground with blood red blotches on lower petals.

MRS. F. KING—Early, brilliant vermilion scarlet. Extra good.

MRS. P. W. SISSON—Softest light pink, the best in this color.

GLADIOLI MAUDE HAYWARD—You will like this variety if you will try it. A clear self lavender, more lavender in color than either Bertie Snow or Minuet. Tall, straight spikes, very substantial flowers, perfectly placed with exceptionally good keeping qualities. Not a primulinus.

NANCY HANKS—Flowers large, well placed on fine stems, color rich apricot. Best cutter from small bulbs. In the very best class.

OLIVE GOODRICH—Early. White edged pink. Extra strong grower, spikes very tall, 6 or more open. Highly valuable cut flower variety.

ORANGE QUEEN—Early. Color copper orange. First class variety.

PEACE—Medium early. A most rugged variety and deservedly popular. Pure white with tyrian rose blotch on lower petals. Tall spikes carrying up to 20 well arranged blossoms.

PICARDY—Of genuine merit and a leader to be for years to come. Extra large florets, petals of extra heavy texture, color apricot pink. Medium early. No. 1 bulbs each 40c, prepaid.

PURPLE GLORY—Medium early. Deep, velvety red with black blotches. Considered by many as the most beautiful of all gladioli. Very tall, strong grower.

PRINCE OF WALES—Displaced by Betty Nuthall.

PRIDE OF WANAKAH—Medium early, spikes tall and strong. Very large florets of deep lavender rose. Magnificent cut flower and exhibition variety.

PRINCE OF INDIA—A refined, delicately colored smoky, used by florists in arrangement with Talisman rose.

ROSE ASH—Medium early. A pastel shade, ashes of roses. Odd and pretty.

ROSE 1910—Extra early, extra large, rich deep pink with narrow central line on lower petals. Fine forcer and highly popular.

ROMANCE—Medium early. One of the best smoky-hued varieties. Coral pink, seen through a haze of blue smoke, is the color.

SCHWABEN—Medium early, pure canary yellow shaded sulphur.

SOUVENIR—(P). An extra good, rich, clear yellow. Early.

GLADIOLI TAPAZ—In our judgment a truly beautiful variety. The individual flowers are medium in size, but what a color—soft pink blended with apricot. Fine spikes always straight, it will stand the terrific summer heat better than any glad. that we are growing. Uncommonly good and inexpensive. Extra early.

VIRGINIA—Early. Same as Scarlet Princess. Strong spikes of massive, intense scarlet blooms. Six or more out. Consistent winner at the shows. Fine forcer. A high class cut flower. Sells readily in any market.

W. H. PHIPPS—Medium early. In the very best class as to color, size, bulb and cut flower value. La France pink overlaid with light rose-salmon. Lower petals speckled with ruby red. Flowers enormous. A masterpiece.

HOW TO FORCE GLADIOLI

Pot the bulbs, using 3 inch pots and ordinary soil, place the pots under the benches. When the pots are filled with roots move them into a temperature of 45 to 50 degrees at night. NOT over that, and when established only 5 degrees of heat can be applied with safety. Too much heat causes the tips of leaves to turn yellow and in some cases blindness. Water cautiously up to the stage when buds begin to form, then give plenty of water and once a week liquid manure. NEVER plant before January 15th, as earlier plantings will result in blindness. Plant in solid ground in rows 8 inches apart, 3½ inches apart in rows, 3 inches deep and if on benches have at least 5 inches of soil in them and do not use strong bottom heat. If your soil is too rich the growth will be rank but there will be no bloom. Only first size bulbs are suited for forcing and a bulb once forced is of no value for forcing even if grown outdoors for two seasons. Keep your bulbs dry, in shallow trays in a temperature of 40 to 50 degrees. If bulbs are left in deep layers they soon heat and form roots which weakens the bulbs. It is easy to grow Gladioli under glass and you will never fail if you will not force them hard, never plant before January 15th, do not plant shallow and never use bulbs once forced. **CULTURE OUTDOORS:** Spade the ground about a foot deep, never use fresh manure and do not plant them in the same place where planted the previous year. Early in May press the bulbs about 4 inches deep into soft ground in rows a foot apart and 6 inches apart in the rows. Keep free from weeds. To bring them to perfection apply all the water they can stand from the time they are 8 inches high until they commence to bloom.

NEW PEONY MANUAL

The most complete and comprehensive treatise on the peony ever issued. Forty-one splendid illustrations, several in color, three hundred and thirty-six pages crowded full of valuable information. Attractive discount allowed dealers. Write W. F. Christman, Secretary, American Peony Society, Northbrook, Ill.

We used your bulbs this spring (Gladioli); they are blooming now and certainly are wonderful. So says a customer in Ohio.

We supply 250 of a variety at 1000 rate, 25 at 100 rate. Prices quoted in lots of 1000 and 100 are F. O. B. Council Bluffs. Price per dozen by mail prepaid, 40c, any variety except Picardy.

GLADIOLI MIXED

CHOICE MIXED—Good standard varieties in all colors. Will produce choice bloom at very little expense. Price for first size bulbs: Dozen 40c; prepaid. Not prepaid: 100 for \$1.50; 1000 for \$13.00, for No. 1 bulbs.

FLORISTS' MIXTURE—Made up of finest named varieties in a well balanced range of colors. If you want the very best at a small expense this is the mixture to buy. Dozen 50c, prepaid. No. 1 bulbs. Per 100, \$1.70; per 1000, \$15.00, for No. 1 size, not prepaid.

OUR TRADE PACKETS

are double the quantity of retail packets. Our packets are well filled with fresh seed of strong germination, strictly true to name. When it comes to quality our seeds are 100 per cent.

HOW TO DYE FLOWERS

As an answer to numerous inquiries will say that, you use special dyes that you can get from firms advertising in the Florists' Exchange or Florists' Review. For further information write to: McClenahan Greenhouses, Oklahoma City, Okla.; Aljo Mfg. Co., New York, N. Y., 130 West 21st Street.

GLADIOLI UNDER GLASS

Successful growers recommend Alice Tiplady, Maiden's Blush and Souvenir as the most dependable for early forcing.

FLORAL WORK of distinction. Use dyed fresh double gypsophyla. Select sprays on which not all the blooms have developed. The shorter the stems the quicker will the dye be absorbed. Make slanting cuts at the end of stems, place in the dye solution and when the color has been absorbed transfer into clear water. The most effective colors are blue, pink and orange.

TO MAKE GLADIOLI PAY

you must have them in bloom before and after the outdoor crop. Start planting January 15th and keep on planting at intervals of 15 days up to March 1st. You may plant in benches or beds and to save space, in pots, which you will place under the benches and on benches when well rooted and with about 6 inches of growth, about 30 to 40 days after potting. Plant again March 15th in pots, place the pots under the benches, when well rooted place the pots on the benches and transfer them to cold frames towards the end of April to get bloom towards the end of June or you may plant March 15th in solid beds in the greenhouse. Again you can start bulbs in April in pots and plant in the open when danger of frost is past. Also plant about April 1st and again April 15th in cold frames. You will have them in bloom long before the outdoor crop. Plant lightly for a crop of bloom to come in August and September and if short, you can always buy, as a rule, for less than the cost of production. For a crop of bloom in the late fall when outdoor crop is gone, asters about played out and mums not counting for much, plant early varieties from July 1st to 10th or even two or three weeks later in a sheltered spot.

MR. FLORIST: Pentstemon Grfl. will make extra money for you. Potted and placed before the public when in bloom (May and June) will sell and advertise you far and wide, because new, never before seen by many, possessing rare beauty, exactly what lovers of flowers are looking for.

FORCING PERENNIALS—Use strong clumps, grow cool not over 45-50 degrees at night. Withhold water for the first 10-14 days. That gives your plants a chance to set their buds instead of making rampant growth of foliage.

FLORISTS will profit by growing perennials in places where now weeds are allowed to grow. In partly shaded places try: Achillea Perry's White, Violas, Hardy Sweet Violets, Veronica Gentianoides, Campanula Rutundifolia, Aconitum, Aquilegia Flabellata. In full sun: Anthemis, Campanula, Carpatica, Coreopsis, Dianthus Deltoides and Caesius, Gallardia Grfl., Gallardia Beautiful Star. This is an annual but seeds itself, is as good as a perennial. Pentstemon, Platycodon, Pyrethrum, Scabiosa Caucasica, Statice Dumosa and Latifolia, Thalictrum, Nepeta, Verbena Venosa, Achillea Tomentosa. Not one of the named needs any "babying" once planted will stay for years without care. From some you will be able to cut flowers; others will be of interest to visitors, you will have flowers inside as well as outside of your greenhouses. Your place will become TWICE the place of flowers that it is at present.

MORE MONEY FOR FLOWERS

The rule of success, a highly successful flower grower says, is: Have flowers when they are most in demand and prices high, in December, January and February. Many flowers can be had in bloom at that time. Calendulas will bloom freely during winter but will not bring top prices as long as pompons are in the market. Follow mums with Stevia, pot plants, gladioli, freesias. Snaps planted close, 5 or 6 inches apart, depending on the size of the plants, kept pinched back till the middle of November and then allowed to come will bloom during winter. To make the flowers come give the snaps say 55 deg. in January and February. The flowers will be weaker and not so long but you will get three times as much money for them than they would bring in March and later. And—do things just a little different. Do not grow a quantity of something your neighbor grower did well with last year. Usually the market will be overstocked with that particular thing and prices poor.

STOCKS Mammoth Column now called Non Branching, deserve the attention of every flower grower as the flowers bring the best returns in the market, often double the amount over other stocks.

IMPORTED EUROPEAN SCYTHES

European Scythe

Made of finest magnetic steel on the principle of a razor. Blade very thin, back strong. Can be sharpened to such a keen edge that one can almost shave with it. Unbeatable in mowing grass, grain or clover. Usually sharpened by hammering, which sharpens and hardens the edge. Those not knowing how to use the hammer should sharpen the blade on a grindstone. Not strong enough for mowing tough, big weeds or brush. Special prices, in quantities, for parks and cemeteries. All our scythes fit the American or any other kind of handle.

HIGHER PRICES. WHY?

THE DOLLAR IS DOWN, THE DUTY IS UP

The lower the value of the dollar the stiffer the duty. The duty is at present 40 to 50 per cent ad valorem. That raises the cost of imported goods. We regret very much that we must raise the prices but we will lower the prices if and when the duty goes down or the value of the dollar goes up.

Dealers and Jobbers

Write for quantity prices. We carry large stocks and can take care of sizeable orders at any time.

PRICES FOR IMPORTED EUROPEAN SCYTHES

Length	Postpaid each
20 inches	\$2.85
22 inches	2.85
24 inches	2.90
26 inches	2.95
28 inches	3.00
30 inches	3.00

A COMPLETE SCYTHE

including the blade, handle, scythe ring, hammer, anvil and stone for \$6.50, prepaid.

EUROPEAN SCYTHE HANDLE

This is straight, not bent. Each, postpaid, \$1.75, including ring. Not prepaid, \$1.55.

European scythes will fit the ordinary bent or curved snaths.

IMPORTED SCYTHE STONES

A soft stone pointed at both ends, that will put a sharp edge on any tool and the only stone to use for sharpening scythes after hammering. This soft stone, made like so many other good things, in Germany and imported by us, will sharpen your scythe and will not reduce the thin edge put on by hammering. If you grind your scythe use any kind of stone, but if you draw the edge by hammering, use this soft stone only. Each, prepaid, 25c. Unprepaid: \$1.00 per dozen.

EUROPEAN SCYTHE RING

Single Screw Ring.....30c Double Screw Ring.....35c

SCYTHE AND PLANT DISEASES

Many fungous diseases and injurious insects live on weeds through the winter and move to the cultivated patches in the spring. You can destroy both these enemies cheaply and effectively by using a scythe or sickle.

Our imported Scythes are hand made by the mountaineers of Styria in Europe. Scythes, also swords, were made in that part of Europe for centuries. The makers have centuries long experience. The steel used is high grade Styrian magnetic steel and scythes as good, cannot be made on this side and sell for moderate prices. Scythe manufacturers in America tried it and gave up. Prices being high, on account of high duties, will not sell in America. American goods will not sell in Austria as they would if Austrians could sell their excellent scythes here. Both sides are losing.

EUROPEAN GRASS HOOK

These European Grass Hooks or better known as German Grass Hooks are a standard article on the American market. People that know demand them, because they are light and keep the edge better than most other grass hooks. Price each 75c; \$7.80 per doz., prepaid.

"LIKE A RAZOR" GRASS HOOK

This Grass Hook, like a razor, has a strong back and extremely thin blade, very sharp and keeps sharp. Will cut grass and weeds with the least exertion on the part of the user. It is hand made, hammered out of a solid piece of very high grade steel. This grass hook will do better work than any other now on the market.

We are sure you will like this grass hook better than any you ever used. If not, send it back at our expense and we will give you your money back. Price, prepaid, each 85c, \$8.50 per doz.

IMPORTED BUSH SCYTHE

A practically unbreakable scythe for cutting heavy weeds and brush. Sharpened by hammering; by drawing out the edge to the thinness of a razor, easy to cut with. On fairly level surface cuts the weeds, brush, or grass flush with the ground. It is a wonderful tool but only if drawn out by hammering. We recommend this scythe only to those that know how to sharpen a scythe with a hammer. Each \$3.40, prepaid.

Real Steel in Our Scythes

It is just 17 years since I ordered three of your scythes which are still in use and in A-1 condition. The scythe I am now ordering is for one of my neighbors.
J. Konop, Maribel, Wis.

ALLIGATOR SICKLE

Alligator sickle has a toothed edge, is very sharp, and is an exceedingly useful tool. It will cut grass, corn stalks, and brush, with very slight exertion. It can be used in cutting woody stalks up to two inches in diameter. Much safer to use than a corn knife. Persons using regular corn knife frequently cut themselves. This is almost impossible when using Alligator Sickle. To sharpen, use emery stone or a file and sharpen the tool on the reverse edge. Price each, 75c; \$7.80 per dozen, prepaid.

Anvil

Hammer

HAMMERS AND ANVILS

Hammering draws out and hardens the edge of the scythe and the scythe stays sharp for a much longer time than it would if it was sharpened by the whetstone alone. Price: Hammer 95c; Anvil 95c, prepaid.

PERENNIALS FROM SEED

As a rule it takes a perennial some time to "come up." Certain perennials like phlox, dictamnus, trolius, etc., are especially slow in coming up. But once up, they are in this world to stay for many years. Other perennials, are of a quick growing nature. The seed sprouts readily and speedily a flowering plant is developed. This is very gratifying to us gardeners but the thing has a reverse side, namely that these easily raised plants take their departure from this world as easily as it was to raise them. So if a perennial is slow in coming up, if you have to wait long for the bloom do not mind it, as you will be rewarded by the plant's longevity. The slow grower will stay with you, will be easy to transplant, and when you sell a plant, it will grow for your customer, he will be satisfied and you will do more business with him and his friends.

Certain perennials raised from seed, when in bloom for the first time, do not come anywhere near the mark. They were described as gorgeous, as magnificent, but they do not look that way to you at first. These belong to a class that do not show their beauty at first, but they will later, when two or three years old and well established. Some of these are wonderful if left undisturbed long enough. Therefore to judge a perennial too soon, would not be fair in these cases.

Many perennials are described as perfectly hardy, yet you have lost them, they winter-kill. Perennials will winter-kill if the plants are young, in their first year of development, and not given protection. But given a light covering of straw, hay or other coarse material the first winter, will from then on, survive any amount of cold and unfavorable winter conditions. Make it a rule to protect seedling perennials over winter. Once established most perennials need no protection whatever.

Sow the seed of perennials in an open frame. The advantages of sowing in an open frame are: You can flood the frame with water, thereby getting the most of watering, the seed will stay in the frame, heavy rains cannot wash out and carry the seed away. If you are sowing during summer and sow in frames, you can easily shade your sowings with lath or burlap, you can keep out birds, cats, that do damage to open seed beds. If you are a beginner, do not expect ANY perennial to come as fast as a radish and if you will fail to get a stand, before you put the blame on the seed, ask yourself whether there might not have been some other cause. You will meet with the least amount of failure, if you will cover the seeds properly, not too much and as lightly as possible when the seed is small or light like statice, heuchera, etc., if you will keep your seed bed moist and during summer shaded with lath, burlap or muslin.

EARLY IN NOVEMBER just before the time when heavy frosts are due, you can sow the seed of perennials outdoors. The seed will lay unsprouted till spring and will germinate very easily in the spring, long before the ground is ready to work. You will get better plants that way, bloom sooner and save yourself lots of watering. At the same time you can also sow the seeds of the following annuals: Ageratum, Alyssum, Cacalia, Calendula, Calliopsis, Candytuft, Centaurea, Clarkia, Cosmos, Cynoglossum, Dianthus, Eschscholtzia, Euphorbia, Godetia, Hunnemannia, Larkspur, Lupin, Nemophyla, Nicotiana, Nigella, Pansy, Petunia, bedding varieties, Phlox, Poppy, Sanvitalia, Saponaria, Schizanthus, Sweet Peas, Viscaria, Mignonette, Snapdragon, Erysimum.

SEEDS ARE THE PRODUCT OF NATURE

Seeds cannot be made. We are at the mercy of nature. If the weather is unfavorable, there is no seed or the crop is short.

When the crop fails the seedman cannot supply the seed. If he does fill the order for an item of which the crop is a failure, he sends something that he thinks is "just as good."

We ourselves do not think this "just as good" stuff, the right thing. When an item in seeds is a crop failure, we do not try to substitute; we send your money back tell you frankly that we do not have what you ordered.

You want the seed of course, we do not send it because we cannot and you think—bum service this.

We ask you to stop to think before you start to form an adverse opinion of us as seedmen.

Suppose YOU were in the seed business. Suppose that you grew a crop or many crops for seed. Then comes a flood, your crops get covered up with mud and destroyed. Suppose again that there is no rain for such a long time that your plants die. Suppose there will appear bugs and worms in untold numbers, blight and other diseases make your plants a visit.

You will spray, apply poison, both liquid and powder, you do all you can, yet you are unable to check the ravages of insects or disease, you are unable to save your crop.

You get no crop of seed. Now then if YOU were a seed grower, had no crop of seed of certain items, what would you do?

You would write to your customers saying, I am very sorry but I cannot fill your order for such and such item. This you would do if you did believe in "be on the square" policy.

You would not fill orders by sending out something that you would think is "just as good."

This is our policy. We regret exceedingly to say to a customer—sorry, cannot serve you—we know how the customer feels. Then too, if we do not fill your order and send your money back we are losing ourselves. We are losing the sale, we have already lost the crop and we are losing in prestige.

Most customers do not mind when here and there their order is not filled in full. Some do, but as explained there is no remedy in substituting. There is a way of getting the missing item.

Gladiolus Longfellow

GLADIOLI LONGFELLOW

Pure colored, medium light pink a most lovely color. Flowers large, wide open up to eight blooms open at one time and the flowers perfectly placed.

In perfect placement of bloom Longfellow has no rival.

See pages 116 and 117 for more gladioli.

In most cases you will locate the seed by trying other reliable seedmen. You will get the missing item unless the crop is a total failure with everybody. Then there is no seed until the following year. We are starting new plantations of seeds every year in order to insure full supply of seeds and you will gain by ordering as early as possible in the season while supplies of seeds are good.

WE GUARANTEE the safe arrival of all orders entrusted to us, and purity of our seeds. Inform us whenever you are not fully satisfied and we will do the right thing every time. In spite of the fact that we send out nothing but seeds of the best quality it is impossible to assure success as that depends on many circumstances such as weather conditions, etc., for that reason we shall be liable only for the amount we received for seeds, bulbs and plants.

SEEDS OF POT, SWEET AND MEDICINAL HERBS

Most herbs should be cut when in full bloom, dried quickly in shade and when thoroughly dry packed in boxes with the air entirely excluded. The seed of most varieties is small and delicate, therefore it should be sown in finely prepared soil, free from weeds, to secure a satisfactory stand.

ANISE—The seeds are used in fine pastries. Pkt. 5c; 1 oz. 30c.

BASIL SWEET—Sweet smelling herb that is used for flavoring soups, stews and highly season dishes. Pkt. 5c; oz. 30c.

BASIL DWARF OR BUSH—Strongly sweet scented plant, grown mostly in pots as a house plant. Pkt. 5c; oz. 30c.

BOHNENKRAUT—See summer Savory.

BORAGE—Leaves are used in pickles and salads; flowers excellent for bees. Pkt. 5c; oz. 20c.

CARAWAY—Used in flavoring liquors, breads, meats, etc. Pkt. 5c; oz. 10c; ¼ lb. 20c; ½ lb. 30c; 1 lb. 50c.

DILL—The green leaves are used for pickles and for flavoring sauces. Pkt. 5c; oz. 10c; ¼ lb. 20c; 1 lb. 80c.

FENUGREEK—Pkt. 5c; oz. 10c; 1 lb. \$1.00.

MAW OR BLUE POPPY—The seed is used in pastries. Pkt. 5c; oz. 10c; 1 lb. 60c.

MARJORAM SWEET—The dried leaves are used for seasoning meats and various dishes. Pkt. 10c; oz. 30c; 1 lb. \$3.50.

MINT—Plants only. Per clump, 20c postpaid. Two varieties, Spearmint and Peppermint. 100 plants 50c; 1,000 plants, \$2.50, not prepaid.

ROSEMARY—Yields an aromatic oil and water. Pkt. 5c; oz. 25c.

SAFFRON—Used for coloring soups. Pkt. 5c; oz. 20c.

SAGE—Leaves are used for seasoning and stuffing. Pkt. 5c; oz. 30c; 1 lb. \$2.40.

SAVORY SUMMER—A culinary herb. Pkt. 5c; oz. 30c.

TARRAGON—Estragon. (*Artemisia Dracunculus*). Hardy perennial with slight protection over winter. Very aromatic. Plants only. The true variety yields no seed. Three for 85c, postpaid.

THYME—Used for seasoning. Pkt. 10c; oz. 40c; ¼ lb. \$1.00.

WALDMEISTER—Used in May vine and also for scenting clothes. Pkt. 5c.

WORMWOOD—Has medicinal qualities. Beneficial for poultry, and should be planted in poultry yards. Pkt. 5c; oz. 25c; 1 lb. 75c.

YARROW—Has medicinal qualities. Pkt. 5c; oz. 25c.

Marjoram

Sage

Balm

Thyme

TREE SEEDS

Sow Evergreen seeds early in the spring in a firm, sandy bed. Give the young seedlings some shade the first summer. The other deciduous seeds can be sown in April or May in drills 2 feet apart.

FINE LAWN GRASSES

NEW ZEALAND FESCUE—Fine leaved late grass being at its best during the hottest part of the summer, when blue grass is wilted and yellow in color. Must be included in every first class lawn grass mixture. Excellent for Putting Greens, making a compact fine turf of deep green. Sow at the rate of half pound to 100 square feet.

CRESTED DOG'S TAIL—Fine leaved grass of low and dense growth that will stand hard wear, thriving even in hard and dry soil. Should be used only in mixtures with other grasses.

COLONIAL BENT—SEASIDE BENT—COCOS BENT—RHODE ISLAND BENT as well as any other grass suitable for building lawns for special purposes always on hand. Prices quoted upon request.

FLOWER GROWERS:

You will be interested and you will profit by trying

DOUBLE SNAPDRAGONS

LILIUM LONGIFLORUM EARLY QUEEN

CARNATION PRAGUE GIANT

SWEET PEA EILEEN

The above are items of great promise sure to show the grower worth while profit.

Tasmania Bean

TASMANIA BEAN **ALSO CALLED GUINEA BEAN**

Tasmania Bean is a variety of Cocosella, producing an immense amount of fruit, delicate in taste and nourishing, whether boiled, fried, stewed or baked. To many people, the fruit sliced, breaded and fried in butter tastes like a most tender veal steak. The fruit grows on vines similar to those of squash but much more vigorous in growth. If given support the vines will climb and the fruit will hang down and be of fine, straight, symmetrical form. Pick when young, when the fruits weigh about 8 pounds or less. Cultivate same as for watermelons. Place 2 or 3 seeds in each hill, not more. Pkt. 10c; oz. 30c; $\frac{1}{4}$ lb. 50c; lb. \$2.00.

LILIUM LONGIFLORUM **EARLY QUEEN** **Now Is The Time To Act**

This lily will be in great demand. There is a demand right now, but no one can supply the bulbs of this lily. What few bulbs there are, are jealously guarded as a seed producing source. Millions of bulbs of this lily will be sold, but before any selling can be done the bulbs have to be produced, which is easily done from seed. Up to 1932 the seed was scarce and hard to get. We now have the seed and can supply worth while quantities.

Early Queen has snow-white trumpet shaped flowers like the old Longiflorum lily. Seed started in January or early in February produces perfect flowers from August to frost at a time when lily blooms are scarce. The flowers brought a local grower that got a start on this lily from seed we furnished him, fifteen cents apiece. The florist was glad to get them and would have used many more had there been more. Every dollar that you will invest in this lily, will make a hundred dollars but you must act now, so as to have a supply while the lily is scarce and competition none whatever. Do not miss this chance to make some extra money.

THE BEST PANSY

We claim that our America Pansy is the BEST OF ALL Pansies. We may be mistaken. If there is a better Pansy we would like to know the name of it. A better Pansy is not being offered in this or any other country. Of this we are sure. We tried all strains and we keep on trying and comparing our America Pansy with other fine Pansies. Never yet did we find a strain as good as America. The demand for the seed of American Pansy is greater from year to year—a pretty good proof that America is THE Pansy.

STATICE DUMOSA **THE FINEST STATICE FOR DRYING**

Of great value to the florist, in fact the most valuable of all Statice. In general appearance it resembles the well-known Incana Nana variety, which, when dried is being imported from Germany and here used in immense quantities in wreaths and other floral work. Dumosa differs from Incana Nana in having larger individual florets much brighter in color, clear silvery white when dry and lavender when fresh. The branched stalks are more than twice the size of Incana, the main stems twice as stout. For these reasons Dumosa is a highly valuable new variety. Height 20 in. Perfectly hardy without protection anywhere.
